said before the Congress Working Committee have gone a step back I know that Rajaji will not agree with me He feels that I am totally wrong Pandit Jawaharlal may say that we have not gone back I have full and equal right to hold my opinion and I do feel that we have gone a step back But there is nothing wrong in it We have every right to do so I feel that we have gone a step back because we want to go a step further I do not make this statement with any mental reservations I want you to accept this resolution imperfect as it is I want you to do so because it reflects truly the Congress mind It reflects exactly all the shades of opinion in the Congress. The position of the Congress is very great. The world is watching us We may not realise it ourselves It is true in India there are other parties also and the Congress may be taken as one of the many parties Nevertheless the fact remains that the eyes of the world are watching us There are some here and abroad who might be afraid that I was wanting to turn the Congress into a religious body It is totally a wrong assumption and wrong fear You have not been wasting your time for the last 20 years Friends were evidently pleased because of this resolution I do not want you to displease them and I do not want the Congress to be ridiculed

The idea that there has been a split or quarrel in the Working Committee is absolutely wrong The difference between me and Jawaharlal Nehru is a non-secret but this difference cannot separate us The same is true about Sardar Patel Rajaji and others Pandit Jawaharlal Nehru is my legal heir I am sure when I pass he will take up all the work I do He is a brave and courageous man Often he quarrels with me but when I am no more he will know how to carry on the work Rajaji is my relative You all know my relations with him

This resolution is a mirror of the Congress Herein is reflected the many views which Congressmen hold despite the fact that I have been relieved of the burden of leading the civil disobedience movement For those like Rajen Babu also there is room in the resolution It is true they are worried because of the possibility of compromising non violence But they need not be worried Ultimately it is non violence that should pervade Russia China and all countries fighting should ultimately come to non violence or they will become aggressors.

Proceedings he assured the Congress that he would never do it any harm and during half a century of his public life he had done no harm to the Congress There is no question of your losing me You can lose me only when I cease to exist or I talk of impracticable things Even when I went out of the Congress It was only to serve the Congress better I have been true to my word. The recent relief that you have given me is also for the same purpose I have been telling those friends who wanted to go out of the Congress not to do so but I may tell you that even if some people did leave the Congress that will not be the end of the Congress There is no man however great he may be who is indispensable for the Congress Great leaders like Dadabhai Naoroji Lokamanya Tilak or Pherozshah Mehta are *no more with us With their passing* away the Congress had not ceased to exist We have done our bit to carry the Congress further and raise its stature If you bring another resolution to retain my leadership you will be doing a foolish thing My advice to you is to accept this resolution

There is one thing on which all agree that so far whatever has been achieved it has been due to non violence I see no reason why there should be a split on it now Members are aware of the instructions issued by the Working Committee There is the fullest scope for believers in out-and out non violence or otherwise for the work It should not be forgotten that there are millions in this country who are not members of the Congress but who all the same form the real strength of the Congress You represent those Congressmen whose names are registered as Congressmen I am one of the millions who are unregistered Congressmen Finally there are some who say that there is no operative clause in the resolution There need not be an operative clause because it is only an explanatory resolution

Replying to the question on the future of Satyagraha Mr Gandhi said So far as civil disobedience is concerned the Congress commands Gandhi to do what he likes and to conduct it in a manner which he likes That is the position In Bardoli I had the intention that the House should be divided because if the House was predominantly non violent then this resolution should be thrown out But that was a hasty opinion of mine The Bardoli resolution he added sought to keep civil disobedience under his absolute control and it was a wise decision So long as I am alive and my mind is not paralysed it is better they leave civil disobedience to the expert After all they would not be able to handle civil disobedience as effectively as I can If I find civil disobedience has got to be embarked upon I shall select from the many applications which I am daily receiving At present I do not know what to do When and if I find that I should have civil disobedience I will do it but if my arms are cut off I can do nothing I want to render service to Englishmen I want to render service to Japan Russia and China Such is the big conception of non violence not merely out-and out non violence but this political non violence

Right Wing Drive.—Long before the meeting of the All India Congress Committee and even of the Working Committee right wing leaders of the Congress leaders who had come out of jail began to show signs of restiveness at the barren policy of Mr Gandhi Mr C Rajagopalachari ex Premier of Madras was the spearhead of this drive for a reorientation of Congress policy It proceeded on certain radical assumptions Negatively put it did not rule out Congress help in the defence of India nay it approached the question with a whole-hearted willingness to co operate in the war effort This group of leaders were *not obsessed* by doctrinaire notions of non violence and they were determined to tackle current problems both internal and international in a realistic manner On the moral plane they were prepared to make inevitable temporary compromises with violence in order ultimately to serve the interests of non violence and establish a world peace order From a political point of view they were convinced that India and the Congress should not stand aloof from

measures calculated to win the war or to put it at its lowest to save India from threats of aggression which were daily growing If only as a matter of expediency they were prepared to settle with the British Government on the basis of co operation in the war effort If the object of a political game were to secure political power it was argued, then it must be apparent to any one that the only means of securing political power for Indians from the British was by negotiation and agreement an armed clash being ruled out both on grounds of non violence and as being impracticable When Great Britain was engaged in a life and death struggle no move for a settlement it was felt was possible except on the basis of full co-operation in the war effort Such co-operation even if it was undertaken as an unavoidable compromise with violence would, it was felt lift the Congress to a high plane and facilitate a settlement on most of the difficult issues which challenged Indian leadership The Indian political situation was analysed as being nearly impossible defying solution Statesmanship demanded that a way must be found out of the surrounding gloom The alternative to consultation and settlement was to continue in a helpless and uncertain state and to pursue a policy of waiting on events Those who thought on these lines also seemed to fear that failure to take early steps towards an agreed settlement might have serious consequences both then and *at the end of the war* It was feared that it might leave the country in a hopeless condition stopped from claiming a share in the benefits of a post war world by refusal to contribute to it too disorganised to put up a solid front against anything too weak even to pick up the threads of *political agitation where it was snapped in 1939* In addition to the consideration that reasonableness of political power would enable India to occupy a position of vantage in political and constitutional bargaining with Britain when the time came it was felt by this school of thought *that actual exercise of political power would lift* the communal question to a practical level and make fruitful discussions capable of yielding results more quickly than theoretical talk and long range sniping

Mr Rajagopalachari actually spoke on one occasion of a parting of the ways between Mr Gandhi and himself on the issue of applying non violence to immediate affairs of administration and the conduct of the war Although Mr Rajagopalachari was one of the few who spoke out their minds it was apparent that a very large number of Congressmen shared his views

War Developments.—If Japan's entry into the war brought the war nearer to India and engendered a more realistic approach on the part of Indian leaders to the defence of their country and to political affairs the early gains of Japan in Malaya the Netherlands East Indies and Burma impelled the British authorities to consider whether the time had not arrived for settling the political problems in India if only to promote unity of purpose and co-ordinated endeavour in this country in order effectively to meet Japanese invasion of India It is also widely believed in India that Russia, China and the United States of America brought their influence to bear upon the British authorities in this behalf

Chiang's Appeal.—Colour was lent to this belief by the visit to India early in 1942 of Marshal and Madame Chiang Kai-shek and the issue of a public appeal by the Chinese leader both to Britain and to India The Generalissimo said

> Since my arrival in this country I have found to my great satisfaction that there exists among the people of India unanimous determination to oppose aggression.
>
> China and India comprise one half of the world's population Their common frontier extends to three thousand kilometres In the two thousand years history of their intercourse which has been of a purely cultural and commercial character there has never been an armed conflict Indeed nowhere else can one find so long a period of uninterrupted peace between two neighbouring countries This is irrefutable proof that our two peoples are peace loving by nature To-day they have not only identical interests but also the same destiny For this reason they are in duty bound to side with the anti aggression countries and fight shoulder to shoulder in order to secure real peace for the whole world
>
> I venture to suggest to my brethren the people of India that at this most critical moment in the history of civilization our two peoples should exert themselves to the utmost in the cause of freedom for all mankind for only in a free world could the Chinese and Indian peoples obtain their freedom Furthermore should freedom be denied to either China or India there could be no real peace in the world
>
> I sincerely hope and I confidently believe that *our ally Great Britain without waiting for any* demands on the part of the people of India will as speedily as possible give them real political power so that they may be in a position further to develop their spiritual and material strength and thus realize that their participation in the war is not merely an aid to the anti-aggression nations for securing victory but also a turning point in their struggle for India's freedom From an objective point of view I am of the opinion that this would be the wisest policy which will rebound to the credit of the British Empire.

Cripps' Visit.—Within three weeks of this appeal a change was announced by Great Britain of her policy towards India The Prime Minister made a statement in Parliament announcing that Sir Stafford Cripps the Socialist leader who had recently returned to England from his diplomatic successes at Moscow and had been made the Lord Privy Seal in a reconstituted War Cabinet would go to India immediately on a special mission Mr Churchill said

> *The crisis in the affairs of India arising out* of the Japanese advance has made Britain wish to rally all the forces of India life to guard their land from the menace of the invader In August 1940 a statement was made about the aims and policy which we are pursuing in India. This amounted in short to a promise that as soon as possible after the war India should attain Dominion status in full freedom and equality with this country and other Dominions under a constitution to be framed by Indians by agreement amongst themselves and acceptable to the main elements in the Indian national life

This was of course subject to the fulfilment of our obligations for the protection of minorities including the depressed classes and our treaty obligations to the Indian States and to a settlement of certain lesser matters arising out of our long association with the fortunes of Indian *sub-continent*

However in order to clothe these general declarations with precision and to convince all classes races and creeds in India of our sincere resolve the War Cabinet have agreed unitedly upon *conclusions for the present and future action* which if accepted by India as a whole would avoid alternative dangers either that the resistance of a powerful minority might impose an indefinite veto upon the wishes of the majority or that a majority decision might be taken which would be resisted to a point destructive of internal harmony and fatal to the setting up of a new *constitution*

We had thought of setting forth immediately the terms of this attempt by a constructive contribution to aid India in the realisation of full self Government We are however apprehensive that to make a *public announcement* at such a moment as this might do more harm than good We must first assure ourselves that our scheme would win a reasonable and practical measure of acceptance and thus promote concentration of all thoughts and energies upon the defence of the native soil

We should ill serve the common cause if we made a declaration which would be rejected by the essential elements in the Indian world and which would provoke fierce constitutional and communal disputes at a moment when the enemy is at the gate of India

Accordingly we propose to send a member of the War Cabinet to India to satisfy himself on the spot by personal consultation that the conclusions upon which we are agreed and which we believe represent a just and final solution will *achieve their purpose*

The Lord Privy Seal and the Leader of the House Sir Stafford Cripps has volunteered to undertake this task He carries with him the full confidence of His Majesty s Government and he *will strive in their name to procure* the necessary measure of assent not only from the Hindu majority but also from those great minorities amongst which the Moslems are most numerous and on many grounds prominent

The Lord Privy Seal will at the *same time* consult with the Viceroy and the Commander in Chief on the military situation bearing always in mind the paramount responsibility of His Majesty s Government by every means in their power to shield the people of India from the perils which now beset them We must remember that India has a great part to play in the *world struggle for freedom and that her helping* hand must be extended in loyal comradeship to the valiant Chinese people who have fought alone so long We must remember also that India is one of the bases from which the strongest counter blows must be struck at the advance of tyranny and aggression

War Cabinet's Offer—Sir Stafford Cripps flew to India in a few days and held consultations with representatives of the Congress the Muslim League the Hindu Mahasabha the Princes Chamber and a number of other political and sectional organisations Here is the text of the offer which he brought to India in the name of the British Cabinet

His Majesty s Government having considered the anxieties expressed in this country and in India as to the fulfilment of promises made in regard to the future of India have decided to lay down in precise and clear terms the steps which they propose shall be taken for the earliest possible realisation of self government in India The object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by a common allegiance to the Crown but equal to them in every respect in no way subordinate in any aspect of its domestic or external affairs

His Majesty s Government therefore make the following Declaration —

(*a*) Immediately upon cessation of hostilities steps shall be taken to set up in India in manner described hereafter an elected body charged with the task of framing a new Constitution for India

(*b*) Provision shall be made as set out below for participation of Indian States in the Constitution making body

(*c*) His Majesty s Government undertake to accept and implement forthwith the Constitution so framed subject only to —

(*i*) The right of any Province of British India that is not prepared to accept the new Constitution to retain its present constitutional position provision being made for its subsequent accession if it so decides

With such non acceding Provinces should they so desire His Majesty s Government will be prepared to agree upon a new Constitution giving them the same full status as the Indian Union and arrived at by a procedure analogous *to that here laid down*

(*ii*) The signing of a Treaty which shall be negotiated between His Majesty s Government and the Constitution making body This Treaty will cover all necessary matter arising out of the complete transfer of responsibility from British to Indian hands it will make provision in accordance with undertakings given by His Majesty s Government for the protection of racial and *religious minorities* but will not impose any restriction on the power of the Indian Union to decide in future its relationship to other Member States of the British Commonwealth

Whether or not an Indian State elects to adhere to the Constitution it will be necessary to negotiate a revision of its Treaty arrangements so far as this may be required in the new situation

(*d*) The Constitution making body shall be composed as follows unless the leaders of Indian opinion in the principal communities agree upon some other form before the end of hostilities —

Immediately upon the result being known of Provincial Elections which will be necessary at the end of hostilities the entire membership of the Lower Houses of Provincial Legislatures shall as a single electoral college proceed to the election of the Constitution making body by the system of proportional representation This new body shall be in number about 1/10th of the number of the electoral college

Indian States shall be invited to appoint representatives in the same proportion to their total population as in the case of representatives of British India as a whole and with the same powers as British Indian members

(c) During the critical period which now faces India and until the new Constitution can be framed His Majesty's Government must inevitably bear the responsibility for and retain the control and direction of the defence of India as part of their world war effort but the task of organising to the full the military moral and material resources of India must be the responsibility of the Government of India with the cooperation of the peoples of India His Majesty's Government desire and invite the immediate and effective participation of the leaders of the principal sections of the Indian people in the counsels of their country of the Commonwealth and of the united nations Thus they will be enabled to give their active and constructive help in the discharge of a task which is vital and essential for the future freedom of India

In announcing the scheme Sir Stafford made it clear that it was only a proposal submitted to the leaders of Indian opinion by the War Cabinet and that its publication was not the publication of a declaration by His Majesty's Government but only a declaration which they would be prepared to make if it met with sufficiently general and favourable acceptance from the various sections of Indian people

Immediate Reactions.—Mr Gandhi described the offer as a post dated cheque the Hindu Mahasabha condemned it as contemplating the balkanisation of India the Liberal leaders protested against the proposed splitting up of the country as a travesty of self-determination Congress leaders however were of the opinion that the provision regarding the right of provinces to secede but laid more emphasis on the provision for the immediate transfer of power in Indian hands Pandit Nehru said for example This emotional conception of the unity of India is something which I am not going to give up it is something for which I am going to fight if it is necessary to fight for it I am going to fight if the new idea means disruption of India I do not know what the future will bring but in the present I will not so far as I can permit or encourage a wrong conception in the people's mind This country with its mountain fastnesses and southern seas is one country It is going to be one in freedom as it has been one in subjection and the Indian States people must play a big part in that united India

Congress Reaction.—After protracted negotiations in which representatives of the principal Indian organisations met in addition to Sir Stafford the Commander in Chief and Col Louis Johnson the personal representative in India of President Roosevelt the Congress rejected the scheme The Hindu Mahasabha had already rejected it (see chapter on Hindu Mahasabha) and the Muslim League followed suit (see chapter on Muslim League) while other organisations expressed disapproval in more or less strong language (see chapter on the Indian National Liberal Federation)

The Congress Working Committee which held what was perhaps the longest session in its history passed the following resolution

The Working Committee have given their full and earnest consideration to the proposals made by the British War Cabinet in regard to India and the elucidation thereof by Sir Stafford Cripps

These proposals which have been made at the very last hour because of the compulsion of events have to be considered not only in relation to *India's demand for Independence* but more especially in the present grave war crisis with a view to meeting effectively the perils and dangers that confront India and envelop the world

The Congress has repeatedly stated ever since the commencement of the war in September 1939 that the people of India would line themselves with the progressive forces of the world and assume full responsibility to face the new problems and shoulder the new burdens that had arisen and it asked for the necessary conditions to enable them to do so to be created

An essential condition was the freedom of India for only the realisation of present freedom could light the flame which would illumine millions of hearts and move them to action

At the last meeting of the All India Congress Committee After the commencement of the war in the Pacific it was stated that Only a free and independent India can be in a position to undertake the defence of the country on a national basis and be of help in the furtherance of the larger causes that are emerging from the storm of war

The British War Cabinet's new proposals relate principally to the future upon the cessation of hostilities

The Committee while recognising that self determination for the people of India is accepted in principle in that uncertain future regret that this is fettered and circumscribed and certain provisions have been introduced which gravely imperil the development of a free and united nation and the establishment of a democratic state

Even the constitution making body is so constituted that the people's right to self-determination is vitiated by the introduction of non representative elements

The people of India have as a whole clearly demanded full independence and the Congress has repeatedly declared that no other status except that of independence for the whole of India could be agreed to or could meet the essential requirements of the present situation.

The Committee recognise that future independence may be implicit in the proposals but the accompanying provisions and restrictions are such that real freedom may well become an illusion

The complete ignoring of the ninety millions of the people of the Indian States and their treatment as commodities at the disposal of their rulers is a negation of both democracy and self determination.

While the representation of an Indian State in the constitution making body is fixed on a population basis the people of the States have no voice in choosing those representatives, nor are they to be consulted at any stage while decisions vitally affecting them are being taken.

Such States may in many ways become barriers to the growth of Indian freedom enclaves where foreign authority still prevails and where the possibility of maintaining foreign armed forces has been stated to be a likely contingency and a perpetual menace to the freedom of the people of the States as well of the rest of India

The acceptance beforehand of the novel principle of non accession for a province is also a severe blow to the conception of Indian unity and an apple of discord likely to generate growing trouble in the provinces and which may well lead to further difficulties in the way of the Indian States merging themselves in the Indian Union

The Congress has been wedded to Indian freedom and unity and any break in that unity especially in the modern world when people's minds inevitably think in terms of ever larger federations would be injurious to all concerned and exceedingly painful to contemplate

Nevertheless the Committee cannot think in terms of compelling the people in any territorial unit to remain in an Indian Union against their declared and established will

While recognising this principle the Committee feel that every effort should be made to create conditions which would help the different units in developing a common and co operative national life

The acceptance of the principle inevitably involves that no changes should be made which result in fresh problems being created and compulsion being exercised on other substantial groups within that area

Each territorial unit should have the fullest possible autonomy within the Union consistently with a strong national state

The proposal now made on the part of the British War Cabinet encourages and will lead to attempts at separation at the very inception of a union and thus create friction just when the utmost co operation and goodwill are most needed

This proposal has been presumably made to meet a communal demand but it will have other consequences also and lead politically reactionary and obscurantist groups among different communities to create trouble and divert public attention from the vital issues before the country

Any proposal concerning the future of India must demand attention and scrutiny but in today's grave crisis it is the present that counts and even proposals for the future are important in so far as they affect the present

The Committee have necessarily attached the greatest importance to this aspect of the question and on this ultimately depends what advice they should give to those who look to them for guidance

For this present the British War Cabinet's proposals are vague and altogether incomplete and it would appear that no vital changes in the present structure are contemplated.

It has been made clear that the defence of India will in any event remain under British control

At any time defence is a vital subject during war time it is all important and covers almost every sphere of life and administration. To take away defence from the sphere of responsibility at this stage is to reduce that responsibility to a farce and a nullity and to make it perfectly clear that India is not going to be free in any way and her Government is not going to function as a free and independent Government during the pendency of the war

The Committee would repeat that an essential and fundamental prerequisite for the assumption of responsibility by the Indian people in the present is their realisation as a fact that they are free and are in charge of maintaining and defending their freedom

What is most wanted is the enthusiastic response of the people which cannot be evoked without the fullest trust in them and the devolution of responsibility on them in the matter of defence

It is only thus that even at this grave eleventh hour it may be possible to galvanise the people of India to rise to the height of the occasion

"It is manifest that the present Government of India as well as its provincial agencies are lacking in competence and are incapable of shouldering the burden of India's defence It is only the people of India through their popular representatives who may shoulder this burden worthily But that can only be done by present freedom and full responsibility being cast upon them

The Committee therefore is unable to accept the proposals put forward on behalf of the British War Cabinet

Causes of Failure —The following extracts from correspondence between Sir Stafford and the Congress President Maulana Abul Kalam Azad throw light on the causes of the failure of the negotiations —

Sir Stafford wrote — My Dear Maulana Sahib —I have as I promised when I last saw you consulted His Majesty's Government as to what further step could be taken in order to meet the criticism of your Working Committee that under Clause (e) of the Draft Declaration the Defence of India would not fall to be administered by a representative Indian Although it is impossible to make any change in the existing constitution during the period of hostilities His Majesty's Government are anxious to give representative Indians the maximum possible participation in the Government during that period in accordance with the principle laid down in Clause (e) of the Draft Declaration

His Majesty's Government are anxious to do their utmost to meet the wishes of the Indian people and to demonstrate their complete trust in the co-operative effort of the two peoples, British and Indian which they hope may reinforce the defence of India I am therefore authorised to propose to you as a way out of the present difficulties that

(a) The Commander in Chief should retain a seat in the Viceroy's Executive Council as War Member and should retain his full control over all the war activities of the armed forces in India,

subject to the control of His Majesty's Govern ment and the War Cabinet upon which body a *representative* Indian should sit with equal powers in all matters relating to the Defence of India Membership of the Pacific Council would *likewise be offered to a representative* Indian.

(b) An Indian *representative* member would be added to the Viceroy's Executive who would take over these sections of the Department of *Defence which can organisationally be separated* immediately from the Commander in Chief's War Department In addition, this member would take over the *defence co-ordination department* which is at present directly under the Viceroy and certain other important functions of the Government of India which are directly related to Defence and which do not fall under any of the other existing departments

His Majesty's Government very much hope —as I personally hope that this arrangement will enable the Congress to come into the scheme so that if other important bodies of Indian opinion are also willing it will be possible for His Excellency the Viceroy to embark forthwith upon the task of forming the new National Govern ment in consultation with the leaders of the Indian opinion

To this the Congress President replied

Dear Sir Stafford —In the Congress resolu tion we expressed our dissent from several im portant and far *reaching proposals for the future* further consideration of these proposals has only strengthened us in our conviction in regard to *them* and we *should like* to repeat that we can not accept them as suggested The over riding problem before all of us and more specially before all Indians is the Defence of the country from aggression and invasion the future important as it is will depend on what happens in the next few months and years We were therefore prepared to do without any assurances for this immediate future hoping that through our sacri fices in the defence of our country we would lay the solid and enduring foundations for a free and independent India We concentrated therefore on the present

Your original proposals in regard to the present as contained in Clause *(c)* of the proposed Declaration were vague and incomplete except in so far as it was made clear that His Majesty's Government must inevitably bear the full respon sibility for the Defence of India These proposals in effect asked for participation in the tasks of to-day with a view to ensure the future freedom of India Freedom was for an uncertain future not for the present and no indication was given in Clause (c) of what arrangements or governmen tal and other changes would be made in the present When this vagueness was pointed out you said that this was deliberate so as to give you freedom to determine these changes in con sultation with others. In our talks you gave us to understand that you envisaged a National Government which would deal with all matters except Defence

Defence at any time and more particularly in war-time is of essential importance and without it, a National Government functions in a very limited field. Apart from this consi deration it was obvious that the whole purpose of your proposals and our talks centred on the urgency of the problems created by the threat of the invasion of India The chief functions of a National Government must necessarily be to organise Defence both intensively and on the widest popular basis and to create a mass psychology of resistance to an invader Only a National Government could do that, and only a Government on whom this responsibility was laid Popular resistance must have a National background and both the soldier and the civilian must feel that they are fighting for their country's freedom under National leadership

We pointed this out to you The question became one not of just satisfying our National aspirations but of effective prosecution of the war and fighting to the last any invader who set foot on the soil of India On general principles a National Government would control through a Defence Minister and the Commander in Chief would control the armed forces and would have full latitude in the carrying out of operations connected with the war An Indian National Government should have normally functioned in this way We made it clear that the Com mander in Chief in India would have control of the armed forces and the conduct of operations and other matters connected therewith

With a view to arriving at a settlement we were prepared to accept certain limitations on the *normal* powers of the *Defence Minister* We had no desire to upset in the middle of the war the present military organization or *arrangements* We accepted also that the higher strategy of the war should be controlled by the War Cabinet in London which would have an Indian member The immediate object before us was to make the Defence of India more effective to strengthen it to broadbase it on the popular will and to reduce all red tape delay and inefficiency from it There was no question of our interfering with the technical and operational sides One thing of course was of paramount importance to us India's safety and defence Subject to this primary considera tion there was no reason why there should be any difficulty in finding a way out of the present impasse in accordance with the unanimous desire of the Indian people for in this matter there are no differences amongst us

'We do not think that there is any inherent difficulty in the way of constitutional changes during the war Everything that helps in the war not only can be but must be done and done with speed That is the only way to carry on to win a war No complicated enactments are necessary A recognition of India's freedom and right to self-determination could easily be made if it was so wished together with certain other consequential but important changes. The rest can be left to future arrangements and *adjustments* I *might* remind you that the British Prime Minister actually proposed a union of France and England on the eve of the fall of France No greater or more fundamental change could be imagined, and this was suggested at a period of grave crisis and peril War accelerates change It does not fit in with static conceptions

In the course of our talks many matters were cleared up unfortunately to our disadvantage You had referred both privately and in the course of public statements to a National Government and a Cabinet consisting of Ministers These words have a certain significance and we had imagined that the new Government would function with full powers as a Cabinet with the Viceroy acting as a constitutional head But the new picture that you placed before us was really not very different from the old the difference being one of degree and not of kind The new Government could neither be called except vaguely and inaccurately nor could it function as a National Government It would just be the Viceroy and his Executive Council with the Viceroy having all his old powers

We did not ask for any legal changes but we did ask for definite assurances and conventions which would indicate that the new Government would function as a Free Government the members of which act as members of the Cabinet in a constitutional Government In regard to the conduct of the war and connected activities the Commander in Chief would have freedom and he would also act as War Minister

We were informed that nothing can be said at this stage, even vaguely and generally about the conventions that should govern the new Government and the Viceroy This was a matter in the Viceroy's sole discretion and at a later stage it could be discussed directly with the Viceroy Ultimately there was always the possibility of the members of the Executive Council resigning or threatening to resign if they disagreed with the Viceroy That sanction or remedy is of course always open but it is curious that we should base our approach to a new Government on the probability of conflict and resignation at the very outset

The picture therefore placed before us is not essentially different from the old one The whole object which we and I believe you have in view—that is to create a new psychological approach to the people to make them feel that their own National Government had come that they were defending their newly won freedom—would be completely frustrated when they saw this old picture again with even the old labels on

The continuation of the India Office which has been a symbol of evil to us would confirm this picture It has almost been taken for granted for some time past that the India Office would soon disappear as it was an anachronism But now we are told that even this undesirable relic of a past age is going to continue

The picture of the Government which was so like the old in all essential features is such that we cannot fit into it Normally we would have had little difficulty in disposing of this matter for it is so far removed from all that we have striven for but in the circumstances of to-day we were prepared to give full consideration to every proposal which might lead to an effective organisation of the Defence of India The peril that faces India affects us more than it can possibly affect any foreigner and we are anxious and eager to do our utmost to face it and overcome it But we cannot undertake responsibilities when we are not given the freedom and power to shoulder them effectively and when an old environment continues which hampers the national effort

While we cannot accept the proposals you have made we want to inform you that we are yet prepared to assume responsibility provided a truly National Government is formed We are prepared to put aside for the present all questions about the future though as we have indicated we hold definite views about it But in the present the National Government must be Cabinet Government with full power and must not merely be a continuation of the Viceroy's Executive Council In regard to defence we have already stated what in our opinion the position should be at present We feel that such an arrangement is the very minimum that is essential for the functioning of a National Government and for making the popular appeal which is urgently needed

We would point out to you that the suggestions we have put forward are not ours only but may be considered to be the unanimous demand of the Indian people On these matters there is no difference of opinion among various groups and parties and the difference is as between the Indian people as a whole and the British Government Such differences as exist in India relate to constitutional changes in the future We are agreeable to the postponement of this issue so that the largest possible measure of unity might be achieved in the present crisis for the defence of India It would be a tragedy that even when there is this unanimity of opinion in India the British Government should prevent a free National Government from functioning and from serving the cause of India as well as the larger causes for which millions are suffering and dying to-day

Congress Blamed.—The last letter of the series was from Sir Stafford Cripps It ran My dear Maulana Sahib—I was extremely sorry to receive from you your letter expressing the rejection by Congress Working Committee of His Majesty's Government's draft declaration I need not go into the question of the division of duties between the Defence Minister and the Commander in Chief as War Member with which you deal at length This division allotted to the Defence Minister all functions outside those actually connected with the General Headquarters Navy Headquarters and Air Headquarters which are under the Commander in Chief as head of the fighting forces in India

Nothing further could have been done by way of giving responsibility for Defence Services to representative Indian members without jeopardising the immediate defence of India under the Commander in Chief This defence is as you know a paramount duty and responsibility of His Majesty's Government while unity of command is essential in the interests of the allied help to India

The real substance of your refusal to take part in a National Government is that the form of Government suggested is not such as would enable you to rally the Indian people as you desire

You make two suggestions First that the constitution might now be changed In this respect I would point out that you made this suggestion for the first time last night nearly three weeks after you had received the proposals and I would further remark that every other

representative with whom I have discussed this view has accepted the practical impossibility of any such legislative change in the middle of a war and at such a moment as the present

Second you suggest a truly National Government be formed which must be a Cabinet Government with full power

Without constitutional changes of a most complicated character and on a very large scale this would not be possible as you realise Where such a system to be introduced by convention under the existing circumstances the nominated cabinet (nominated presumably by the major political organisations) would be responsible to no one but itself could not be *removed* and would in *fact constitute an absolute* dictatorship of the majority This suggestion would be rejected by all minorities in India since it would subject all of them to a permanent and autocratic majority in the cabinet Nor would it be consistent with the pledges already given by His Majesty's Government to protect the rights of these minorities

In a country such as India where communal divisions are still so deep an irresponsible majority Government of this kind is not possible Apart from this however until such time as the Indian peoples frame their new constitution His Majesty's Government must continue to carry out its duties to those large sections of the Indian people to whom it has given its pledges The proposals of His Majesty's Government went as far as possible short of a complete change in the constitution which is generally acknowledged as impracticable in the circumstances of to-day

While therefore both I and His Majesty's Government recognise the keen desire of your Working Committee to carry on the war against the enemy by every means in their power I regret that your Working Committee has not seen its way to join in the war effort upon the *conditions sincerely offered the only conditions* which could have brought together all the different communities and sections of the Indian people

Rejoinder—We are convinced that if the British Government did not pursue a policy of encouraging disruption all of us to whatever party or group we belonged would be able to come together and find a common line of action declares Maulana Azad in his rejoinder to Sir Stafford Cripps

My colleagues and I were considerably surprised to read it

Your statement that we have for the first time after three weeks suggested a change in the constitution is hardly correct In the course of our talks reference was made to it but it is true that we did not lay stress on it as we did not want to introduce new issues But when you stated explicitly in your letter that we had agreed that no constitutional changes could be made during the war we had to deny this and correct your impression

There has been a progressive deterioration in the British Government's attitude as our negotiations proceeded What we were told in our very first talk with you is now denied or explained away You told me then that there would be a National Government which would function as a cabinet and that the position of the Viceroy would be analogous to that of the King in England *vis a-vis* his cabinet In regard to the India Office you told me that you were surprised that no one had so far mentioned this important matter and that the practical course was to have this attached or incorporated with the Dominions Office The whole of this picture which you sketched before us has now been completely shattered by what you told us during our last interview

You have put forward an argument in your letter which at no time during our talks was mentioned by you You refer to the absolute dictatorship of the majority It is astonishing that such a statement should be made in this connection and at this stage This difficulty is inherent in any scheme of a mixed cabinet formed to meet an emergency but there are many ways in which it can be provided for Had you raised this question we would have discussed it and found a satisfactory solution The whole approach to this question has been that a mixed cabinet should be formed and should co-operate together

We accepted this We are not interested in the Congress as such gaining power but we are interested in the Indian people as a whole having freedom and power How the Cabinet should be formed and should function was a question which might have been considered after the main question was decided That is the extent of power which the British Government would give up to the Indian people Because of this we never discussed it with you or even referred to it Nevertheless you have raised this matter for the first time in what is presumably your last letter to us and tried most unjustifiably to sidetrack the real issue between us

You will remember that in my very first talk with you I pointed out that the communal or like questions did not arise at this stage As soon as the British Government made up its mind to transfer real power and responsibility the other questions could be tackled successfully by those concerned You gave me the impression that you agreed with this approach

We are convinced that if the British Government did not pursue a policy of encouraging disruption all of us to whatever party or group we belonged would be able to come together and find a common line of action But unhappily even in this grave hour of peril the British Government is unable to give up its wrecking policy We are driven to the conclusion that it attaches more importance to holding on to its rule in India as long as it can and promoting discord and disruption here with that end in view than to an effective defence of India against the aggression and invasion that overhangs us To us and to all Indians the dominant consideration is the defence and safety of India and it is by that test that we judge

Leaders Assurances.—Sir Stafford Cripps then announced that the draft declaration of the British Government had been withdrawn and that the position reverted to what it was before he came out to India though not quite perhaps to that position.

In spite of the failure of the effort of Sir Stafford Cripps and the bitter tone of the final remarks in the controversy responsible Indian leaders reiterated their determination to defend the country against aggression Pandit Nehru said We are not going to embarrass the British war effort in India or the effort of our American friends who may come here We want production to go on full speed ahead We want the people to hold to their jobs and not run away from them We cannot participate in Britain's war effort The problem before us is how while not participating in that war effort and not embarrassing it how to organise our own war effort on our own basis of a free and independent India I cannot tolerate the idea that I should sit idle or the people should sit idle in their houses while the Battle for India is being fought between foreign armies and while the Japanese are invading the country Much less do I want the Indian people to give in or be passive to the Japanese I want them to resist it to the uttermost My general advice is Do not submit or surrender do not give supplies non co operate with the aggressor embarrass him in every way—fighting will be done by the armed forces The fundamental factor today is distrust or dislike of the British Government It is not a pro Japanese sentiment It is anti British sentiment That may occasionally lead individuals to give a pro-Japanese expression of views This is short sighted It is a slave sentiment a slave way of thinking to imagine that to get rid of one person who is dominating us we can expect another person to help us and not dominate us later Freedom ought not to think that way It distresses me that any Indian should talk of the Japanese liberating India The whole past history of Japan has been one of dominating others Japan comes here either for imperialist reasons straight out or to fight with the British Government Anyhow whatever the reason it does not come here to liberate

Madras Surprise.—Just at this time on the eve of the meeting of the All India Congress Committee called at Allahabad at the end of April 1942 the Madras Congress Legislature Party under the guidance of Mr Rajagopalachari passed a resolution recommending to the A I C C to acknowledge the Muslim League's claim for separation should the same be persisted in when the time comes for framing the future constitution of India and to invite the Muslim League for consultation for the purpose of arriving at an agreement and securing the installation of a National Government to meet the present emergency

The meeting also passed a resolution voicing the general feeling in this part of the country that there should be at this critical juncture a popular Government in this province doing its utmost to secure the requisite conditions for the people to play their part The party is of the opinion further that to facilitate united and effective action in this regard by such a popular Government the Muslim League should be invited to participate in it

The party requested the A I C C to permit the party to take steps to this end notwithstanding the general all India policy followed by the Congress

These resolutions met with a storm of protest from Congress leaders outside Madras, but were welcomed by some moderate leaders and by Muslim League circles.

A I C C Session—The A I C C met towards the end of April 1942 and passed the following resolution on India and the war —

In view of the imminent peril of invasion that confronts India and the attitude of the British Government as shown again in the recent proposals sponsored by Sir Stafford Cripps the All India Congress Committee has to declare afresh India's policy and to advise the people in regard to the action to be undertaken in the emergencies that may arise in the immediate future

The proposals of the British Government and their subsequent elucidation by Sir Stafford Cripps have led to greater bitterness and distrust of that Government and the spirit of non co-operation with Britain has grown They have demonstrated that even in this hour of danger not only to India but to the cause of the United Nations the British Government functions as an imperialist Government and refuses to recognise the independence of India or to part with any real power

India's participation in the war was a purely British act imposed upon the Indian people without the consent of their representatives While India has no quarrel with the people of any country she has repeatedly declared her antipathy to Nazism and Fascism as also to Imperialism If India were free she would have determined her own policy and might have kept out of the war though her sympathies would in any event have been with the victims of aggression If however circumstances had led her to join the war she would have done so as a free country fighting for freedom and her defence would have been organised on a popular basis with a national army under national control and leadership and with intimate contacts with the people A free India would know how to defend herself in the event of any aggressor attacking her The present Indian Army is in fact an offshoot of the British Army and has been maintained till now mainly to hold India in subjection It has been completely segregated from the general population who can in no sense regard it as their own

The essential difference between the imperialist and the popular conceptions of defence is demonstrated by the fact that while foreign armies are invited to India for that defence the vast man power of India herself is not utilised for the purpose India's past experience teaches her that it is harmful to her interest and dangerous to her cause of freedom to introduce foreign armies in India. It is significant and extraordinary that India's inexhaustible man power should remain untapped, while India develops into a battle ground between foreign armies fighting on her soil or her frontiers and her defence is not supposed to be a subject fit for popular control India resents this treatment of her people as chattels to be disposed of by foreign authority

The A I C C is convinced that India will attain her freedom through her own strength and will retain it likewise The present crisis as well as the experience of the negotiations with Sir Stafford Cripps make it impossible for the Congress to consider any schemes or proposals which retain even in a partial measure British control and authority in India Not only the interests of India but also Britain's safety and world peace and freedom demand that Britain must abandon her hold on India It is on the basis of independence alone that India can deal with Britain or other nations

The Committee repudiates the idea that freedom can come to India through interference or invasion by any foreign nation whatever the professions of that nation may be In case an invasion takes place it must be resisted Such resistance can only take the form of non violent non co operation as the British Government has prevented the organisation of national defence by the people in any other way The Committee would therefore expect the people of India to offer complete non violent non co operation to the invading forces and not to render any assistance to them We may not bend the knee to the aggressor nor obey any of his orders We may not look to him for favours nor fall to his bribes If he wishes to take possession of our homes and our fields we will refuse to give them up even if we have to die in the effort to resist them. In places wherein the British and the invading forces are fighting our non co-operation will be fruitless and unnecessary Not to put any obstacle in the way of British forces will often be the only way of demonstrating our non co-operation with the invader Judging from their attitude the British Government do not need any help from us beyond our non interference

The success of such a policy of non co-operation and non violent resistence to the invader will largely depend on the intensive working out of the Congress constructive programme and more especially the programme of self-sufficiency and self protection in all parts of the country

The Madras resolution acknowledging the Muslim League's claim to separation was defeated by 120 votes against 15 while a counter resolution moved by Pandit Jagat Narain opposing any proposal to disintegrate India was carried by 92 votes to 17 The latter resolution ran

The A I C C is of opinion that any proposal to disintegrate India by giving liberty to any component State or territorial unit to secede from the Indian Union or Federation will be highly detrimental to the best interests of the people of the different States and Provinces and the country as a whole and the Congress therefore cannot agree to any such proposal

The Hindu Mahasabha.

The Hindu Mahasabha which in recent years has claimed a growing share of public attention in India is an organisation of comparatively recent origin. Its beginnings can be traced to the first years of the current century almost simultaneously with the awakening of Muslim consciousness in 1906

During the first twenty five years of its life the Hindu organisation had to struggle for its existence what with the proverbial indifference of the Hindu masses the inherent inability of majorities the world over to organise and the better response which the Congress with its wider nationalistic appeal evoked among the Hindus All this time however the causes which hampered the growth of the Hindu organisation were gradually if imperceptibly *neutralised*

For instance the Hindu community s indifference began to give place to communal consciousness as a result of a number of Hindu Muslim riots in which the majority community came out second best The waves of conversion from the Hindu fold partly due to the discontent of the outcastes and partly because of the proselytising nature of the Islamic and Christian religions opened the eyes of Hindu leaders to the growing decrease in the number of people owing allegiance to the Hindu faith

In addition to the reasons stated above the political gains secured by the Muslim community under the Minto-Morley and Montague Chelmsford Reforms Schemes taught the Hindu community to come together and set up an organisation which will voice its claims in future adjustments

Even the wider platform of national emancipation and Hindu Muslim unity from which the Congress appealed to the Hindu mind has latterly given signs of weakness because Hindu Muslim concord far from coming within reach threatens to go beyond grasp

It is however wrong to assume that the Hindu organisation is anywhere near as powerful as the Congress or even the Muslim League of the past two or three years The Hindu Mahasabha has undoubtedly consolidated its position in recent years most Hindus not excluding many Congressmen professing nationalistic ideals have a sneaking sympathy for the Mahasabha but when it comes to a question of elections to representative institutions the Mahasabha has failed to make an appeal to the Hindu electorate to the exclusion of the Congress

Just as the Muslim League in spite of its not very thumping success at the polls in 1937 has become a mighty organisation among the Muslims of India, similarly the Hindu Mahasabha has given proofs of considerable following among the Hindu and even of a certain amount of power—as evidenced by the importance bestowed on it by His Excellency the Viceroy In 1940 for the first time in its history the Mahasabha was recognised as an organisation influential enough in the country to be reckoned with for purposes of representation in the Central Government

Speaking for the present however it is difficult to say whether the status at present enjoyed by the Mahasabha will continue in the event of the Congress coming to a settlement with the British Government because the Congress has been in the field for a much longer period and has perfected its organisation in the country to an extent which the Mahasabha has yet to achieve.

Moreover, it was only recently that the Mahasabha struck out a path of its own to the point of hostility to the Congress having in the first twenty or twenty five years of its existence contented itself with occupying a status subordinate to that of the Congress and seeking only to emphasise the communal claims of the Hindu as distinct from their national claims

Those who first urged the community to organise were actuated by a fear lest the numerical strength of the community should be adversely affected by the proselytising activities of the champions of other faiths A Hindu leader for instance remarked Political power in democracies hinges more and more on the population strength of a community which in the case of the Hindus must depend in the main on the proportion in which the Hindus succeed in stopping the dreadful conversion activities of alien faiths and in accelerating the reclamation of the alienated numbers back to the Hindu fold In a country like India where a religious unit tends inevitably to grow into a cultural and national unit the *Suddhi* (reconversion to Hinduism) movement ceases to be merely theological or dogmatic but assumes the wider significance of a political and national movements If the Muslims increase in population the centre of political power is bound to be shifted in their favour

Another Hindu leader said A community which does not know itself does not feel its individual pulse does not pride in its past and believe in its future is to all intents and purposes a dead and self effaced community In order to exist at all and exist in the midst of a struggle where the universal law is encroachment and survival of the fittest the very first and most preliminary need is to realise individual existence

For these reasons the early years of the Hindu Mahasabha were more or less associated with the activities of the Arya-samaj an allied organisation which worked for the reclamation of Hindu converts to other faiths

Apart from the denominational aspect of its activities the Hindu Mahasabha has claimed that India belongs to the Hindus—the term Hindus being interpreted as meaning people belonging to the Hindu race irrespective of their denominational affiliations It has been argued that the minority problem of Europe is preeminently a racial one and not religious because there is only one religion Christianity which is common to all. The minority problem of India on the other hand is if anything pre-eminently religious and not racial at all.

The first beginnings —Following the partition of Bengal in 1905 the foundations of the Muslim League were laid in Dacca in the next year The first activities of the infant Muslim League gave rise to a fear in the minds of the Hindus of Bengal who in the following year held a provincial conference of the community The conference passed a resolution viewing with apprehension 'the decrease in the normal growth of the Bengal Hindu population and appointed a committee to inquire into its causes

Almost simultaneously there was founded in the Punjab a provincial Hindu Sabha with the object of watching and safeguarding the interests of the entire Hindu community in all respects Four years later at the time of the introduction of the Minto-Morley Reforms the Punjab Hindu Sabha sent a memorial drawing attention to the differential treatment in the *distribution of Government patronage* and the disadvantageous position in which the Hindus would be placed in the matter of representation under the proposed Reforms scheme The conference also contended that the principle which had been accepted in providing for the separate and special representation of one particular community puts educational qualifications at a discount and introduces a new factor of political importance which by giving rise to invidious and unjustifiable distinctions based purely on denominational considerations will tend to accentuate social feelings and militate against the good results that the people of Hindustan expect from the schemes of Reforms

Nor has any case been made out for any special concession to the Mahomedan community on the score of their alleged historical or political importance The Government of the country in almost every case was acquired by the British from the Hindus The vast majority of the Mahomedans in the country are descendants of Hindu converts Hindustani Mahomedans have never been rulers of the country Even at the present moment a great majority of the Native States of Hindustan are ruled by Hindu Chiefs and Princes

A number of meetings of the Punjab Provincial Sabha were held in Upper Indian towns in the succeeding years The foundations of the All India organisation were however laid at Allahabad in 1910 when it was decided to form an All India Hindu Mahasabha A few years later an organisation came into being under the title of Akhil Bharatiya Hindu Mahasabha The first few sessions of this body were held on the occasions of certain annual Hindu fairs but it did not take many years for the Hindu organisation to become a regular political institution

It suffered an eclipse in 1919 20 as a result of the Congress ascendancy to power under Mr Gandhi who conducted the non-co-operation and Khilafat movements. The first effects of the Khilafat movement on Hindu Muslim relationship was the Moplah disturbances in which the fanatical Moplahs perpetrated numerous atrocities on the Hindu inhabitants of Malabar This was followed in the next few months by riots in Multan Saharanpur and Kohat in all of which the Hindus were the sufferers. These gave rise to a feeling among the Hindus that they should organise themselves for self protection.

Dawn of Renaissance.—This period has been described by Hindu leaders as the dawn of Hindu renaissance It was at this time that the twin movements of *Suddhi* (reconversion into Hinduism) and *Sangathan* (Hindu unity drive) were born An outstanding event occurred in 1922-23 when 450 000 Mahomedan Rajputs were reconverted to Hinduism

In 1923 was held the Benares session of the Hindu Mahasabha which was a pronounced success The rules of the Mahasabha were amended at this session After this date provincial and branch Hindu Sabhas were organised and Hindu conferences took place in different parts of the country Swami Shraddhanand Lala Lajpatrai and Pandit Madan Mohan Malaviya took active interest in the work of the Mahasabha

The Hindu reconversion movement gave rise to a counter movement on the part of the Muslims one of whose leaders published a book outlining the quickest and most comprehensive ways of converting *Kaffirs* to Islam

The war of *conversion went on* for a few years. Much bad blood was generated which manifested itself in a number of Hindu Muslim riots Swami Shraddhanand was murdered about this time The murder of one or two advocates of the Hindu cause also took place in 1926-27

Meanwhile the political aspect of the Mahasabha s work had also begun At the session of the Mahasabha held at Delhi in 1925-26 it was resolved that at the forthcoming elections to the legislatures Congress candidates who might be considered harmful to the interests of the Hindus should be opposed and Hindu Mahasabha nominees set up against them—otherwise the Hindu Mahasabha should not oppose the Congress The years that followed marked the termination of this friendly relation ship between the Congress and the Mahasabha. With the advent of Bhai Parmanand and Dr B S Moonje the Mahasabha acquired somewhat of an aggressive and militant character Prior to this time, while the Hindu leaders were keen on defending the rights of the Hindu community they still dreamed of a united nation Socially they wanted to make the Hindu community very strong and united but politically they sought to keep the Hindu Mahasabha as an adjunct to the Congress

Then followed the Simon Commission the Round Table Conference and the Communal Award The announcement of the Communal Award and the attitude adopted by the Congress towards it namely of neither accepting it nor rejecting it, drove a further wedge between the Congress and the Mahasabha The latter's leaders conducted a strong campaign in the country against the Communal Award which they contended was strongly pro-Muslim and anti-Hindu

Earlier Demands —Before we come to this stage we may briefly survey the demands of the Hindu Mahasabha in the preceding ten or fifteen years.

The 1918 session at Delhi demanded responsible self-government for India as a unit in the Empire and expressed opposition to the introduction of creed and colour considerations in the matter of representation on legislative councils etc While deprecating the attempts to extend separation and excessive communal representation in local bodies the session demanded that if any special consideration was shown to a non-Hindu community where it was in a minority the same consideration should also be shown to the Hindus where the latter were in a minority

In 1925 the Mahasabha which met at Calcutta resolved As it is essential to have one nation for peace and happiness and for the establishment and maintenance of Swaraj in the country and also as communal representation in regard to national institutions and the services has been harmful and detrimental to the creation of a united nation the Hindu Mahasabha strongly protests against the introduction of such a system, the Mahasabha also appeals to the non Hindu brethren to give up such anti national demands and help the Hindus in establishing national solidarity and oneness

In the next year the Mahasabha expressed the opinion that as the principle of communal *representation and separate electorates far from* bringing the different communities together has proved a serious hindrance to the growth of national feeling and to the smooth working of municipal district provincial and national *representative institutions it is the duty of all* Hindu politicians of all shades of opinion to make a determined stand against this vicious principle.

In 1928 the Mahasabha reaffirmed its conviction *that communal representation was fundamentally* opposed to nationalism and laid down the following essential propositions for incorporation in any future constitution of the country That there shall be uniformity of franchise for all communities in each province that elections to all elective bodies shall be by mixed electorates that there shall be no reservation of seats on communal considerations in any of the elective bodies and educational institutions but to start with *it* a minority community in any province were to demand reservation of seats such reservation may be granted only in the legislatures for a short and on the basis that the representation of different communities *shall be uniform such as adult* population voting strength or taxation the re-distribution of provinces in India if and when necessary shall be made on their own merits in the light of principles capable of general application with due regard to administrative financial and similar other considerations but no new provinces shall be created with the object of giving a majority therein to any particular community In the case of provinces like the *N W F P* and Baluchistan and Scheduled Districts steps should at once be taken to secure with as little delay as possible the benefits of a regular system of administration both judicial and executive so as to leave no ground for refusing them the *full benefit* of the future reformed constitution of the Government of India there shall be no communal representation in the Public Services which must be open to all communities on the basis of merit and competency ascertained through open competitive tests

Round Table Conference.—While the Round Table Conference was in session the Mahasabha met at Akola in 1931 and resolved *inter alia* The Hindu Mahasabha warns the Government that the people of Hindustan are in no mood to be satisfied with anything less than immediate full Dominion Status and full responsible government this conference while being emphatically of the opinion that Hindustan is quite capable of taking over immediately full responsibility for its own Government puts on record its desire that the Round Table Conference may prove a success and that peace and friendship may be established between England and Hindustan In case a certain transitory period as regards the defence of the country and imperial foreign policy be still considered needed such period should not exceed ten years when those special reservations should automatically cease to operate that even during such a period of transition there should be a minister or ministers in charge of the reserved subjects and the ministers shall be appointed by the Viceroy from among the elected members of the Central Legislature that recruitment of officers holding King s Commissions in the Indian Army Navy and Air Force should be made in India from the Indian Army Navy and Air Force, irrespective of considerations of caste or creed or of the so called martial and non martial classes, subject always to the requisite standard of efficiency provided that it shall be open to the Government of India to provide for recruitment in England to fill up such of the vacancies as may not be filled in India that all arrangements should be made for the intensive military training of Indian boys by establishing military schools and rifle associations and organising gymnasia for the training of boys in the indigenous arts of self defence such as lathi play sword play etc and encouraging boys to join University Training Corps and young men to join the Territorial Force

Communal Award.—The session held in 1932 at Delhi was of particular importance to the Hindu community in that it condemned the Communal Award on the following grounds.

That it maintains and extends the scope of separate communal electorates against all canons of democratic responsible and representative Government which the British Government are pledged to establish in Hindustan, that it belies the Prime Minister s own declaration in the House of Commons on January 19 1931 emphatically condemning communal electorates and weightages in representation as they leave no room for national political organisations or parties that it flouts the unanimous opinion of the vast Hindu community of the Sikhs, of important sections of Muslims Christians, and Depressed Classes and also of the women of India in favour of joint electorates that it practically forces separate communal electorates on unwilling Hindu minorities in the Punjab and Bengal that it even extends separate electorates to women against their agreed demands to the contrary that in the name of protection of minorities it has only granted protection to Muslims whether they form majority or minority while not only no protection has been granted to

Hindu minorities but they have been even deprived of a part of their representation which they are entitled to on the basis of their proportion in population that it provides for differential treatment of minorities favouring Muslim and European minorities in that (i) it adds an artificial and arbitrary weightage to the representation of Muslim minorities (ii) it reduces the representation of the Hindu minorities of Bengal and Punjab below what they are entitled to on the basis of their proportion to the population (iii) it denies to the Sikhs the weightage in representation which it grants to Muslim minorities under similar conditions (iv) it grants to European and Anglo-Indian minorities a weightage of representation which is grossly out of proportion to their strength in population and (v) it reduces the representation of the Hindu minorities of Bengal and the Punjab to what is flagrantly out of proportion to their contributions to taxation and to the cultural charitable benefactions and general progress of their respective provinces The resolution continued It destroys the communal equipoise of the Lucknow Pact which was an agreed solution of the Communal problem and which was endorsed even by the Simon Commission in the absence of any other agreed solution that the communal decision is not an award of an arbitrator to which the parties concerned are committed but it is the decision of the British Government that the communal question is agreed Indian solution of the communal problem is not forthcoming is unwarrantable inasmuch as the problem was at its origin the creation of the Government itself its solution has been obstructed by conditions created by Government such as the publication of the Government of India's despatch on Simon Commission practically conceding in advance almost all the demands of the Muslims and by the exclusion of nationalist Muslims from the Round Table Conference Therefore as circumstances favourable to an agreed solution do not exist the Hindu Mahasabha in accordance with its previous resolutions recommends that the communal problem of Hindustan be settled on an all India basis on the lines of the International Communal Award embodied in Minorities Guarantee Treaties to which His Majesty's Government and the Government of India are already committed as parties and signatories and which now form part of the public law of Europe and of the world guaranteeing to minorities full protection linguistic, cultural educational and religious but not through separate communal electorates

The Hindu Mahasabha invites all other communities to stand for this International Communal Award formulated by the highest Arbitral Body of the world as their agreed solution of the communal problem, that in case the Communal Award is not suitably modified within reasonable time the Hindu Mahasabha calls upon the Hindus to take all steps necessary both in legislatures and outside for frustrating the objects of the Anglo-Muslim alliance on which it is based and directs the Working Committee to prepare a programme of work to give effect to it.

The next year's session discussed an appeal to the League of Nations in respect of the Indian minorities problem

The sessions of 1935 and 1936 condemned the *Reforms scheme* especially as it sacrificed the interests of the Hindu community to those of the other communities but decided to contest the elections to be held under the 1935 Constitution with a view to protecting and upholding the Hindu interests

In 1937 the Mahasabha resolved that in spite of the defects of the constitution, the Hindus should utilise whatever powers are provided for under the Act in the interest of the evolution of Hindustan as a united nation and urged upon Government to expedite the introduction of Federation

The Mahasabha took strong exception to the Congress attitude of neither accept-nor reject towards *the Communal Award* and as a protest against it Pandit Madan Mohan Malaviya and Mr M S Aney who till then wielded considerable influence on Congress policies started a new party called the Congress Nationalist Party within the Congress determined to oppose the Congress attitude towards the Award

During 1934 35 a number of conferences were held to oppose the Communal Award

Congress-Mahasabha Cleavage.—Then occurred another change in the Hindu Mahasabha Mr V D Savarkar entered the lists with a virile programme for the regeneration of the Hindu community The cleavage between the Congress and the Hindu Mahasabha was further accentuated Mr Savarkar's attitude of hostility towards Congress may be illustrated by the following words The Hindu Sangatanists had to face the apathy on the part of scores of the unawakened masses of their co-religionists on the one hand and on the other the treacherous attitude of the pseudo-nationalist Hindus who are friends of every other community in the world but their own and who are ever ready to betray even the just interests of the Hindus and to placate the Muslims even in the most anti-national demands on their part—just to prove that the Indian patriotism of these pseudo-nationalists like Cæsar's wife was above suspicion Thus unaided and betrayed at home the brave band of the Hindu Sangatanist leaders and missionaries had to face outside the organised opposition of the Christian missionaries on the one hand and the fanatical riots hooliganism assaults and assassinations by the Muslim fanatics on the other while the British Government out of its political hostility to the Hindus was sworn never to take the side of the Hindus whenever Hindu interests clashed with the interests of the traditional favoured wife of the British

Bhai Parmanand said the best way to bring about Hindu Mahomedan unity is to strengthen the communities Let the Hindus cease to be Hindus but the Mahomedans shall be Mahomedans for all times to come The negation of Hinduism on the part of the Hindus does not mean the negation of Islam on the part of the followers of the latter The best security for bringing about a desirable national evolution is to preserve the communal strength. It will then be to the interest of the Mahomedans to consent to the obliteration of all religious distinctions for political purposes Sub-consciously, the

Hindus have perhaps felt that the Congress the bestower of the priceless gift of liberty must have been right in pawning Hindu independence culture and prosperity in exchange for an elusive Moslem support In fact the emotion that has accompanied Congress activity in the last twenty years has destroyed in the Hindus the love of their heritage They have been too willing to offer themselves as sacrifices at the altar of a Goddess which was surreptitiously given back Hindu offerings Muslim

If the Congress had not engineered the theory that liberty can only follow Hindu Muslim unity liberty today would not be hampered and confined as it is

Referring to the latest phase of the Hindu Muslim relationship Bhai Parmanand said

The situation has got only two solutions One is the partition of the country into two and the other to allow a Muslim state to grow within the State That is sure to take us to a period of trial of strength and in that case the Hindu Mahasabha alone and not the Congress can offer the *right solution* I am convinced that if the Congress had not thought of Hindu Muslim unity if Mr Gandhi had not made his ill fated pact with the All Brothers it could have made a significant contribution to the achievement of freedom It would then not have nurtured an enemy to its ideals within its own territories

Dr Moonje remarks that during the last 18 years the Congress has developed a tendency that may aptly be called a pro Muslim mentality at the cost of Hindu interests with the ultimate object of placating and winning them over to merge in the Congress The Muslim scheme of emancipation is essentially and fundamentally based on the essentially communal ambition of winning a domineering position for Islam in this hoary land of the Hindus The Muslims have no idea of patriotism or nationalism if shorn of Muslim communalism nor do they care for *Swaraj* in India if Swaraj does not offer to them a domineering status in the administration of the country Their one point on which they have concentrated for the present all their energy and intellect and staked everything that counts in life is how to win a position for Islam in India *even if it be at the cost of others* Does this in any sense mean the need for minority protection ? What is the cure for such a mentality ? It has now reached its culminating point it is no mere bluff It has now begun to demand division of India into Muslim India and Hindu India Dr Moonje claims that in any country it is always the right of the majority community to establish Swaraj and to create its own nationalism to maintain internal law and order and to defend the *swaraj* from external aggression

Since 1937 Mr Savarkar has been Hindu India s No 1 In 1937 the Mahasabha declared as its goal the attainment of complete Independence by all legitimate and peaceful means

An example of the militant character of the Mahasabha in later years may be found in a resolution passed in 1938 at Nagpur which urged upon the provincial Hindu Sabhas the need of opening *akhadas* (gymnasia) for improving the physique of Hindus and of starting rifle clubs

The 1939 session in Calcutta resolved to form volunteer corps under the name of Hindu Militia It also expressed the view that the Muslims have been made much of both by the Congress and the Government and have been given concessions at the expense of the Hindus constitutional and administrative much more than what are their due in their proportion to the population

Attitude to War —On the question of war it was resolved In view of the statement made by His Majesty s Government that it has declared the war with a desire to safeguard the vital principles of freedom and democracy as against the rule of force and in view of the fact that nowhere is there greater necessity for the application of these principles than in India the All India Hindu Mahasabha declares As the task of defending India from any military attack is the common concern of England and India and as India is unfortunately not in a position today to carry out that responsibility unaided there is ample room for whole hearted co-operation between India and England and that in order to make such co-operation effective His Majesty s Government should immediately take steps (1) to introduce responsible government at the centre (2) to redress the grievous wrong done to the Hindus by the Communal Award both at the Centre and in the Provinces particularly in Bengal and the Punjab where the Hindus have been reduced to the position of a fixed statutory minority contrary to all principles of democracy with their representation in the legislatures reduced far below what they are entitled to even on the basis of their population strength (3) in order to inspire the people of India to feel that the Indian Army is the national army of the people of India and not an army of occupation of the British to remove all artificial distinctions between the so-called listed and non listed classes or martial and non martial races and to accomplish the complete Indianisation of the Indian Army as early as possible (4) to modify the Indian Arms Act so as to bring it on a par with what prevails in England (5) to expand on an extensive scale the Indian Territorial Force and the University Training Corps to establish such military organisations in provinces where they are not in existence at present and to increase substantially the admission of cadets at the Indian Military Academy and (6) to make adequate arrangements for the training of the people in all branches of the defence forces so as to make it ready for all emergencies

As far as the future constitution of India is concerned the session resolved that the All India Hindu Mahasabha reaffirms complete independence as the goal of India s political aspirations and urges that a constitution based upon the Dominion Status as defined in the Statute of Westminster be immediately conferred on India and that the Mahasabha emphatically protests against the recent pronouncements of the Viceroy and the Secretary of State to the effect that the further constitutional progress of India must depend upon a solution of its communal and minority problems since they flagrantly violate the fundamental principles of a democratic constitution resting ultimately upon the vote of the political party commanding a majority and not subjected to the veto of the minorities

In the Limelight —The declaration of war in September 1939 followed as it was by numerous efforts by His Excellency the Viceroy to get leaders of Indian opinion together to an understanding on the political and constitutional issues with a view to unifying and intensifying India s war effort brought the Hindu Mahasabha very much into the limelight It was in 1939-40 that the Mahasabha secured for the first time official recognition at the hands of the Govern ment of India a fact which was appreciated by the annual session of the Mahasabha in 1940 When His Excellency the Viceroy summoned leaders of different communities and interests for consultation on the political question the Hindu Mahasabha insisted that it alone had the right to speak in the name of the Hindu com munity The resolution passed by the Maha sabha welcomed the recognition by the Viceroy and the Secretary of State that the political situation in the country cannot be satisfactorily solved without the co-operation of the Hindu Mahasabha which is the most outstanding body representing the Hindu community s interests'

In the middle of 1940 when the Viceroy was considering the best method of associating representative Indian opinion with the gover nance of India by means of an expanded Central Executive Council the Hindu Mahasabha strongly advocated the claims of the Hindu community for adequate representation thereon and strongly resisted the claims of Mr Jinnah that the Muslim League should have a majority in the Central Executive Council if the Congress abstained from participation

The Working Committee of the Hindu Maha sabha resolved in September 1940 — In view of the opportunities that the present war offers for the general militarisation of the Hindus and for the organisation of the defence of India on sound up-to-date modern lines so that India may be converted into a self contained defence unit the Hindu Mahasabha is prepared whole heartedly to work out the schemes of the extension of the Viceroy's Executive Council and the War Advisory Council but on honourable terms of equity and justice as stated below —

In view of the declaration made by the Muslim League of its determination firm resolve and faith that the partition of India is the only solution of a future constitution for India the Hindu Mahasabha urges upon the Viceroy to make a clear and definite declaration that Government have not approved or accepted any such proposal or scheme

That in view of the reported understanding between the Viceroy and the Muslim League that the League would be given two seats on the proposed extended Executive Council and five seats on the proposed War Advisory Council the Mahasabha claims a representation of six seats in the extended Executive Council and 15 seats on the War Advisory Council on the population basis

That out of the six seats on the extended Executive Council one be given to Sikhs and one to Scheduled Castes and the rest to be given to the nominees of the Mahasabha

The Working Committee considers the demand of the Muslim League for 50 per cent. representation on the proposed Executive Council and elsewhere as undemocratic unconstitutional unreasonable and preposterous and urges upon the Viceroy to give an assurance to the Mahasabha that no such demand would be entertained

In view of the attitude taken up by the Muslim League and the altered political situation brought about thereby the Working Committee of the Hindu Mahasabha requests the President without meaning any disagreement about the personnel of the panel to withdraw the panel which was submitted by him to the Viceroy on behalf of the Mahasabha in deference to the wishes of the Viceroy

The Working Committee also urges that a sub committee of the extended Executive Council be formed with the Viceroy as President, to be in charge of the defence portfolio and that Hindus should be given adequate representation on it

The meeting urges that the Viceroy should not commit himself to any distribution of portfolios before the extended Executive Council is constituted The Committee further urges that the distribution of portfolios when made should be on an equitable basis with due regard to the importance and interests of the Hindus

Opposition to Pakistan —During 1939-40 the Hindu Mahasabha was considerably exer cised over the demands of the Muslim League for the division of the country into Muslim and Hindu Indias Anxiety was also expressed over the statements made by the Secretary of State for India on this subject which were interpreted by the Mahasabha as conceding too much to the Muslims (For details of these pronouncements by British spokesmen see the chapter on the Muslim League) The Working Committee of the Mahasabha claimed that India should be granted Dominion Status within a definite time limit and expressed the opinion that the state ments made by the Viceroy and Mr L S Amery as highly unsatisfactory and disappointing In that they contained no reference to India s right to independence which was the declared goal of the Mahasabha and that the reference made to the grant of Dominion Status as an immediate step in constitutional advance was vague and uncertain The Statement to the effect that the British Government would not agree to hand over the administration of the country to a system of Government which would not be acceptable to large and powerful elements of Indian life the Committee thought required clarification as it was capable of the inter pretation that if the Muslim League the Princes or other vested interests opposed the recognition of the legitimate rights of the majority in India the further constitutional advance would be held up, or the rights of the majority would be surrendered to them This would mean negation of the principle of democ racy and an incitement to the minorities to obstruct and revolt.

With regard to the Mahasabha attitude to the war and the offer of the Viceroy to expand the Central Executive Council the Working Com mittee declared that the activities of the Maha sabha would be guided by a policy whereby the Hindu interests would be furthered and that no

elements would be permitted to dominate the public life of this country to the detriment of Hindus. The Mahasabha was determined to fight every inch of ground both inside and outside Government to achieve this object and it would accept any reasonable and honourable offer made by Government only if such acceptance would stimulate and advance the Hindu cause and prevent any encroachment being made on the rights of Hindus But this acceptance of the offer would not be considered as a bar to the Mahasabha carrying on agitation for the further advancement of the Hindu cause and interests

While the Hindu Mahasabha kept on urging the Hindus to offer themselves for recruitment in the fighting services with a view to the steady militarisation of the Hindu community its leaders carried on a ceaseless agitation against the Muslim League's Pakistan demand and against what they termed as the persistent refusal of the authorities to repudiate it

Madura Session.—It was in this atmosphere that the annual session of the Mahasabha met at Madura in South India in December 1940 Mr V D Savarkar who presided preached the ideal that the Hindus should get themselves reanimated and re-born into a martial race

The main resolution passed by the session *inter alia* stated that the Hindu Mahasabha appreciated the recognition by the Viceroy and the Secretary of State that the political situation in the country could not be satisfactorily solved without the co operation of the Hindu Mahasabha

The resolution added that while reiterating faith in the goal of complete independence the Hindu Mahasabha is prepared to accept Dominion Status of the Westminster type as the immediate step

The resolution also called upon the Government to recruit Hindus for the army and the navy make military training compulsory for Indians, and to promote the establishment of war industries in India The resolution concluded In case the Government fails to make a satisfactory response to the demands embodied herein before March 31 1941 the Mahasabha will start a movement of direct action. A committee was appointed to devise ways and means for starting and conducting the campaign of direct action after the lapse of the period mentioned above

Nothing happened however on the expiry of the ultimatum because, it was gathered the Hindu Mahasabha President received from the Viceroy assurances which were conciliatory in nature It was reported in April 1941 that the Viceroy had told Mr Savarkar that there was no formal Pakistan proposal before the Government and that none such was under consideration by the authorities

No Direct Action.—The threat of direct action in the event of the British Government failing to meet the demands of the Hindu Mahasabha came up for discussion at a meeting of the All India Committee of the Mahasabha held at Calcutta in the summer of 1941 Dr B S Moonje moved that giving effect to the Madura resolution of the preceding session be postponed Three amendments were moved one was withdrawn and the other two rejected The decision was due mainly to international developments and to internal communal rioting In the first half of the year Hindu Muslim disturbances of a grave type broke out in Ahmedabad Dacca Bihar and Nellore As usual each side condemned the other as the aggressor Mr Shyamprasad Mookerjee said, for instance that the recent communal disturbances were unusual They were not isolated examples of lawlessness but a well organised campaign of opression of the Hindus and an attempt to terrorise us into accepting Pakistan He expected a more vigorous drive of communal hatred in the near future and said that when those attacks came the Hindus must have the strength and organisation to resist them He urged the Hindus to concentrate on consolidating themselves in order to ensure the security of their hearths and homes For similar reasons Mr Savarkar said it was in the interests of Hindus to postpone any foolish jail seeking programme taking a lesson from the Congress fiasco of their own programme

The resolution postponing the launching of direct action referred to the correspondence that had passed between Mr Savarkar and H E the Viceroy in pursuance of the Madura resolution and to the pronouncements made from time to time by the Secretary of State for India in connection with the political situation in India It noted that the Viceroy had turned down some of the fantastic communal demands put forward with regard to the extension of the Viceroy's Executive Council and also that the Secretary of State for India had under pressure of public opinion created by the Hindu Mahasabha criticised adversely the so called Pakistan proposal It also noted that the Government of India had taken action against the Khaksar movement which the Working Committee of the Mahasabha had urged in 1940 The resolution expressed the opinion that Hindu interests in Sind the North West Frontier Province Bengal and the Punjab continued to be systematically assailed

Recommending the postponement of direct action the resolution added that such a decision would not in any manner debar any action that might be required to be taken with the previous approval of the Working Committee on important local or provincial issues affecting the civic religious cultural or political rights of Hindus It stressed the need for —

(1) Hindu sangathanists to organise themselves on a national scale

(2) A constructive programme

(3) Creation of Hindu Solidarity and consolidation of all classes of Hindus

(4) Effective organisation of volunteer corps

(5) A vigorous campaign for enrolling at least 10 000 000 Hindu Sabha members

(6) Effective economic relief to Hindus by organising Buy Hindu Campaigns and supporting Hindu industries and concerns.

The mover criticised Government's failure to give protection to Hindus in the riot-affected areas in different provinces and argued that if at that stage the Hindu Mahasabha leaders and workers courted arrest there would be no other persons organisations or associations to look after the interests of Hindus and resist aggression on them

The committee also adopted a resolution condemning the action of the Government of Bengal in interfering with the Census operations in the province and calling upon the Central Government to intervene immediately

Another resolution expressed strong disapproval of the application of the Defence of India Rules by Government to suppress legitimate expression of political opinion and activities thereby strengthening the grip of bureaucratic control in India by taking advantage of the war situation and in particular pointed the Hindu Sangathanists and Hindu Sabha workers

The next resolution related to communal harmony It expressed the opinion that communal amity could be established in the country not by pandering to the anti national communal demands of minorities but by recognising equality of civic rights for all communities without distinction

Communal Rioting—The Working Committee of the Mahasabha which met at Calcutta at the same time passed a strongly worded resolution on the communal rioting It ran

The Committee views with great concern the communal riots in Dacca Ahmedabad Bombay Cawnpore Bihar Sharif Bhiwani (Punjab) and other places and while it recognises the imperative need for taking stringent measure by every civilized Government for suppressing the activities of aggressors and rioters the All India Committee desires to emphasise that recent riots disclose a well organised campaign of oppression of Hindus by anti Hindu elements and that this can be effectively resisted only if the Hindus themselves decide to organise their own defence to the best of their ability and resist attacks in defence of their person and property The All India Committee records its opinion that the British Government is either unable or unwilling to protect the rights properties lives and honour of the Hindus that the Government of Bengal failed in its primary duty of keeping law and order and that the Government of India failed in its responsibility regarding maintenance of public peace and tranquillity in the provinces which devolved on it consequent on the proclamation of Emergency by the Governor General on the outbreak of the war

The Committee records further its opinion that the Communal ministry which has been installed in the province of Bengal on the basis of communal electorate created by the Communal Award, has by its anti-Hindu policy an active and open support of the anti national scheme of Pakistan emboldened the Mahomedans to take up an aggressive attitude towards the Hindus and that outrages committed in the District of Dacca resulting in organised looting arson and defilement of temples and images and forcible conversion of Hindus in over 70 villages were results of the wide spread impression among the Muslim hooligans that they would enjoy immunity for the acts of oppression and depredation upon Hindus

Akhand Hindusthan"—Hindu Mahasabha circles were unanimous in ascribing the outburst of communal rioting to a design on the part of some Muslim leaders to force the issue on Pakistan Mr K M Munshi a well known Congress leader and former Home Minister of the Government of Bombay left the Congress on the issue of a non violent approach to the communal rioting He started an Akhand Hindusthan (Undivided India) campaign which was very popular in Hindu circles Mr Munshi's exit from the Congress was solely on the issue of Mr Gandhi's insistence on remaining non violent even in the midst of rioting On this subject of course the Hindu Mahasabha held diametrically opposite views

In statements and speeches made at the time Mr Munshi said It is essential that all those who believe in the unity and internal security of undivided India (Akhand Hindusthan) must mobilise and consolidate opinion against the loose talk of dividing India Several leaders of all communities have already expressed themselves against this attempt to vivisect India

There is no possibility at present of adjusting communal rights for no one can foresee the basis of future life The world including India and its political parties is in a melting pot No one knows the shape they will take when this terrible war ends The Akhand Hindusthan is the undivided India of Hindus Muslims Sikhs Christians and Europeans and Parsis of everyone who is born in India or who has his home in India At the end of the war we all hope to live here as brothers in full freedom to pursue our distinctive growth

Unfortunately we have in Mr Amery the Secretary of State for India a gentleman who is anything but helpful He is not likely to withdraw the veto with which he has invested those who seek the division of this country His constant emphasis on agreement between political parties before any political advance is made is a flat refusal on the part of Whitehall to help us solve our problems Unless this veto is therefore taken away and Britain declines to put a premium on communal intransigence it would be idle to expect that Britain will help us in this matter But that is no reason why an effort should not be made by us to see the dangers ahead and help ourselves.

Akhand Hindusthan is not a communal problem not even a social, political or religious one There are some things which are above political rights and religious bonds of them the right to live, the right to live in security is the most sacred right This will simply vanish if the territorial integrity of our land is disrupted In this sense Akhand Hindusthan is above political expediency and religious differences, it is the prime necessity of life.

I could not reconcile myself to the principle of abjuring the use of force in matters of self defence Apart from this difference I remain the same unrepentant nationalist that I was before I joined the Congress and since I cannot think of political freedom for this country except on the basis of harmonious adjustment of the claims of all our communities and interests which nationhood implies

I am equally convinced that the demand for the vivisection of India is intended to destory the position and influence of Hindus in this country

If the Hindus and other nationalist elements like the Sikhs Christians nationalist Muslims and others on whose effort Akhand Hindusthan is to march to freedom are over awed into submitting to India s vivisection or to their reduction to the position of a minority life will not be worth living in this land

The one and only new force which we created in co-operation with other communities was nationalism But at present it is at the cross roads The labour of a century is being threatened by a few fanatical disruptionists who desire to divide India by harnessing religious bigotry to the chariot wheels of politics

But the greatest stumbling block to resisting the disruption of India is not the fanaticism of the disruptionists but the fear complex of the Hindus We are afraid of not being accepted as nationalists if we stuck to things which make us what we are

If the country is threatened with disruption we find excuses for not resisting the threat We shall be bullied and coerced into giving up everything which makes life worth living Nationalism the one basis on which India hopes to build up her future will never triumph unless we shed our fear complex unless we remain true to our culture and above all unless we stand up against all threats

In the struggle for Akhand Hindusthan that is ahead of us we have to enlist all sections and communities in India which may be ready to join us We should work so that the nation may be great that we sink our provincial and linguistic differences and achieve freset the consolidation Nationalism is not antagonistic to my being a true Hindu just as it is not antagonistic to a Muslim being a true Muslim I want to leave in peace and harmony with non Hindus in India to gain national freedom for all by the efforts of all But I refuse to be apologetic of my race religion or culture Political rights and opportunities are a mere framework in which to live the life as my forebears conceived it If Hinduism has a meaning and a message we shall not suffer any power on earth to tear it up from the soil of Akhand Hindusthan. India has a message for the war ridden world. India cannot die

Bhagalpur Session.—To return to the activities of the Hindu Mahasabha proper During the later half of 1941 the Hindu Mahasabha was engaged in a controversy with the Bihar Government over the venue of the next annual session of the Mahasabha It was decided to hold it at a place called Bhagalpur in Bihar Owing to its proximity to the scene of serious communal rioting quite recently, the Government of the province suggested that the venue be changed especially as the dates on which it was proposed to hold the session were too close to a Muslim festival It was evidently feared by the authorities that the strongly pro-Hindu speeches which were sure to be made at the meeting of the Mahasabha might exacerbate feelings and lead to a serious breach of the peace This was the subject of a prolonged controversy between the provincial Government and the Mahasabha circles Letters were also exchanged between the President of the Mahasabha and the Governor General and the Bihar Governor At a certain stage a compromise was suggested both in respect of the venue and the date Nothing availed however and it was eventually decided by the Hindu Mahasabha to hold the session at the time and place originally fixed A majority of members who attended a meeting of the Working Committee of the Mahasabha at Delhi in October 1941 felt that an important principle was involved in the controversy *and that they should not concede to Govern*ment the right to ban Hindu meetings and processions in the interest of peaceful observance of Muslim religious days This section of opinion also presumed that the Bihar Government would not relax its ban and made the committee take the decision in favour of appointing dictators and fixing up other details to carry on civil resistance to enforce their irrevocable decision to hold the session at Bhagalpur

The Working Committee also passed a resolution declaring that the blunt statement of Mr Churchill acquiesced in by America will disillusion those Indians—Congressites and others—who fancied at the very outbreak of the war that Britain was out in defence of democracy and freedom all over the world and vindicated the Hindu Mahasabha view India the resolution added must consequently adopt that policy alone which safeguards and *promotes her own national interests*

The authorities were however determined to uphold law and order and imposed a ban on the meeting The Mahasabha leaders decided to defy the ban Hundreds of arrests were made including those of the President Mr Savarkar and the working President Mr Shyamprasad Mookerjee who had recently *become a Minister of the Bengal Government* The leaders were released after a few days

The normal meeting of the session was prevented by the authorities but an attempt was made to hold the session and pass certain resolutions

Asserting that the independence of India *indivisibility of India representation in pro*portion to the population strength, public services to go by merit alone and the fundamental rights of freedom of worship language script etc guaranteed to all citizens alike formed some of the basic principles on which the Hindu Mahasabha took its stand, Mr Savarkar in the course of his presidential address which was to have been delivered at the Bhagalpur session of the All India Hindu Mahasabha, said that the Hindu Mahasabha

sought not an inch more than what was legitimately due to it or than what it was willing to concede to all non Hindu minorities in India in strict proportion to their population strength It follows from this very just and legitimate conception of true nationalism that the Hindu Mahasabha should not yield an inch of what is legitimately due to the Hindus on the ground of national equity to the Moslems or anyone else simply because they do not happen to be Hindus

The Hindu Electorate Mr Savarkar added must vote for only those Hindus who stand openly on the Hindu Mahasabha ticket under the Hindu flag and pledged to guard the Hindu interests Thereby alone would they invest the Hindu Mahasabha with an undeniable status as the first and foremost representative body of the Hindus

Situated as we Hindus are at present our best national interests demand that so far as India s defence is concerned Hindudom must ally unhesitatingly in a spirit of responsive co operation with the war effort of the Indian Government in so far as it is consistent with Hindu interests by joining the Army the Navy and the Air Forces in as large a number as possible and by securing an entry into all ordnance ammunition and war-craft factories Militarisation and industrialisation of our Hindu nation ought to be the first two immediate objectives which we must pursue and secure to the best of our power if we want to utilise the war situation in the world as effectively as possible to defend the Hindu interests

Mr Savarkar condemned what he called the Pan Islamic ideals of the Moslem League and said The time has come when our Moslem countrymen should realise that even in their own interests they should accept the inevitable and should cease amusing themselves with airy nothings They must count with realities they must know that they are in a minority and that there is not the slightest chance now left for them to reduce the present majority of the Hindus in any appreciable measure He strongly criticised the ban order of the Government as humiliating and even illegal and accused the Government of following a partial and anti Hindu policy throughout India He said We go to Bhagalpur not to challenge the Government but to assert our legitimate rights

Reply to Muslim Threat.—In the early part of 1942 the Hindu Mahasabha leaders engaged in themselves in replying to the Muslim League s Pakistan propaganda Mr Savarkar for instance replying to Mr Jinnah s contention that India was not a country but a continent with a variety of religions and dialects asked the President of the League to apply the same to Bengal and the Punjab where too there were numerous religions and dialects There was no geographical or cultural unit

Mr Savarkar expressed his preparedness to accept the challenge thrown by Mr Jinnah that if Hindus did not agree to the Muslim demand of Pakistan Muslims would create an unprecedented revolt He said We have faced more serious revolts in the past Why hold your threat in abeyance why not come out with it to day Hindus have an ancient culture and have withstood numerous revolts They are four times the Muslims numerically and have the same arms and penal codes to defend ourselves which Muslims have

Mr Jinnah continued Mr Savarkar promises protection to minorities in Muslim provinces why should he not accept the same protection from Hindus in India taken as a whole His logic is illogical and his Pakistan is a mere fad and a dream Does Mr Jinnah think that the Hindu youth of Bengal or the Sikhs of the Punjab will submit to his Pakistan scheme?

Turning to the Government the Mahasabha President advised them to grant India full independence immediately if they wanted the whole hearted co operation and support of the Hindus and as a first step to that end there should be nationalisation of the Indian Government and complete Indianisation of Services. He exhorted Hindus to join the army the Navy and the Air Force in large numbers and enjoined all Hindus to come under Hindu Mahasabha standard adding We shall not budge an inch and shall have our rights

Political Demands.—A meeting of the All India Committee of the Mahasabha was held at Lucknow in March 1942 when a number of resolutions were passed The main political resolution read

The Hindu Mahasabha had called upon the British Government to put into practice the war aims professed by England and the *Allies that they had joined this titanic struggle* for establishing the principles of freedom and democracy The Hindu Mahasabha regrets that Britain has failed to convince the people of Hindustan of the sincerity of her intentions and takes this final opportunity of warning the British Government that the tragic reverses in the Far East can be prevented in Hindustan by England granting full political freedom to India and securing the whole hearted sympathy and co-operation of the Hindus

Of all the tragic events in the present war, the fall of Singapore affects most vitally the question of Indian defence The only effective measure to counteract the defeatist shock and rouse the Indian people with proper spirit in this crisis is a bold and an unambiguous proclamation on the part of the British Government that India is granted full independence and co-partnership equal with Great Britain in the Indo-British Commonwealth and such a declaration must be immediately made by the British Government

The All India Committee of the Hindu Mahasabha urges the British Government to realise that the sooner the British make India feel that fighting in alliance with Britain is fighting for India s independence the better for both England and India

"This All India Committee demands the abolition of the India Office and of the India Council, the complete nationalisation of the Government of India on democratic lines,

the concentration of political sovereignty in India and the transfer of the entire administration of India to Indian hands including Defence Finance Foreign Affairs and relations with the Indian States

Other Resolutions were — In view of the deplorable unpreparedness of India in matters of defence the All India Committee of the Hindu Mahasabha calls upon the Hindu Sabhas throughout India and particularly in Provinces and Districts which are exposed to the dangers of air raids or invasion by foreign powers to organise civil defence parties and to take all possible steps to raise and equip a National Militia for preventing the ravages caused by possible air attacks and Hindu hooliganism and internal commotion The Hindu Mahasabha defence organisations should act in co-operation with the authorities and with the defence parties started by other political organisations The provincial Governments should bring about proper co-ordination between the civic and A R P services and enlist public sympathy and co-operation and grant fullest recognition to the Mahasabha defence organisations and afford them facilities to organise and equip the Mahasabha volunteer forces The Committee calls upon the Government to repeal the Arms Act and to provide the members of the defence organisations with arms so that they can form a real National Militia able to withstand and cope with all possible internal emergencies This was moved by Mr N C Chatterji and was passed unanimously

In view of the fact that the Government has so far failed to organise adequate defence of India the Hindu Mahasabha calls upon the Government to (1) relax the administration of the Arms Act so that every Indian should be able without any difficulty to secure rifles and to learn their use to shoot down invaders as a second line of defence and guerilla warfare in support of the defence to be put up by the Government (2) encourage and provide funds for the organisation of a National Militia so as to enable every able bodied Indian to do his part in the defence of his country (3) establish immediately factories for the manufacture of aeroplanes motor cars and warships and to give help to the industrialisation of the country to bring about self-sufficiency in the matter of weapons for the defence of the country and (4) provide serviceable and non serviceable rifles with ammunition free of charge to schools and colleges as a preliminary for training of educated youths

From the speeches made and the statements issued by the prominent Congress leaders the Hindu Mahasabha apprehends that the Congress may accept some anti democratic and anti national agreement to placate the Muslims The Hindu Mahasabha which is the only body to speak on behalf of the Hindus warns the Government that if any such agreement is arrived at behind the back of the Hindu Mahasabha it will be stoutly resisted by every possible means

Cripps Scheme opposed —When the Cripps proposals(see the chapter on The Indian National Congress) were announced the Hindu Mahasabha was one of the earliest to reject it on the ground of the unity of India The statement issued by the Mahasabha ran

There are several points in the declaration which are more or less satisfactory but accordingto the statement unfortunately made by Sir Stafford Cripps the scheme of his Majesty's Government is to be accepted or rejected in toto As some essential features of the scheme are wholly or partially unacceptable to us the Hindu Mahasabha has no other alternative but to reject the scheme

One of the cardinal points in the scheme which Sir Stafford Cripps has put forward on behalf of the War Cabinet is the right which has been conferred on the provinces of British India to keep out of the Indian Union or Federation The basic principle of the Hindu Mahasabha is that India is one and indivisible In religious and cultural aspect there has been recognised the fundamental unity of India by the Hindus throughout the ages and even unity in political sphere was an accomplished fact in many periods of this country's history Even during some two centuries of British rule the political unity of India has been recognised and fostered and this has always been claimed by Britain herself as her finest achievement Besides India has been treated as one political and constitutional unit under the Constitution Act of 1935 The right to step out of the Indian Federation will stimulate communal and sectional animosities The other option given to the non accedors provinces to set up a rival Pakistan—federating —constitutes in view of such Moslem movements as Pakistan and Pathanistan involving threats of joining hands with Afghanistan and other Moslem nations a serious menace to Indian security and unity and this may lead to civil war in the country The Hindu Mahasabha cannot be true to itself and to the best interests of Hindustan (India) if it is a party to any proposal which involves the political partition of India in any shape or form

The Hindu Mahasabha therefore has fundamental objections to the proposal The right of non accession of any province to the Indian Union cannot be justified on the principle of self determination and no such right can be imposed by any outside authority India has already been one unitary state and the existing provinces are constituted as administrative units The analogy of sovereign states entering into a federation and surrendering a portion of their sovereignty for certain common purposes cannot apply to Indian provinces

According to the scheme of Sir Stafford Cripps a treaty will be a signed between his Majesty's Government and the constituent assembly and such treaty will implement the undertakings given by his Majesty's Government for the protection of racial and religious minorities In the framing of this treaty all parties and sections will have an effective say Such a treaty ought to completely satisfy the minorities If however, any minority is not satisfied with the safeguards in the proposed

constitution then the question of such safeguards can be referred to the tribunal of arbitration to be appointed by the constituent assembly in consultation with disputing parties We want to take our stand on justice and fair play and we do not ask for any rights or privileges which we are not prepared to extend to any community

The Hindu Mahasabha is not so much concerned with a declaration as to the future but the real question is whether England is willing to transfer immediately real political power to India and if so to what extent It notes with regret that the scheme which Sir Stafford Cripps has announced is nebulous vague and unsatisfactory with regard to the interim arrangements The Government of India Act of 1935 still maintains the breacracy in power with the Governor General and the Governors as their powerful protagonists But for successful prosecution of the war it is essential to transfer real power to Indian hands and to set up conventions whereby Indian ministers can formulate and execute the policy of national defence including the formation of a national militia and the arming of the Indian people for the defence of the country

It has been the demand of the Hindu Mahasabha that India should be immediately declared an independent nation with free and equal status in the Indo British Commonwealth. The declaration promises full national sovereignty in the future but the constitutional position and status of India during the interim period have not been made at all clear

Particularly in regard to defence the scheme of his Majesty's Government is unacceptable to us It is urgent and imperative that if India is to be an effective partner in the struggle for freedom her defence policy must be determined and her defence arrangements must be made on the responsibility of her own defence minister enjoying the confidence of all sections of the people The tragic experiences of Malaya and Burma have demonstrated that apart from the deplorable failure of military strategy the apathy and hostility of the people who were deliberately kept unarmed contributed to the British reverses The psychology necessary for full and willing co operation in the present war amongst the Indian people cannot be created unless and until the defence of India is put in Indian hands

We note with satisfaction that this scheme provides for a constitution making body for framing the future constitution of India and that the constituent assembly may begin its work with the declaration of India's independence But the principle on which it will be constituted is vicious The constitution making body will be elected on the basis of the Communal Award which is not only anti national but runs counter to the essential principles of democracy

Unless and until the scheme of his Majesty's Government is radically altered and readjusted on the vital issues mentioned above the Hindu Mahasabha cannot be a party to the acceptance inasmuch as the scheme is to be accepted or rejected *in toto*

The rejection did not mean however that the Mahasabha refused to co-operate in any case In fact Mr Savarkar agreed to join in a Government at the centre in spite of the Mahasabha's opposition to the other parts of the Cripps formula In a statement issued in reply to American criticism of the attitude of the Mahasabha Mr Savarkar said The impression that the Hindu Mahasabha was uncompromising in rejecting the Cripps scheme is misinformed The Mahasabha accepted it partially and welcomed the promised grant of equal co partnership with Britain, but the scheme made it all conditional on the grant of freedom to the provinces to secede and break up India into a number of independent States with no Central Indian Government To us Hindus the unity and integrity of India our motherland and holy land is an article of faith The Indian Government of *today* does also imply that the political and administrative unity of Hindustan is an accomplished fact But Sir Stafford Cripps insisted on the acceptance or rejection of the scheme in toto The Hindus consequently could not but reject it altogether Americans in particular who went to war even with their kith and kin on the question of secession and saved the integrity of their Union cannot fail to appreciate and uphold the Hindu opposition to the vivisection of India The Hindus are prepared to guarantee legitimate safeguards to the minorities but can never tolerate their efforts to create a State within a State as the League of Nations puts it.

Sikhs' attitude.—Although the Sikhs are not connected with the Mahasabha it may be appropriate to mention in this chapter the Sikhs rejection of the Cripps formula The Sikh All Parties Committee in a representation to Sir Stafford Cripps declared that the proposals were unacceptable to them because instead of maintaining and strengthening the integrity of India specific provision has been made for separation of provinces and the constitution of Pakistan and the cause of the Sikh community has been lamentably betrayed. The Sikhs said Ever since the British advent our community has fought for England in every battle field of the empire and this is our reward that our position in the Punjab which England promised to hold in trust and in which we occupied a predominant position has been finally liquidated

Why should a province that fails to secure 3 5th majority of its legislature in which a religious community enjoys statuary majority be allowed to hold a plebiscite and given the benefit of a bare majority in fairness this right should have been conceded to communities who are in permanent minority in the legislature.

Further why could not the population of any area opposed to separation be given the right to record its verdict and to form an autonomous unit? We are sure you know that the Punjab proper extended upto the banks of the Jhelum excluding Jhang and Multan districts, and the trans—Jhelum area

was added by the conquest of Maharaja Ranjit Singh and retained by the British for administrative convenience It would be altogether unjust to allow extraneous trans Jhelum population which only accidentally came into the province to dominate the future of the Punjab proper

We give below the figures which abundantly prove our contention —

From the boundary of Delhi to the banks of the Ravi river the population is divided as follows —Muslims 45 05 000 Sikhs and other non Muslims—76 46 000

From the Delhi boundary to the banks of the Jhelum river excluding Multan and Jhang districts —Muslims—82 88 000 Sikhs and other non Muslims 93 48 000

To this may be added the population of the Sikh states of Patiala Nabha Jind Kapurthala and Faridkot which is about 26 000 00 Of this the Muslims constitute barely 20 per cent and this reduces the ratio of Muslim population still further

We do not wish to labour the point any more We have lost all hope of receiving any consideration We shall resist however by all possible means separation of the Punjab from the all India union We shall never permit our motherland to be at the mercy of those who disown it

The National Liberal Federation—
And Moderate Politics

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (*vide* 1919 edition of this book) witnessed the birth of the National Liberal Federation which has since then been the platform of Indian moderate leaders *It held its first session in* Bombay in 1918 Sir Surendranath Banerjee presiding The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress The Liberal Party in India has always been the rallying point of moderately progressive opinion It has consistently stood for a pure type of nationalism and orderly progress through peaceful and constitutional means as opposed to the revolutionary creed and policy of the Congress During the first five or six years of its existence the party played a useful and valuable part in politics and exerted a wholesome influence on public life The death of the Rt Hon E S Montagu was a serious blow to the Indian Liberal Party whose influence on Indian affairs steadily waned since then The Indian Round Table Conference brought it again to the forefront but its influence again suffered partly as the result of the reactionary provisions of the Government of India Act of 1935 and partly as the result of the growing strength of the Congress organisation The return of the Congress to the constitutional path ousted it from Indian politics At the time of writing the Liberal Party exists only in name there being no place for a middle group in Indian affairs at the present day Indeed it will not be necessary to enter at a recent session of the Liberal Federation a special plea for the continuance of the Liberal Party in reply to suggestions that the party be wound up

The general elections for the provincial legislatures under the Government of India Act of 1935 confirmed the exit of Liberals from active political life in India Few Liberal candidates contested the elections but hardly any was successful During the past two or three years the Liberal Party existed only in name Its leaders however, made their existence felt by occasional contributions to the discussion of public questions They also played a valuable part in offering sober and constructive criticism of the policies and actions of the majority party in the Congress Such criticism was all the more useful owing to the absence of an opposition in most of the provincial legislatures in which the Congress is now in power

Although the Liberals hold no less progressive views than Congressmen there is a fundamental difference between the two the former have fixed Dominion Status within the Empire as their ambition while the latter have set complete Independence as their goal Similarly in the matter of method the Liberals are opposed to direct action and are wedded to constitutional forms of agitation to accelerate the pace of the country's political advance

There is another direction in which the Liberal Party's sentiments may be said to be different from those of the Congress. *Having an abiding faith in the British connection and being convinced of the potentialities for good of the* British Empire, the Liberal Party constantly wishes well by the Empire and what it stands for For this reason no member of the Party wishes anything but success for the Empire in the struggle which it is waging against Nazism. Many of them have given public expression to their convictions in this behalf and to their undoubted desire that India should render full support to Britain in her war

Latterly however the bulk of the Liberals have shown signs of impatience over the dead lock in the country While they were ready to realise that the intransigence of the Congress was not a little responsible for the political *impasse* they were by no means happy over the bureaucratic form of administration both at the centre and in the majority of the provinces They wished that the authorities should make an effort to end the political inactivity primarily with a view to investing the country a war effort with popular sanction through non-official representatives of Indians Towards this end they made repeated appeal to the British authorities

Not all of these were made in the name of the Liberal Federation Indeed the most influential and well known exponents of the view point of the Liberal Federation do not belong to that Organisation Take for instance the Non Party Leaders Conference whose proceedings figured largely in Indian politics during the past few months The President and more than one leading light of this Conference are not members of the Liberal Federation It is nevertheless true that the views of both are identical on many subjects It may therefore be appropriate to deal with the activities of these leaders in this Chapter

A Middle Course.—The activities of the Liberals and other moderate leaders during the past couple of years have followed a middle course On the one hand they were never slow to denounce any attempt to hamper the country's war effort and on the other their demands were little different from those of the Congress What may thus be described as the dual policy of the Liberals found ample expression in the past few months Shortly after the publication of the Viceroy's August offer (see chapter on Indian National Congress) the Council of the National Liberal Federation passed a resolution voicing the fear lest the British obligations in India should permanently stand in the way of this country achieving the same freedom as the other Dominions and demanding an assurance that the contemplated free and equal partnership of India was not subject to a distinction between the functions and the status of a Dominion

The past twelve months may rightly be described as the moderates era in Indian politics Not that they regained their lost influence nor that the masses abandoned their extremist tendencies which they had acquired from the Congress propaganda. If anything extremism, feeding on itself became more extremist Nevertheless it was a moderates period in the *sense that the moderate leaders occupied the* public stage almost continuously The Congress

exit into wilderness was partly responsible for this development When the satyagraha movement was in progress there was hardly any politics worth the name except the activities of the Liberals and other moderate leaders Another reason for public attention being directed towards moderate politics was the effort made by the British Government to meet the demands of moderate leaders It cannot be said that the authorities did anything substantial to enhance the reputation and strengthen the position of the sober element in the Indian political world on the contrary the point was frequently made that the way in which the Liberals were ignored gave additional impetus to extremism But such action as was taken was the result of the outspoken representations made by the moderate leaders They figured in the picture even then their demands were turned down For instance Mr Amery the Secretary of State for India made a pointed reply to the resolutions of the Non Party Leaders' Conference held in Bombay in March 1941 (See last years issue) He referred to practical difficulties in the way of giving effect to the resolutions and said The resolution seems to me to have been directed to the wrong address The time table of India's constitutional advance depends far more upon Indian agreement than upon ourselves The same applies to any far reaching alteration of the present constitutional position

Expansion of Viceroy's Executive Council — Almost the first event of importance in the past official year was the announcement on July 21 1941 of the expansion of the Governor General's Executive Council and the creation of a National Defence Council to associate Indian opinion with the prosecution of the war The *communique* on the subject ran

As a result of the increased pressure of work in connection with the war it has been decided to enlarge the Executive Council of the Governor General of India in order to permit the separation of portfolios of Law and Supply and Commerce and Labour the division of the present portfolio of Education Health and Lands into separate portfolios of Education Health and Lands and Indians Overseas and the creation of portfolios of Information and of Civil Defence

His Majesty the King has approved the following appointments to the five new seats on the Council —

Member for Supply —Sir Hormusji P Mody MBE MLA (Central)

Member for Information—The Right Honourable Sir Akbar Hydari P C

Member for Civil Defence—Dr E Raghavendra Rao

Member for Labour—Malik Sir Firoz Khan Noon KCIE

Member for Indians Overseas—Mr M S Aney MLA (Central)

For the vacancies which will occur when Sir Muhammad Zafrulla Khan and Sir Girja Shankar Bajpai take up the posts to which they have recently been appointed His Majesty has approved the appointment of —

Sir Sultan Ahmed to be Law Member and Mr Nalini Ranjan Sarker MLA to be member for Education, Health and Lands

In pursuance of the desire of His Majesty's Government to associate Indian non official opinion as fully as possible with the prosecution of the war approval on the recommendation of the Viceroy has also been given to the establishment of a National Defence Council the first meeting of which will take place next month The Council the strength of which will be about 30 members will include representatives of Indian States as well as of provinces and of other elements in the national life of *British India in its relation to the war effort*

British White Paper —A White Paper on the subject presented to Parliament by the Secretary of State explained that though no constitutional change was involved in the announcement and though the enlarged Executive Council would not be responsible to the Legislature the Viceroy would now have what to all intents and purposes was a War Cabinet with a marked majority of Indian public men instead of the former European and official majority The new members of the Council are as representative of and as responsive to public opinion as the refusal of the Indian Congress and the Muslim League to co-operate makes possible

The changes indicated in the White Paper while making a significant step towards augmenting and consolidating India's war effort are not in any way concerned with constitutional developments in India Authoritative quarters recall that in various statements made on behalf of the British Government since the outbreak of the war it has been made clear that constitutional changes in India are quite im *practicable while the British Empire is engaged* on a vital struggle for its existence and that agreement between the major political parties and interests in India is a fundamental condition of consideration of any new constitutional scheme

The creation of a National Defence Council associates with India's war effort representatives of all influential sections of the community which are ready to co-operate There are 22 representatives of British India on the Council

Representatives of Indian States will all of them be Princes with the possible exception of Hyderabad The National Defence Council will meet at intervals under the Chairmanship of the Viceroy and the Council will on each occasion receive a full and confidential statement of the war position and of the position in regard to supply The Council will also act as liaison between provincial war effort and the war effort of the Centre The creation of a National Defence Council answers the insistent demand for something of this kind.

In addition to these measures now taken by the Viceroy to bring Indian public opinion into the closest possible contact with the conduct of India's war effort the Commander in-Chief has already announced the setting up of a

Pan

Committee of the Central Legislature over which he will preside for the purpose of enabling members of the legislature to be kept in confidential and intimate touch with defence matters Further an Indian has been appointed Additional Defence Secretary to the Government of India

Explaining the position of the National Defence Council Mr Amery said — It is an advisory body and the object is to keep the Central Government of India in its war effort in touch with the different Provincial Governments and Indian States with commerce labour etc

Referring to the expanded Executive Council Mr Amery said For many months the Viceroy had conducted negotiations with the Congress and the Muslim League with a view to securing complete co operation He has now succeeded in securing the co-operation of many representative men some of whom are members of the Muslim League and others who have been closely associated with the Congress The new Members of the Executive Council would share full statutory collective responsibility of the whole Council as well as being responsible for the administration of important departments

Mr Amery described those who had joined the Viceroy s Executive Council as a team of ability and experience which it would be difficult to rival in India or indeed elsewhere They were he declared men with administrative political and business experience and of personal ability The Viceroy's War Cabinet would be very much stronger for their inclusion They would in the fullest sense share in the collective responsibility and statutory responsibility of the Executive Council as well as to direct important departments which had been entrusted to them The aim said Mr Amery was to increase the efficiency of Government and to make full use of the vast and hitherto inefficiently tapped reservoir of Indian ability and patriotism These measures marking a change in the spirit if not the letter of India s constitution were the earnest of the British Government s desire to transfer to Indian hands steadily an increasing share in India s destiny

The National Defence Council will be very far from being a body of Yes men At the meeting of the Council Members would be informed in confidence of affairs which they would discuss with the Viceroy and in turn put forward their own suggestions After the meeting they would return to their provinces and confer with their representatives In this way it was hoped that there would be continual contact between the Viceroy and his Executive on the one hand and Provincial or State Governments local War Committees or Industrial organisations, on the other

Mr Amery thought that it ought to prove most helpful in guiding and stimulating India s war effort I cannot help hoping that in the course of working together side by side in the common interests of India s safety and India s future representatives on these bodies of men of every political complexion and community will be drawn closer together

I hope they will find bonds of mutual understanding and sympathy which may immensely facilitate the solution of those very difficult inter communal and inter party problems which are today the main obstacle to India s attainment of her rightful position as a free and equal member in the British Common wealth

Mr Amery s Explanation.—Further explaining the significance of the expansion of the Executive Council at a later date Mr Amery declared that these measures are an earnest of Britain s desire to transfer to Indian hands a steadily increasing share of the control of India s destiny It was a matter of general acceptance that India should as soon as was practicable, attain to Dominion Status or as I prefer to describe it to a free and equal partnership in the British Commonwealth For the undoubtedly key positions the Viceroy Lord Linlithgow had selected men whom he believed to be individually best fitted for the work in hand declared Mr Amery To attempt to make so small a body as an Executive Council representative of all the different elements of India s national life could obviously have been impossible

The important thing was to find a team of individual competence and willing to share the collective work and responsibility of the Council in this Mr Amery ventured to say the Viceroy had definitely succeeded The old Executive contained apart from the Viceroy four European and three Indian members In the new Executive eight Indian members would be in a majority of two to one the development marking a change not indeed in the form of the constitution but in its spirit

The National Defence Council except for the presence of one representative of the European commercial community and one for the resident Anglo Indian community was Indian This said Mr Amery was essentially a body representative of all elements of the whole national life of India in the fullest sense of the term

It was in no sense a collection of yes men scraped together to create a facade of Indian support for the Government It was a body of patriotic Indians who had readily come forward to help their country at a critical moment

The British Government s action met with a mixed reception in India As far as the moderate leaders were concerned they seemed inclined to welcome it although it fell short of the demands put forward by the Non Party Leaders Conference held earlier in the year at Bombay Another session of this Conference was held at Poona on the morrow of the announcement when a resolution was passed welcoming what was given and reiterating the Bombay demand. The one motive which seemed to actuate those who attended the session was to take what was given and to fight for more The conference was particularly critical of the retention of important branches of the administration in the hands of British civilians and about the failure to make a declaration on the future status of the country

Atlantic Charter—The next important development concerning Indian politics occurred when Mr Churchill interpreted the famous Atlantic Charter in its application to India The Atlantic Charter as many may know was a joint declaration by the Prime Minister of Great Britain and the President of the United States of America of the peace aims of the two great democracies It visualised the right of those people who had come under Nazi domination to determine for themselves the kind of government under which they wished to live For a time this was assumed to apply to India as well especially in view of the statement by the Deputy Prime Minister of Great Britain Mr Attlee that the Atlantic Charter was applicable to all races and to all countries Mr Churchill broke his two year long silence on Indian affairs and said The (Atlantic) declaration does not qualify in any way the various statements of policy made from time to time about the development of constitutional government in India We are pledged by the declaration of August 1940 to help India to obtain free and equal partnership in the British Commonwealth of Nations subject of course to the fulfilment of the obligations arising from our long connection with India and our responsibilities to its many creeds races and interests

This statement of Mr Churchill aroused considerable protest from India from extremists and moderates alike Sir Tej Bahadur Sapru in a statement on the subject said

This was the first time that Mr Churchill referred to India in the House and his speech goes to show that the Prime Minister has not changed his views on India

(1) That at the Atlantic meeting between the President of the United States and the Prime Minister of England they had in mind primarily the extension of the sovereignty self government and national life of the states and nations of Europe now under Nazi yoke and the principles which would govern any alterations in territorial boundaries of countries which may have to be made That is according to Mr Churchill quite a separate problem from the progressive evolution of self government institutions in regions whose people owe allegiance to the British Crown

(2) That the declaration of August 1940 by which His Majesty s Government proclaimed that they would help India to obtain free and equal partnership in the British Commonwealth of races subject of course to the fulfilment of the obligations arising from their long connection with India and their responsibilities to its many creeds races and interests is now going to be treated as the polar star of Great Britain s policy towards India

It must be clear by now to Mr Amery and Lord Linlithgow that attempts to carry Indian opinion with them in regard to this declaration have been a complete failure Having failed to carry with them the Congress they have equally patently failed to carry with them the Muslim League on whose support they had built up so much of their hopes

I have always maintained that while the minorities, whoever they may be, are entitled to see their rights amply and adequately protected a policy which rests upon treating one party as a barrier against the other can at best be a temporary expedient but is bound to lead to disastrous consequences in the end

The words used by Mr Churchill which qualify that pledge are subject of course to the fulfilment of the obligations arising from our long connection with India and our responsibilities to its many creeds races and interests In themselves these may seem to be innocuous but in their application they are susceptible to a great deal of mischief They undoubtedly refer to the question of the minorities to Indian States to problems of defence and possibly also to the problems of the services and to similar other things If they do so why cannot Mr Amery make up his mind to tell us something of what his conception of those obligations is ?

It is no use Mr Amery or British statesmen reminding us that they have already stated that they have left it to Indians to frame their own constitution They know the difficulties which are facing us—difficulties some of which at any rate have been aggravated by the unwise and shortsighted policy of the British Government An assurance of this character therefore should not mislead us and I have never since it was given felt that the position was safe It is for this reason that I have been urging and do urge that even now it is not too late for Mr Amery and Lord Linlithgow to impress upon His Majesty s Government that the time has come when this short sighted policy should be definitely and positively abandoned and His Majesty s Government should make up their mind to courageously tell us whether we are going to be treated as a dependency in future or whether we are going to be fed upon such pledges circumscribed as they always are by cautious reservations which may mean anything or nothing

This question was again raised in Parliament when Mr Amery stated I can only repeat in order to remove any possible grounds for misunderstanding that the Prime Minister s statement with reference to the Atlantic Charter expressly made it clear that the Government s previous declaration with regard to the goal of India s attainment of free and equal partnership in the British Commonwealth and with regard to our desire to see the goal attained with the least possible delay after the war under a constitution framed by agreement among the Indians themselves held good and is in no way qualified The answer to the remainder of the question is in the negative

Indian Protests—Sir Tej Bahadur returned to the charge early in the winter of 1941 and voicing the viewpoint of the Standing Committee of the Non Party Leaders Conference issued a lengthy statement which said

The Committee has noted with profound disappointment that in his first and unfortunately only reference to India since he became Prime Minister Mr Churchill used language which has made many people to doubt whether he and his Government do really mean to part with power and whether India will ever attain real self government

It seems to the Committee that so far as Mr Churchill is concerned the fundamental principles to be applied to India are those contained in the declaration of August 1940—a declaration which has afforded no satisfaction to any section of Indian opinion and which far from easing the tension in India or winning over those sections which had withheld their support from the British Government and from hastening the position of those which have been friendly to the British Government and which would like to remain so has given rise to grave misgivings and has caused a great deal of resentment In the opinion of the Committee the declaration of August 1940 is not wholly consistent with the noble and generous sentiments contained in the joint declaration quoted above

His Majesty's declaration of August 1940 is hedged in by so many conditions is so incomplete in the enunciation of the aim and so non committal in regard to its being implemented within any reasonable distance of time that it can afford no satisfaction whatever to the people of this country

The Committee thinks that the whole position in regard to the future of India should have been made clear long ago by using definite certain and unambiguous language so that India may feel sure that after the war in the event of victory her position shall be the same as that of Britain and the Dominions In short the Committee is strongly of the opinion that after victory the position of India in regard to her status and powers shall not be that of a dependency but shall be one of perfect equality

In the opinion of this committee the question of the internal constitution of India with proper provisions for the safeguarding of different interests should not be allowed to stand in the way of making such a declaration of policy regarding the political and constitutional relations of England and India For this reason the Committee holds that immediate steps should be taken to secure that India's representatives at the Peace Conference or any other international conference shall be selected by the Government in India and be answerable to it and shall on no account be in the leading strings of the Secretary of State A change like this can be effected without amending the Statute by the adoption of a suitable convention

The Committee is equally anxious that during the interim period in regard to international matters India should be treated to all intents and purposes on terms of perfect equality and that her internal constitution should during the interim period be so worked in practice as to approximate as far as possible under the existing conditions to the working of the self governing Dominions For this reason the Bombay and the Poona conferences and this Committee at its previous sittings have emphasised that all the portfolios including Defence Finance Home and Communications should be put in the hands of Indian members of the Executive Council who would, in the interim period be responsible to the Crown

In the opinion of this Committee these steps are essential for a successful prosecution of the war, and therefore necessary changes should be introduced without delay so as to hearten the people and make them feel sure of their destiny The Committee while it realises that in times like these war preparations must have the foremost place It nevertheless strongly feels that the fullest measure of help from the public cannot be hoped for without making the people of this country realise that they shall be in the full sense of the word participators in the fruits of victory In the opinion of this Committee to make the cry of win the war first as the only cry would be very poor statesmanship indeed and far from easing the situation it would widen the estrangement between the people and the Government—a result which must be avoided at all costs

For this reason it is pressing the view set forth above and it trusts that the expanded Executive Council of the Viceroy which has now eight Indian members will use its influence and its moral pressure to bring about a desirable change in the policy of Government The primary responsibility for a satisfactory change in policy must rest with Government and the Committee has no hesitation in saying that in the recent past those who have been responsible for the conduct of affairs in India or at Whitehall have shown neither a correct appreciation of the situation nor done anything striking to appeal to the imagination of the people or to strengthen constructive forces It trusts that in matters of high policy the principle of collective responsibility will be observed scrupulously and that Indian members of the Executive Council will claim it as a matter of constitutional right

While the Committee recognises that there are eight Indian members of the Executive Council it also notes with regret that the important portfolios of Defence Finance Home and Communications have been withheld from Indians Until and unless such a transfer takes place it cannot be said that more power has been made over to Indians The Committee therefore urges that as a preparation for full responsible government in future the entire Viceroy s Executive Council should consist of non official public men Similarly it holds very strongly that in the provinces the rule of the Governors with the aid of the Advisers under Section 93 should be brought to a speedy end and therefore they appeal both to the people and to Government to change their outlook It is also strongly of the view that parliamentary institutions such as they are should be utilised as instruments for the advancement of the freedom of the country and its effective defence The Committee is convinced that to stimulate war effort a big scale change of policy is necessary

Views somewhat on similar lines were expressed by the Working Committee of the Indian National Liberal Federation a few days later It said The Working Committee protests against the exclusion of India from the purview of the Atlantic Charter by the Prime Minister of England His speech is inconsistent with the appeals made to India to regard the war as a struggle for the enlargement of the bounds of freedom and democracy The committee is

convinced that in order to get the whole hearted support of Indians the British Government should *bind itself to establish the equality of India* with England and the Dominions unconditionally both in respect of internal government and external relations within a very brief period of the termination of the war The committee is further of the opinion that in any International peace conference which may be convened after the war India should be represented by delegates responsible to the Government of India

While favouring the expansion of the Executive Council the committee regrets that no substantial power has been transferred to Indian hands and reiterates the Liberal Party's demand that all portfolios in the Viceroy's Executive Council including those of defence and finance should be held by non official Indians representative of public life in this country

The committee is of the opinion that it is necessary in the interests of India and particularly of the provinces under Governors' rule that both Government and the Congress should revise their attitude and that the political prisoners should be released and the satyagraha *movement* be called off

British Opinion.—British response to these appeals was reflected in the statements of spokesmen of advanced sections of opinion the press and parliamentarians The London *Times* for instance wrote A grave responsibility rests on Government to break this vicious circle of mistrust and provocation by every means compatible with their duty of maintaining public order The position is too serious for recriminations about errors of the past If opinion in this country is uneasy over the prolongation of the deadlock opinion in India—notably in some Congress circles—is equally restive at what appears to be the purely negative character of Indian leadership in the face of the crisis of the war A timely word would do much to rally and encourage those who feel that the moment has come to make a resolute attempt to heal the breach. Government stands pledged to the acceptance of any solution of the constitutional issue which is agreed among themselves by the Indian parties But *the Government* cannot remain exclusively on this ground valid as the reasons are for having taken it nor is it possible to postpone to an indefinite future problems which the war is making every day more urgent and more actual

It may be doubted whether the complexities of constitution making offer at the present time the most *hopeful line of advance* But nothing could be lost and much sympathy might be won by a determined and understanding effort to bring more Indian leaders including those now or recently in active opposition into a responsible share in the tasks of Government and in the solution of those problems military social and economic which weigh heavily on India at the present time Direct participation in responsibility whatever from it may take is the only true basis of democracy A policy designed to achieve this end would enhance the British prestige throughout the Empire and the English-speaking world. More important still, it would discharge the obligation which this country owes to the Indian people and itself

Mr Amery in a speech at Manchester further explained the British policy towards India and said We can be proud of Britain's contribution to India What the Magna Carta won for us in the rights of the individual under the law *that we have given to India* We have now set ourselves to achieve in co operation with Indian statesmanship the far greater miracle of building up in India within the space of a few years that superstructure of responsible freedom which we here took centuries to complete

In spite of suspicion we still retain the underlying goodwill and confidence in India but above all there is need for goodwill between Indians themselves There perhaps lies the *greatest difficulty and danger before India* and one which our own form of democracy with its rivalry for power between parties has tended to accentuate

The problem of India is not to be solved by catch phrases like We are fighting for democracy Why not therefore give India what she wants? where is the body in existence or to be constituted which can in that sense speak for India or express an agreed demand?

There could be no more typical instance of loose thinking than that clamour for what is called the application of the Atlantic Charter to India and the protest against the Prime Minister's explanation that article 3 of the Charter primarily referred to restoration of national life in Europe and in any case did not qualify in any way our own declarations as to India's future with which it is in entire harmony

I can well imagine if in answer to a demand for statement of our Indian policy we had answered merely in terms of the Atlantic Charter derision and indignation would have met so vague and unsatisfying a reply The answer we gave last August is no less far reaching in its scope and far more satisfying in the procedure envisaged and in the pledge involved

It defined as our proclaimed and accepted goal that free and equal partnership in the British Commonwealth which is usually referred to as Dominion Status

That *status combining all the advantages* if unfettered freedom with those of an association of incalculable value both in peace and war is, I venture to assert the highest in the world.

Mr Amery declared that the attainment of full Indian self-government could not be indefinitely delayed by the veto of some extreme section on some issue of detail If agreement by the *main elements on the main principles* of the constitution was reached the detail would not present any insuperable difficulty *in India or elsewhere* He did not believe that Indian statesmen had so little constitutional capacity genuine patriotism or desire to see India governed by Indians that they would prefer to disagree indefinitely rather than evolve some solution reasonably acceptable all round.

The task before Indian statesmanship was immensely difficult, but not hopeless Beneath

all differences of religion culture race and political structure there was an underlying unity and if some such sort of a unity had not existed it would have had to be invented. The immediate features of the Indian problem were the outcome of underlying difficulties and reluctance to abandon accustomed methods Only recognition by Indians of those difficulties could solve the present deadlock

Meanwhile added Mr Amery there is no immediate solution that we can bring forth as a temporary Interim step forward which does not run the risk of prejudicing the ultimate solution Political status whether described as Dominion Status or otherwise is not conferred like a decoration but acquired by the power to exercise and defend it and today that power is more necessary than ever before In its turn it can only be effectively sustained by the general physical and intellectual vigour of the national life

Liberal Federation.—The annual session of the National Liberal Federation was held at Madras in Christmas week Sir Bijoy Prasad Singh Roy presided

Sir P S Sivaswami Aiyer Chairman of the Reception Committee said The present deadlock cannot be considered to be merely the result of a domestic problem arising from the failure of the two major communities to come together It is far more largely due to the issue between Britain and ourselves in regard to the unwillingness of the former to transfer real power to the people of India as amply evidenced by the scheme for the expansion of the Executive Council

Sir Sivaswami advocated closer union with the British Commonwealth and alliance and co operation with the powers that have combined to overcome the totalitarian powers He characterised the Congress ideal of independence as visionary and dangerous and the means and methods advocated by them as impracticable and futile

Proceeding he said While I have indicated the course which our party has to follow our attitude must not be understood as any approval of the policy which has been pursued by the Government The Government have no doubt repeatedly declared that they will help India to achieve the goal of a free and equal partnership in the British Commonwealth soon after the conclusion of the war The controversy now between the British Government and ourselves relates to the conditions which the Government have attached to their promise to bring the new relationship into existence Some of these conditions are of a character which it is not possible for us to fulfil

The most serious difficulty put forward is the adjustment of the claims of the Muslim community The Hindu community has never been unwilling to concede any reasonable demands of the Muslim community or to provide safeguards for their just rights But what is to happen if it is impossible to reach an agreement? The conflict between the claims of the two communities is largely the creation of British policy and the British Government cannot avoid responsibility for its solution. The demand of the Muslim community for the division of India into Pakistan and Hindustan is one which no Hindu or for that matter anyone sincerely interested in the national integrity and welfare of India can possibly agree to In any negotiations for the settlement of controversies of this character we often reach a point where it is impossible to come to an agreement The Hindus consider that the claim of the Mahomedans is one which will end in the vivisection of India and will expose her to external danger and internal anarchy and confusion Upon this point the Hindus cannot give in under any circumstances

The other matters referred to by Mr Amery are comparatively easier to settle The present deadlock is mainly due to the feelings of suspicion and distrust which have pervaded the relations between the people and the Government and between the different communities *inter se* These feelings have been encouraged by the attitude and policy of the British Government and the unreasonable intransigence of any particular party must be overcome by the authorities responsible for the transition. One of the devices which have been adopted for creating and keeping alive feelings of hostility is the separate electorate for the Hindus and Muslim which was brought into existence by Lord Minto

Referring to the expansion of the Executive Council in the Government of India he said, This expansion has evoked no enthusiasm among the people for two reasons It has not completely Indianised the Council and has not transferred the most important portfolios like defence finance home and communications to Indian hands It may perhaps be suggested that they are too important to be transferred to Indians during a time of war The handsome tribute which the Viceroy paid a few days ago to the capacity wisdom and spirit of co-operation of the non official Indian members who have been recently appointed is gratifying and there is no reason to apprehend that if the key position in the ministry were transferred to non-official Indian members the safety of the country or the efficiency of the administration would be imperilled

Referring to the future constitution of India, Sir Sivaswami Aiyer said. Mr Amery thinks that the British form of democracy is unsuitable for India and has been good enough to investigate the whole field of political structures and look for precedents in many directions in the world The British pattern of a democratic constitution is the one which has worked most satisfactorily and an Englishman may very well pardon us for our desire to follow the British model which has worked so well and with which our study of history has made us familiar

Referring to some of the gravest defects in the policy of the British administration of India which the war has brought into prominence he said We were assured by the military authorities that all necessary steps had been taken for the adequate defence of the British possessions in Burma and Malaya, and that the forces and the equipment provided for them were ample and sufficient to repel

any attack by our enemies The progress of the Japanese arms in Malaya the evacuation of Penang and the attack of Hong Kong said to be the Gibraltar of the East are some of the latest incidents of the war which show how ill founded were the boastful assertions of confidence in the sufficiency and preparedness of the British forces in this region and have affected the prestige of the British power If the Government had embarked in time upon the production in India of armament and basic industries we might have been better prepared to avert the disaster which has overtaken the British navy in the East It is only subsequent to the war that the Government has turned their attention to the remedying of some of these defects and it is very doubtful whether even at the present time the Government realise the wisdom and urgency of carrying out the industrialisation of India By serious steps have been taken by the Government of India for the encouragement of ship-building in India on any large or adequate scale and no one who has read the accounts of the progress recently made by Australia in the matter of ship-building can accept the plea of the Government that their omission to launch a vigorous programme of ship building is due to the difficulty of procuring the supply of the necessary engines or other materials from America as adequate or satisfactory We in India have a deep rooted suspicion that the reason why Britain has not encouraged a policy of industrialisation of India is the fear of Indian competition with British industry after the war The war affords excellent opportunities for the creation of new industries and especially basic and key industries and it is to be hoped that advantage will be taken of these opportunities by the Government of India under the inspiration of the non-official element of the expanded Executive Council

Presidential Address.—Sir Bijoy Prasad in his presidential address said In view of the chaos of political thought and undisciplined action the need for a united front for the achievement of our political advancement is great The group spirit the partisan bias class conflict competing self interests—all this is clogging the path of our progress It is unfortunate that in the absence of cohesion amongst the different political parties communal and sectional movements are gaining strength The energy of the nation is being dissipated over a host of sectional causes In normal times we could wait for the slow progress whereby movements gain in strength gradually and make for effective united action But the present situation is likely to deteriorate beyond redemption if it be left to take its own course Signs are visible which make it clear that the cause of democracy is in jeopardy I feel that our political struggle to be effective and fruitful must move around the orbit of constitutionalism it must seize every vantage of power for further conquest of the State machinery In sober realism the transference of political power to India can only take place through the consent of the British nation. Because in theory the Imperial Parliament is the sole Constituent Assembly of the British Empire All this does not rule out the wresting of political power of the creation of proper sanctions for achieving the desired political goal If the political system is to be suited to the new needs and demands of the country it must be fashioned by Indians themselves In the circumstances the Constitution of the country must be adapted to its requirements and should represent the will of the people

It is very unfortunate that in a land marked by comprehensive synthesis at every turn of historical process the theory of a hostile and dual attitude is gaining ground The Pakistan movement as propagated by the Muslim League is a challenge to the fundamental unity running through the whole continent of India it is a repudiation of the unity of purpose which underlies the external multitudinous ramifications of society it encourages an attitude towards life where emphasis is placed on differences and incompatibilities in scorn of the impulse of cohesion Such a scheme leaves society open to the assaults of chaos and anarchy The Pakistan movement is undemocratic as it perpetuates the two-nation theory in the political economic and social planes As a political reality it has little justification To cut out an Indian province predominantly Muslim from the vitalising effect of the Federation of other provinces or to create conditions for the coalescence of the Muslim dominated provinces into a Federation as the counterpart of the Indian Federation of the Hindu-dominated provinces is not a step forward in the democratic path of progress It is an eloquent and passionate preaching of communal ascendancy in defiance of social harmony Such a scheme contains contradictions which are menacing in the ultimate analysis

The mere pledge of Dominion Status does not inspire enthusiasm amongst our countrymen because it is fastened round with three vague conditions (1) there is no definite time limit at the end of which the pledge will be redeemed (2) the transfer of political powers should be consistent with certain historic and other obligations which the British Government have towards India (3) the right of self determination will be conceded in the event of agreement amongst Indians themselves This threefold brake emphasised in the recent declarations of the Viceroy and the Secretary of State for India has rendered the pledge illusory and incapable of being redeemed The history of British rule in India is strewn with many a broken pledge and they have honoured such pledges only when the Indian national demand proved inexorable It is a sad comment on British statesmanship

The declaration by the British Prime Minister that the Atlantic Charter so far as it relates to the right of all peoples to choose the form of Government under which they will live will not be applicable to India has disappointed Indians greatly and it has deepened their suspicion that Great Britain is not sincere about her war aims and in her declarations that this struggle is for the creation of a new world-order and for the vindication of Democracy

One need hardly remind the authorities that unless Indians are definitely assured that they too will have equal opportunity of being liberated when the new democratic world-order

gathered in on the victory of the Allied powers in the war it is more than human to expect that India will prove enthusiastic in supporting Great Britain in this struggle and would strain her every nerve in contributing to the Allied victory The psychological effect of the reconstitution of India s just claim for political emancipation in return for her contribution to this struggle for the vindication of Democracy should be adequately appreciated Four hundred millions of people of this sub-continent with ancient traditions of culture heroism and sacrifice cannot be coerced to co-operation merely by the logy of Nazi aggression The Liberal Federation has recognised that the present time is not congenial for bargaining though India s grievances are profound and many and it specifically asked that the Central Government should be so reconstructed as to have by convention a fully national character and the British Government should not ordinarily interfere with any policy that has the support of such an Executive and the Central Legislature All this could be done within the limitations of the Constitution Act of 1935

The war has already reached our frontiers To stand by and watch the vandalism of infamous aggressors invites disasters on us Our grievances against British rule are great and grave but we have a duty to our own country We cannot calmly see our country overrun by plunderous hordes We must resist them we must co-operate with those who are in the field to resist them Nazi Germany and Imperial Japan have threatened our peace and security they are stretching themselves for their own expansion they are menacing the basis of civilisation in which we are interested The situation calls forth our willing services and sacrifices for the victory of the Allies in the cause of Indian Democracy If India falls a victim to the anti-christian powers the cause of our political progress will be definitely put back and she will have to undergo ruthless suppression for an indefinite period of time It is for the sake of India that Indians should offer their services and resources This is not the time to bargain on the doctrinal plane although we should not stop impressing the British Government that for fuller utilisation of the willing co-operation of India the settling of political accounts is urgent As realists we cannot remain indifferent to the need for co operation in war efforts and to the necessity of political adjustment There is a visible bond between these two pressing issues

In the sphere of politics the transfer of power to Indians is necessary In the field of economics primary efforts should be the augmentation of national wealth with equitable distribution amongst all the dynamic factors of production In social matters we should rise from the slough of listlessness and make our society more vigorous and responsive But signs are not wanting that the political objective is being neglected in the scramble for group-supremacy that economic legislations are directed towards the growth of class antagonism without paying heed to the creation of national wealth and that social apathy and instability are perpetuated by a false concept of individualism We must overcome the spirit of brooding dissatisfaction that prevails in the country I feel that the time is nigh for an active rally around the flag of constructive nationalism for the attainment of our objectives I trust the Federation will keep this in mind

Resolutions —The session passed the following resolutions

The National Liberal Federation of India feels that the war of aggression started by Nazi Germany supported by Fascist Italy and Imperial Japan has proved to be a great menace to freedom peace and tranquillity in the world The Federation is of the opinion that the forces of progress and Justice in this conflict are represented by the Allied Powers such as Great Britain America Soviet Russia and China The Federation feels that the present War situation has brought India into the front line of the conflict and therefore appeals both to the Government and the people to view the situation realistically and mobilise the resources of the country in men and material to protect the lives of India s teeming millions from the imminent danger which threatens the country At the same time it feels that the unity between the Government and the people required for the necessary effort will not be possible unless a new psychological atmosphere is created by a change in the policy of His Majesty s Government towards India which is urgently called for

The National Liberal Federation of India protests against the Prime Minister s speech excluding India from the scope of the Atlantic Charter and the recent speeches of Mr Amery and Lord Linlithgow reiterating the determination of His Majesty s Government to make no change in their policy towards India

The Federation while regarding the recent expansion of the Viceroy s Executive Council by the appointment of additional Indian members as a step in the right direction considers it as entirely inadequate to meet the needs of the situation It is of the opinion that the Central Government should be so reconstructed as to have a fully national character The Executive Council should consist entirely of non official Indians who should take charge of all portfolios including those of Defence and Finance The reconstructed Government should deal with all questions of policy on the basis of joint responsibility and the British Government should not ordinarily interfere with any policy that has the support of the Indianised Executive and the Central Legislature

In regard to all Inter Imperial and International matters the reconstructed Government should be treated on the same footing as Dominion Governments The Federation further demands that in order to remove the doubts and apprehensions that have been created as to the genuineness of the intentions of His Majesty s Government regarding the future constitutional status of India it should be immediately declared that India will enjoy the position of equality in regard to both status and functions with England and the Dominions within a period not exceeding two years after the conclusion of the war

In the opinion of the Federation the gravity of the International situation makes the

acceptance of the demands put forward above a matter of urgent importance It is necessary at this juncture that the Government should take bold and statesmanlike steps to bring about a unity between the people and the Government in the best interest of both India and England.

The National Liberal Federation of India is emphatically opposed to any idea of dividing India into Pakistan and Hindustan on communal basis Such a division in the opinion of the Federation is anti national and inimical to the unity and cohesion of India and entails the danger of disintegrating the national units resulting in complete disruption of the nation

The National Liberal Federation while agreeable to the safeguarding of the interests of all sections of the people considers that the aim of India's political evolution should be a democracy not based on considerations of race or creed and therefore the Federation is definitely opposed to the permanent existence of communal electorates and the present Communal Award at the same time as it would not be practicable to effect this reform immediately owing to existing conditions It considers that steps should be taken towards the elimination of separate communal electorates by the creation of joint electorates with reserved seats for a definite period

Appeal to Premier—A joint statement and appeal to the Prime Minister of Great Britain was made early in the new year by a number of prominent Liberal and other moderate politicians It said —

The gravity of the international situation compels some of us who have spent long years in the public life of India to make this appeal to you to realise the urgent necessity for transforming the entire spirit and outlook of the administration in India Detailed discussions of the question of the permanent constitution may well wait for more propitious times until after victory has been achieved in this titanic struggle against the forces which threaten civilisation

But some bold stroke of far sighted statesmanship is called for without delay in India at this hour of growing danger to her safety to enlist her whole hearted and active cooperation in intensifying the war effort Millions of men and women are required for the adoption of effective measures designed to protect the civilian population The heart of India must be touched to rouse her on a nation wide scale to the call for service undistracted by internal and domestic differences

Is it not possible for you to declare at this juncture that India will no longer be treated as a dependency to be ruled from Whitehall and henceforth her constitutional position and powers will be identical with those of other units in the British Commonwealth? Such a declaration should we suggest be accompanied by concrete measures calculated to impress the people that in co-operating with the war effort they are safeguarding their own freedom These measures are

(1) The conversion and expansion of the Central Executive Council into a truly national Government consisting entirely of non-officials of all recognised parties and communities and in charge of all portfolios subject only to responsibility to the Crown

(2) The restoration in provinces now ruled autocratically by Governors in accordance with Section 93 of the Government of India Act of popular governments broadly based on the confidence of different classes and communities, failing this the establishment of non-official Executive Councils responsible to the Crown as proposed for the Centre

(3) The recognition of India's right to direct representation through men chosen by the national government in the Imperial War Cabinet (should such a body be set up) in all Allied war councils wherever established and at the peace conference and

(4) Consultation with the national Government precisely on the same footing and to the same extent as His Majesty's Government consult the Dominion Governments in all matters affecting the Commonwealth as a whole and India in particular

These are war measures whose adoption need in no way prejudice the claims or demands of different parties in regard to India's permanent constitution But knowing intimately the feelings and aspirations of our countrymen as we do we must express our conviction that nothing less than the inauguration of this policy can resolve the crisis in India The urgency of immediate action cannot be over-emphasised We appeal to you in all sincerity but with the greatest emphasis to act while there is still time for such action so that India may line up with the other anti Axis Powers on a footing of absolute equality with them in a common struggle for the freedom of humanity

Since this is a matter of great public importance we propose to make it public after it has reached you

The signatories are —Mr T R Venkatarama Sastri Mr Srinivasa Sastri Sir P S Sivaswami Aiyar Sir Jagdish Prasad Kunwar Sir Maharaj Singh Mr Jayakar Sir Chunilal B Mehta Sir Rahimtoola Chinoy Sir M V Joshi Dr Sachidanand Sinha Mr Mahomed Yunus Sir S Radhakrishnan and Sir Tej Bahadur Sapru

Since the cable to the Prime Minister was sent Sir R P Paranjpye (Poona) and Mr Jamshedji Nusserwanji (ex Mayor) Karachi have signified their willingness to join the representation

Leaders' Conference.—It took some time for Mr Churchill to reply to this appeal as he was then in America Shortly after his return home he announced the Cripps Mission Meanwhile another session of the Non Party Leaders Conference was held in Delhi in February 1942 Sir Tej Bahadur Sapru said —

It is stated that the August Declaration anticipated the wisdom of the Atlantic Charter When we ask if the Charter applied to India the reply is No Surely the English people ought to be able to say a simple thing in plain English language I want England to make up her mind at once that India is no more to

remain as a Dependency We want to defend ourselves hence our demand. Mr Churchill alone can answer clearly bravely and courageously the call of statesmanship If Mr Churchill should fail, then woe betide India and England.

General Chiang Kai-Shek's fare well message (See Chapter on Indian National Congress) formed the principal theme of vigorous and enthusiastic speeches.

The speakers particularly Mr M R Jayakar underlined the Marshal's expression of hope that the British Government would without waiting for demands from the Indian people grant them real power forthwith The speakers also declared that only a National Government could effectively conduct the war and that a National Government would have given a greater and better welcome to the Marshal and Madame

The conference passed a resolution recording its high appreciation of the honour done to *India by the visit of Their Excellencies General* Chiang Kai-Shek and Madame Chiang Kai-Shek and its whole hearted admiration of the heroic struggle for national freedom carried on by the Chinese people under their gallant and inspiring leadership

Sir C R Reddy moved a resolution urging that the persons selected by the Government of India for representation on the War Cabinet and the Pacific War Council in London should be non official Indians commanding the confidence of the public

On Sir Maharaj Singh's motion the conference passed a resolution expressing the opinion that in the Provinces the rule of Governors under section 93 of the Government of India Act should forthwith cease and that popular Governments enjoying public confidence should be established

The main resolution was moved by Mr M R Jayakar It expressed profound dissatisfaction that all real power in the Central Government is still concentrated in British hands inasmuch as the key portfolios of Defence Finance Home and Communications continue to be withheld from Indians The resolution called for an abandonment at this critical stage of the existing policy of the British Government and urged the immediate adoption of the following measures by His Majesty's Government

(1) A declaration that India shall no longer be treated as a dependency to be ruled from Whitehall and that henceforth her constitutional position and powers will be identical with those of the other self governing units of the British Commonwealth

(2) During the period of the war the Governor General's Executive Council shall be reconstructed as a truly National Government functioning on the basis of joint and collective responsibility and consisting entirely of non officials enjoying public confidence and in charge of all portfolios, subject to responsibility to the Crown and in regard to Defence without prejudice to the position of the Commander in Chief as the executive head of the defence forces

(3) The British Government should recognise the right of India to direct representation through persons chosen by the National Government in all allied war councils wherever established and at the peace conference

(4) The National Government should be consulted in all matters precisely on the same footing and to the same extent as His Majesty's Government consult the Dominions.

Cripps Mission.—As if in reply to the Indian Leaders appeal Mr Churchill said in Parliament on March 11 1942

The crisis in the affairs of India arising out of the Japanese advance has made Britain wish to rally all the forces of Indian life to guard their land from the menace of the invader In August 1940 a statement was made about the aims and policy which we are pursuing in India This amounted in short to a promise that as soon as possible after the war India should attain Dominion Status in full freedom and equality with this country and other Dominions under a constitution to be framed by Indians by agreement amongst themselves and acceptable to the main elements in the Indian national life

This was of course subject to the fulfilment of our obligations for the protection of minorities including the depressed classes and our treaty obligations to the Indian States and to a settlement of certain lesser matters arising out of our long association with the fortunes of the Indian sub continent

However in order to cloth these general declarations with precision and to convince all classes races and creeds in India of our sincere resolve the War Cabinet have agreed unitedly upon conclusion for present and future action which if accepted by India as a whole would avoid the alternative dangers either that the resistance of a powerful minority might impose an indefinite veto upon the wishes of the majority or that a majority decision might be taken which would be resisted to a point destructive of internal harmony and fatal to the setting up of a new constitution

We had thought of setting forth immediately the terms of this attempt by a constructive contribution to aid India in the realisation of full self government We are however apprehensive that to make a public announcement at such a moment as this might do more harm than good.

We must first assure ourselves that our scheme would win a reasonable and practical measure of acceptance and thus promote concentration of all thought and energies upon the defence of their native soil

We should ill serve the common cause if we made a declaration which would be rejected by the essential elements, in the Indian world, and which would provoke fierce constitutional and communal disputes at a moment when the enemy is at the gates of India

Accordingly the Prime Minister continued, we propose to send a member of the War Cabinet to India to satisfy himself on the spot by personal consultation that the conclusions upon which we are agreed and which, we believe, represent a just and final solution will achieve their purpose The Lord Privy Seal and Leader

of the House Sir Stafford Cripps has volunteered to undertake this task

He carries with him the full confidence of His Majesty s Government and he will strive in their name to procure the necessary measure of assent not only from the Hindu majority but also from those great minorities amongst which the Muslims are most numerous and on many grounds pre-eminent

The Lord Privy Seal will at the same time consult with the Viceroy and the Commander in Chief on the military situation bearing always in mind the paramount responsibility of His Majesty s Government by every means in their power to shield the people of India from the perils which now beset them We must remember that India has a great part to play in the world struggle for freedom and that her helping hand must be extended in loyal comradeship to the valiant Chinese people who have fought alone so long

We must remember also that India is one of the bases from which the strongest counter blows must be struck at the advance of tyranny and aggression

Sir Stafford Cripps will set out as soon as convenient and suitable arrangements can be made He will command in his task the heartfelt good wishes of all parts of the House and meanwhile no words will be spoken or debates held here or in India which would add to the burden he has assumed in his mission or lessen the prospects of good result

Liberals Reaction.—Sir Bijoy Prasad Singh Roy President of the Liberal Federation of India Sir Chimanlal Setalvad and Mr Nanubhai Bharucha Honorary Secretary of the Federation saw Sir Stafford Cripps on April 2 and communicated to him the following views of the Liberal Federation on the draft declaration (See Chapter on Indian National Congress)

The Council of the Liberal Federation has very carefully examined the draft declaration brought by Sir Stafford Cripps It welcomes the proposals to make India a self governing dominion with the same status and functions as are enjoyed by Great Britain and other members of the Commonwealth On examination of the different heads of the proposals the Council feels that the provision giving liberty to any province not to accede to the Indian Union is fraught with serious difficulties and dangers The creation of more than one Federal Union in India having their own separate armies may result in certain conceivable circumstances in a conflict between them It would almost immediately lead to customs barriers and complicated questions about ports railways existing public debt etc would arise More over the weakness of the military organisation of the one or the other of the different Unions will seriously impair the safety and defence of India as a whole

The Council further feels that communal feelings would be further exacerbated in the course of carrying out the process of arriving at a decision about accession or non accession

All these and other considerations and the serious dangers and difficulties should be fully considered before His Majesty s Government finally decide to implement these proposals

The Council has always been of the view that the interests of different communities should be adequately safeguarded and that the different communities should have proper voice in the governance of the country But the proposals now made go far beyond the necessities of the case and will seriously affect not only the unity and solidarity of India but her stature and influence in the Commonwealth of Nations

One of the effects of the proposals is that the question whether a Province accedes to the union or not will in the last resort be determined by a plebiscite unless 60 per cent of the lower house of the legislative vote for accession The plebiscite vote is to be determined by a bare majority The Council feels that the decision of such momentous question should not be concluded by a bare majority but that some minimum percentage say at least 55 per cent should be prescribed The Council also sees no reason why women who are entitled to vote for the elections to the legislatures and can be and are members of the legislature should be denied a vote in the plebiscite

With regard to the representation of Indian States on the constitution making body the Council urges that the people of the States should be given a voice in the selection of the representatives of the States on this body

On the subject of defence the representation of India on the War Cabinet and the Pacific War Council is satisfactory so far as it goes But this should not stand in the way of the appointment of an Indian as a Defence Member Such an appointment will have a tremendous effect in producing the necessary psychological reaction which will bring the Indian people whole heartedly in the war effort

The Council of the Liberal Federation would also urge the British Government to appreciate the fact that totalitarian aggression involves totalitarian defence and that total war cannot be won unless the Indian nation as a united political entity throws itself into this war heart and soul Malaya Singapore and Rangoon serve as grave warning as to how even in modern warfare technical skill alone without the spontaneous support of the millions on the home front can achieve little on the military front It is the considered opinion of the Council that full co operation of the Indian people will not be secured in the war effort unless an Indian Defence Member is appointed

With regard to the question of reconstituting the Executive Council of the Governor General the Liberal Federation Council would suggest that the Governor General s Council should be nationalised so that by conventions in the near future the Governor General may assume the position of a constitutional head of his Government

Sapru Jayakar Memorandum.—Sir Tej Bahadur Sapru and Mr M R Jayakar in a joint memorandum to Sir Stafford Cripps pressed for the inclusion of an Indian Defence Member in the Governor General's Executive Council, and among other things asked

that the majority required for any decision by a provincial legislature to adhere or not to adhere to the Union should not be less than 65 per cent of the Indian members of the Lower House present at the meeting at which the decision is taken The memorandum opposed a plebiscite for the purpose and calls attention to the necessity for the restoration of popular Governments in the provinces

Sir Tej Bahadur and Mr Jayakar said —

We observe from the draft declaration that excepting clause (e) there is very little in the declaration about the changes to be introduced in the constitution of the Government of India during the period of the war It may be that instructions have been or may be issued to His Excellency the Viceroy to bring about the necessary changes in the composition and the constitution of the Executive Government If any such instructions have been issued, we are not aware of them but we must point out that Indian opinion attaches the greatest importance to the transfer of real power in the Central Government at the present moment and it is for this reason that we emphasize the necessity of the complete non officialization of Government without the reservation of any portfolio during the interim period.

We realize that the transfer of absolute control over defence at the present juncture when it is necessary that there should be unity of direction and control of military policy would not be in the best interests of England and India But we fail to see how this end will fail to be achieved by the appointment of an Indian Defence Member, who we presume will be a man possessed of a due sense of responsibility and would be only too willing to accept expert advice and to work in the closest co-operation with the War Cabinet

While we appreciate the necessity of unity of policy and control in matters of defence we think in common with most of our countrymen that the appointment of an Indian Member in charge of Defence working in close association and co-operation with the War Cabinet and willing to accept expert advice will be taken at this stage as an unmistakable token of the reality of the transfer of such power and as a symbol of the confidence of His Majesty's Government in the people of this country We have no doubt that the object of His Majesty's Government is that the people of this country should feel that this is their own war but we feel that the requisite sense of responsibility for the defence of the country can best be stimulated by an appeal to their sense of pride and self esteem and by the two countries—England and India—completely identifying themselves with each other in the common cause of defending this country We strongly hold that it would be a mistake to ignore the strength of the sentiment of the people on this subject

We desire to state unequivocally that we are strongly in favour of the Indian people rendering every possible help in the successful prosecution of the war At the same time, we feel equally clearly that in order to achieve that end, it is necessary that, during the period of the war there should be an Indian Defence Member of the Council of the Governor General. We are fully aware of the arguments to the contrary and we do not wish to overlook or minimise them but we feel that the arguments in favour of the adoption of this step are over whelming

The adoption of an Indian Defence Member will have a great effect on Indian psychology It will inspire the people with confidence and materially help in altering the present mentality of the people which in our opinion is not adequately zealous in the successful prosecution of the war We do not in the slightest degree desire that there should be any conflict between his powers and those of the Commander in Chief in technical matters or in decisions about the movements or disposition of the troops or similar other matters We think that the presence of such a member will far from weakening the military position in India strengthen it and the political effects of this step will be very wholesome

Besides there are in our opinion large and inexhaustible resources of man power remaining untapped in the youth of the country which can be mobilized by methods which a Defence Member drawn from the people can alone effectively employ His approach to this store house of strength will be by methods vitally different from those which the British official mind has hitherto employed with such little effect We venture to suggest that at this critical time when the danger is daily approaching the old world ideas of keeping Indians in the perpetual position of unarmed helplessness and also the feelings of distrust and suspicion which have led to this policy should be forth with abandoned and a new era of hope and confidence inaugurated leading to a joint effort by England and India on terms of mutual reliance association and truthfulness It is only such an association that would be productive of the maximum effort of this country resulting eventually in a victory based on the self esteem honour and willing sacrifice of a proud people

On all these grounds we desire strongly to press the inclusion of an Indian Defence Member in the Executive Council as otherwise the declaration whatever its other merits may be will fail to achieve the object it is intended to serve It should not in our opinion be difficult to define the spheres of activity of the Defence Member and of the Commander in Chief so as to avoid conflict nor should it be difficult to secure close co-operation and co-ordination between the two

While we recognize the justice of allowing any province of British India the liberty of remaining out of the new constitution and of retaining its present constitutional position, we are not free from considerable doubt and anxiety about the wisdom of the further provision which makes it possible for another Federal Union being established Such a Federal Union may in certain conceivable circumstances be a rival or hostile union. But apart from this, we cannot favour any step which may have the effect of breaking up the integrity of the country fostered by a long succession of Hindu

wider franchise over 6,000 000 women voters as compared with 315 000 provided by the acts of 1919 and 1919 The Act of 1935 secures representation for women for the Depressed Classes for industrial labour and for special interests and for the bulk of the small landholders small cultivators urban ratepayers as well as a substantial section of the poorer classes.

Powers of Provincial Governments — Under the old constitution the Provinces had no original or independent powers The local Governments were under the superintendence direction and control of the Governor General in Council and the Secretary of State for India The first step which the new constitution took was to create provinces with independence of their own and to assign to them a certain exclusive share of the activities of Government All subjects have been transferred to the control of the legislature The subjects which are classified as provincial are as indicated above exclusively dealt with by the Provincial Government which have power to make laws for peace and good government There are no more reserved subjects All subjects are transferred The administration of all these subjects have passed from the bureaucracy to the control of Ministers responsible to the legislature Such subjects include public order courts police prisons education, health and sanitation public works agriculture forests land revenue excise tolls unemployment and certain classes of taxation.

Generally the Ministers are entrusted with the administration of their own departments. Under the old constitution they were merely advisers of the Governor Under the new Constitution they are effective executives Only in those spheres where the Governor retains a special responsibility does he have the right to act independently of the Ministers should he differ from their views But normally such occasions are not frequent

Both the Upper and Lower Houses have power to initiate legislation except that Money Bills can be initiated in the Lower House only Should there be a difference of opinion between the two Houses with regard to a Bill the Governor has power to convene a joint session of the two Houses Any Bill affirmed by the majority in the joint session shall be taken to have been duly passed

Governors Powers —Under the new Constitution the Governor has almost the same special responsibilities as the Governor General except the one relating to financial stability and credit The Governor has not with standing the advice of his Ministers power to take whatever action he thinks necessary for the due discharge of his responsibility for preserving the peace and tranquillity of the Provinces

The following tables give the strength and composition of the Federal and Provincial Legislatures under the new constitution —

THE COUNCIL OF STATE.

Representatives of British India.

In the Punjab one of the Landholders seats is to be a seat to be filled by a Tumandar
[illegible] seat reserved for women are to be non communal seats

The Indian Legislature

War continued to overshadow the work of the Indian Legislature and several legislative and taxation measures were enacted and 10 amending Ordinances and 9 original Ordinances were promulgated during the year 1941 42 to promote the war effort The Central Legislative Assembly elected normally for three years completed the 8th year of its life on September 30 1942 and in all probability its life will be extended by another year

The Central Assembly held 14 sittings during the autumn session of 1941 and 32 sittings during the budget session of 1942 the Council of State held 8 and 10 sittings respectively during the corresponding sessions The Congress Party which constitutes the main opposition in the Central Assembly and had resolved to keep away from the sittings of the House since the Simla session of 1939 returned to the Assembly for one day only each session to fulfil the letter of the Law to prevent the seats of Congress Members from being declared vacant on account of continuous absence The Muslim League Party withdrew from the autumn session of the Central Assembly as a protest against the scheme of expansion of the Viceroy's Executive Council but returned to the House for the budget session of 1942

The Viceroy Lord Linlithgow did not address a joint session of the two Houses during the year

Governor General's Ordinances.—After the invasion of Norway the Government of India Act 1935 was amended empowering the Viceroy to make Ordinances which would remain in force for the duration of the war and one year thereafter The original power restricted the life of such Ordinances to 6 months Lord Linlithgow enacted 19 Ordinances during the year ending March 31 1942 The important ones are —

The War Injuries Ordinance 1941 —This is an Ordinance to make provision for the grant of relief in respect of certain personal injuries sustained during the continuance of the present hostilities Section 4 of the Ordinance empowers the Central Government to make a scheme or schemes in accordance with the provisions of this Ordinance providing for the grant of relief in respect of the following injuries sustained during the continuance of the present hostilities namely —(a) war injuries sustained by gainfully occupied persons (with such exceptions if any as may be specified in the scheme) and by persons of such other classes as may be so specified and (b) war service injuries sustained by civil defence volunteers and authorise the Central Government or any authority authorised by the Central Government to make payments under the scheme By section 5 power is taken to ascertain the earnings of the person injured in respect of any period before he sustained the injury and to punish the person avoiding to satisfy the Government in this respect with fine which may extend to Rs 500 Under section 6 of the Ordinance any person who for the purpose of obtaining a payment of grant under a scheme either for himself or for any other person knowingly makes any untrue statement or untrue representation shall be punishable with imprisonment for a term which may extend to three months

The Active Service Ordinance, 1941 —This is an Ordinance to declare that certain persons shall be deemed to be on active service for the purposes of the Army Act the Air Force Act the Indian Army Act 1911 and the Indian Air Force Act 1932 By section 2 all persons forming part of and all persons who are employed by or are in the service of or are followers of or accompany any portion of His Majesty's Forces shall until such date as the Central Government may by notification in the official Gazette declare to be the date on which the present hostilities cease be deemed for the purposes of each of the said Acts to be on active service By section 3 of the Ordinance no punishment inflicted and no order passed or other action taken in any proceedings held under any of the Acts specified in section 2 shall after the commencement of this Ordinance be called in question in any court on the ground only that the person on whom the punishment was inflicted or to whose prejudice the order was passed or the action was taken was not on active service if (a) the act for which the punishment was inflicted or in respect of which the proceeding was commenced occurred on or after the 3rd day of September 1939 and (b) such person at the time the act was committed formed part of or was employed by or was in the service of or was a follower of or accompanied any portion of His Majesty's Forces

The Essential Services (Maintenance) Ordinance 1941 —This Ordinance makes provision for the maintenance of certain essential services By section 3 this Ordinance shall apply to all employment under the Crown and to any employment or class of employment which the Central Government or a Provincial Government being of opinion that such employment or class of employment is essential for securing the defence of British India the public safety the maintenance of public order or the efficient prosecution of the war By section 4 power is taken to order persons engaged in certain employments to remain in specified areas Provision is made for declaring the disobedience of any lawful order given to him in the course of employment or without any reasonable excuse abandoning such employment or absenting himself from work or departure from any area specified in the order an offence under the Ordinance Penalties and procedure are provided for under section

The Special Criminal Courts Ordinance 1942.—This Ordinance provides for the setting up of special criminal courts of Special Judges Special Magistrates and also Summary Courts It shall come into force in any Province only if the provincial Government being satisfied of the existence of an emergency arising from a hostile attack on India or on a country neighbouring India or from the imminence of such an attack by notification in the official Gazette,

declares it to be in force in the Province, and shall cease to be in force when such notification is rescinded It is the first duty of Government to do all it can to protect the law abiding population against such outbreaks and to enable Government to act effectively It is essential that it should be able to apply deterrent penalties to offenders with the minimum of delay The Penalties (Enhancement) Ordinance and this Ordinance have this object in view Some of their provisions may at first sight seem to be severe but when the circumstances in which and the persons to whom they are to be applied are remembered no one can say that they go too far

The Motor Vehicles (Drivers) Ordinance 1942.—This is an Ordinance to provide for the requisitioning, on behalf of Government of the services of persons capable of driving motor vehicles By section 3 a Provincial Government is authorised to ask any licensing authority to prepare for the Province concerned a register showing the names of such persons within the Province who are capable of driving a motor vehicle By section 4 power to requisition the services of any of the persons entered in the register is taken The services of persons so requisitioned shall be utilised within the Province Penalties are provided for in section 6 of the Ordinance

The Cotton Fund Ordinance, 1942.—This Ordinance enables a fund to be established for financing measures for the benefit of the growers of cotton Section 2 of the Ordinances imposes an additional duty of customs on raw cotton imported into any port in British India at the rate of one anna per pound Section 3 empowers the Central Government to utilise the proceeds of the additional duty in financing such measures for the benefit of the growers of cotton in India as the Central Government thinks fit

The Civil Pioneer Force Ordinance 1942.—This is an Ordinance to constitute a Civil Pioneer Force for service in British India and to provide for the organisation control and discipline thereof This Force will under section 4 of the Ordinance be required to carry out the construction or demolition of building the clearing of debris the building of roads the loading or unloading of transport vehicles etc Penalties are provided for major and minor offences in sections 11 and 12 of the Ordinance

War Risk Insurance of Factories—An Ordinance relating to compulsory Insurance of Factories was promulgated as the financial year closed It covers damages caused by the enemy or in combating the enemy to the plant and machinery and buildings of factories Damages resulting from destructive measures taken by the Government with a view to denying facilities to the enemy will also be covered The premium payable is 4% of value of the property payable in instalments cover being provided up to March 31 1944 The Government's liability is 80% of the damage and the insured will have to bear the first Rs. 1 000 or 20% of the claim whichever is greater Policies are accepted through insurance companies acting as Government agents

An Ordinance amending the War Risks (goods) Insurance, 1940, has made three important changes :

(1) That the definition of the expression War Risks now includes damages resulting from destructive action taken by or under orders of Government with a view to denying facilities to the enemy

(2) That if the premium for a quarter is changed power has been taken to charge the higher rate to persons who have already taken policies at the lower rate

(3) That the goods owned by firms carrying on business in British India which are situated *in the State area inside the Cochin port limits* and also inside the municipal limits of Ernakulam and Mattancherri are also covered by this amendment on a compulsory basis

CENTRAL BUDGET 1942 43

The Central Budget for 1942 43 was presented to the Central Assembly by Sir Jeremy Raisman Finance Member on February 28 1942 It disclosed a revenue deficit of Rs 17 crores for 1941 42 and a prospective deficit on the present basis of taxation of Rs 47 crores in 1942-43 The revised estimate of Defence expenditure for 1941 42 was placed at Rs 102 crores This expenditure for 1942 43 was estimated at Rs 133 crores The Finance Member stated that this was only a fraction of the total sum being spent in India on the war He announced that the amount of expenditure on Defence services and Supplies that the Government of India expected to recover from His Majesty's Government under the operation of the Financial Settlement would amount to about Rs 200 crores for 1941 42 and exceed Rs 400 crores in 1942 43 The share of the provinces in the income tax would be he stated 7 39 crores in 1941 42 and Rs 8 37 in 1942-43 The Finance Member observed in this connection that this is considerably more than the total sum which at the time of the Niemeyer Award the provinces were expected to receive at the end of the ten year devolution period or than ever appeared to be possible before the outbreak of the war

The total revenue estimates for 1942 43 were placed at Rs 140 crores as compared with Rs 129 62 crores in the revised estimates of 1941 42 The yield from customs duties was taken at Rs 30 crores as against Rs 36 crores revised The Finance Member explained that this reduced estimate was due to a considerable drop in imports expected as a result of extension of the war to the Pacific The yield from Corporation Tax and Income tax together with the Central Surcharge was expected to increase by over Rs 4 crores and the collections of the Excess Profits Tax were put at Rs 20 crores as compared with Rs 8 crores in the current year On this basis the Finance Member stated the divisible pool of Income-tax was expected to increase to Rs 25 75 crores. On the assumption that the sum to be retained by the Centre from the provincial moiety would be maintained at Rs 4½ crores, the share of the provinces in 1942-43 was expected to reach the figure of Rs 8 37 crores

DEFENCE EXPENDITURE.

The Defence Budget for 1942-43 was placed at Rs 133 crores made up as follows —

(1) Basic normal budget	36 77 crores
(2) Effect of rise in prices	6 52
(3) India's war measures	81 30
(4) *Non effective charges*	8 41

Of the total amounts shown roughly Rs 47 crores the Finance Member stated represented capital expenditure and Rs 86 crores annual recurring expenditure India's Defence expenditure he further stated was only a fraction—about one fourth—of the gross Defence expenditure likely to be brought to account in India's books during 1942 43 In other words the amount of expenditure on Defence Services and Supplies that the Government of India expected to recover from His Majesty's Government during 1942 43 under the operation of the Financial Settlement would exceed the enormous total of Rs 400 crores

Civil expenditure estimates showed increases amounting to Rs 9 63 crores as compared with the revised estimates for 1941 42 Chief provisions which resulted in this increased expenditure mainly related to essential measures connected with the war particularly Rs 4 crores for expenditure on *Civil Defence*

The financial position for 1942 43 was thus summarized by the Finance Member —

	Crores of Rupees
Civil estimates	54 07
Defence expenditure	133 00
Total expenditure estimate	187 07
Total revenue at the existing level of taxation	140 00
Prospective deficit	47 07

The Finance Member proposed to meet a part of this deficit by fresh taxation estimated to yield Rs 12 crores leaving a deficit of Rs 35 crs *to be covered by the borrowing* programme

The Finance Member then announced his fresh measures of taxation He proposed to tax incomes from Rs 1 000 to Rs 2 000 liable to tax at 6 pies in the rupee over the first Rs 750 of total income (subsequently however the exemption limit was raised to Rs 1 500 in deference to criticisms in the Assembly during Budget debates and discussions over the Finance Bill) This liability would however be completely discharged he stated if the assessee deposited one and a quarter times the amount of tax liable in a Defence Savings Bank Account from which sums could *not* be withdrawn till one year after the end of the war and on which 2½ per cent interest would be paid The Surcharge on Income tax was raised from the previous 6 per cent level to a scale which runs from 6 pies in the rupee on incomes between Rs 1 500 and Rs 5 000 to 9 pies in the rupee on the next Rs 5 000 1 anna 2 pies on the next Rs 5 000 and 1 anna 3 pies on the balance over Rs 15 000 the last being equivalent to a 50 per cent surcharge At the same time Corporation tax was raised to 1¼ annas in the rupee The Finance Member informed that for incomes not exceeding Rs. 6 000 an amount of the tax equal to half per cent of the Assessee's income would be *funded for repayment to him after the end of* the war

The Finance Member announced that the rate of Excess Profits Tax would be retained at 66⅔ per cent but as an incentive to *economy* in business administration he stated that Government would contribute an amount up to one tenth of the Excess Profits Tax paid to a reserve for the re equipment of industry after the war provided the assessee deposited double this amount The assessee's contribution to the reserve would be repayable within 12 months of the end of the war and till then would earn 2 per cent simple interest

The above measures of direct taxation after excluding repayable deposits were expected to bring in Rs 530 lakhs

The main proposal of indirect taxation was the levy of an emergency surcharge of one fifth on all customs import duties The only exceptions were *petrol* the tax on which was increased separately from 1 anna to 15 annas a gallon raw cotton on which the duty had been previously doubled and certain imports from Burma which were excluded by the operation of the Trade Agreement with that country The duty on imported salt was to continue at the old rate and the excise duty on kerosene was raised to the enhanced import duty The additional revenue from this overall surcharge was estimated at Rs 570 lakhs

The final proposal was an increase in posts and telegraphs rates to yield one crore The ordinary letter rate was increased from 1½ annas to 1¼ the postcard remaining unchanged The minimum rate for ordinary telegrams was raised from 10 annas to 12 annas and for express telegrams from Rs 1-4-0 to Rs 1-8-0 The surcharge on trunk call fees was also raised from 10 per cent to 20 per cent

Discussing the ways and means position the Finance Member gave a detailed exposition of the Sterling Debt Repatriation Scheme Under the compulsory Sterling Debt Repatriation, the total terminable stock acquired amounted he said, to Rs 97 crores Including the market purchases which preceded this first compulsory acquisition the total Sterling debt had been reduced by £101 million and the annual interest payments in sterling by over £ million The *second compulsory scheme* of repatriation which had recently been inaugurated in respect of the non terminable 81 ring loans would according to the Finance Member require about £70 million for the 2½ per cent and 3 per cent Stocks *Another £70 million would be required* at the end of 1942 43 for payments in connection with the 3½ per cent Stock The Finance Member stated that the Reserve Bank would be able to make these amounts available to Government without any strain on its Sterling resources on account of its continued large scale acquisition of Sterling

Answering some of the criticisms against the repatriation scheme the Finance Member stated that the real gain to the country lay in the

liquidation of the external obligations, which might prove an embarrassment in future and their replacement by internal debt

Railway Budget, 1941-42.—Introducing the Railway Budget on February 18 1942 the Communications Member Sir Andrew Clow stated that against the original forecast of a surplus of 11 88 crores the year 1941 42 was expected to end with a surplus of 26 20 crores which was 7 74 crores more than the actual surplus of 1940-41 For 1941 42 the total traffic receipts from State owned lines were expected to be 127 crores i e about 15 crores more than the previous year and 18 75 crores more than the original estimate Total working expenses including 12½ crores for depreciation were 73 13 crores or about 7½ crores more than the previous year Of the expected surplus of 26.20 crores 19 12 crores would go to general revenues and 7 08 crores to the depreciation fund In repayment of the loans taken from it in past years of deficit Of the 19 12 crores paid to general revenues 4 80 crores would be treated as current contribution while the balance of 14 32 crores would be taken in reduction of the arrears of contribution The liability of the railway revenues to general revenues at the end of 1941-42 in respect of past arrears would stand at 13 68 crores only while the outstanding loan from the depreciation fund would stand at 23 21 crores The amount in the railway reserve would stand at the end of the year at 0 79 crores

1942 43 traffic receipts were estimated at 125½ crores and working expenses at 70½ crores while the surplus was expected to be 27 95 crores of which 20 13 crores would be transferred to general revenues and 7 82 crores to the depreciation fund

The moratorium resolution keeping in abeyance the liability of railway revenues to the depreciation fund for the loans taken therefrom and to the general revenues for the arrear contribution expired with the close of the budget year 1941 42 If it were not renewed and the terms of the separation convention were acted upon strictly the entire railway surplus would go towards repayment of the loans taken from the depreciation fund As the general revenues cannot in the conditions created by the war afford to do without a substantial assistance from the railway revenues the moratorium has been extended by a year and Sir Andrew Clow promised that Government would in the light of the position reached by the autumn place before the House their proposals either for a revision of the existing convention or for further interim arrangements to meet the war situation only

During the course of the year there were a few enhancements in rates and fares The East Indian and the North Western Railways passenger fares were enhanced to bring them into line with those on other large railway systems while, with a view to preventing the increasing tendency to send goods by passenger trains the rates for parcels and luggage were increased by another two annas in the rupee leaving the existing exceptions e g newspapers intact In order to ensure a better use of wagon supplies at a time when they are badly wanted an extra charge of two annas in the rupee has been imposed on consignments of food grains of less than a wagon while the rebate on wheat exported west of Aden has been withdrawn All these changes take effect from the 1st of May 1942

During the year 1942 43 the B & N W and R & K Railways and two small branch lines will be purchased by the State at a cost of Rs 20 crores With this development the entire railway system of Northern India with the exception of unimportant light railways and some lines owned by Indian States will come under State management the mileage under State management thereby increasing from 17 000 miles to 24 000 miles and the number of railway employees in the service of the State will increase from 3 90 000 to over 5,00 000

Eastern Group Conference.

In order to co-ordinate the industrial war effort of the eastern countries belonging to the British Commonwealth of nations a Conference known as the Eastern Group Conference was held in New Delhi in October 1940 and was attended by delegates from Australia New Zealand South Africa North and South Rhodesia Kenya Tanganyika Newfoundland Zanzibar Burma Ceylon Malaya Hongkong and Palestine The Indian delegation to the Conference was an official one while the United Kingdom was represented by a Supply Mission headed by Sir Alexander Roger

The object of the Conference was to bring all the eastern industrial countries together as a single block for the production of war materials and to make them as far as possible self supporting for all supply purposes One of the functions of the Conference was to devise means to avoid duplication. Although the work of the Conference was limited to war supply problems, conversations not concerned with war supply were conducted outside the Conference proper under the aegis of the Commerce Department of the Government of India

Eastern Group Supply Council—The deliberations of the Conference led to the formation of a permanent body called the Eastern Group Supply Council under the Chairmanship of Sir Archibald Carter as the civil organisation responsible for co-ordinating supplies and the Central Provision Office as its military counterpart with Major General Holden as the Controller General of Army Provision, responsible for co-ordinating military requirements. The primary function of the Eastern Group Supply Council is to arrange supplies from the eastern group countries to meet the demands of the Central Provision Office and in doing so the Council helps in the co-ordination of production plans within the different Group countries.

The Indian Tariff Board.

The Indian Tariff Board is an *ad hoc* body constituted from time to time as necessity arises to investigate the claims made by any Indian industry to protection. It generally consists of a President and two members one of whom is *normally* a Government official. It has *subject* to the approval of the Government of India power to co-opt other members for particular enquiries It tours over the industrial centres in India where the industry referred to it is located and if satisfied after detailed enquiries that the claim for protection is justified, it makes its recommendations to the Government of India The last Tariff Board became *functus officio* early in 1939 after completing an enquiry into the question of extending protection to the Indian sericulture industry

Indians Overseas

	Total for all countries	3 768 404	

General.—The recognition of the importance attached by public opinion in this country to the problems of Indians residing in other parts of the Empire led to the creation of the Department of Indians Overseas under the portfolio of a separate Member of His Excellency the Viceroy's Executive Council in October 1941 to deal with this increasingly complex matter With the extension of war in the East and Far East and the occupation of Allied territories by the Japanese the problems of the evacuation of Indians from these territories and of the welfare of those stranded in these areas are also being dealt with in this Department

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras and there is little evidence of any settlement of Indians overseas in early times except in Sumatra Java and Ceylon Emigration for purpose of labour dates from the beginning of the 19th century From 1800 A.D onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice tapioca and sooconut plantations of Penang and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830 when a French merchant named Joseph Argand carried some 150 artizans to Bourbon The abolition of slavery in British colonies in 1824 gave the first great impetus to the movement The sugar planters of Mauritius at once turned to India as their best recruiting ground and between 1834 and 1837 obtained at least 7 000 recruits from Calcutta The Government of India at a very early stage realised the necessity of bringing such emigration under regulation The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live These recommendations were embodied in the first Emigration Act (V of 1837) which also provided that contracts should be determinable after 5 years

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (69 men the first and last direct emigrants to Australia) In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud robbed of their wages and treated with brutality In consequence emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica British Guiana and Trinidad Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1894 gave rise to a system of emigration from French Indian ports to Réunion and Bourbon which was largely based on crimping in British territory This practice was checked by Act XXIV of 1852 In 1858 emigration was opened to St Lucia, and in 1860 to St Vincent Natal and St Kitts In the latter year a more elaborate Act based on a convention with the French Government was passed legalising and regulating emigration to Réunion Martinique, Guadeloupe, and French Guiana Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control It was itself amended in 1869 and 1870 in important respects with the object of preventing

epidemics on emigrant vessels and improving sanitary conditions in settlements In 1869 emigration was permitted to Grenada, and in 1872 to Surinam Owing to the removal of the Straits Settlements from the control of the Government of India in 1867 emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants which was subsequently extended to Trinidad Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment

Legislation —In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India The opportunity was taken to depute two officials (Major Fitcher and Mr Grierson) to ascertain, in the N W P and in Bengal respectively the way in which the system of recruitment actually worked, the respects in which it was open to improvement and the attitude of the people towards emigration Their reports were reviewed by the Government of India and finally in 1883 the law was again recast and consolidated by Act XXII of that year This Act specifies the countries to which emigration is lawful, but empowers the Governor-General in Council to add to the list by notification and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country or on the ground that proper measures have not been taken for the protection of emigrants or that the agreements made with them in India are not duly enforced This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica British Guiana, Trinidad, St. Lucia, Grenada, St Vincent Natal, St. Kitts, Nevis Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix Emigration to St. Lucia, Grenada, St. Vincent, St Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers The Government of India also occasionally deputs to the colonies their officers to report on the condition of Indian labourers Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs McNeill and Chimanlal and they arrived at the conclusion that the time has come when contract labour should be abolished The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control and the definition of Emigrant was extended to cover all persons assisted to depart from India

Another development was the appointment of a Standing Emigration Committee composed of 12 members of the Central Legislature to advise the Government of India on all major emigration questions and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March 1923 are those which the committee approved after meeting deputations sent by the two countries

It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not, may operate to the detriment of Indian communities overseas particularly in times of economic depression The Indian Emigration Act was suitably amended in 1938 and the Government of India took power, to prohibit, when necessary even unassisted emigration for the purpose of unskilled work This amendment was promulgated on December 14 1939

The Indian Emigration Act 1922, also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work It was found that illicit emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated

under the Act on the 14th Dec. 1939 providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the cost of recruitment These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1922 were remedied by the Indian Emigration Act, 1940 This Act em powers Protectors of Emigrants to exercise the powers of detention search, etc for the prevention of offences under the Act and by making the offence under Section 30 of the Act cognizable, removes an anomaly between Sections 35 and 30A of the Act

Present Position—Indian emigration questions have recently taken on a wider as pect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and tra vellers In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are them selves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population The issues round which public interest at present centres are three —

(a) Control of emigration

(b) Rights of Indians to admission to other parts of the Empire.

(c) Rights and disabilities of Indians domiciled overseas

These questions may be considered separately

Control of Emigration—So far as unskilled labour is concerned the Government of India have assumed absolute powers of control in accordance with powers conferred on them by the Immigration Act of 1922 (*See earlier issues of the Year Book* for details)

Admission of Indians to Empire Countries.—On the motion of the Govern ment of India this question was discussed at the Imperial War Conferences 1917 and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions —

"(1) It is an inherent function of the Gov ernments of the several communities of the British Commonwealth including India that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities

"(3) British citizens domiciled in any Bri tish country including India, should be ad mitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour pur pose or to permanent settlement

(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (a) That not more than one wife and her children shall be admitted for each Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

The first paragraph of this resolution has regularized the various restrictions on immigra tion which the self-governing dominions have, from time to time, adopted and which, with out expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is re fused to any person regarded as unsuitable to settle in the country South Africa pro hibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuited to the requirements of the Union Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right $250 dollars Since 1930 Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age of any Canadian citizen legally admitted to and resident in Canada who is in a position to receive and care for his dependents New foundland and the Irish Free State impose no restrictions. All the self-governing Domi nions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of com merce, pleasure or education India on its side has assumed power to regulate the ad mission of immigrants from any other part of the Empire or foreign countries by means of passports. A bill has also been passed by the Indian Legislature empowering the Govern ment of India to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British posses sion, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administ ration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigra tion of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921 which was recorded in the following terms —

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India as an equal member of the Empire and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire and this Conference therefore is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised "

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union The representatives of India while appreciating the acceptance of this resolution nevertheless feel bound to record their profound concern as the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position

Summary of present Position.—Outside Australia, New Zealand and Canada the position stands as follows —

(1) **South Africa**.—The main grievances of Indians which led to a passive resistance movement headed by Mr Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement (*See earlier editions of the Year Book for details*)

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the Year Book

Cape Town Agreement 1927

It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means The Conference assembled at Cape Town on December 17th and its session finished on January 12th There was in these meetings, a full and frank exchange of views which has resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good will,

Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life, should be enabled to do so

For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required Union domicile will be lost after 3 years continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them

The Government of India recognise their obligation to look after such emigrants on their arrival in India

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments and in order that the agreement may come into operation under the most favourable auspices and have a fair trial the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments

In February 1930 a Select Committee of the Union House of Assembly was appointed to inquire into and report on certain matters relating to the rights of Indians to own and occupy immovable property in the Transvaal and incidentally to trade The Committee was required, *inter alia* to investigate how far the intentions of the legislature, as embodied in the Act of 1919 were being given effect to and whether and, if so, to what extent, an amendment of the Act was desirable The Committee came to the conclusion that the position which had arisen as a result of illegal occupation in the mining areas was serious and that there was no doubt that Law 3 of 1885, as amended by the Act of 1919 intended that Asiatics should not own fixed property in the Transvaal outside reserved areas either individually or collectively and either directly or indirectly It submitted its report on the 13th May, 1930, and embodied its recommendations in a Bill, which it urged should be enacted immediately The Bill was read for the first time on the 14th May 1930, but in deference to the representations made by the Government of India that adequate time should be allowed for careful examination of the far-reaching provisions of the measure, the Union Government decided to defer

further consideration of it until the Parliamentary session of 1931 As a result of opposition to the Bill it was later postponed further and a Conference was held in 1932 to examine the provisions of the Bill and to review the working of the Cape Town Agreement of 1927 in accordance with para 7 of that Agreement

The results of the Conference were summarised in previous editions of the Year Book

Since 1932 there have also been several enactments which are capable of being used against Indians in the Union *e g* the Transvaal Licences (Control) Ordinance of 1932 and the Natal Rural Dealers *Licensing Law Amendment Ordinance of* 1935 A further development occurred in 1937 when three private Bills affecting the position of Indians in the Union were introduced in the Union Parliament The first sought to prohibit marriages between Europeans and Asiatics or natives It was introduced on the 12th January but attempts to have it referred to a Select Committee failed The second Bill sought to empower Provincial Councils to prohibit the employment of Europeans by non Europeans in the Union and the third to prohibit the acquisition of fixed property in the Transvaal by any European, Coloured or Cape Malay women married to Asiatics and by children of such marriages Both the Government of India and their Agent General in the Union made representations against these two Bills Second reading which would have involved acceptance of the principle of the two measures was not proceeded with and they were referred to a Select Committee of the Union House of Assembly for investigation of their contents and form Both the Indian community and the Agent General gave evidence before the Select Committee The Committee came to no conclusion on the proposal to restrict ownership of land through marriage but after consideration of the other Bill, submitted an amended Bill entitled the White Women's Employment Restriction Bill The amended Bill sought to prohibit the employment of European women by Asiatics except under a certificate of the Minister of Labour and to forbid the issue of such a certificate if the women concerned were to be under the direction or supervision of a non European or to be housed or employed on premises containing dwelling or sleeping quarters of Asiatics or at places where they might come into contact with Asiatics other than as customers over the counter Cape Malays and Japanese (while the trade convention with Japan lasted) were to be exempted from the restriction The new measure was purely anti Indian and the Government of India protested strongly against it In the course of oral evidence before the Select Committee a representative of the South African Indian Congress stated that he believed Indians would be willing to terminate employment of European women voluntarily where circumstances showed that particular exception might be, or had been, justifiably taken to such employment The Union Government accepted this statement as an assurance of co-operation by the Indian community in objectionable cases and an announcement was made on the 14th April in the Union House of Assembly that no further opportunity would be given for the discussion on, or for legislation in connection with the Select Committee's report on the Bills The Union Government, however, reserved the right to undertake legislation later should circumstances demand it The dropping of these two Bills did not, however satisfy certain sections and an announcement was made in the Union Parliament on the 17th May 1937 that two Commissions one to enquire into mixed marriages and the other into the question of Asiatic land tenure in areas not covered by the enquiry of the Feetham Commission would be appointed These Commissions were appointed in February, 1938

Mixed Marriages Commission.—In September 1938 the South African Indian Congress presented a memorandum to the Commission and also gave oral evidence It was pointed out that the number of marriages between Europeans and Indians was negligible there was no sign of an increase in spite of the rapid growth in the numbers of each community and that the effect of such marriages had an insignificant effect on the composition and future welfare of the South African population The Agent General in the Union supplemented the evidence already given by the local Indian community

The report of the Mixed Marriages Commission was published in August 1939 Four members of the Commission signed a majority report and one member a minority report The finding of the majority report was that public opinion had failed to prevent mixed marriages and could not be relied upon to prevent such marriages in future and that mixed marriages give rise to social problems of a serious nature The Commission held that segregation by means of housing schemes and the separation of the sexes at places of work would help in reducing the incidence of mixed marriages The Commission emphasised the need for improvement of the economic position of non Europeans on the ground that marriages with Europeans would be less attractive if their present disabilities were diminished It was also suggested that a separate law should be enacted to govern the validation of the marriages between coloured persons only coloured persons including all non Europeans In the minority report it was stated that legislation was no solution of the problem and it was suggested that the simple laws of heredity should be taught and also that to overcome the disparity between the European male and female population immigration into South Africa of young European women should be encouraged In January, 1940 Dr Malan moved a resolution in the House of Assembly urging, introduction of legislation to give effect to the recommendations of the Commission In the course of the discussion on the resolution the Minister of the Interior stated that as the country was in a state of war, Government did not propose to embark upon contentious legislation touching difficult social conditions, sentiments and racial pride

Murray Land Commission.—This Commission which was appointed early in 1938, was presided over by Mr Justice Murray of the Supreme Court of South Africa (Transvaal Provincial Division) and had the following terms of reference —

To inquire into and report whether, and if so to what extent, the letter or spirit of any law restricting or prohibiting the ownership,

use or occupation by Asiatics of land is being evaded and to make any recommendations it may think fit in regard thereto.

The foregoing terms of reference shall not apply to proclaimed land under the Precious and Base Metals Act 1908 (Transvaal) as amended from time to time to the extent to which it has been dealt with by the Feetham Report

Both the Transvaal Indian Congress and the Agent General in the Union gave evidence before the Commission in October 1938 and its report was published on the 22nd March 1939 The recommendations of the Commission which have been published in the Press are generally considered to be satisfactory from the Indian point of view No action has so far been taken by the Government of the Union on the report

In spite of repeated representations from the local Indian community and the Government of India the Union Government passed the Asiatic (Transvaal Land and Trading) Act 1939 which came into force on June 16 1939 The Act restricts three important rights of the Indian community in the Transvaal (*a*) the right to occupy land not subject to Gold Law restrictions (*b*) the right to trade anywhere in the Transvaal and (*c*) the right of Indians holding trading licences in May 1919 to transfer their business premises in the same township The main provisions of the Act are as follows (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May 1930 (2) The issue of trading licenses except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30 1939 (4) The Minister was empowered to issue permits of exemption In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years *i e*, till May 1943

The international situation in September, 1939 and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly so far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war In January 1940, the Minister of the Interior also announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent if any of Asiatic penetration of predominantly European areas, and the Commission was actually appointed in May with the Hon ble Mr Justice F N Broome as Chairman and the following terms of reference

Broome Commission.—The international situation in September 1939 and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power have not been without effect on the attitude of the Union Government towards the Indian problem. Though the Asiatic (Transvaal Land and Trading) Act, 1939, had been brought into force in June 1939, as a result of further representations the Union Government declared that no fresh statutory measures involving segregation would be introduced during the war In January 1940, the Minister of the Interior also announced the intention of the Union Government to appoint a judicial Commission to ascertain the extent if any of Asiatic penetration of predominantly European areas, and the Commission was actually appointed in May with the Hon ble Mr Justice F N Broome as Chairman and the following terms of reference

To enquire into and report whether and if so to what extent Indians have since 1st January 1927 commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Provinces of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act 1908 as amended of the Transvaal) and the reasons for such occupation or acquisition

An attempt made by the Indian community to get the Commission discharged on account of the critical war position in Europe proved futile The Commission concluded the recording of evidence in the Transvaal in November and enquiries in Natal were in progress during the first half of 1941 A summary of the findings of the Commission was published on October 11th The two main findings are that in the Transvaal the extent of penetration since 1927 does not appear to be alarming or even surprising and in Natal the extent of penetration into European areas is little more than a trickle As regards the cases of penetration as had been found it has been stated that the main reason for penetration by acquisition is attributable to the desire to obtain good investments (and this is also held to account for some of the acquisitions with occupation) while the most important reason for acquisition with occupation is given as the lack of housing and civic amenities in predominantly Indian areas. The Commission has also recorded that it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome but that *de facto* segregation may some day be achieved by voluntary mutual co-operation.

Lawrence Committee.—Towards the end of 1939 Mr Lawrence the Minister of the Interior suggested that the Natal Indian Association and the Durban City Council should constitute a Joint Committee for the purpose of preventing further penetration by Asiatics into European areas The Natal Indian Association expressed their opposition to any form of segregation but offered to co-operate with the Durban City Council in the manner suggested in order to establish harmonious relations between the two communities. The object of the Committee was also to draw the attention of the City Council to the housing needs of the Indian community and the necessity for providing proper municipal amenities The Committee has so far continued to function usefully

War Effort.—The Indian community in South Africa with possibly a few dissentients has co-operated in the war effort of the Union Government both by contributing their mite to the War Funds and by assisting in enrolment of Indians in the Services

The Feetham Resolutions.—Reference has already been made to the passing of the Transvaal Asiatic Land Tenure (Amendment) Act of 1936 after consideration of the recommendations of the Feetham Commission Under the Act the Minister of the Interior is empowered to exempt land from the operation of the Gold Law regarding residence on or occupation of that land by coloured persons but the Select Committee on the Bill had unanimously recommended that Asiatics should be given the right of ownership in areas proposed for exemption by the Feetham Commission in Asiatic Bazaars and in areas predominantly occupied by Coloured persons provided the proposal was approved by both Houses of Parliament by means of a resolution Hence what is known as the Feetham Resolutions has been of considerable importance to the Indian community in Transvaal but till early in 1941 the Union Government could not see their way to push the resolutions through Parliament mainly because of opposition among party members to the scheme The more liberal attitude of General Smuts Govt and the influence on South African public opinion of the magnificent performances of Indian soldiers in the Middle East made it possible for the Feetham Resolutions to be moved in the Union Parliament in April 1941 The resolutions were passed by both Houses and hence for the first time Indians have been given legal right to continue to occupy and own land in what was known as gold areas

Immigration.—Among other matters in which the position of Indians has lately improved mention may be made of the decision of the Union Government in May 1941 to admit commercial travellers from India into the Union Under the immigration law of the Union of South Africa prohibited immigrants were not entitled to obtain a license to carry on any trade or calling in the Union and following representations from the Agent General in the Union the South African Government have agreed to issue to *bona fide* commercial travellers from India temporary permits as well as necessary licenses to trade Also as a gesture of goodwill the Union Government have taken steps to see that the anti Asiatic provisions of the law were not applied to Indian visitors particularly those in transit through the Union

Change of Status.—Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions and an announcement was made that from 1st January 1941 the status of the Agent General would be raised to that of High Commissioner for India in the Union of South Africa The announcement was accompanied by a message from General Smuts to His Excellency the Viceroy While the High Commissioner will be the sole channel of communication between the Governments of India and the Union of South Africa and in official representations and correspondence his views will be those of the Government of India only he will still be available for giving advice to the Indian community and for making any representations on their behalf

(2) **Kenya Colony**.—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India dated October 21st 1920 The controversy centred round the following points —

(*a*) FRANCHISE.—Indians have not the elective franchise The Government of India objected firstly that it was impracticable secondly that it was commercially inconvenient and thirdly that Indians even in practice unfairly treated in the allocation of sites

(*c*) THE HIGHLANDS.—Lord Elgin decides in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians The whole area has now been given out and the Government of India claim that there is no land left to which Lord Elgin a decision applies This decision has now however been extended so as to prohibit the transfer of land in the uplands to non Europeans

(*d*) IMMIGRATION.—Suggestions have been put forward for restricting Asiatic immigration into Kenya The Governments of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923 It was held that the guiding principle should be that the interests of the African native must be paramount" and in light of this it was decided —

(*a*) FRANCHISE.—A communal franchise was adopted with 11 seats for elected Europeans 5 elected Indians one nominated Arab one missionary representing the Africans, and a nominated official majority One Indian is also appointed on the Governor's Executive Council

(*b*) SEGREGATION.—The policy of segregation as between Europeans and Asiatics is abandoned

(*c*) THE HIGHLANDS.—The existing practice is maintained both as regards initial grants and transfers A similar reservation in the lowlands is offered to Indians.

(*d*) IMMIGRATION.—Racial discrimination in immigration regulations is rejected But in the economic interests of the Africans, further control over immigration is necessary Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya The Governors of Kenya and Uganda have been instructed to submit joint proposals for legislation

The Governmnent of India reviewed their decisions in a resolution published on August 18th, 1923 and recorded their deep regret

that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee :—

(1) IMMIGRATION.—My position is that if danger ever arises of such an influx of immigrants, of whatever class, race nationality or character as may likely be prejudicial to the economic interest of the natives I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE.—I have given careful consideration to representations in favour of a common poll, but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS.—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, expressed or implied, which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS.—It was proposed to reserve an area in the lowlands for agricultural land-grants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924 His Majesty's Government announced the appointment of an East African Committee under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, like the Southborough, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the Europeans and Indian communities responsible for the cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, viz., an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January 1927.

Closer Union.—In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the

Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront

In March 1929 the Secretary of State for the Colonies sent out Sir Samuel Wilson Under-Secretary of State for the Colonies to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon V S Srinivasa Sastri P C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission s Report and to be at Sir Samuel Wilson s disposal if he wished to make use of him in dealing with the Indian deputations.

Mr Sastri left India in April and returned in June 1929 In the Report presented by him on his return he recommended that the Government of India should—

(*a*) press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike,

(*b*) invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll

(*c*) oppose the grant of responsible government to Kenya or of any institutions leading up to it

(*d*) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson

(*e*) demand in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians,

(*f*) advocate the continuance of the official majority in the Legislative Council of Kenya

(*g*) demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty s Government.

The report of Sir Samuel Wilson was published on the 5th October 1929 Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty s Government as regards closer union in East Africa were published in June 1930 in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament In accordance with this decision a Select Committee was set up in November 1930 The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V S Srinivasa Sastri P C., C.H., as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr Sastri in July 1931

The report of the Committee was published simultaneously in England East Africa and India on the 2nd November 1931 and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932

As regards the question of *Closer Union* His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time has not arrived for taking any far reaching step in the direction of the formal Union of the several East African Dependencies

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for Closer Union. Early this year an unofficial conference of Europeans, held at Arusha was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee s decision and that immediate steps should be taken towards the Closer Union of East Africa A "Memorandum on Union was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matters which had been so carefully investigated by the Joint Select Committee as recently as 1931 This decision is contained in Malcolm MacDonald s despatch, dated the 12th October 1935 to His Excellency the Governor of Kenya which has been published in all the countries concerned.

Franchise—As regards franchise, His Majesty's Government stated in the White Paper of 1930 that His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilisation or education

character open to all races. In 1931 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union After discussing the arguments that had been brought forward for and against a common electoral roll, the Select Committee stated in para 100 of their report that it would be impracticable under present conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter

Highlands —*The Joint Select Committee* of Parliament which was appointed to consider the question of Closer Union in East Africa had recommended that in view of the nervousness among the native population as regards the land question a full and authoritative inquiry should be undertaken immediately into the needs of the native population present and prospective with respect to land within or without the reserves held either on tribal or individual tenure In April 1932 a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following

> To define the area known as the High lands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923

The Commission in their report which was published in May 1934, recommended that the boundaries of the European Highlands should be safeguarded by Order in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives His Majesty's Government announced that they accepted this recommendation of the Land Commission. The Indian community was perturbed by this announcement as the proposed Order in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community No Order-in Council had been promulgated till the end of 1937 but the position as it affects Indians appears clear from the following extracts from the speech of the Secretary of State for the Colonies made on the 9th July 1936 —

> (a) What is contemplated arising out of the recommendations of the (Morris-Carter) Commission, is the issue of two Orders-in-Council There are, of course many other things arising out of those recommendations, but the points which have been raised are chiefly concerned with these Orders-in-Council One of them is to define the boundaries of those parts of the Highlands which are to be set aside for non-native occupation, and (b) I want to make it clear that there is to be nothing in either Order imposing any legal disability against Indians or against any persons on the ground of race, colour, creed or anything else Equally I want to make it clear that the existing administrative practice, which was first laid down by Lord Elgin is to be continued. I wish that to be understood clearly both in India and elsewhere The existing administrative practice of the Kenya Governments which has been followed since 1908 will continue In the area demarcated as the European area not by law, not by any thing in the Order-in-Council, but as a matter of administration that practice will continue in the future as in the past There will be no legal colour bar

In spite of protests from the Government of India and the local Indian community the Order in-Council contemplated in the above announcement issued in February 1939 Though the Order does not contain a definition of the privileged position which persons of European descent are to have within the territorial limits to be included in the Highlands, His Majesty's Government have made it clear that there is no intention of changing the administrative practice which has been followed for many years with regard to alienation and transfer of land in the Highlands This decision has caused profound disappointment to all sections of Indian opinion both in Kenya and in India, in particular because of the preference which it accords even to non British subjects of European race

Lowlands.—Subsequent to the announcement made in the House of Commons in 1924, in connection with the Lowlands, the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea

Apart from the major problems outlined above, other questions have also been causing concern to the Indian community in the colony The most important of these are (i) the Ordinance to control and regulate the marketing of native Produce and (ii) the Transport Control Ordinance. The former *Bill* sought to regulate the selling and buying of native produce by such methods as limiting the number of licences and confining sales to specified localities so as to ensure maintenance of quality As a number of Indian traders were affected, representations were made to His Majesty's Government by the Government of India and the Bill was revised in certain respects and became law in 1935 It was brought into force from the 1st January 1936.

The Kenya Transport Control Bill which was passed last year was intended to give effect to the recommendations of the Kenya Transport Co-ordination Committee which was appointed in 1935 to investigate and consider the desirability of co-ordinating and regulating all forms of transport in the colony The Indian members of the Kenya Legislative Council objected to the principle of the Bill as in the attempt to prevent wasteful competition between the railways and other forms of transports in Kenya they felt that the considerable interests of Indians in the transport industry would be affected adversely The other main objections were directed against the composition of the Transport Licensing Board and the provisions relating to the grant of exclusive licences. The Bill has now become law and an Indian has been appointed to the Transport Licensing Board.

In the latter half of 1938 and the beginning of 1939, the Kenya Indians were interested in (1) the Immigration of Jewish refugees (2) the Kenya Immigration Restriction Ordinance and (3) the representation of the Indian community in the Kenya Immigration Board All these three questions were connected with one another in some form. His Majesty's Government had under consideration a scheme for the settlement of a small number of Jews in the Kenya Highlands. The main objection of the Indian community was that it would accord to foreign subjects within a British Colony privileges which are denied to British Indian subjects. As His Majesty's Government were committed to a policy of settling Jewish refugees from Central Europe it was not possible to meet the objections of the Indian community in the matter To prevent an influx of destitute and undesirable foreigners into the Colony as a result of the international situation in Europe, an Immigration Advisory Board was established in October 1938 The Board was to advise the Commissioner of Police on such matters as may be referred to it in connection with immigration into Kenya but it was not intended that it should consider or advise upon any aspect of Indian immigration. Nevertheless it was felt that the Indian community which is vitally interested in the composition of the population and the economic development of the Colony should be represented on the Board Representations were made to His Majesty's Government in the matter and the result of the representations is awaited. The objections to the Kenya Immigration Restriction Bill centred round two provisions of the Bill —(i) the provision authorising the Immigration Officer to require any intending immigrant who is without any visible means of support or is likely to become a pauper, to give security by bond to an amount not exceeding £500 and (ii) the provision altering the period of 12 months within which an intending immigrant has to prove that he is not a prohibited immigrant to any period the Immigration Officer may fix in his discretion. Though these clauses were intended to apply only to immigrants from Europe the Indian community thought that they might at any time be applied to Indians also

Both questions have been settled satisfactorily Indian representation on the Board has now been conceded and under the revised provisions all immigrants are divided into two classes (*a*) those who will if necessary be received back by their country of birth or origin and (*b*) those who will not be so received back, the existing law being left practically unaltered in respect of the former category of persons. Indians therefore will be unaffected by this measure which received the Royal assent in May 1939

Tanganyika.—In the adjoining mandated territory of Tanganyika the Indian community were deeply concerned at the rumoured transfer of the territory to Germany Their views in regard to this subject were communicated by the Government of India to His Majesty's Government. It was learned from His Majesty's Government that the rumours were without foundation

Nyasaland and the Rhodesias.—The report of the Royal Commission which had been appointed in 1938 to inquire into the question of closer co-operation between Southern Rhodesia, Northern Rhodesia and Nyasaland was received and was under the examination of the Government of India but in view of the war the discussions have been suspended for the present.

Natal.—Out of a total population of about 40 151 Indian male immigrants in Natal in 1940 approximately 84 000 or 85 per cent. are according to the 1940 report of the Protector of Immigrants in Natal, just published) in employment in the Provinces and many in addition, are farming on their own account and carrying on other trades

Of those in employment, the largest number about 6 300 are in the sugar industry The next largest number are in the corporate bodies which provide employment for over 2,400 Miscellaneous industries and employment as domestic servants account for 7,800 and tea coal and railways employ roughly 1 485

The average rate of wages paid on the estate is between 45s and 60s per month including food accommodation, medical attention and medicines free of charge

The total number of Indians employed in coal-mines in Natal during the year was 1 922 of whom 579 were men 563 women and the rest children.

The wages on the mines remained about the same as before namely 1s 6d or 2s 6d per shift, with food medicine medical attention and quarters free

The number of Indians in Natal on 31st December, 1940 was approximately 188 985 of whom 40,351 were males 90 428 females and the rest children Of the 188 985 about 24 600 represent the original immigrants and 164 369 are Natal born

There were 291 more births and 58 less deaths during 1940 than in the previous year bringing the birth rate to 47 88 per mille and death rate to 13 27 per mille The corresponding figures of 1939 were 48 01 and 14 02 respectively

There were no arrivals during the year emigration to Natal having been stopped by the Indian Act of 1911 The total number of Indian immigrants who returned to India during the year was 48 of which 45 were sent to India from different parts of the Union under the Assisted Emigration Scheme The number of Indian children attending the schools both Government and aided is about 26 700 out of a total children population of 118 400, thus bringing the percentage to 22 6

During the year 1939 there was a renewal of the agitation in Durban on the question of penetration of European areas by Indians Protests were made by the Natal Indian Association in a letter to the Town Clerk Durban, but at the suggestion of the Minister of the Interior who visited Durban it was agreed to establish more cordial relations between the European and Indian communities A joint committee of representatives of the Durban City Council and the Natal Indian Association was accordingly formed Apart from purchases of property the committee deal with questions of Indian

housing and provision of municipal amenities in Indian areas. Inaugurating the session of the committee the then Agent-General to the Government of India Sir Ramaswami Mudaliar said that not only the Union Government but also the Government of India would watch with interest the results of this experiment

(3) Fiji and British Guiana.—Emigration to Fiji was stopped in 1917 under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration With a view to secure, if possible, a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr Rankine Receiver General to the Fiji Government, arrived in India in December 1919 and submitted a scheme of colonisation which was referred to a committee of the Imperial Legislative Council on 4th February 1920 To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January 1920 and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March 1920 that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji. In July 1920 the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge subject to his approval Arrangements with regard to the contemplated deputation, however were postponed until January 1921 owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation an announcement was made on the 27th June 1921 But owing to the inability of the two Indian members Messrs Srinivasa Sastri and Hirdayanath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G L. Corbett, Govind Sahai Sharma, and Lieutenant S Hasan ud-din Khan did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India The Government of Fiji cancelled the indentures of Indian labourers as from January 1920 while arrangements were made for the early repatriation of such of them as desired to return to their own country In consequence, large numbers left Fiji Many arrived in India comparatively destitute while others who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country Returned emigrants from other colonies also, being in destitution owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood At the earnest representation of the Fiji Government, and after full consultation with representative public men arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony as well as of such near relations as they desired to take with them Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India The deputation from India left Fiji on the 3rd April 1922, and submitted its report to the Government of India It has not been published.

In February 1929 Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued Provision was made *inter alia*, for the election of three Indian members on a communal basis. On the 5th November 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members As a protest against this vote, all three Indian members resigned their seats and, no Indian having subsequently offered himself for election the seats remained unfilled throughout the life of the Council A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council but no candidate offered himself for election from the third constituency

In 1935 the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch, dated the 20th July 1936 addressed by the Secretary of State for the Colonies to the Government of Fiji The main points of the decision were —

(a) the Fijian representatives should be selected as heretofore, *viz*, by the Governor from a panel submitted by the Great Council of Native Chiefs

(b) some of the European and Indian members should be elected and the others nominated

(c) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor 16 official members, 5 European members (3 to be elected on a communal franchise and 2 to be nominated) 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated)

The Legislative Council as newly constituted met in September 1937 Fresh elections to the reformed Legislative Council took place in 1940

The most important problem affecting the Indian community in Fiji is that of land tenure Out of the total Indian population of 94 966 estimated in 1939 a very large majority consists of agriculturist but alienation of native owned land is prohibited More than 80 per cent of the land in the Colony is held by native owners as tribal land, and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company, Ltd. Indians hold land as lessees from the native owners for the cultivation of rice sugarcane etc and from the Colonial Sugar Refining Co for cultivation of sugarcane Practically the whole problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop sugarcane caused some alarm to Indians engaged in agriculture A number of practical difficulties connected with the leases which in main related to the procedure for obtaining leases and the administration of the land law were also brought to the notice of the Government of India

In September 1936 the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians. As a result of the examination of the question the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with *all* the native lands in the Colony and then to appoint a Commission to determine the lands to be set aside for the exclusive use of the Fijians These proposals were referred to the Council of Chiefs in October, 1938 and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November 1939 to give effect to the proposals referred to above The Government of India made suitable representations on the Bill and the Bill with certain amendments passed its third reading on the 22nd February 1940 and was assented to by the Governor

The Native Land Trust Ordinance 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust A Fijian Commission has been appointed to conduct enquiries into particulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians it has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed Though there is no Indian representation on the Board provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years

On the subject of alleged discrimination in the Fiji Civil Service the Government of India have now been assured by His Majesty's Government that there is no rule preventing the appointment of an Indian as such to any posts in Fiji except those concerned solely with Fijian administration The Colonial Government had under consideration a proposal to fix a quota for Indian emigrants but the matter has been held over for discussion with the Government of India after the war

British Guiana —The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic Towards the end of 1919 a deputation consisting of the Hon Dr J J Nunan Attorney General and J A Luckhoo a prominent Indian who was a member of the combined court visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India This was examined by a Committee of the Indian Legislature which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs Pillai Keatinge and Tivary visited British Guiana Mr Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay Diwan Bahadur P Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice President, and Mr Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces The two reports of the deputation were published on the 21st of January 1924 Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan Kt, and the Hon Mr J C Luckhoo K C arrived in India for further discussions The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matter Kunwar Maharaj Singh, M.A., C I E, Bar-at-Law was deputed for this purpose He proceeded to that Colony in September

1925 His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled The colonisation scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves

In March 1928 following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council The changes eventually introduced by the British Guiana (Constitution) Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony

Nothing important about the Indian community in that colony was heard till September-October 1935 when there were labour disturbances on certain sugar estates A Commission was appointed by the Governor to enquire into and report on (*a*) the causes which led up to the disturbances and (*b*) *inter alia* the condition of labour on sugar estates and to advise on the measures necessary to obviate the recurrence of similar disputes From the report of the Commission, which was published in December 1936 it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers whether resident or non resident There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities In order to remedy this state of affairs, the Commission has recommended

(i) the creation by Government of some authority with such powers as are considered necessary for the efficient safeguarding of the interests of both employed and employer and

(ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed As a result the British Guiana Government has appointed a Commissioner of Labour but the other recommendations are it is understood, still under consideration.

West Indies Royal Commission.—The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 14th June 1938 in the course of the debate on the Colonial Office vote during which discussion largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following —

> To investigate social and economic conditions in the Barbados British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago and Windward Islands and matters connected therewith and to make recommendations

In view of the large number of Indians in Jamaica Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission the question of safeguarding the interests of Indians engaged the attention of the Government of India. As a result of representations made by them they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. J D Tyson C B E., I C S who was secretary to the Rt. Hon ble V S Srinivasa Sastri, P C C H when the latter went as the first Agent in the Union of South Africa and subsequently represented the Government of India before the Joint Select Committee in South Africa on the Transvaal Asiatics Land Tenure Amendment Bill in 1930 was the officer chosen in this connection

The Commission concluded taking evidence towards the end of March 1939 and the report was made available to the press in October 1939 Only a summary of the recommendations of the Commission were available, the report will not be published by His Majesty's Government for the present. The Commission recommended that some officer or officers preferably members of the labour department should specialise in East Indian questions and if suitable candidates are forthcoming should be East Indians. The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law is concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which relate to matters of education housing and labour administration appear satisfactory and likely to be of benefit to Indians As an immediate step towards implementing the recommendations of the Commission His Majesty's Government have announced their decision to increase the annual allotment to the Colonial Development Fund from £1 000 000 to a maximum of £5 000 000 for ten years and to sanction annually a grant up to £500 000 for the purpose of colonial research Though the Commission made no recommendation for the appointment of an Agent of the Government of India in the West Indies the matter continues to engage the attention of the Indian Government.

During 1939-40 Major G Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour condition in the West Indies. The Government of India have taken steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India have suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry and in regard to educational institutions in British Guiana that the Colonial Government should make every endeavour to assume direct responsibility for their management and control

Some of the recent developments since the visit of the West India Royal Commission in the Colonies of British Guiana Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to) deserve mention In Jamaica where Indians are less organised and fewer in numbers than in the other two territories there has been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr Tyson in his evidence before the Royal Commission This claim has now been conceded It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation while retaining the method of nomination for representation of minority or backward interests In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and their not being numerous enough in any electoral district to have their effect felt the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view In Trinidad and British Guiana local committees having Indian representatives have been appointed to examine franchise questions

(4) OTHER PARTS OF THE EMPIRE

Ceylon and Malaya —The Government of India maintain their own agents in Ceylon and Malaya.

The question of the fixation of a standard minimum wage for Indian estate labourers in Ceylon and Malaya which is of considerable importance to the labourers has been the subject of negotiations between the Government of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act 1923

Ceylon —A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as the 'Indian Labour Ordinance No. 27 of 1927' The standard rate of wages agreed upon were introduced with effect from the 1st January, 1929 In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid and low country estates were reduced early in 1932, those in up-country being left intact A further reduction in wages took place in 1933 in view of the deterioration in the position of the rubber and tea industries. While agreeing to these proposals the Government of India stipulated that the reductions should be treated as strictly temporary and emergent and revision of rates on the upward grade should be considered as soon as the industries revived

As soon as there was a revival of these industries towards the middle of 1933 the Government of India pressed for the restoration of wage cuts and the rates in force prior to the reductions of 1933 were restored with effect from the 1st June, 1934

Since September 1935 there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September 1937 with an increase of prosperity in these two industries, the demand from the planters for extra labour became insistent. Their requirements were estimated as 20 000 labourers but the Ceylon Government decided to permit the recruitment of only 5 000 as they were anxious to absorb suitable labour available for employment The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise. The position in regard to the village Committee franchise is explained in a later paragraph

After summoning Wages Boards and completion of the necessary formalities the Ceylon Government restored the wages of Indian estate labourers with effect from the 12th June 1939 to the levels prevailing before the slump period since February 1932 viz

	Men	Women	Children
Upcountry Cts	49	39	29
Mid Country	47	37	28
Low Country	45	36	27

with provision for the supply of rice at a rate not exceeding Rs 4 80 per bushel

With the outbreak of war there was a general rise in commodity prices and a corresponding rise in the cost of living of the labourers The period synchronised with a period of unrest and there was naturally a demand by the labourers and their associations for an increase in the rates of wages With a view to meeting this demand the planters agreed to the grant of a war bonus at the discretion of the Superintendent of an estate In order to place the scale of wages on a statutory basis the Board of Indian Immigrant Labour recommended the following scale of wages after considering the varying recommendations of the Wages Boards

	Men	Women	Children
Upcountry Cts	54	43	32
Mid Country	52	41	31
Low Country	50	40	30

with the old provision about the issue price of rice to labourers

These rates were brought into force from the 1st February 1941 the grant of war bonus being discontinued from that date

In 1936 as a result of a resolution passed in the State Council the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non-Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of Immigration into Ceylon of workers from other countries including assisted estate labourers Indians form the majority of the immigrants in Ceylon and they presented a memorandum to the Immigration Commissioner The report of the Commissioner was published in April, 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home that the immigrant workers made possible an economic and general advance which could not have taken place without them that Indians did not undercut wages that the existing means of control of immigration were sufficient and that the introduction of Indian immigration for the protection of Ceylonese employment was not practicable

This vindication of the cause of Indian immigration into Ceylon did not satisfy Sinhalese opinion The Board of Ministers were intent on some measure to control Indian immigration and a memorandum containing a summary of certain far reaching proposals designed to restrict the entry of persons into Ceylon whether for purposes of permanent residence or for taking up any occupation in Ceylon was referred to the Government of India in August 1940 in accordance with an assurance given to them in the matter It was agreed to discuss these proposals during informal conversations arranged to be held in November 1940 in New Delhi to consider all questions outstanding between the Indian and Ceylon Governments The Conference was held at New Delhi from the 4th to the 13th November 1940 The fundamental question of the status of Indians resident in Ceylon was first taken up for discussion The proposals of the Ceylon Delegation were conditioned by one main purpose namely a substantial reduction in the number of Indians resident in the Island and sought to limit full citizenship rights to Indians in Ceylon in the second or third generation while extending certain restricted rights to those Indians with only a Ceylon domicile of choice (which was to include among other conditions to be prescribed a minimum of five years residence in Ceylon) They further proposed that all other Indians in Ceylon and future immigrants should be debarred for ever from acquiring franchise or other rights of citizenship The Government of India, on the other hand, pressed for full citizenship rights for Indians who had put in five years' residence in the Island and produced evidence of a permanent interest in the Colony and for opportunity for all other Indians in Ceylon on a prescribed date to qualify for such rights in due course As the Ceylon Delegation were not prepared to modify their attitude, the talks ended in a breakdown of the negotiations.

On 4th March, 1941 the Board of Ministers introduced two Bills in the State Council, one to provide for the registration of persons in Ceylon who did not possess a Ceylon domicile of origin and the other to make provision for the regulation and control of the entry of non-Ceylonese into Ceylon After the Bills passed their second reading they were referred to Standing Committee A who have expressed themselves willing to hear all persons who wished to be heard before the Bills were finally considered The European Association presented its views through counsel but the Indian associations have not considered it necessary or advisable to make any representations as Indians were wholly opposed to the principles underlying the Bills The arguments for the European Association were concluded on 26th June 1941 when the Committee adjourned *sine die*

In August 1941 at the request of the Government of Ceylon the Government of India agreed to a resumption of the informal conversations that had ended inconclusively at New Delhi in November 1940 Delegations from the two Governments met at Colombo on the 8th September 1941, and the conference ended on the 21st when agreed conclusions were reached on all the subjects discussed and a joint report was signed by the two Delegations This report was simultaneously published in Ceylon and in India on the 16th October In their report to the Ceylon Board of Ministers dated on the 30th October the Ceylon Delegation strongly recommended the adoption of the joint report

The proposals in the joint report however came in for criticism from prominent Indians and Indian Associations in Ceylon particularly in regard to the provisions about the establishment of domicile of choice and the position in the grant of franchise rights to the Indian population already in Ceylon the absence of specific provision for the safeguarding of domicile rights of the children of holders of certificates of permanent settlement the disabilities attaching to absence for more than a year and the conditions on which future immigration might take place Opinion in India was also strongly against the proposals in the joint report, and on 17th November 1941 the Central Legislative Assembly unanimously passed a resolution that Indians in Ceylon on the prescribed date of the agreement and those who had been residents within a specified period prior to the date of the agreement should have freedom of entry into Ceylon and no regional or occupational restrictions should be imposed on them they should be entitled to full rights of citizenship on the completion of the prescribed period and that for the future provision should be made to protect Indian trade interests. Matters arising out of the joint report are under consideration by the Governments of India and Ceylon

Another piece of legislation affecting Indians in Ceylon was the Village Communities (Amendment) Ordinance. The amendment sought to enfranchise all persons of either sex other than Indian estate labourers thereby giving the vote to Europeans and Burghers who were previously excluded. This discrimination against Indians roused protest both in India and in Ceylon,

With the object of removing the charge of obvious racial discrimination, the Standing Committee of the State Council made an amendment to the proposed Bill which had the effect of extending the franchise to those members of excepted classes *i e.*, (Europeans Indians and Burghers) who pay land tax and possess a specified area of land (5 acres) The practical effect of this would be to enfranchise the great majority of Europeans and Burghers and leave practically the entire Indian estate labour population without the vote A further protest was made to the Ceylon Government by the Government of India, who decided to stop the recruitment of labour for Ceylon until this question was satisfactorily settled The Bill was passed by the State Council but was reserved by His Excellency the Governor of Ceylon for the signification of His Majesty s pleasure

With a view to meeting the charge of racial discrimination the relevant clause of the Bill was amended so as to exclude all labourers resident on estates, whether Ceylonese or Indian, from the village committee franchise. The Original Bill and this amendment became law on 1st January 1939 and it is felt that though *de jure* discrimination against Indians has been removed *de facto* discrimination remains as a very large body of Indian estate labourers still in practice be excluded from the village franchise while the effect upon the Ceylonese will be negligible.

Reference should also be made to another matter in which there has been difference of opinion between the Indian and Ceylon Governments. Despite repeated appeals for delay from the Government and people of India the policy of so-called voluntary repatriation was brought into force by the Ceylon Government on August 1 1939 *About 600 Indian ex-employees of the* Ceylon Government left the Island with the promise of a bonus on reaching their homes Attempts were continued to squeeze out Indians engaged in other walks of life such as teachers and municipal servants

As the Ceylon Government were unwilling to modify their attitude in regard to their scheme the Government of India decided to withdraw their offer to enter into trade negotiations with that Government and in view of the uncertainty of employment for unskilled labour in Ceylon they also prohibited the emigration of all un skilled labour to Ceylon with effect from 1st August 1939 It may be mentioned that the Ceylon Government continued to pursue their schemes for the discontinuance of Indian daily paid employees and the total number who have retired from Government service is 2 017 Including 1 215 workers compulsorily retired

The Shops Regulation Ordinance came into force on 1st August 1939 As there was great difficulty in fixing closing hours of shops and there were numerous representations that portion of the Ordinance which related to closing hours was not enforced only the provisions regarding working hours holidays leave and other conditions of service of shop employees being put into operation The Fisheries Ordinance which received Royal Assent in November, 1940 discriminates between Indians and Ceylonese and prohibits non Ceylonese from engaging in fishing in Ceylon waters for profit without a fishing license but the Ceylonese Minister has stated that Indians who have been resident in Ceylon for a number of years and have been carrying on *bona fide* fishing as an industry will experience no difficulty in obtaining licenses

The question of reform of the Ceylon Constitution which was debated in the State Council from 9th March to 13th July 1939 has been engaging the attention of His Majesty s Government and an Order in Council extending the life of the present State Council, which was normally due to expire in March, 1943, for a further period of two years was published in the Ceylon Gazette Extraordinary dated 19th October 1940 On 28th October 1941 the following communication from the Secretary of State for the Colonies was read by the Speaker in the State Council—

The urgency and importance of reform of the Constitution are fully recognised by His Majesty s Government but before taking decisions upon the present proposals for reform concerning which there has been considerable unanimity, but which are of such importance to the wellbeing of Ceylon His Majesty s Government would desire that the position should be further examined and made the subject of further consultation by means of a Commission or Conference

This cannot be arranged under war conditions, but the matter will be taken up with the least possible delay after the war

Malaya—In Malaya standard wage rates which were considered suitable by both the Indian and Malayan Governments were introduced in certain Key areas in 1928 The rates fixed however were reduced by 20 per cent. with effect from the 5th October 1930 owing to the acute depression in the rubber industry The Government of India accepted the proposals for the reduction in the wages but they represented to the Malayan Government that all Indian labourers who wished to be repatriated either because they were thrown out of employment, or because they were unwilling to work on wages lower than the standard rates, should be repatriated free of cost As a result of this suggestion nearly 78 000 Indians obtained free repatriation between August and December 1930 All recruitment of labour from India to Malaya moreover, was stopped and only such persons were assisted to emigrate to Malaya as had left their families there The depression in the rubber industry continued throughout 1931 and 1932, but towards the end of 1933 there was an upward trend in rubber prices The figures of repatriation showed a steady decrease and it was felt that there might be a shortage of labour if prices continued to rise The Malayan Governments accordingly requested the Government of India to permit the reopening of voluntary assisted emigration from South India to Malaya which was stopped in 1930 Assisted emigration was resumed in May 1934 and was regulated by a quota system subject to certain safeguards This system was continued in 1934 and 1935 and was stopped from 1936 when voluntary assisted emigration was allowed without a quota. In 1936 the Government of India sent a deputation

consisting of the Rt Hon V S Srinivasa Sastri P C C H with G S Bozman I C S as his adviser to Malaya to examine the condition of Indian labourers in Malaya with special reference to the rates of wages During the visit of the Deputation the Malayan Governments decided to restore half the cut which had been imposed in 1930 in so far as labour employed by them was concerned The estates immediately followed suit and the standard rates in force on the estates were fixed at 45 cents for men and 36 for women There was wide spread labour unrest towards the end of 1936 The Chinese labour on estates and mines struck work and as a result secured revision of wage rates Over 12 000 Indian labourers employed by the Singapore Municipality also struck work in November 1936 and the Municipality decided to give a minimum basic wage of 50 cents a day to unskilled labourers with free quarters and corresponding increases in the higher rates of wages of all labourers with effect from the 1st March 1937 The Deputation returned to India in January 1937 and recommended the immediate restoration of the wages of Indian labourers to the 1930 level As a result of the correspondence between the Government of India and the Malayan Governments the latter restored the rates of 50 cents for men and 40 cents for women with effect from the 1st April 1937

This restoration of wages was however short-lived The condition of the rubber industry deteriorated and the Malayan Governments reduced the wages of the Indian labourers by 10 per cent with effect from the 1st May 1938 and contemplated a further reduction of 10 per cent from the 1st August 1938 The Government of India asked for a statement of the reasons for the first reduction and requested that in the meantime the reduction of wages should be postponed The second reduction was not brought into force and the Government of India prohibited with effect from 15th June 1938 all assisted emigration to Malaya for the purpose of unskilled work

With a view to settling the differences that had arisen as a result of the stoppage of emigration to Malaya and in order to discuss other outstanding questions the Government of India accepted the suggestion of the Malayan Governments that a delegation from Malaya should visit India This delegation came to India in January 1939 and discussed the various points of interest with the Government of India the Members of the Standing Emigration Committee also met the members of the Malayan delegation and heard their views The main question discussed was that of the rates of wages of Indian labourers in Malaya Certain proposals for a recalculation of standard wages partly on a fresh basis and partly on account of the changed circumstances were made by the Government of India The Malayan Delegation after stating certain objections to these proposals agreed to place them before the Malayan Governments for examination on their return to Malaya The Malayan delegates also agreed to have the suggestion of the Indian representatives on certain other points *e g* the status of Indians in the Malayan States, the provision of adequate educational facilities for Indians of all classes etc examined by their Government Future negotiations were to be continued by correspondence and the Government of India were in communication with the Malayan Government on all the points raised

As regards wages the outbreak of war in September 1939 resulted in a considerable increase in the price of rubber and the employers of Indian labour voluntarily raised the daily wages of Indian labourers to 50 cents for men and 40 cents for women with effect from October 1 1939 The Malayan Governments also sanctioned cost of living allowances for daily paid labourers in their employ with provision for review of the rates from time to time On the subject of similar allowances for estate labourers representations were made to the Malayan Governments It was reported that the United Planting Association of Malaya decided to grant from 1st January 1941 temporary allowances in addition to normal wages for urban labour also both skilled and unskilled the Malayan Government sanctioned cost of living allowances

Of labour legislation passed recently by the Malayan Governments reference should be made to the Trade Unions and the Industrial Courts Enactments Though some of the major changes suggested by the Government of India were not accepted the Malayan Governments assured that when experience was gained of the administration of the above legislation any amendments based on the results of the working of the Indian Trade Unions Legislation would be fully considered The Secretary of State also informed the Government of India that the question of amendments might suitably be pursued after the war

Burma —With the separation of Burma the position of Indians in that country had to be watched with special care and attention Between July and September 1938 Indians in Burma passed through very anxious times. Anti Indian riots of an alarming character broke out in Rangoon on the 26th July and continued till the 1st August As the news spread to the districts and villages rioting took place in various districts towards the end of July and the beginning of August In a few places rioting continued till September Though the first outbreak of riots was brought under control there was acute tension between the Burmese and the local Indian communities which manifested itself in a second outbreak in Rangoon early in September Indian life and property became insecure during this period and about 11 000 Indian refugees were repatriated to India by the shipping companies by private relief committees and at the expense of the Government of Burma The total number of Indians killed and injured during the riots is estimated at 164 and 711 respectively The loss of Indian property on account of the riots is estimated between 18 and 54 lakhs

The serious situation in Burma hastened the decision of the Government of India to send out their Agent whose appointment was already under contemplation to A Henderson C S I I C S a senior I C S officer from Madras, was temporarily appointed as Agent and he took over charge of his duties towards the end of September 1938

The Government of Burma appointed on the 22nd September a Committee to enquire into the riots and the personnel and the terms of reference are given below

Personnel—(1) The Hon'ble Mr Justice H B L Braund, M.A. Bar-at-Law (*Chairman*) (2) U Po Han, B.A Bar-at-Law member of the Public Services Commission Burma (3) Senator A Rahim of Maymyo (4) U Khin Maung Dwe Pleader Mandalay and (5) Dr M A Rauf B A B C L. LL.D (Bar-at-Law)—*Members* F S V Donison I C S—*Secretary*

Terms of reference—

(1) to inquire into and report on

(*a*) the causes of the recent riots in Burma

(*b*) the measures and actions taken by the police and civil officers during the riots and

(*c*) the loss of life and property and the desecration and destruction of religious edifices and buildings during the riots

(2) to make recommendations for the prevention of similar communal or religious disturbances.

In view of the importance and urgency of removing the underlying causes of the riots the Committee submitted an Interim Report which was published in January 1939 According to the Interim Report though the immediate cause or the occasion of the outbreak of the riots was the publication or rather the discovery of Maung Shwe Hpi's book which is alleged to have insulted the Buddhist religion the real causes were political economic and social and lay deeper The unsatisfactory conditions of land tenure and the resultant agrarian discontent the feeling of uneasiness which exist in the mind of the average Burman as to the future course of Indian immigration into Burma and of its effect upon the economics and social life of the Burmese marriages of Burmese women with Indian moslems and the activities of the organisations which have for their motto Burma for the Burmese were according to the Committee some of the more important causes of the riots of 1938 The Final Report of the Inquiry Committee was published during April 1939 and the Recommendations made in these two reports are receiving the attention of the Government of India. The questions under active consideration are (i) compensation for loss of Indian life and property and (ii) Indian immigration into Burma

The general improvement in Burma was unfortunately marred in the closing days of January 1940 by a communal riot in Rangoon The casualties were estimated at 15 dead and about 100 injured The tension did not spread into the interior and peace was restored in less than a week In this matter R H Hutchings C.I.E I C S who had succeeded C A Henderson C.I.E I C S as Agent of the Government of India in Burma in September 1939 had the prompt and effective co-operation of the Rangoon City Police and the Government of Burma

In view of the wide-spread uneasiness about Indian penetration into Burma revealed by the Riot Inquiry Committee in 1939 the Government of Burma decided to appoint a commission headed by the Honourable Mr J Baxter and containing one Indian representative Ratilal Desai to inquire into and report on the volume of Indian Immigration and its ramifications The Commission has not yet completed its work

During the latter half of 1939 the attention of the Indian community in Burma was focussed on the land Purchase Bill which sought to establish the principle of individual and indepen dent propriety in the soil on the Rangoon Municipal Amendment Bill 1937 which aimed at remedying the inadequate representation of Burman interests in the Municipality of Rangoon and on the administration of the Tenancy Act 1938 which affected the Nattukottai Chettyars Association Representations were made by the Government of India to the Burma Government on all these matters

In April 1941 an Indo Burma Trade Agreement was signed at New Delhi under which subject to the provisions of the agreement the con tracting parties undertook to accord each other the most favoured Empire nation treatment

The more important items of trade affected and the new rates of duty applicable to goods imported into India are as follows —Rice and other grains and pulses timber raw rubber and lubricating fuel and batching oils to be admitted free of duty duty to be levied at 5 per cent *ad valorem* on potatoes cotton fabric cutch and gambier and 10 per cent on candles wax and grease turpentine non-essential oil seeds and cigars betelnuts to pay duty at 20 per cent *ad valorem* while a duty of one anna per pound was charged on unmanufactured tobacco Motor spirits and kerosene were already liable to full duty

In accordance with the terms of the revised Trade Agreement no duty was levied in India on imports of starch from Burma The general principle underlying the agreement was that goods of Indian and Burmese origin enjoyed in the market to which they were exported a margin of preference of not less than 10 per cent over similar articles liable to duty at the standard rate

In June 1941 the Government of India sent a delegation to Burma to negotiate an agreement over immigration of Indians into Burma The delegation consisted of the Hon Sir Girja Shankar Bajpai R H Hutchings Agent to the Government of India in Burma and C S Bozman with V Viswanathan I C S as Secretary Indian immigration to Burma is regulated by the Burma Immigration Order since the separation of Burma from India in 1941 a twelve months notice terminating the Order was given by the Burma Government A New agreement therefore has to be reached by March 31 1942

Further consideration of all these questions were necessarily suspended with the extension of war into Burma

Under the Indo Burmese Immigration Agreement signed in July 1941 it was agreed that workers would not be allowed into Burma without either an A or B permit, and

as A permits cost Rs 500 this will virtually exclude unskilled labourers B permits were to be valid for not more than three years but could be extended with the Burma Government's approval to not more than 9 years in all A literacy test was laid down for A permit Permits would be limited to quotas fixed by the Government of Burma on the recommendation of an Immigration Board on which Burmans Indians and Europeans were to be represented In addition to the repatriation and entrance fees totalling Rs 32 an unskilled labourer was required to pay a residential fee of Rs 5 a year and extra fees for admitted dependants Skilled workers were subject to higher levies Immigrants who have resided in Burma for 7 years between 1932 and 1941 were to be treated as privileged and given the right to further employment without the time limit The agreement met with hostile criticism in the Indian press generally

Zanzibar—The small Protectorate of Zanzibar consisting of the two islands of Zanzibar and Pemba has an Indian community of nearly 15 000 out of a total population of 235,000 These Indians are mostly traders, and the trade in cloves—of which Zanzibar furnishes more than 80 per cent of the world's supply—is largely in their hands No problems of any magnitude faced this community until July 1934 when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H.H the Sultan

2 So great was the apprehension of the Indian community in regard to these measures that after an unsuccessful attempt to have their operation postponed the Government of India deputed K P S Menon, I C S to visit Zanzibar and examine the effect of the Decrees on Indian interests Mr Menon expressed the opinion that (i) the clove legislation i e, the Clove Growers Association Decree and Clove Exporters Decree and (ii) the Land Alienation Decree, were objectionable from the point of view of the Indian community In regard to (i) he stated in his Report which was published in January 1935 that its effect would be to drive from the market most exporters of cloves and also middlemen in the internal market who as already explained were almost entirely Indians

3 After consideration of Mr Menon's recommendations and the comments of the late Resident of Zanzibar thereon detailed comments on the Decrees were communicated to His Majesty's Government by the Government of India Eventually as a result of their representations, His Majesty's Government deputed B H Binder a Chartered Accountant to Zanzibar in April 1936 to review the position of the Zanzibar clove industry With the concurrence of His Majesty's Government the Government of India deputed G S Bozman, I C S to act as an observer in connection with the enquiry

4 Mr Binder's Report was published in November 1936 and he made the following recommendation for the control of the clove trade with the object of securing a fair price to the producer and preventing wide fluctuations of prices

(i) **Internal marketing**—The purchase of cloves should be restricted to licensed buyers, a sole licence to buy and receive deposits of cloves being in the first instance granted to the Clove Growers Association The Association should fix purchase prices according to quality from time to time, if possible for each season and in so doing should take into account the profit or loss on each year's working The Association should have the power to appoint district representatives and local agents for purchasing cloves from the growers to be selected from existing local dealers and shopkeepers irrespective of nationality

(ii) **Export trade**—No sales should be made by the Association except for export and to licensed exporters The Association should not export direct unless overseas buyers desire to buy direct or other circumstances arise which necessitate this course The right to limit the number of licensed exporters should remain but the license fee should be reduced to a sum which would be within the means of the small exporter and the levy on the export of cloves should be abolished.

(iii) **Advisory Committee**—Mr Binder recommended the establishment of an Advisory Committee to consist of two representatives of growers one for Zanzibar and one for Pemba two representatives of exporters and one of the C G A to confer from time to time with the Board of the Association and to discuss the purchase and sale prices to be fixed

5 Mr Binder's recommendations were opposed both by the Indian community in Zanzibar and public opinion in India Legislation which substantially gave effect to these recommendations was, however, passed in the shape of the Clove (Purchase and Exportation) Decree and came into force on the 1st August 1937 As a result of representations by the Government of India safeguards were provided in the form of (i) an assurance that all Indians previously engaged in the internal trade who applied for them would be given buying agent's licences and (ii) Indian representation on the Board of Management of the C G.A. to the extent of a total membership of seven and on the Advisory Committee to the extent of two members out of six These modifications however did not satisfy the Zanzibar Indian community who refused to nominate their representatives and organised an almost complete boycott of the clove trade both in the internal market and on the export side Their sympathisers in India also organised an equally effective boycott of imports of Zanzibar cloves into this country in this connection it must be remembered that over 26 per cent. of the cloves exported from Zanzibar normally come into this country, and that India is almost the sole market for cloves of the best quality

6 The whole question of the clove trade was now re-examined by the new Resident in the light of the boycott and, following representations by the Government of India, the Government of Zanzibar with the approval of the Secretary of State for the Colonies, prepared a modified scheme for the control of the clove trade. Details of this scheme were explained in a memorandum which was published simultaneously in Zanzibar and India on the 3rd March 1938. The main feature of the scheme

was the withdrawal of the monopoly of the Clove Growers Association in the internal market Any licensed dealer was to be free to purchase cloves, either from producers or from other licensed dealers at prices to be arranged between themselves and to store cloves as long as they wished Producers indebted to Government under the Land Protection (Debt Settlement) Decree (explained in paras 10 and 11 below) were to sell only to the Clove Growers Association, but other producers were to be free to sell their cloves to the Association or to any licensed dealer All cloves were to pass through the Association before ultimate export, but the Association itself was not to sell to principal overseas markets as long as the normal flow of exports was maintained

7 The Government of India were of opinion that the proposals were not free from certain features held to be objectionable by local Indians and suggested that the possibility of evolving a satisfactory formula acceptable to them should be explored by means of a conference at which alternate proposals and matters of detail could be discussed The Government of India also offered to depute an officer to render all assistance in effecting a settlement if the proposal found favour with the Zanzibar Government This was readily acceded to by them and the Government of India selected for this purpose G S Bozman I C S (who had been deputed to Zanzibar in 1936 in connection with Mr Binder's enquiry—a choice which was welcomed by the Zanzibar Indian National Association

Mr Bozman reached Zanzibar in the middle of April 1938 Though the outlook for an amicable settlement seemed rather gloomy at various times during the negotiations it was possible to announce an agreement on the 5th May thanks to the co operation of the local Indian community and the accommodating spirit of the Zanzibar Government

8 The main objections of the Indian community to the original proposals were (i) that participation in the export trade was very much restricted (ii) that freedom of purchase in the internal market was permitted only with producers not indebted to Government and (iii) that the proposed transport scheme for the conveyance of cloves from producers was liable to be used as an inducement to attract all sale of cloves to the Clove Growers Association According to the compromise arrived at exporters are free to purchase up to 50 per cent of the quantity to be exported from other than the Association's stocks, so that half the export trade is not subject to control In the view of the Zanzibar Government this measure of control could not be dispensed with if export prices are to be maintained at a stable level As regards the internal market producers indebted to Government are under obligation to sell to the Clove Growers Association only so much of their stocks as will set off the instalment due to Government under the debt redemption scheme Under the modified transport scheme cloves will be brought to market centres where dealers and the Clove Growers Association will have an equal chance with the producer The agreement has been given effect to by the Clove Decree 1938 and so far has been working smoothly

9 Closely allied with the control of the clove trade were the problems of indebtedness and the restrictions on the alienation of land The land alienation Decree passed in 1934 besides restricting the passing of land out of the hands of the Arab and African plantation owners into those of Indians, established, for one year in the first instance a moratorium on debts secured on land mortgage This moratorium was later extended from time to time pending a settlement of the whole problem of indebtedness Mr Menon enquired in regard to these questions also discussed a position unsatisfactory from the Indian point of view After consideration of his recommendations the Government of India suggested to the Government of Zanzibar that the position was such as to require review The latter agreed to make a fuller investigation of the indebtedness question and appointed a Commission for the purpose This Commission which included one Indian member (Mr Tayabali Rajabali), produced a report which on the whole supported the position taken up by the Indian community in this respect The Government of Zanzibar however found themselves unable to accept the report as it stood and formulated alternative proposals

10 Representations were made by the Government of India and after considerable discussion a Bill drafted by the Attorney General of Zanzibar in consultation with Sir Ernest Dowson was passed into law as the Land Protection (Debt Settlement) Decree which came into force on the 1st December 1937 The principal features of the scheme embodied in the Bill are —

(a) Adjudication of the debt with a view to ascertaining the actual amount lent (or value of goods delivered on credit) and allowing a fair rate of interest thereon

(b) Valuation by an officer appointed by Government for the purpose of both mortgaged lands and lands sought to be attached by unsecured creditors

(c) The Government to pay off the creditor to the extent of the value of the land threatened and to assume the position of mortgagee in respect of the amount paid

(d) Where the value of the land as estimated by the officer appointed to value it is insufficient to satisfy the debt the creditor will be free to challenge the valuation either by instituting a suit for foreclosure or sale or by applying for an order for sale or attachment

(e) On any such proceeding being taken the Court will in the first instance proceed to value the property in such manner as it considers proper unrestricted by the rules contained in the Bill which govern the actual valuation

(f) The Court's valuation must not be less than the official valuation If it is greater the Government must give effect to it unless the debtor himself prefers that the proceedings against his land which have commenced shall take their ordinary course

(g) Repayment by the debtor of the amount advanced by the Government on his behalf and interest thereon to be effected by suitable instalments having due regard to the necessity of leaving means at his disposal to provide for the proper husbandry of the land and for the livelihood of himself and his family

The moratorium imposed by the Land Alienation Decree of 1934 was lifted at the same time. The new scheme has, on the whole, met with a favourable reception from all communities in the Protectorate

The decree was assented to by the Sultan on June 16 1939 From information received from the Indian Trade Commissioner in East Africa the Government of India understand that the clove agreement continues to work smoothly So far as can be judged from the figures of total clove exports from the Protectorate and the business handled by Indian firms Indians have recovered the full share in the trade which they had in 1934 and there is no doubt that this position is a direct outcome of the agreement

Mauritius—In April 1924 the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation The Government of Mauritius agreed to receive an Officer for the purpose and to give him all facilities and in December 1924 an Indian Officer of Government Kunwar (now Sir) Maharaj Singh left India to conduct the necessary inquiry

Sir Maharaj Singh's report was published by the Government of India in August 1925 The various recommendations made in the report were commended to the consideration of the Colonial Government

In February 1926 the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius viz that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the Island the Colonial Government expressed their willingness to give effect to several of them

The condition of Indians in this Colony continued to remain satisfactory till 1937 when there were labour disturbances on certain sugar estates employing Indian labour The Colonial Government appointed a Commission to enquire into and report on the disturbances The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinance of 1922 which mainly dealt with indentured labour Both recommendations have been given effect to and the Labour Ordinance of 1938 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers a large number of whom are employed on sugar estates The Industrial Associations Ordinance of 1938 provided for the regulation of conditions of employment the establishment of machinery for the peaceful settlement of disputes and generally the formation of industrial Association This Ordinance, it will be observed provides for collective bargaining by Industrial labourers.

The Government of India had under consideration for some time the question of deputing an officer to visit the Colony and to report on the condition of Indians resident there as no officer of the Government of India visited the Colony since Kunwar Sir Maharaj Singh's deputation in 1925 The suggestion was accepted by H M's Government and in May 1940 S Ridley I C S Secretary to the Agent General for India in the Union of South Africa was deputed to visit Mauritius He stayed in the Colony for about five weeks and submitted a report to the Government of India

Canada and Australia—The present position of Indians in the Dominions is that under the Canadian Dominion Election Act Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces In the province of British Columbia, Indians do not enjoy the provincial or the Dominion franchise and efforts so far made to remove this disability have not been successful In New Zealand Indians enjoy the franchise on the same footing as all other British subjects In Australia sub-section (5) of section 99 of the Commonwealth Electoral Act, 1918-24 was amended in 1925 by adding after the word Asia the words except British India This measure gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr Sastri on the occasion of his visit to Australia in 1922 As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State It was therefore in Western Australia alone that Indians did not enjoy the suffrage in respect of election for the Lower House This disability was also removed at the end of 1934 By Acts which have recently been passed by the Commonwealth Parliament British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics Old Age Pension is payable to men above 65 years of age or above 60 years provided such persons are of good character and have resided continuously for at least 20 years An Invalid Pension is obtainable by persons who, being above 16 years of age and not in receipt of an Old Age Pension have whilst in Australia become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind provided they have resided continuously in Australia for at least five years

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government

War The extension of war in to the Far East and Burma has given rise to new problems First under the threat of occupation of territories by the Japanese there was the question of the

evacuation of non-essential civilian Indians particularly women and children to India In spite of the shortage of shipping about 5 000 Indians were safely transported to India by sea. In the case of Burma evacuation by sea was possible till the port of Rangoon had to be abandoned and about 70 000 Indians had been evacuated As regards land routes, a total of over two hundred and fifty thousand Indians have reached India by means of the Assam Burma land route and the Prome Akyab-Chittagong route Appreciable numbers of Indians have also been evacuated by air Secondly following the present occupation of the territories by the Japanese the problem of assistance to the dependants in India of Indians stranded in these territories and to the evacuees themselves has become of considerable magnitude and the Government of India have generously come forward by authorising Provincial Governments to give necessary advances on behalf of the Government of India Thirdly the welfare of Indians in the Japanese occupied territories generally is one on which both Government and the public are much concerned Every effort is being made to obtain such information as may become available through neutral sources and the International Red Cross Fourthly with the cessation of normal communications with these countries a very considerable number of enquiries are being received for eliciting information regarding the welfare of individuals in those areas and through the courtesy of the Red Cross attempts are being made to secure the necessary information Fifthly Government have been receiving claims in respect of properties and assets left behind in the enemy occupied territories which are for the present merely being recorded for any possible action later though obviously no guarantee can be given that these claims can at all be settled Sixthly the question of the rehabilitation of the evacuees in India is also of great importance The Provincial Governments and National Service Labour Tribunals have been requested to register applications for employment from non technical and technical personnel respectively with a view to the persons being put into touch with employers including Government Departments and industry Reference has been made only to some of the more important questions which have arisen and for a fuller account reference should be made to the *communiques* on the various subjects which are being issued from time to time by the Government of India

Indians in Great Britain.

In the middle of the nineteenth century the Parsee community in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co led the way in the sojourn of Indians in England for business purposes. This lead has since maintained though there are both Hindu and Mahomedan business men firmly established there Nor are the professions unpresented for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth The number of the latter especially Parsees, is considerable Three Indians (all belonging to the Parsee community) have sat in the House of Commons Since 1910 seven Indians—the late Mr Ameer Ali the first Lord Sinha the late Sir Binode Mitter the late Sir Dinsha Mulla Sir Chadi Lal Mr M R Jayakar and Sir Madhavan Nair—have served on the Judicial Committee of the Privy Council Three Indians are Advisers to the Secretary of State for India In 1919 the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government

India House.

High Commissioner for India —This post was first established in 1920 and its various permanent incumbents have been —

Sir Wm Meyer I C S (Retd) 1920 22 Sir Dadiba Merwanjee Dalal 1923 24 Sir Atul Chandra Chatterjee 1925-31 Sir Bhupendra Nath Mitra 1931 36 Sir Firozkhan Noon from 1936 1941 and Sir Azizul Huq from the Spring of 1941

In March 1930 the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Aldwych erected and furnished at a cost of £324 000 The design of this noble building which has a frontage of about 130 ft opposite the Waldorf Hotel was the work of Sir Herbert Baker R A with Mr Oscar Faber as consulting engineer Although expression of the Indian character of the building is mainly found in the interior the architect has given to the details of the external elevation by means of carving heraldry and symbolism an individuality that proclaims it the London house of India Including basement and mezzanine floors there are twelve floors in all the available space for clerical work alone being between 50 000 and 60 000 ft The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft

On the ground floor there is a great hall for exhibits of the products and art wares of India This hall is carried up two floors the upper floor being represented by a wide gallery and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor This gallery in its turn leads to a high vaulted library and reception rooms and the central portion of the library provides accommodation for large receptions on special occasions

The staircase exhibition hall octagonal hall and library markedly express the Indian character of the building The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone carved and pierced in the geometrical patterns of the *jali* in Indian architecture Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble The use throughout of Indian hardwoods chiefly gurgan for flooring obviates the need for any floor covering From basement to roof scarcely any wood of non Indian origin was employed For panelling and decorative purposes in all parts of the great building silver gray koko laurel and the beautiful dark red padouk have been used The domes and vaults of the building have been embellished by mural paintings the work of specially selected Indian artists The water supply is entirely independent of municipal service being obtained from two artesian wells sunk some 460 ft below the basement where the central heating apparatus is installed

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which was housed until the bombing of London at the depot off the Thames at Belvedere Road Lambeth

The Students

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem Its numbers multiplied ten or twelve fold in the quarter of a century before the 1914 18 war After a very considerable temporary check caused thereby the numbers rapidly expanded from 1919 in spite of pressure on college accommodation In addition to the ordinary graduate or under graduate student there are some youths of good family including heirs of Indian States admitted into the public schools such as Eton and Harrow There are ordinarily some 600 Indians at the Inns of Court In the last quarter of a century there has been a welcome increase in the number of technical and industrial students Altogether including technical and medical students there were up to the outbreak of War in 1939 fully 2 000 young Indians (some five per cent of them women) in London Edinburgh Cambridge Oxford Glasgow Manchester Birmingham Leeds Sheffield Liverpool and a few other centres London absorbed about half the total The added dangers of total warfare under present day conditions and difficulties of transport led to a rapid reduction of members since there were few new comers and the stream almost dried up Happily the decision of H M Government in the autumn of 1939 moved thereto by the East India Association to make open the combatant services to Indian temporarily or permanently resident in Great Britain led to recruitment of a number of the students some of whom obtained commissions in the R A F Many Indians took a share in A R P and other civil defence organisation The Indian Soldiers and Sailors Comfort Fund under the leadership of Mrs L S Amery has been doing excellent work with headquarters at India House

SOCIETIES AND INSTITUTIONS IN LONDON CONNFCTED WITH INDIA

ANGLO INDIAN ASSOCIATION LONDON — Established in 1905 to promote the interests and welfare of the Anglo Indian and Domiciled European communities wherever resident by such means as may be deemed by the Council to be desirable Anglo Indians and Europeans whether domiciled in India or not are eligible *Hon Sec* F L Sheldon BA 23 Winchester Road Oxford

LAST INDIA ASSOCIATION —Founded in 1866 by Dadabhai Naoroji and other public men Its object is to promote by all legitimate means the welfare of the inhabitants of India generally The methods are—(1) by providing opportunities for the free public discussion in a loyal and temperate spirit of important questions affecting India (2) by promoting friendly social contact between Indians and English people interested in India through the medium of social gatherings and of private meetings of members to exchange views on current Indian questions (3) by making representations to the authorities on non political questions affecting Indian interests and generally by the promulgation of sound and trustworthy information regarding the many weighty problems which confront the Administration in India so that the public may be able to obtain in a cheap and popular form a correct knowledge of Indian affairs Subscription entitling a member to the free supply of the quarterly *Asiatic Review* £1 5 0 per annum *President* Major General Sir Frederick Sykes P C G C S I G B E C M G M I *Chairman* Sir John Woodhead K C S I C I E *Hon Secretary* Sir Frank Brown K C I E 3 Victoria Street S W 1

THEOSOPHICAL SOCIETY IN ENGLAND —50 Gloucester Place W 1 (Baker Street)

Sport.

Despite the many unfavourable conditions produced in India by the War appreciable progress has been made in almost every branch of sport and substantial amounts contributed to the War Fund through this channel

Cricket—The Board of Control for Cricket in India is responsible for the affairs of the game The various provinces compete annually on the zonal basis in the Cricket Championship of India for the Ranji Trophy a magnificent gold cup of unique design which keeps green the memory of that illustrious Indian cricketer Ranjitsinhji The biggest attraction of the year is the Bombay Pentangular Tournament which comprises teams representing the Hindus *Muslims Parsis Europeans* and *The Rest* and attracts all the leading players in the country Despite a renewal of the agitation which had been responsible for the non participation of the Hindus in the previous season the tourna ment was played in the usual way and resulted in a triumph for the Hindus

Football—The game is controlled by sub ordinate provincial associations in affiliation with the All India Football Federation It has made tremendous strides in recent years and the institution of a rule by the parent body preventing the wholesale transfer of players during the season has proved most beneficial There is an official championship for the country competed for by provincial teams and the trophy is the Santosh Memorial Shield presented by the Indian Football Association in memory of the late Maharaja of Santosh who rendered yeoman service to the game The premier tournaments are the I F A Shield in Calcutta the Rovers Cup in Bombay and the Durand Cup usually played in Simla but now trans ferred to Delhi

Hockey—The game which is controlled by the All India Hockey Federation is easily the most popular in the country and the standard of play is the best in the world a fact which is borne out by India s triumphs at the last three Olympiads There is an official championship competed for by provincial teams and the trophy is a quaintly carved Maori Shield presented by the Maoris to the Indian team which toured New Zealand. The principal tourna ments are the Aga Khan Cup in Bombay which was not held in the season under review owing to war conditions the Beighton Cup in Calcutta and the Yadavendra Shield in New Delhi

The Turf—Racing in India is organised on a large scale and all the many courses are controlled between them by the Royal Western India Turf Club and the Royal Calcutta Turf Club The standard is very high and the race-courses particularly those in Bombay and Calcutta compare favourably with the best in the world The class of thoroughbred imported from Australia and England is of the best and the indigenous breed has made remarkable im provement in the last few years The principal races are the Eclipse Stakes of India run in Bombay and regarded as the Blue Riband of the Turf in the country and the King Emperor s and Viceroy s Cups in Calcutta

Golf—The game has a big following and almost every town of any size has its own course The Royal Calcutta Golf Club s A course is considered the best in the country and the one recently laid out by the Bombay Presidency Golf Club at Chembur holds great promise In view of the seriousness of the War situation it was feared that the annual Golf Week at Nasik always popular with followers of the game in Western India would have to be dropped but the excellent support forthcoming made it possible for the event to materialise and prove as successful and enjoyable as any of it predecessors

Tennis—Tennis is looked after by the All India Lawn Tennis Association through its provincial associations and a definite effort is being made towards the improvement of the standard of play by the attention which is being given to the appointment of expert coaches and th selection of promising young players for those coaches to work on The aim of the Association is the training of a Davis Cup team and there are a few players who already show great promise of developing into first class players judged by world s standards

Athletics—There is an All India Olympic As sociation with subordinate associations in most of the provinces but athletics generally do not ap proach the standard of the other games There was an appreciable improvement at the 1942 Olympic Games held in the major provinces but in no event did the performance approach International standard Lack of tracks and suitable training grounds is a big handicap to progress being made but the governing body is tackling this question and already cinder and cycle tracks have been constructed at Patiala

Other Games—Most of the other games have their controlling organisations Table Tennis and Billiards have caught on wonderfully with all classes and Badminton has made appreciable progress Amateur Boxing is strong in Bombay Bengal and in the Services but is still in its infancy in other parts of the country

ATHLETICS.

Ajmer

The Third Annual Rajputana Olympic Games finals —

110 metres hurdles —Kartar Singh (Neemuch Police) 1 G N Singhal (Jodhpur Police) 2 S N Mathur (Alwar) 3 Time 17 2 seconds

100 metres —S N Bhaya (Alwar) 1 S M A Beg (Jaipur College) 2 Bhanupratap Deo (Ajmer Mayo College) 3 Time —11 seconds (New record)

400 metres —S N Mathur (Alwar) 1 B K Sharma (Alwar) 2 Kishan Singh (Neemuch Police) 3 Time —53 8 seconds (New Record)

200 metres —S N Bhaya (Alwar) 1 S M A Beg (Jaipur College) 2 B K Sharma (Alwar) 3 Time 23 seconds (New record)

800 metres —Sher Zaman (Neemuch Police) 1 Kannaiya Lal (Hathi Bhata Ajmer) 2 R N Shukla (Alwar) 3 Time —2 minutes and 10 seconds

1 500 metres —Abdul Hafiz (Alwar) 1 H Bell (Ajmer Railway) 2 Pritam Singh (Neemuch Police) 3 Time —4 minutes 25 seconds (New record)

3 000 metres —H Bell (Ajmer Railway) 1 Sita Ram (Alwar) 2 Jumman Khan (Neemuch Police) 3 Time —10 minutes 3 seconds (New record)

400 metres relay —Alwar 1 Neemuch Police 2 Ajmer Merwara Police 3 Time —47 seconds

1 600 metres relay —Alwar 1 Neemuch Police 2 Ajmer Merwara Police 3 Time — 3 minutes 42 seconds (New record)

Pole Vault —H Boston (Ajmer Railway) 1 Harban Singh (Ajmer Railway) 2 S N Mathur (Alwar) 3 Height 10 feet 2 inches (New record)

High Jump —G N Singhal (Jodhpur Police) 1 Prakash Chand (Ajmer Government College) 2 B P Deo (Ajmer Mayo College) 3 Height —5 feet 8 ½ inches (New record)

Broad Jump —Manohar Lal (Bikaner) 1 B P Deo (Ajmer Mayo College) 2 G N Singhal (Jodhpur Police) 3 Distance — 21 feet 3 inches

Hop Step and Jump —Manohar Lal (Bikaner) 1 H Boston (Ajmer Railway) 2 G N Singhal (Jodhpur Police) 3 Distance —44 feet

Putting the Shot —Kakim Khan (Neemuch Police) 1 Ganpat Ram (Bikaner) 2 T Y Khan (Ajmer Schools) 3 Distance — 33 feet ½ inches

Throwing the Hammer —Ajab Singh (Bikaner) 1 K L. Anand (Alwar) 2 Shiv Dayal (Ajmer Govt College) 3 Distance —77 feet 5 inches (New Record)

Throwing the Discus —Manohar Lal (Bikaner) 1 Ganpat Ram (Bikaner) 2 K K Lal (Alwar) 3 Distance —102 feet 2½ inches

Throwing the Javelin —M C Dhawan (Ajmer Mayo College) 1, Manohar Lal (Bikaner) 2 H Boston (Ajmer Railway) 3 Distance —166 feet.

1 000 metres cycle race —E Boezalt (Ajmer Railway) 1 Maharajkumar Jai Singh (Ajmer Mayo College) 2 S P Rao (Hathi Bhata Ajmer) 3 Time —1 minute 42 4 seconds

3 000 metres cycle race —E Boezalt (Ajmer Railway) 1 S P Rao (Hathi Bhata) 2, M K Jai Singh (Ajmer Mayo College) 3 Time —5 minutes 48 4 seconds (New Record)

Basket Ball (Final) —King George s Royal Indian Military School Ajmer beat Crown Representative Police Neemuch 31 points to 26

Volley Ball (Final) —Jodhpur Volley Ball Association beat B B and C I Railway (Metre Gauge) 15 10 10-15 15-9

Kabbadi (Final) —Hathi Bhata Ajmer beat Ajmer Merwara District Police 37 points to 33

Bombay

The following are the results of the Eighth Annual Bombay Presidency Olympic games —

MEN S EVENTS

3 000 metres —L Pereira 1 J R Pingley 2 M G Amin 3 Time —9 minutes 52 seconds

3 000 metres cycle race —B Malcolm 1 J F Amin 2 V Pai 3 Time —6 minutes 2 4 seconds

1 000 metres cycle race —J F Amin 1 B Malcolm 2 A Havewalla 3 Time — 51 6 seconds

800 metres —R N Utchil 1 N Richardson 2 S D Lima 3 Time —2 minutes 2 4 seconds

Pole vault —J Jameson 1 R Gohil 2 B A Haldipur 3 Height 10 feet 2½ in

Throwing the discus —Baldeo Singh 1 Ranbir Singh 2 J Jameson 3 Distance — 97 feet 8½ in

Putting the shot —J Jameson 1 Ranbir Singh 2 Baldeo Singh 3 Distance — 32 feet 9½ in

Indian Orders

The Star of India

The Order of the Star of India was instituted by Queen Victoria in 1861 and enlarged in 1866 1875 1876 1897 1902 1911 1915 1920 1935 1937 and 1939 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign a Grand Master (the Governor General of India) the first class of forty six Knights Grand Commanders (24 British and 22 Indian) the second class of one hundred and six Knights Commanders and the third class of two hundred and thirty-seven Companions exclusive of Extra and Honorary Members as well as certain additional Knights and Companions

The Insignia are (i) the Collar of gold composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown all enamelled in their proper colours and linked together by gold chains (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband tied at the ends and inscribed with the motto of the Order *Heaven's Light our Guide* also in diamonds that of a Knight Commander is somewhat different and is described below (iii) The Badge an onyx cameo having Her Late Majesty Queen Victoria's Royal Effigy thereon set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points all in diamonds (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky blue having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander and pendent therefrom a badge of a smaller size (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery or if the recipient was resident in India to the Secretary of the Order at New Delhi or Simla.

Indian Titles Badges.—An announcement was made at the Coronation Durbar in 1911 that a distinctive badge should be granted to present holders and future recipients of the titles of Diwan Bahadur Sardar Bahadur Khan Bahadur Rai Bahadur Rao Baha dur Khan Sahib 'Rai Sahib and Rao Sahib Subsequently the following regula tions in respect of these decorations were issued —(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King s effigy crowned and the name of the title both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown the plaque or shield being of silver gilt for the titles of Diwan Sardar Khan Rai and Rao Bahadur and of silver for the titles of Khan Rai and Rao Sahib (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan Rai and Rao Bahadur light red with a dark red border and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border

A Press Note issued in November 1914, states —The Government of India have recently had under consideration the question of the position in which miniatures of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself When the miniatures are worn in conjunction with other decorations they should be placed immediately after the Kaisar I Hind Medal.

Indian Distinguished Service Medal.—This medal was instituted on June 28th, 1907 by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII and on the reverse a laurel wreath encirc ling the words For Distinguished Service The

medal 1¾ inches in diameter is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 1¾ in wide with blue edges ¼ in wide This medal may be conferred by the Viceroy of India

Indian Order of Merit.—This order was instituted by the Governor General of India in Council in 1837 and amended in 1939 It is divided into a Civil Division and a Military Division The Civil Division consists of one class and is awarded for any act of conspicuous personal bravery in aid of public authority or the safety of others The Badge consists of an eight pointed star 1″ in diameter composed of rays with in the centre a circular ground of dark blue enamel surrounded by a laurel wreath On the enamel ground there is the Royal Cypher surmounted by a Crown encircled with the words For Bravery The Badge is of Silver and the laurel wreath and the design in the centre of gold The Badge is worn on the left breast pendant from a dark red ribbon with blue edges

The Military Division consists of two Classes and appointments are made for any act of conspicuous gallantry performed in connection with duties Appointments to the First Class are made only from members of the Second Class for any similar act performed The Badge of the Military Division consists of an eight pointed silver star 1¾″ in diameter with in the centre two crossed swords around which is inscribed the words Reward for Gallantry all on a circular ground of dark blue enamel and surrounded with a laurel wreath In the Badge of the First Class the laurel wreath and the design in the centre are of gold and the Second Class of silver The Badge is worn on the left breast pendant from a dark blue ribbon with red edges

The members of the Order use the letters I O M after their names

Order of British India.—This Order was instituted at the same time as the Indian Order of Merit and amended in 1939 It consists of two Classes and appointments are made from among those on the active list in the Armed Forces in India for long, faithful and honourable service Appointments to the First Class are made only from members of the Second Class The Badge of First Class consists of a Star 1 11/16 in in diameter composed of rays of gold and surmounted by a Crown with in the centre on a ground of light blue enamel the words Order of British India encircling a lion and surrounded by a laurel wreath of gold In the Badge of Second Class the star is of 1¼″ in diameter on a ground of dark blue enamel The Badge is worn pendant from a ribbon of dark red round the neck Members of the Order also use the letters O B I after their names The First Class carries with it the title Sardar Bahadur and an additional allowance of two rupees a day and the second the title of Bahadur and an extra allowance of one rupee per day

Indian Meritorious Service Medal.—This was instituted on July 27th, 1888 and on receipt of the medal the order states a non-commissioned officer must surrender his Long Service and Good Conduct medal but on being promoted to a commission he may retain the M S medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind encircled by the legend Victoria Kaisar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base having a star beneath between the two wreaths is the inscription for meritorious service Within the palm wreath is the word India The medal 1¾ in diameter is suspended from a scroll by means of a red ribbon 1¼ in wide The medals issued during the reigns of Queen Victoria a successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS

The Kaisar-i-Hind Medal

This decoration was instituted in 1900 the preamble to the Royal Warrant—which was amended in 1901 1912 1933 1938 and in 1939—being as follows —"Whereas We taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created and by these presents for Us Our Heirs, and Successors, do institute and create a new Decoration " The decoration is styled " The Kaisar-i Hind Medal for Public Service in India " and consists of three classes. The Medal is an oval shaped Badge or Decoration—in Gold in Silver or in Bronze—with the Royal Cypher on one side and on the reverse the words " Kaisar i Hind for Public Service in India it is suspended on the left breast by a dark blue ribbon

Historical Centres

Abu, Mount—The Dilwara Jain temples form the great attraction of Abu They belong to a beautifully modified style of the Aryavarta or North Indian or Indo Aryan school of architecture

Of the Abu group of temples two are most important They form the noblest examples of Jain temples of the North Indian school of art One of them is dedicated to Adishvara or Adinatha or Rishavadeva the first prophet of Jainism Vimala Shah a merchant prince of Gujarat built the temple in 1031 A D It is said that he bought the ground covering it with silver coins and that it took 19 years to build the temple at a cost of Rs 180 lacs plus Rs 59 lacs towards levelling the hill The other temple is ascribed to the brothers Vastupala and Tejpala who built the triple temple at Girnar (the name of Tejpala alone is met with in the inscriptions) The temple was dedicated to Neminatha the 22nd Tirthankara (the prophet of the Jains) This temple was built 200 years (1231 A D) after the temple of Vimala Shah It is comparatively simpler and bolder

These temples belonging to the last period of the medieval age record specimens of the culmination of Indian decorative sculptures The Indian sculptor s proverbial patience reaches its limit here No example of decorative art known anywhere in the world can beat the richness and delicacy of the sculptural decorations of the ceilings pillars and walls of these temples Never before has marble produced such marvellous specimens of artistic workmanship Both the temples have at the entrance a room containing 9 or 10 elephants Inscriptions record that the elephants carried riders Most of the figures are musing What ever is left records a wonderful amount of life in the figures Such lively human figures are hard to be met not only in any other Jain temples but anywhere else in India

Apart from the claims of artistic interests Mount Abu makes the finest hill station of Rajputana It is on an isolated plateau about 4 000 ft high The Nakhli Talao an artificial lake near which the temples stand lends a fine scenic effect A few miles off at Achalgarh on a summit stand a beautiful group of temples They are smaller temples and lack the finish of the Abu temple but they have a real appeal of simplicity and charm South of Mount Abu will be seen the traces of an ancient town Chandravati the remains of which have been removed by the Sultans of Ahmedabad and the Thakurs of Sirohi

Agra—The architectural history of Agra dates from the time of the Imperial Lodis who transferred the capital from Delhi to Agra It had been an early capital of the Moguls In 1527 Babar made it his capital Humayun had a preference for Delhi but in 1565 Akbar formally removed the capital to Agra He proposed to make it a worthy capital of an empire extending from Afghanistan to Bengal and from Kashmir to Ahmednagar In 1658 Aurangzeb made Delhi again the imperial seat and henceforth Agra was relegated to unimportance On the banks of the Jumna in the shape of a crescent lies the fort of Agra one of the greatest relics of Indian art in the Muslim period The ramparts a mile and a half long and 70 ft high enfold palaces halls of state terraces balconies kioques etc the cost of each of which would be a king s ransom Salim Shah the son of Sher Shah laid the foundation of the Fort Akbar developed it fully Akbar a tomb at Sikandra is worthy of him enshrining the unique eclectic spirit of the Great Mogul It represents the Indian tradition of the multi storeyed academic hall where professors of the different schools of art and science could hold discussions in groups Akbar himself had revived the plan in the council chamber at Fatehpur Sikri The tomb of Itimmad ud Daula is worthy of the exceptional abilities of Nurjahan who was in herself a combination of Elizabeth and Cleopatra It has distinct qualities apart from its noble grandeur

Agra had been the favourite seat of Shahjahan and he made contributions to the glories of Agra Fort In his Moti Masjid (Pearl Mosque) is inscribed Verily it is an exalted palace of paradise made of a single pearl of magnificence In the history of the world no mosque made of marble could rival its greatness and beauty The appeal of its noble magnificence lies in its great simplicity Its refinement of contour is matched only in the Taj The Jama Masjid one of the greatest mosques of India is built in white and red stones in memory of Jahanara The Dewan I Am by some accounts was built by Aurangzeb Thus would be Aurangzeb s greatest architectural contribution As his puritanical policy doomed to death the Mogul empire the same spirit put an end to the great tradition of Mogul architecture and sculpture All these edifices would have made Agra second to no other Mogul city but the Taj is an unparalleled monument and gives it a unique position

The Taj Mahal is the tomb built at Agra by Shah Jehan for his wife Mumtaz Mahal where he is also buried It was begun in 1632 (in which year the Shah ordered the stopping of all other Hindu temple building) and was completed by 1650 The Taj Mahal is the most perfect example of the Mogul style and is by some considered the most beautiful building in the world The tomb proper consists of a domed square white marble building raised on a terrace from the corners of which rise four slim, white minarets The whole is set in an exquisite garden surrounded by a red sandstone wall a gate and a mosque are subsidiary elements in the composition The tomb building itself is 186 ft square with a dome 58 ft in internal diameter rising to a total height of 210 feet The Building is said to have cost over £5 000 000 It was probably designed by an architect named Ustad Isa, traditionally supposed to have been either Turkish or Persian

Ajanta —The Ajanta Hills contain 29 caves (5 chaityas or shrines or churches and 24 viharas or monasteries all Buddhist) and present a record of an almost unique combination of painting sculpture and architecture of a period of about 9 centuries (2nd or 1st cen B C to middle of 7th cen A D) Ajanta forms specially the great museum of Indian painting

The caves excavated as caves and not as cave temples (*e g* Kailash Ellora) extend over a distance of about 600 ft in a perpendicular rock Thus the roofs were not hewn only the facades were hewn and sculptured The Archaeological Department numbers the caves from East to West Paintings have been noticed in 16 caves

The sculptures and the paintings of one cave may belong to different periods frescoes have been painted sometimes long after the excavation of a cave Sculptures in different periods have been undertaken to continue the decoration of the caves Paintings reminiscent of the sculpture of Bharut and Sanchi partially covered with later paintings have been found in certain of the caves

The caves were first noticed in 1819 Greedy ignoramuses indemency of weather and much damp natural to the country had done the worst imaginable injuries That it could survive to any extent is due to the peculiar formulae of plastering and painting During the present century steps have been taken towards preservation of the great works Lately Hyderabad State has taken charge of the caves

The subjects of representation are almost always taken from Buddhist literature They generally portray the figure of Buddha and incidents from his lives (his last life as Buddha and his previous births as man or a lower animal) Secular pictures are comparatively few but not unknown We have a bull fight many other beasts prowling in their pleasure a pair of lovers etc These drawings are remarkably good Women have received very great attention in Ajanta Women with lotus eyes dreamily half open faces with delicate and tense expressions poses most graceful and charming and hands and fingers delicately modelled have made indelible impressions upon all succeeding ages of Indian art

Amritsar —The Pool of Immortality with the Golden temple in it makes Amritsar the most famous shrine of the Sikhs Ramdas the fourth Guru (Prophet) of the Sikhs (1574 81) is said to have received from Akbar a piece of land within the limits of which he dug a reservoir since well known as Amritsar Some Sikh accounts however record that the pool had been an ancient one and a Vairagi (recluse) devoted to Rama claimed it as a sanctuary The Guru however succeeded in ousting him The appellation Haramandir for Darbar Sahib is perhaps reminiscent of a tradition that it had been the site of a temple of Shiva At first the locality was called Ramdaspur The next Guru Arjun (1581 1606) made Amritsar the proper seat of his followers, the centre which should attract their worldly longings for a material bond of union The tenth and the last Guru Govind (1695 1708) declared the equal right of all Sikhs of all castes to bathe in the sacred tank The temple and the pool suffered great havoc possibly on two occasions at the hands of the Durani invader Ahmed Shah Abdali The Khalsa (specially the Dal or army founded by Jussa Singh Kulal) restored the shrine and rebuilt the temple (1763 64) At this time they held at Amritsar a formal *Gur mutta* or conclave of the Sikhs probably the first of its kind On defeating the invader a viceroy the Sikh chiefs met at Amritsar and struck for the first time the Govindashahi coins In 1802 03 Ranjit Singh covered the dome and very possibly the whole structure with golden repousse copper work Hence it is known as the Golden temple As it served as the court of the Gurus it is called the Darbar Saheb

The temple stands on a raised plinth 65 ft square in the centre of the tank and is surrounded by spacious verandhas A white marble causeway 204 ft long with an archway over it joins the temple with the mainland There are four entrances with doors covered with silver plates neatly wrought Entrance by the principal gateway leads to the Bhung where the arms of the Gurus have been preserved Except the lower parts of marble the whole edifice is wrapped with gilded copper and quotations from the Granths Saheb (the Sikh bible) are plentifully inscribed The Granths Saheb is the material object of veneration

In the Guru Ka Bagh or the garden of the Guru there is the pretty Bab Atal Tower There are some interesting late nineteenth century frescoes depicting incidents of the life of Guru Nanak

Benares (Kasi) —Benares the religious capital of Hindu India for centuries is visited by millions of pilgrims every year It lies between the Barna and Asi and stretches for three miles on the crescent of the Ganges Massive medieval looking edifices line the bank which is practically a stretch of spacious ghats of which there are 64 in good or indifferent condition

Benares has 1 500 comparatively large temples besides countless minor shrines The most important temple is the one dedicated to Vishwanatha (Lord of the Universe) It is also known as the Golden Temple (the domes and spires were covered with gilt golden repousse copper work) and stands in a typical Benares alley Although it is the most famous shrine of India it is conspicuous by its comparative smallness and the absence of ornamentation Latterly Benares has become the seat of the famous Hindu University

Bhuvaneshvar —In the Gupta period (4th and 5th centuries A D) the golden age of Indian art and literature most devout Hindus (Vaishnavas) as the Guptas were they built numerous temples all over their great empire Almost every part of the Gupta empire proved to be lasting seats of Muslim Kings whose spirit of iconoclasm almost thoroughly succeeded in erasing the monuments of the Guptas Only in one out of the way place have a few comparatively insignificant specimens survived to bear evidence of the glories of the great art of this period

Bhuvaneshvar a small village on the way to Puri and the seat of Shiva is only second in importance to Benares and contains some four hundred or six hundred temples mostly of Shiva, dating from the 9th or 10th century to the 18th century A D The temples are entirely covered with sculptures and the artistic vision of the builders appears to be practically unlimited The representations and patterns seem executed with great care and their claims to artistic merit are high

The great temple in Bhuvaneshvar is the finest example of a purely Hindu temple in India The main shrine is now 160 ft very possibly originally it had been a little (15 to 25 ft) higher It stands within a stone wall as strong as the ramparts of a medieval fort The area is 520 ft by 485 ft The deity *Tribhuvaneshvara* or *Lingaraja Mahadeva* is represented by a block of granite 8 ft in diameter It rises 8 inches above the floor

The Muktesh vara temple held by some to be the gem of Orissan art is a small temple Its proportions are almost perfect The whole body top to bottom inside and outside is sculptured The numerous floral designs very delicate and natural men and women dressed with great care and in very elegant poses dancing girls arrayed very charmingly couples of lovers very gracefully drawn elephants lions etc marvellously well represented domestic scenes true and delicate beautiful figures of gods and goddesses etc form an endless lavishing of beautiful sculpture

Bijapur —Yusuf Khan (Yusuf Adil Shah) said to be a fugitive younger son of Sultan Murad of Turkey employed as a very high officer in the Bahmani Kingdom on the decline of his masters set up the Sultanate of Bijapur (the city of Victory) in 1489 Eighth in succession, Sikandar Ali Shah lost his kingdom to *Aurangzeb* in 1686 *In commemoration of* the noble origin of the founder of the kingdom the great edifices of the city were often surmounted with the Turkish crescent

The most important architectural works in Bijapur are Jami Masjid the tomb and mosque of Ibrahim II or Bolli Gumbaz the Mother Mahal Asar Mahal Gagan Mahal Chini Mahal Mecca Masjid etc

The Jami Masjid, one of the finest mosques of India and the greatest mosque in South India was begun and very possibly completed by Adil Shah (1557 80) probably after the fall of Vijayanagar (1565) An inscription records that it stood in the reign of Mahammad Shah (1636) As a matter of fact however the mosque was never completed The minor domes are so low as hardly to be seen from outside

Bijapur has the distinction of possessing the second largest dome of the world in the Gol Gumbaz the mausoleum of Mahammad Shah which covers more ground than any other dome or vaulted roof It dates back to 1659 A D and is also known as Boli Gombas or the whispering gallery Loud laughter is answered by a score of fiends hidden behind the plaster

Conjeevaram (Kanchipuram) —The Benares of South India. Of 7 holy cities (Sapta-Tirtha) only one viz in South India which is Conjeevaram Jainism Buddhism Shaivism and Vaishnavism have all played great parts in this city It possesses historical records dating before Christ The City grew in glory under the Pallavas and the Cholas It has two parts the western with a large number of Shiva temples is known as Shiva or Big Conjeevaram and the eastern with a much lesser number of Vishnu temples is called Vishnu or Little Conjeevaram There are well over 1 000 temples in the city of which none belongs to the pre-Pallava period and most of the large ones belong to later Dravidian style There are very good examples of temples of the first half of the eighth century

Sculptures are lavished all over the main shrine the porches and the minor shrines There is a joint figure of Shiva Parvati (Andharnishvara) The Devaraja temple (Vishnu Conjeevaram) would make a good example of later Dravidian style in which the early Pallava and early Dravidian styles are mixed up with a predominance of the latter The temple has unfortunately been highly reconditioned at later periods It has a seven storeyed tower 100 ft high and the original builders had either made it higher or had proposed to make it higher The hall of Pillars is one of the most beautiful productions of its kind It had received some injuries from Hyder Ali

The Ekambranatha temple is a great monument of the art of Vijayanagar It is 10 storeyed and 188 ft high All the walls run zig zag and no two towers are at right angles The hall of thousand (540) pillars is typical of the wealth of sculpture of Vijayanagar

The temple of Kamakshi Amman where the goddess is depicted in the form of a *Yantra* is very popular

Delhi.—In the course of 3 000 years within an area of about 50 sq miles rose eight Delhis sometimes one upon another and sometimes one beside another as the imperial capital of India In the longest Indian drama the curtain falls after the 9th act and tradition goes that the fall of the 9th Delhi would close finally the career of India s greatest historical city In the days of the *Mahabharata* (Circa 1 000 B C) Delhi under the name of Indraprastha (the site where Indra had worshipped Vishnu) was for the first time declared the capital of India The epic records that the surrounding moats were as large as rivers, the doors of the gateways were of the size of the wings of Garuda the great mythological bird and innumerable palaces filled the city Later the city was named Dilli (Delhi) in commemoration of Dilu of the Mayura dynasty The fort of Indrapat also known as Purana Kila (the Old Fort) is traditionally supposed to mark the site of Indraprastha The construction of Purana Kila was begun by Humayun and completed by Sher Shah In the 11th century the Paias of the Tomara clan had their capital at Delhi, the remains of which may be traced at Lalkot Their successor Prithviraja, the last Hindu prince of Delhi (1193 A D) built a capital at

Rai Pithora which proved to be an extension of Tomara Delhi First within the walls of Rai Pithora and later beyond the same at Siri, Qutubuddin and his successors built the first Muslim Delhi. Materials of the Hindu temples were used often *en block* in the construction of the new capital Images and sculptures representing figures of men and animals were scrupulously destroyed

In the middle of the 16th century the Lodis removed the capital to Agra Sher Shah built a wall surrounding the city his capital however was Agra His son built Selimgarh after his name Akbar and Jehangir lived mainly at Agra Lahore and Ajmer The last Muslim Delhi is Shahjahanabad the city of Shahjahan which is now known as Old Delhi In 1857 in course of the suppression of the Sepoy Mutiny the last Mogul Emperor was taken prisoner and Delhi was formally annexed to the British Crown At the Delhi Durbar on the 12th December, 1911 by an Imperial Proclamation the seat of the Indian capital was removed from Calcutta to Delhi (New Delhi)

The Qutb mosque the Qutb Minar the tomb of Iyaltimash (Altamash) the mosque of Azmir and the gateway of the chief mosque at Budaun (U P) form the early great Muslim edifices of India The Qutb mosque was named after a Muslim saint Qutbuddin of Ush near Baghdad It was built in 1196 under the Viceroyalty of Qutbuddin Aibek The present dilapidated mosque preserves only a small portion of the original one

The Qutb Minar (circumference 47 ft 3 ins at the bottom and 9 ft at the top height 280 ft) a five storeyed detached minar was begun by Qutbuddin Aibek and completed by Iyaltimash (1232) *It is the most beautiful example known* to exist anywhere It does not form part of the mosque which has its own minars Tradition goes that it makes a pillar of victory first erected by Prithviraj and later reconstructed by the Muslim emperors Some Muslim accounts say that it had been begun by the Hindus and completed by the Muslims

New Delhi is the creation of the British wherein European architecture of different periods generally modified or modernised has been observed Often features of Muslim architecture (*e g* the dome) have been added and improved in that light The appeal of simplicity in magnificence of correct outlines and proportions forms a great architectural principle

Ellora —The Ellora Hill containing the cave temples stands about 19 miles north west of Aurangabad (Hyderabad State) It was known as Grishneshwara (an appellation of Shiva) and held holy by the Hindus especially the Shaivites. *It has the largest cave temple* in India a form of architecture which in its development makes a most remarkable feature of architecture in India. The caves are excavated in the face of a hill or rather the scarp of a large plateau and run nearly north and south for about a mile and a quarter the scarp at each end of this internal throwing out a horn towards the west The hill has the shape of a crescent, the southern arm the centre and the northern arm being occupied by the Buddhist Hindu and Jain temples respectively The caves have been numbered from south to north The large or main caves are 34 and there are a number of minor caves

The Buddhist temples in the southern section known locally as Dheralerna are the oldest The caves number twelve The first cave is a monastery with eight rooms the second cave is a hall which was probably used as the lecture hall its verandah has a number of Buddhist figures the third one resembles the first and is older than the other two caves Five other caves have been more or less destroyed Further up is the Maharbara cave The *height inside is about 117 ft* and the width 58 ft The roof rests on 24 pillars On the left of the entrance is a figure of Buddha in meditation A crowd of males and females attend him In the south of the cave there is a temple of a seated Buddha attended by a host of devotees holding gracefully clusters of lotuses Next come a number of monasteries and tanks A little further up is the cave of Visvakarma the Indian Vulcan Local craftsmen come to worship here The dating of the Buddhist caves may be made from the 3rd to the 6th century A D

Beyond the three storeyed temple in the Hindu region containing 17 large caves below the brow of the scarp and a large number of smaller ones above The Hindu caves are generally more decorated than the other ones and the Kailasha Temple is the most famous of all the cave temples of Ellora Both the architecture and the sculpture of Ellora reached their culmination in the Hindu cave temples They present some excellent specimens of Indian sculpture and *architecture (8th-9th cen A D) The gem of the* collection is the Kailasa temple a masterpiece of Indian architecture and sculpture with a claim to be called unique of its kind in the world About three million cubic feet of rock had to be quarried or chiselled to turn out this monolithic temple It stands in a court averaging from 154 ft wide by 276 ft long with a scarp 107 ft high at the back Colossal in size and ambitions in plan the whole temple inside and outside the roofs ceilings walls pillars every part of it has been extravagantly sculptured with lavish decorations The sculptures as in the case of Ajanta Elephanta and elsewhere had been painted with a thin coating of lime plaster

The whole execution shows an extraordinary command of glyptic technique not only in the grouping and composition of line but in the powerful and subtle treatment of the varied gradations of relief

The last temple of the northern section belongs to *Parsvanath of the Jains* It was built in brick by a Jain merchant of Aurangabad in the 18th century The temple is about 700 ft. above the ground The figure of Parsvanath is unclothed and is about 10 ft. high The Jains (Digambaris) of Gujerat worship the image on the 14th day of the bright moon of Bhadra. South of the Parsvanath temple is the Indrasabha, composed of three caves. The first one is

60 ft by 30 ft with 16 pillars. The walls are sculptured with figures of Jain divinities The second one is Jagannathsabha A large inner nave or shrine contains figures of Jain Tirthankaras Ambika etc The temple of Ranchhorji is the third one Figures of Jains Gandharvas etc are seen on the shrine and the walls In the porch an elephant carries a male and a female The Brahmans identify them as Indra and his wife

Fatehpur Sikri —Fatehpur Sikri was the proud and faithful mistress of the mightiest Mogul emperor Akbar His son Salim who was also her son had been kind to her in his early days. But she had practically died with the death of her lord Her noble career is compassed within the period of half a century Fatehpur Sikri is now a dead forsaken city

Again and again Akbar suffered the bereavements of his babies He was left no son Stories of miraculous powers of Shaikh Salim Chisti of Fatehpur Sikri reached his ears When men of science failed him he turned to the man of God His prayer was granted The son was given the name of the saint This son Salim born at Fatehpur Sikri succeeded Akbar as Jehangir

In 1569 Akbar founded the city of Fatehpur Sikri 23 miles off Agra The present town of Fatehpur is on the south west and the village of Sikri is on the north east of the ruins Both used to be within the walls of the city

The most striking work of art is the Buland Darwaja or the Great (High) Gateway It was erected (160 ft) in commemoration of the conquest of Khandesh It forms the Southern gateway of the most imposing edifice in Fatehpur Sikri the Jami Masjid (1571) said to be a copy of a mosque at Mecca or Medina It measures 550 ft east to west and 470 ft north to south It contains the tomb of Shaikh Salim Chisti The Buland Darwaja makes the noblest example of the Mogul gateways It is the highest Indian portal the summit of the finials being 176 ft from the roadway and 134 ft from the pedestal In its construction marble is noticeably used with sandstone The form is Persian but the construction is Indian

Konark, Kanarak —The Sun temple of Konarak known as the Black Pagoda stands unsurpassed in the field of Indian art By the sea shore it is about 20 miles and by motor car 52 miles from Puri Traditionally it had been built by Sthamba a son of Krishna in thanksgiving to the Sun for curing him of an incurable disease The present temple was built by king Narasingha deva I of Orissa (1240-80)

The main temple has been destroyed It may be that the sandy soil could not bear so enormous a structure It may also be due to an earthquake There is a tradition that some Muslim seamen (as their ship foundered because a great lodestone on the top of the temple attracted away the iron bolts of the ship) had destroyed the temple Ain I Akbari records that there were 28 temples adjoining the main temple and a wall 225 ft high and 28½ ft thick surrounded it The remains of the great temple formed a heap 70 ft long and 45 ft. high.

As in the cases of some other ancient Hindu monuments so also Konark leaves one to wonder how numerous blocks of stones weighing many tons were conveyed over a long distance (not less than 80 miles) and it is a miracle of engineering how such stones were hoisted to a height of 150 ft The Konark temple is markedly correct in proportion and symmetry An image of great beauty of the sun in a temple in the yard of the Puri temple is shown as the image of the sun of Konark The temple is built of red laterite and was probably called black due to the great shadow it casts The pillar in front of the Puri temple had been brought from Konark

Madura —Known as *Kadamba-Vanam* (the Forest of Kadambas) in an earlier period it was made the capital of the Pandya Kingdom by Muthu Tirumala Nayak (1623 59) Before the fall of Vijayanagar (1565) Madura had been an important centre of architecture On the fall of Vijayanagar it became the principal seat of Hindu architecture The Nayaka rulers in the 16th and especially in the 17th centuries built the magnificent edifices of Madura and Tirumala Nayak proved the greatest builder The town was planned after a coiled snake

The Great Temple in Madura forms a rectangle 847 ft by 720 ft It is made up of two temples one of Meenakshi (*lit* one with eyes resembling the shape of a fish Tradition holds that she had been born as a Pandya princess and Sundareshvara took her as his consort) and the other of Sundareshvara (*lit* The Lord Beautiful—Shiva) The entrance is by Meenakshi s temple Adjoining the temple are the Nandi Hall the temple of the Saints (Arunvati Muvar) wherein there are some remarkable statues of saints and gods the Jewel House (the jewelleries of the deities make one of the finest collections in South India) and the Stable Houses A Hall of Thousand Pillars (*Ayyrakkal* or *Sahasra stambha mandapam*) stands in the north-east corner No pillar is a replica of another In the central row of pillars are statues of 10 Nayak kings together with their queens In the outer rows are some remarkable sculptural representations of legends connected with Shiva

Tirumal Nayak s Mahal or Palace in Madura records a landmark in the development of Indian architecture It makes a great example where Hindu architecture in a masterly way had assimilated the principles of Saracenic and Gothic architectures The great hall in the Palace is 140 ft long 70 ft wide and 70 ft high

Tirumala Nayak s grandson Chokkanadhan went back to the old capital Trichinopoly and to build a great palace there the old palace was shorn of all its splendour As a matter of fact the greater portion of the palace the best parts by his choice were removed

Mohenjo-Daro.—The ruins of Mohenjo-Daro (the Domain of the Departed) are situated eight miles off Dorki station (B N W R.) Indian archaeological history dates from the 3rd century B C The excavated remains in Mohenjo-Daro belong to the last city which had been built on ancient cities which are suspected generally

to be lower than the water-level All the objects found have not yet been studied in detail and there are reasons to think that the yield of even the upper layer cannot be strictly confined within 2750 B C and the subsequent period Excavations of the lower strata may be expected to yield the remains of an older period Failure to read the characters of the seals and inscriptions of excavation continue to fortify the sealed character of its ancient inhabitants and their civilisation

It is a very remarkably well-planned city All the streets were laid south to north. Nothing is more welcome to an Indian city than the south wind. The city had necessarily grown most towards the north Lanes are free from a general devisting of unhygienic character Houses were two-storeyed and the staircase lead not to the lower storey but to outside This feature is not unknown in the houses in the hills Covered balconies or open porticoes are conspicuous by their absence The courtyards are to an extent small Proximity of the dwellings points to a very crowded city Mohenjo Daro is a city of bricks fire-burnt and sun burnt It had probably stressed more on drainage than any other ancient city Evidence of under ground drains are to be found everywhere They are large and high and provided with manholes The vastness of the drainage surely reflects the greatness of the upper structures, now very much lost to view It is not known however, whether the drains led to any common dumping place away from the city although soak pits have been noticed, but from their size one cannot be sure that they were used as the main dumping grounds A flight of steps into one of them would rather suggest that they proved minor temporary repositories refuse from which has been systematically scraped off Bathrooms are another feature significant of the cleanliness of the city

The objects found in the remains mainly consist of seals jewelleries potteries figures (human and animal) and toys The seals have on them inscribed characters of a conventionalised form of pictograph writing which have not yet been deciphered Most of them are of steatite and of square size The more common animal is difficult to be identified It has features both equine and bovine with one horn only

Puri (Jagannatham)—A popular Hindu pilgrimage centre on the eastern seaboard of India specially sacred to the Vaishnavites. The White Pagoda of Jagannath or the Lord of the Universe is at Puri The presiding deities are Jagannath (Krishna seen with his disc Sudarshana) his brother Balaram and his sister Subhadra

The strict communal rules of the Hindu caste system have no application in Puri especially in the matter of taking together the *Mahaprasada*, cooked or uncooked eatables ceremoniously offered to the deity This is unknown anywhere else in Hindu India It has been asserted that this peculiar feature marks Buddhist influence

The altar in the temple, which is held very sacred, is supposed to contain one hundred thousand Shaligrama-Shilas (a particular type of round black stones, of the size of eggs, which serve as emblem of Narayana or Vishnu)

The court of the White Pagoda is 665 ft east, to west and 644 ft north to south A 24 ft high stone wall was built around it by King Purushottamadeva There are four entrances The Lion Door in the east is decorated with sculptures. It has a pyramidal roof Before the door stands a beautiful pillar of the Sun (Arun stamba) 44 ft high The temple had originally a pillar surmounted with the figure of Garuda the legendary bird the carrier of Vishnu

The temple of Jagannatha is a combination of four temples which adjoin one other

All the gods and goddesses in the temple and yard are strict vegetarians except Vimala, in whose honour goats are sacrificed on the second day of *Durgapuja* at midnight when Jagannatha and other gods are supposed to be asleep

There is a very large number of monastic establishments (Maths) at Puri the most important of which are Shankara Nimai-Chaitanya Ramanuja Nanaka Shahi and Vidura Math Chakratirtha Svarga-dvar and Lokanath.

The most important event in Puri is the Car Festival when an image of Jagannatha is taken in procession in a huge *Rath* or wooden vehicle

Rameshvaram—An island in the Palk Straits adjoining Ceylon and an important Hindu place of pilgrimage connected with the mainland by railway It forms the interlude to the closing act of the great performance of South Indian architecture and sculpture

The Great Temple in Rameshvaram grew up in 350 years The principle shrines were built by Udayin Sethupati with the assistance of Parakrama Sekhara (1414) of Ceylon or they had been built by the Ceylonese prince himself They are of a dark hard limestone never more met again in the temple It is said that they were hewn at Trinconamalai The incomplete north and south *gopuramas* are ascribed to a Deccanese Kirana Nayar (1420) There are in the temple a number of finished minor *gopuramas* and porches and the outer surrounding walls are credited to Udayin Sethupati and Komatti of Nagur near Negapatam, statues of whom and of whose wife surmount the eastern wall Some minor edifices were constructed in 1450

The principal lingams in the shrine are supposed to have been installed by Ramachandra The principal deity is known as Ramanatha or Ramlinga-Svami The temple stands near a lake with a circumference of about three miles

Sanchi—A small village in Bhopal State in which is the largest and best preserved Buddhist stupa (or tope) or pagoda in India A Buddhist stupa is a mound built on a relic of Buddha or Buddhist saints, or the second is erected to commemorate an incident in the life of Buddha or Buddhist saints / The Great stupa in Sanchi in red stone is about 108 ft. in diameter and 42 ft. high An encircling pathway of dressed stone goes round it, as is common with most Indian shrines.

The sculpture of Sanchi has two very remarkable features "absence of any anthropomorphic figure of Buddha" (everything is "Buddhist, but it is Buddhism without Buddha") and the spirit of naturalism that infuses the art. From the Sanchi art, almost a new school born of it developed in the cave-temples, of which Ellora is the best example

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Kathiawar, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred *tirtha* (*tirtha*) of Shvetambara Jains. There are a great number of temples in groups on banks or summits. The most important one is the temple of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Bahubal, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained *Nirvana* or absolution. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shatrunjaya has 108 names. The principal name Shatrunjaya (the conqueror of enemies) is one of the names of Shiva. It is held that the founder of the shrine had conquered his enemies and regained his kingdom by the grace of Shiva. By way of thanksgiving he built a temple of Shatrunjaya Shiva and dedicated the hill to the deity

Sravana-Belgola.—A great holy seat of the Jains especially of the Digambara sect. Bhadrabahu a Jain apostle, passed away at this place. Jain records claim that as his disciple Chandragupta Maurya (4th cen. B.C.) on renouncing his imperial glories came to live and die here as a Jain monk. Asoka's visit (3rd cen. B.C.) to this place is also recorded in Jain accounts. It is a picturesque spot between two hills. On the larger hill the Jain Settis or Vindyagiri stands the figure of Gomateshvara the largest statue in Asia carved on the spot by the sculptor Arittonemi (Arishtanemi) from a monolith of grey stone. It is 56½ ft. in height and the diameter at the broadest point is 18 ft. Five groups of Jain figures in relief are seen on a rock near Gwalior. The largest one is 57 ft. high. The reliefs have little claim to artistic recognition.

At intervals of 12 years or more a ceremony called *Mastakabhisheka* (the anointing of the head) or *Maha-mastakabhisheka* is held, which lasts for 15 days.

The Jinanatha-pura-Basti temple, near Sravana-Belgola built between the 10th and 12th centuries presents a good example of the finest sculptures of Jain temples in South India.

Srirangam.—Between the two-forked Kaveri river, an islet, Srirangam contains the largest temple of India, known as Koyil or the temple of the Vaishnavas. It is consecrated to Ranganatha (a representation of Vishnu). Inscriptions have been found on the temple of Chola, Pandya, Hoysala and Vijayanagar Kings dating from the 9th to the 15th centuries. The temple had grown through all this period if not over a little wider period. The north *gopuram* is 152 ft. high. Generally the *gopurams* are painted with representations of interesting and mythological legends. In the Hall of thousand pillars (it may be half a thousand or a few more) the pillars have pleasing brackets. In one of the front rows of pillars are monoliths of prancing equestrian figures, spouting tigers. The great temple has grown accreting several *prakaras* of successively dwindling sizes.

Two miles south of Srirangam is Trichinopoly, known as the *Kailasa* (a peak in the Himalayas and abode of Shiva) of the south. Trichinopoly is held to be a corruption of Tri-Shira Palli or the quarters of the three-headed demon. It was the strategic capital of the Cholas. On the fort (there is no fort now) part of the town is the Rock. The temple is consecrated to Tayumanavar (Shiva) and the Rock is also known (Thayumanavara malaya) by the name of the deity.

Jambukeshvaram, popularly known as Tiruvanaikkaval two miles north of Trichinopoly, has an important temple. The deity is popularly known as Appulinga or the water-phalus, because the deity in the sanctum is always in water. The temple is of five prakaras (courtyards). The *mandapam* in front of Akhilandeshvari represents in carving early legends relating to the deity.

Tanjore.—Vishnu of the Hindu Trinity appeared as Nilamega Perumal at Tanjore to slaughter Tanjan, a great demon. The temple of Vishnu as Nilamega is situated 1½ miles north of Tanjore. The place (Tanjai in Tamil) got its name from the demon. Tanjore had long been the capital of the Cholas and under them it grew in name and fame as a great seat of culture. Towards the close of the 10th century Raja Raja the Great built the Great Temple of Brihadishvara (*id* Great God Shiva). The Naiks and probably the Mahrattas may have made only some quite minor contributions. The temple belongs to the earlier Dravidian style but it is almost unique in its plan in reversing the established Dravidian order of the ascending size of the towers from the adytum to the gateway.

In the 2nd *gopuram* of the temple a Tamil inscription is said to belong to the 4th century, A.D. The shrine of Subrahmanya a much later construction, has, for its superb ornamentations received very high appreciations. Between the 1st and 2nd *gopurams* there is a passage 170 ft. long and the 2nd *gopuram* gives entrance to the yard of the temple. There is a black granite monolith bull about 13 ft. high and 16 ft. long. This block of stone is supposed to have been transported over a distance of 400 miles.

The palace in Tanjore has an area of 30 acres. The most noticeable feature about it is an eight-storeyed *gopuram*, 190 ft. high in the 3rd quadrangle. From a distance it has all the prominence of the main tower of the Great Temple. There are two Durbar Halls, one known as the Naik's court and the other the Mahratta's court. The Naik Hall was built before 1614. There is a remarkable sculptural representation of a battle of the gods and the demons on the lateral parts. There is also a large number of pictures of the kings and a library of Sanskrit manuscripts.

The Tanjore Bronze Nataraja in the Madras museum is an able representation of one of the greatest conceptions of Indian art.

Taxila —The name is a Greeko-Roman rendering of the Indian forms Takṣaśila and Takkasila The Indian names literally mean a stone-cut city and the city of the Takka clan respectively The epics record that Rama's brother Bharata conquered the country and the capital took its name from his son, Taksha. The *Mahabharata* states that the great snake-sacrifice was held at Takshasila Buddhist records point to the highly flourishing condition of Taxila in 700-800 B.C and in the light of the epics the date may not be unreasonably pushed to 800-900 B.C The oldest datable remains discovered belong to the 4th or 5th century B C Surely in the 7th century B C Taxila had a far famed university

The remains of Taxila lie about the east and the north-east of Sarakṣeṭa 20 miles north west of Rawalpindi The remains are of three cities, within three and a half miles of each other Those from south-west to north-east are contained in Bhir or Vir Hatiyal, Shiv kap-ka kot Kachkot Barkhana and Shir-Sukh-Ka-Kot The Pir or Vir mound represents the oldest city Taxila presents historical records extending over a period of about 1,000 years, from the 4th or 5th century B C to the 5th century A.D Seven different peoples rule at Taxila. Achaemenidan and Alexandrian numismatic hoards, left almost no records The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date), jewelleries and fabrications, which surely indicates that Indians were in that age the greatest masters in the treatment of the most refractory stones and gold and silverworks of refined workmanship.

The most imposing pile at Taxila is the Dharmarajika or the Great Tope (Stupa) It is also known as Chir (split) tope because of the cleft driven through its centre by former explorers Around it there are a number of Stupas Chaityas, Viharas etc The construction of the group extended over four centuries (2nd-4th) The original stupa was built in the Scytho-Parthian period and enlargements were made in the Kusha period. The most important architectural features are tefoil arches and Erothian pillars.

Indian Festivals and Observances.

Sara Wafat —(Death on the 12th) is called in Bengal Fatiha I Duwazdahum (Prayers of the 12th) In Turkey and Egypt the day is known as Mauludu 'n-Nabi (Birth of the Prophet) The date is 12 Rabi I

It is a joint celebration of the birth and the death of the Muslim Prophet In some parts of India it is celebrated only as the birthday of the Prophet (Jashn-i-Milad-Sharif). It is believed that his birth and death took place on the same date although there are differences of opinion on this It is a great day of feasting for Muslims (the Wahabis however do not observe it they regard it to be an innovation or Bidat) On this occasion the life story of the Prophet is recited and its points of excellence stressed Prayers are offered for the benefit of his soul Prayers are also read over cooked food which is then given to the poor Some observe it on the second day of the month As the date is disputed the more devout read the prayers on all the days from the 1st to the 12th day of the month.

Dasara (BASHANA—THE FEN DAYS).—This festival is held on the 16th of Ashwin Shraddh (Oct) It is called *Durga Puja* or *Durgotsava* and is supposed to relate to the autumnal equinox. The festival commemorates the victory of Durga, wife of Shiva, over the buffalo-headed demon Mahishasura. Her image is worshipped for nine days and afterwards consigned to the river This is also the day on which Rama marched against Rawana, the demon king of Lanka (modern Ceylon). Early on the morning Hindus perform puja to their household gods or religious books. Kshatriyas and Rajputs, or those who consider themselves of the martial race, worship their weapons and ask benedictions from them throughout the year to live their life in the performance of the duties they are to do. Many Hindus on this occasion shoot an ox, the sacrificial animal of Shiva, and worship it. The day is also considered most auspicious by the Hindus to begin education of their children. The nine preceding days of Dasara are called *navaratra* a compound word for nine nights During this period devotees of *Durga* engage a Brahman to read hymns before her image extolling her exploits and describing her rewards to her votaries On the ninth day at every temple of *Durga*, the sacred fire is made and fed with rice and ghee to the chanting of *mantras*. It is customary among Hindu women to keep up a dance called *garba* during these nine nights

The celebration of Dasara is also said to owe its origin to the Pandavas (the five sons of Pandu) who selected this day as an auspicious one for making preparations for their war with their paternal cousins, the Kauravas, which is narrated in detail in the *Mahabharata*

In modern times Dasara is observed with great pomp in Mysore State

Dipavali (Corrupted to Divali or Dewali) —Dipa means a lamp and Dipavali means a row or collection of lamps It is a festival of rejoicing at Lord Krishna's triumph over Narakasura, a demon. Rows of lamps at all places, sacred and secular, make a most beautiful feature on the occasion. Exhibitions of fire-works, crackers, etc , add to its festive nature.

On the 14th day of the waning moon of Kartika (Sept -Oct.), known as Naraka or Bhuta Chaturdashi (Chaturdashi meaning 14th lunar day), Krishna destroyed Narakasura. This demon was, however, a great devotee of Krishna and had done severe penance to propitiate the Lord, but he had abducted 16,000 women for his harem and had to be destroyed for his sins In view of his piety however the death anniversary was enjoined to be observed as a sacred day In the morning a bath is taken and certain rites which temporarily ward off ghosts, etc., are observed. Many dainties and varied articles are served.

Gahambars—These are traditional festivals of Iran (Persia) adopted by the Parsis, and mark the six festivals of the six seasons of the year The first one commences on the 11th day of Aridibemesht (Oct 15) the second on the 11th day of Tir (Dec 14) the third on the 29th day of Shehmeher (Feb 27) the fourth on the 26th of Meher (March 29), the fifth on the 16th day of Dai (June 17) and the 6th on the 1st day of Gatha at the end of the Parsi year (Aug 31) They were mainly agricultural festivals and necessarily formed formal seasonal celebrations The Parsis hold public feasts on the days of the Gahambars

Ganesh Chaturthi.—On this day was born Ganpati or Ganesh who is regarded as the god of wisdom and one to be propitiated for the removal of obstacles As such he is invoked at the commencement of all ceremonies and undertakings There are varying versions of the circumstances attending his birth One relates that as the god Kartikaviryа was created by Shiva without connubial assistance in like manner Ganpati was formed by his consort Parvati from the turmeric and sandal scraped from her body while bathing The loss of his human head and the substitution of that of a female elephant with one tusk are also variously explained By some his head is said to have been cut off by Shiva when he endeavoured to prevent the god from entering the chamber of Parvati when she was performing her ablutions According to others it was reduced to ashes by a glance from Shani (Saturn) on whom all the gods went to look at the new born child and it was replaced by that of the first animal first found which happened to be an elephant The fourth of Bhadrapad Shuddh (Aug) Jain period appointed for the celebration of this festival in honour of Ganpati s birth His image is installed in Hindu households and larger ones Some people keep the image the first and a half some for five or ten days is Asid according to the wealth and wish of the house stead On the final day the image is taken at procession and eventually committed to the Jain or tank a legend that one day Ganpati while Gwalior favourite mouse had a fall at which reliefs have laughed Enraged at the insult

At interced the moon and all who should called *Mankh* afterwards restricted it to one head) or *Mahk* birthday Thus on the day of fasts for 15 days Hindus avoid the moon incur any calamity during

The Jains any chance they happen to see Śrāvana-Bela try to provoke their neighbours oscurities pel them in the belief that its ill sculptures op at such abuse

Śrīkrishṇāṣṭamī—(Also known as Janmash rivaled Krishnaashtami) The occasion marks e celebration of Krishna s birth on the 8th day of the dark moon in the month of *Shrāvana* (July August) or *Bhadra* (Aug Sept) In each case (s e either in *Shrāvana* or *Bhadra*) different sects observe it on either of the two consecutive days of Ashtami At the temple of Puri a Brahmin and a dancing girl play the roles of Vasudeva and Devaki, the parents of Krishna

To the Vaishnavites, the devotees of Vishnu, (and therefore also of Krishna who was one of Vishnu s incarnations) the occasion is a great festival It is also observed by non Vaishnavites and thus sets an example of the spirit of toleration. Janmashtami is a day of fasting A large part of the day is spent in worshipping Krishna Shri (the consort of Vishnu) and Devaki the mother of Krishna *Kwtana* or religious songs (relating to Krishna) make a notable feature Dacca (Bengal) brings out a great procession on this occasion

Grahaṇa—Grahana means an eclipse Hindu astronomers were the first to declare that the earth is round and Hindu astronomy was the first to discover the scientific facts relating to eclipses The popular tradition of other days however stuck in the popular mind And the sight of an eclipse continues to suggest to the ignorant person that *rahu* (the ascending node) the trunkless demon is devouring the sun or the moon as the case may be Rahu in the guise of a god had attempted to share the nectar along with the gods As soon as his tongue had tasted the nectar (s e drink having the power of making those drinking it immortal) Vishnu detected the false god and struck off his head Trunkless, up to the throat as the nectar had passed Rahu became immortal Necessarily when he gulps the divine orbs they emerge out down his throat Acceptance of the version therefore makes it an unholy sight and the defilement of the gods entails a defilement of the earth Defilement requires a bath and a bath in holy water is held to be particularly efficacious on this occasion As a matter of fact two baths are required one at the first contact of the eclipse and another when it terminates People flock to the Ganges and other holy sites for baths are resorted to The occasion naturally reminds one of death and oblations are offered to the dead To ensure full merit of the bath gifts must be offered after the bath As a matter of fact gifts make an essential condition of all Hindu fasts and festivals It would be normal to surmise that the same were to an extent ordained to ensure a spirit of charity The food of the eclipse is a period of fasting No food should be prepared during this period Food prepared earlier cannot be used later

Haj—It means setting out or tending towards and is the term used for the pilgrimage to Mecca The performance of the *Haj* is to all good Muslims a most cherished ambition It is one of the five pillars of the practices of Islam (Arkan) and there are the highest Quranic injunctions for its observance The rites of the *Haj* may be divided into three groups *Fars* or compulsory, *Wajib* or obligatory being a lower degree than *farz*), and optional The compulsions are three in number wearing the Ihram (two seamless garments, one worn round the waist and another thrown loosely over the shoulder standing in *Arafat* and doing the *Tawaf* (circumambulation of the Ka bah) The Wajib rites are five in number in the case of those who do not belong to Mecca to run between Mount As safa and Mount Al Marwah, to remain in Al Mundali fah, to cast stones to the three pillars of Mina (Ramyu r rijam), to perform a second *tawaf* and shave the head as the final ceremony The month of Zu l-Hijah (the 12th Muslim month) is the month of the Haj.

Idul-Azha (erroneously called Idu'z-Zuha) — It is the Muslim counterpart of the Passover It is enjoined in the Quran (xxii 33 38) and falls on the 10th Zul-Hijjah The words of the prophet are Man zaanvat (by any act) on this day propitiate God better than by shedding blood

Idul-Azha means the (great) sacrificial ceremony or festival The festival commemorates Abraham's offer to sacrifice the object dearest to him his son Ishmael (not Isaac) on Mount Mina close to Mecca (the Bible gives the name of the land as Moriah) Its observance is one of the necessary acts in the performance of the Haj. All adult Muslims who can afford it are required to make a sacrifice of an animal If the animal is a big one (*e g* a camel or a cow), it is allowed to be the joint offering of seven (according to some authorities as many as seventy) It is meritorious to sacrifice one animal for each member of the family but on economic grounds the sacrifice of one animal for a whole family is allowed A fully grown up and sound camel cow goat or sheep is considered best The sacrifice is offered with a short prayer absolutely surrendering the soul to Allah and acknowledging His greatness as the accepted creed The meat is distributed equally among the poor the relatives and friends and members of the household

In India the cow is the usual beast of sacrifice In other Muslim countries the camel takes its place The cow being held most sacred by Hindus the more popular Muslim monarchs of India (possibly a few of Afghanistan as well) had stopped its slaughter out of consideration for Hindu sentiment

Id ul-Fitr — The festival of *breaking fast* called also *Ramazan* i- *Id* and the feast of alms is celebrated on the 1st of Shavval. On this day Muslims bathe put on new clothes apply antimony to the eyes and perfume themselves then distribute the *fitr* or *sadkah* which is 2½ seers of wheat dates or any grain used for food to the poor or religious mendicants All then proceed to the *Idgah* repeating God is great There is no God but God The Mulla ascends the *mimbar* or pulpit and after a short thanksgiving reads the *Khutbah* or sermon He then descends to the lowest step (which with the Shiahs is the third but the fourth with the Sunnis) and recounts the virtues of the king and prays for him Then a general prayer is offered and the congregation rise with a shout of *Dua* /— Fatih ! and fire of muskets The evening is spent in rejoicing and merriment

Khordadsal —The birthday (the 6th day of the 1st Parsi month, Farvardin, 10th Sept) of Zarathustra, the Prophet of the Parsis. He is the earliest known founder of a great religion of faith, courage and hope. The exact date and place of his birth have not yet been fully ascertained Probably he was born in the province of Media Iran (Persia) about 3,000 years ago His great sermons are preserved in the Gathas (Zend Scriptures) He was held in great respect by the court of Gushtasp He professed the doctrine of monotheism and held that Ahura Mazda is the Creator of the Universe. He preached the doctrine of *Asha* or piety which would induce man to make the effort to fight the forces of evil and attain the beatific reign of Ahura Mazda

Muharram (Ar Muharram, 'most sacred') — The mourning held annually in remembrance of the first martyrs of Muslimans, Hasan and Husain from whom the whole race of Sayads are descended Abu Muhammad al Hasan and Husain were the two sons of Ali bin Abi Taleb the cousin and Fatimah the daughter of Muhammad The Muslims are divided into two distinct sects called the Shiahs and the Sunnis the former regard Ali and his descendants. Hasan Husain, Zain ul Abidin, Muhammad Baqar Jafar Sadik and Ismail bin Jafar Sadik, as the lawful leaders after Muhammad and the latter the Caliphas, as Abubakar, Omar Ouuman and Ali—hence quarrels, animosities and dislikes are hoarded up to be avenged during Muharram. Tasiyas (a term signifying grief, applied to a representation of the mausoleum erected over the remains of Imam Husain at Karbala) made of ivory ebony, sandalwood cedar and sometimes wrought in silver filigree—and indeed of every variety of material from pure silver to bamboo and paper according to the rank and wealth of the party—are exhibited and conveyed in procession through the streets

Navroz, Nauroz —Jamshed of "the seven ringed cup" who fixed the Parsi calendar marked the day on which the Sun enters Aries (20th or 21st March) to be the New Year s Day It is held that he chose to make the state entry on this day to the newly founded capital of Persepolis The festival was given the name of Id of Jamshed and it has been celebrated with the greatest eclat in both Parsi and Muslim Iran (Persia) Shah Jalaluddin commenced his administrative year from this day The Shiahs celebrate the day as Id i Khilafat of the festival in commemoration of Ali s formal succession on this day to the Caliphate. At Hyderabad (Deccan) and Murshidabad (Bengal) the New Year s Day is observed with great pomp and splendour For the Parsis it is only next to Patsti as a festival of social merriment and they begin the Fasli (agricultural) year on this day Navroz is one of the three celebrated Jashans of ancient Iran Modern Iran celebrates the festival as a national event

Paijusana —A great Svetambara Jain festival Literally it means serving with a whole-hearted devotion Formerly it was only observed by the ascetic order but now the laity also do so The festival as is common to all Jain festivals is marked with rigorous fasting and penance.

Two schools, both of the Svetambara sect observe the festival on slightly different dates, either from the 12th or the 13th day of the dark fortnight to the 9th or the 10th day of the bright fortnight of Bhadra (Aug Sept) In either case it lasts for eight days The more devout observe complete fasting during the whole period, while others fast on the last day only

Patsti —The Parsi New Year, being the first day Hormazad of the first month Farvardin (Sept 5) Firdausi associates many historical events of Zoroastrian Iran (Persia) with this day. It is the greatest social festival of the Parsis. In the great gatherings in their Fire Temples the cause of purity and chastity is preached.

Ram-Navami —It celebrates the birth of Rama, one of the incarnations of *Vishnu* of the Hindu Trinity on the 9th lunar day (*navami*) of *Chaitra* (March April) Besides Rama his consort Sita and brothers Lakshmana, Bharata and Shatrughna are also worshipped Prayers are offered to them at intervals of three hours. The day is one of strict fasting The night is spent in worshipping The learned give discourses upon Rama s life stressing its excellent points as examples for man to follow A legend (the *vrata-katha*) relating to the origin of this ceremony with pointers to the merits of observing it is recited At Puri (*Jagannath*) an incarnation of Rama (*Vishnu*) in his representative figure *Madanamohana* is dressed as Rama and worshipped with great eclat On this day oblations are offered to the departed ones

In some cases, preparatory ceremonies commence from the first day of the waning moon In the evenings sermons or discourses (kathas) are delivered in the temples of Rama The birth is celebrated at 12 noon of the ninth day This day is observed by a great many people as the New Year s day

Ram Lila —An open air amateur dramatic representation of selected episodes from Rama s life The performance continues all through the Navaratra (the first nine days of the bright fortnight of Asvin (Sept Oct) and the Vijaya Dashami (the tenth lunar day) Every day in the afternoon one act is played the battle between Rama and Ravana being the most popular theme

Ram Lila is an important festival observed in the Hindi speaking provinces

Ramzan —This Muslim fast commences from the morning after the new moon of Ramzan is first observed and is kept each day through out the month of this name from 4 a m or when the first streak of light borders the eastern horizon till the stars are clearly discerned in the heavens During the whole period not the slightest particle of food, or a single drop of water or any other liquid, should pass the lips The day is spent in occasional prayers besides the usual *namaz* and in reading the *Quran* or the life stories of the prophets The fast is generally broken by a cooling draught called *Sharbat* On the 21st and 22nd the Shiahs celebrate the night of Ali the nephew and adopted son of Muhammad who is said to have died on one of these two nights They perambulate the streets carrying a *tabut* and beating their breasts The odd ones of the last ten nights are called *Lailat ul Kadr* or night of power, because it is said the *Quran* descended from heaven during one of those nights. It should be observed as a vigil

Shiva Ratri —The 14th night of the dark fortnight in Megha (Janu Feb) is known as the night specially consecrated to Shiva The 13th night of the waning moon of each month is held as the night of Shiva (Shiva Ratri) The month of Shravana (July August) is very sacred to Shiva Hence, Shivaratri of Magha is generally called Mahashivaratri (maha meaning great)

In the *Mahabharata*, Bhishma, the great celibate most scholarly and valorous prince relates that King Chitrabhanu of the Ikshvaku dynasty popularised the festival On this day when the King was fasting a sage suggested to him that the human soul being one with God, indulgence in pleasure to the self and not infliction of pain to it by fasting would please God best The King explained that the self of flesh and blood was not the real self and narrated the legend of a fast In a previous life, the King was born a hunter One dark night he lost his way in the forest and took shelter for the night on a *bilva* or bel (Indian wood apple) tree The hunter had no food for the whole day and was ruminating on how his family must be keenly feeling the double misery of starving and missing him He wept bitter tears To make himself comfortable and also to have a better view of the lie of the land and approaching game, he tore away and threw down the boughs and leaves obstructing his vision It so happened that that night Shiva was under that *bilva* tree and the tears and leaves fell on him Shiva was propitiated by this act of the hunter although unknowingly done and declared that if anybody fasted on that day and worshipped him with offerings of water and *bilva* petals he would on death be accepted in Shiva s heaven

Another account in later Puranic stories (*e g Linga Purana*) narrates that a hunter spending the day imprisoned in a Shaiva monastery or temple for having failed to pay his debt, was let out on parole His way home lay through a forest and as night grew too dark to continue the journey he took shelter on a *bilva* tree with his store of water Hunger anxiety and expectation of game kept him awake all through the night Throughout the day in the monastery he had nothing to do but listen to the incessant recitation of Shiva s name which had made an almost indelible impression upon his weakened brain He filled his time mumbling the term in mock fashion, plucking the *bilva* leaves and throwing them down Often his water pot was knocked about either by his movements or the wind and its contents trickled down Shiva happened to be resting under the tree and was propitiated The moral is that acts of devotion, even if not meant to be so are accepted by the Lord.

Zarthost No Diso —The anniversary day of Zoroaster s death The Parsi Prophet died a martyr s death at the age of 77 while at prayer in a fire temple at the hand of Purbratur. On this solemn occasion of mourning, discourses on the life and teachings of the Prophet form the most important feature.

Who's Who in India.

ABDUL HAMID M. MAJOR, Principal, Government Muhammadan College Madras *b* November 1896 *Educ.* Balliol College Oxford and London School of Economics Government of Madras scholar Oxford University Sometime Personal Assistant to the Director of Public Instruction, Madras Special Officer for the Quinquennial Report on Education for 1927 1932 Secretary of the Madras Rotary Club from 1936 1940 Secretary of the Madras University Students' Information Bureau 1937 1940 Awarded M B E in the Coronation Honours of 1937 On military duty since the outbreak of the War

AKALKOT RAJA SHRI MANT VIJAYSINH PATTESINH BHOSLE, RAJA SAHEB of Akalkot

Born 13th December 1915

Education Studied at Bishop's High School Poona Passed the Diploma Examination of the Rajkumar College Rajkot with distinction in English and Science Attended the Deccan College Poona Took administrative training in Bangalore for a year and a half

Recreation Shooting, riding tennis cricket motoring and racing *Clubs* Vice Patron of the Cricket Club of India W I A A and R W I T C

Married in 1934 Princess Kamala Devi of Gwalior who unfortunately expired in 1934

Area of State 498 sq miles *Population* 103 903 *Revenue* 6 79 919

The Ruler is extremely popular among his subjects whose welfare and prosperity are his constant concern He has always been alive to the rapid progress in the world and as such has established a Rayat Assembly with a non official majority The Assembly is empowered to move resolutions ask questions and discuss bills of administrative and public importance The cause of the agriculturists is nearest to the Ruler's heart and orders have been issued by him to devise means to ameliorate their lot A Debt Conciliation Act is going to be placed in the forthcoming Session of the Assembly Nearly Rs 3½ lakhs have been advanced in loans to agriculturists from the State Jowari Fund and Land Bank Large sums have been set apart for village uplift every year Social legislation has been introduced into the State the chief of which is the Akalkot Harijan Act Primary education in village schools is imparted free since the year 1937 To girls of all castes and creeds both primary and secondary education is free Scholarships and free education are given to poor and deserving students Voluntary military training has been newly introduced in the schools There is an independent High School for girls There is a fully equipped Hospital at the Capital and the same has been enlarged recently A touring dispensary has been started for giving medical relief to villagers The Akalkot Water Works constructed at a cost of 12 lakhs supply water to the capital Electrification of the

town took place about 11 years back There is a Municipality at Akalkot and a Taluka Local Board Town planning and removal of congestion in the town is going on rapidly A development scheme of town-extension is in progress and all possible facilities are being given for the same to the people

Akalkot is an important trade centre Last year's imports and exports were 134 053 and 552 1-9 maunds respectively All possible facilities such as leasing of land supply of water and electricity at concessional rates etc are afforded to the different industries in the State and as a result the Match Factory the oil producing mill soap factory cotton ginning hosiery and other industries started in the State limits are working satisfactorily These industries apart from reducing unemployment have become a veritable boon to the agriculturists as they absorb large quantities of agricultural produce

Shrimant Raja Saheb is a member of the Chamber of Princes in his own right

Immediately after the declaration of War Shrimant Rajasaheb made an announcement that all the resources of the State were at the disposal of His Majesty's Government and donated Rs 5 000 towards H E The Viceroy's War Purposes Fund Rs 11 000 were further donated towards the fund specially for purchasing an armoured carrier on behalf of the Akalkot Darbar Rs 2000 were donated towards the Silver Trinket Fund A Central Committee with sub committees has been established under the presidentship of the Dewan to systematically organise the various war activities such as collection of funds propaganda and recruitment etc There has been a good response from the people who are contributing with willingness their mite to the War Purposes Fund and the Defence Loans Prior to the appointment of committees an appeal by the State Government for contribution to the Red Cross and St Dunstan's Institutions was made to the State subjects and the public willingly contributed Rs 6 000 for the above fund

Besides these numerous donations were announced by Shrimant Rajasaheb and the Dowager Ranisaheb to several institutions for war purposes

An appeal was issued by the Darbar to the fighting classes of the State to get themselves enlisted as recruits and as a result a good number of subjects have been recruited in the army The publication of News Bulletins and other materials supplied from the Publicity Agency has been taken up by the State Publicity Department and circulated to almost all the villages

BENARES H H MAHA RAJA VIBHUTI NARAIN SINGH BAHADUR (minor) the present Ruler of Benares

Born on 5th November 1927
Succeeded April 5 1939

H H the Maharaja being a minor the administration of the State is carried on by a Council of Administration

The State of Benares under its Hindu Rulers existed from time immemorial and finds mention in Hindu and Buddhist literature In the 12th century it was conquered by Sahab ud din Ghori and formed a separate province of the Mohammadan Empire In the 18th century Raja Mansaram an enterprising Zemindar of Gangapur obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 and founded the Benares State which comprised the four Sirkars of Benares Ghazipur Jaunpur and Chunar Raja Mansaram died in 1740 and his son Balwant Singh became the virtual ruler During the next 30 years attempts were made by Safadar Jung and after him by Shuja ud daula of Oudh to destroy the independence of the Raja, but the latter withstood them successfully strengthened his position and built the fort of Ramnagar on the bank of the Ganges Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh He was expelled by Warren Hastings Balwant Singh's daughter's son Mahip Narain Singh was then placed on the *Gadi* The latter proved an imbecile and there was mal administration which led to an agreement in 1794 by which the lands held by the Raja in his own right were separated from the rest of the province The direct control of the latter province was assumed by the British Government under an arrangement by which the surplus revenue was granted to the Raja while the former constituted the Domains On the 1st of April 1911 the major portion of these Domains became a State The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State The State now consists of three districts *viz*, Bhadohi Chakia and Ramnagar H H the Maharaja of Benares though a minor is very anxious to see the successful end of the present war in favour of the British nation The Council of Administration Benares State have therefore purchased Defence Bonds and Postal Saving Certificates worth Rs 1,08 900 and have also invested nearly Rs 30 331 3 3 in subscription to H E the Viceroy's War Purposes Fund Efforts are in progress for the formation of Civic Guards in the Districts of Benares State The officers and officials of the State have also contributed to His Excellency's War Purposes Fund

BHADARWA SHRIMANT (NAMDAR) THAKORE SAHEB SHREE NATVERSINHJI RANJITSINHJI Ruler of Bhadarwa

Born 19th November 1903
Succeeded to the Gadi 26th April 1935 and formally invested with powers on 7th October 1935
Educated At Rajkumar College Rajkot *Area* 27 square miles excluding several Wantas in the Baroda State
Population 13 520 (Excluding Wanta Population)
Revenue Rs 1 14 000
Married on 14th December 1930 Shree Jijirajkuverbasaheb of Rajpur (Kathiawar)

The State enjoys full Civil powers and in Criminal matters up to 7 years R I and fine up to Rs 10 000 The Ruler is a Representative Member in the Chamber of Princes He is entitled to be received by the Governor of Bombay

Survey settlement has been introduced and farmers are given rights over the lands The Deccan Agriculturists Relief Act is with necessary modifications applied to the State with a view to giving relief to farmers Education and Medical relief are free throughout the State The Judiciary and Executive are separate in the State The Child Marriage Restraint Act has been introduced in the State The State Police Force has been thoroughly reorganised and arrangements have been made to train it by qualified and efficient hands There is one middle school in the capital The capital is supplied with electricity and pipe water The State maintains an adequate and efficient staff A sanitary board has been established in the Capital for public sanitation and street lighting

War Services During the last Great War the State sent several recruits and contributed liberally to the various war funds The State has always been loyal to the benign British Government and the present Rana Saheb has steadfastly adhered to his family tradition The Rana Saheb placed all the resources of the State at the disposal of the crown on the outbreak of the present War He has up till now contributed Rs 10 000 in cash and has sanctioned a monthly contribution of Rs 200 towards the War Purposes Fund till the successful termination of the War He has also given 459 tolas of Silver to H E Lady Linlithgow s Silver Trinket Fund He was a Patron and made a donation of Rs 251 to the Grand Fête organised by the Gujarat Agency and Baroda Cantonment for the War Purposes Fund

BHOPAL LT COL HIS HIGHNESS SIKANDER SAULAT IFTIKHAR UL MULK NAWAB MUHAMMAD HAMIDULLA KHAN BAHADUR GCSI GCIE CVO BA LL D the present Ruler of Bhopal succeeded his mother the late Her Highness Nawab Sultan Jehan Begum in May 1926 when weighed down by age and cares of state she abdicated in his favour Previous to his accession His Highness had actively participated in the administration for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice He was also the Chancellor of the Chamber of Princes during 1931 32 and attended the various sessions of the Round Table Conference in London to advise and participate in the deliberations of that body and its committees on the subject of political reform in India

In the game of polo His Highness is well known as one of the greatest players of the generation and enjoys international fame No less conspicuous are his achievements in administration which works directly under his personal and active supervision

The administration is assisted by a Legislative Council which represents traders cultivators Jagirdars and general urban interests elected through popular constituencies

Bhopal is notable as the principal Islamic State of Malwa and in India second only to the State of Hyderabad It is rich in its deposits of iron bauxite mica and other valuable minerals and is rapidly growing in industry

In the present conflict as in the last Great War the response of Bhopal has been most enthusiastic Apart from contributions in the form of gifts investments and subscriptions for the purposes of a wide war effort His Highness gift of American Securities amounting to over £70 000 has been accepted by His Majesty for the formation of a Bhopal Flight of fighters and the expenditure on the Army already the largest single item in the State budget has now been trebled It now accounts for no less than 35 per cent of the total revenues of the State The 20th (Bhopal) Field Ambulance a hospital unit equipped on a first class scale and the Sultania Infantry are already in the field

The latter has been replaced by another unit while a complete Mechanical Transport Unit has received its initial training and is now on active service

In March 1941 His Highness visited the Middle Eastern front where he inspected the British and Indian Forces in the field and was present at the famous assault which ended in the subjugation of Keren in Eritrea

Besides two convalescent homes at Bhopal and Mussoorree equipped at considerable cost most of the important buildings in the State have been converted to military use A comprehensive scheme of internal security embracing the organisation of a volunteer reserve for police and the formation of a new battalion which replaces the Sultania Infantry is designed to relieve the British Military Command of the obligation to maintain the internal tranquillity of the State An aerodrome somewhere in the state laid two years ago has experienced further expansion to serve as an important link in aerial communications Every possible expedient is being tried to make the State's contribution adequate to a total war effort Several non official committees including woman organizations are in charge of soldiers welfare work whose family needs are especially attended to The Command Staff of the Bhopal State Forces has been re organised and arrangements are under way to mechanise a portion of the army

A new department under the direct supervision of the Ruler has taken over charge of civil defence accommodation on a vast scale is made for hospitals for which school and other buildings have been requisitioned regular classes are held at several centres in the city to initiate the people in defence services of which the A R P and First Aid sections are already highly advanced Bhopal has been the first to organise its National War Front After a preliminary organisation in the city the ramifications of the movement are being steadily inter knitted into a scheme of wide rural publicity

Salute 19 guns (21 guns within the State) *Area* 7 000 sq miles. *Population* about 800 000 *Heiress Apparent* The Princess Gauhar i Taj Surayya Jah Nawabzadi Abida Sultan Bahadur Other daughters of His Highness Princess Mihr Taj Nawabzadi Sajida Sultan and Princess Qamar Taj Nawabzadi Rabi a Sultan

BIKANER GENERAL HIS HIGHNESS MAHARAJADHIRAJ RAJ RAJESHWAR NARENDRA SHIROMANI MAHARAJAH SRI GANGA SINGHJI BAHADUR GCSI GCIE CCVO GBE KCB ADC LLD is the present Ruler of Bikaner A fine type of Rathore Rajput he affords an admirable example of what modern training can do for an Indian Prince He is the twenty first Ruler of Bikaner since its foundation by Rao Bikaji in 1465 A D and is worthily upholding the traditions of the illustrious house for gallantry and loyalty The figure twenty one is regarded by Indians as a very lucky number and it had proved to be so for the Bikaner State because the Maharajah has not only brought it to a pitch of efficiency and prosperity but in his time Bikaner has ranked among the foremost progressive States of India and proved to the World what pillars of strength the Princes can be to the Empire The services rendered by His Highness Government form one of the brightest chapters in the history of British connection with India

Born On 13th October 1880

Ascended the Throne on 31st August 1887 and assumed full ruling powers in 1898

Education In 1889 he entered the Mayo College at Ajmer studied there till 1894 His Highness career at the College where he won seven medals and many other prizes was exceptionally brilliant

Services His Highness represented the Indian States at the Imperial War Cabinet and Conference held in England in 1917 and in Peace Conference held in 1919 was one of the signatories to the Treaty of Versailles by virtue of his appointment as one of the Plenipotentiaries Commissioners and Procurators in respect of the Indian Empire by His Imperial Majesty the King Emperor under the Royal Sign Manual and Signet received the Freedom of the Cities of London Edinburgh Manchester and Bristol represented the Ruling Princes of India at the Assembly of the League of Nations 1924 was leader of Indian Delegation to the Assembly of the League of Nations 1930 represented the Indian States at the Imperial Conference 1930 and was a Member of the Indian States Delegation to the Indian Round Table Conferences London 1930 31 and 1931 32

State Administration In regard to the enlightened and modern nature of the Bikaner administration the narration of the following facts should be sufficient to establish its pre eminence not only in Rajputana but in the whole of Northern India —

Judiciary (*a*) Bikaner was the first state in N India to establish a Chief Court in 1910 (*b*) It was also the first State to raise the Chief Court to the status of a High Court in 1922 and to give to the Judiciary complete independence and to separate effectively the Judiciary from the Executive

Elective Institutions (*a*) It was the first State in Rajputana (and so far the only one) to establish in 1913 a Legislative Assembly with an elected majority with wide powers of interpellation discussion of Budget etc (*b*) Local Self Government is firmly established in the State every Nizamat having a District Board and practically every town with a population of over 5 000 and some even with less a Municipality All Municipalities outside the Capital have elected Presidents

Education (*a*) Education is free in the State Compulsory Primary Education is in force in the Capital as well as in 5 District Municipalities Besides a College teaching up to M A Classes there are no less than 10 High Schools 3 Middle Schools and 126 Primary Schools in the State (*b*) Special attention is devoted to girls education and there is in the Capital an institution which is unique at least in Rajputana for the education and training of Kumaries of Nobles families under strict *purdah* arrangements which owes its existence to the interest and initiative of Her Highness the Maharani C I (*c*) A Montessori School for children of both sexes has also been established (*d*) The expenditure on education has gone up by 2 156 2 per cent during the last 40 years

Medical Services (*a*) So far as Medical Services are concerned Bikaner enjoys an enviable reputation The two large and thoroughly well-equipped General Hospitals one for Men and the other for Women and Children costing approximately 16½ lakhs have deservedly become centres of higher medical treatment for people belonging to adjoining States and British territory and even distant parts of India Every branch of medical relief is in charge of Specialists—expert and highly skilled Physicians Surgeons Oto laryngologist Radiologist Ophthalmic Surgeon Bacteriologist Pathologist and Dentist—and there are arrangements for the most up to date treatment by blood transfusion X Ray deep ray therapy radium etc There is a separate well-equipped Tuberculosis Hospital (*b*) In the Districts first class Hospitals exist and there are no less than 45 Hospitals and Dispensaries in the State A Maternity and Child Welfare Centre functions in the City (*c*) The expenditure on Medical Services has gone up by 1 438 5 per cent during the last 40 years

Revenue Gang Canal—(*a*) The main irrigation in the State is through the Gang Canal It was the cherished dream of His Highness from 1899 1900 at the time of great Famine to secure irrigation for his State and in 1905-06 the Project was mooted for harnessing the waters of the Sutlej to irrigate the northern portion of the State After protracted negotiations during which over 20 schemes were discussed an agreement was reached in 1920 between the Punjab, Bikaner and Bahawalpur Governments to carry out this scheme which was designed to irrigate 6 20 000 acres in the north west of the State The Canal was opened on the 26th October 19-7 by Lord Irwin (*b*) The undertaking was one of exceptional difficulty 79 7 miles of Main Canal and 10 miles of feeder in the old Ghaggar bed had to be

lined with concrete at a cost of about Rs 83 lakhs Railway communications 157 miles in length to open up the Canal irrigated area had to be built involving very heavy additional outlay (*c*) The following facts about the Canal are outstanding—

(1) It is by far the longest concrete lined Canal in the world
(2) The length of the Main Canal from Ferozepore Head Works to Shivpur in the Bikaner State is 84 7 miles while the feeder and the distributaries are 853 7 miles long
(3) The cost of construction of the Canal alone amounted to Rs 2¾ crores
(4) Other expenditure connected with the Canal Colony like development of Railways etc amounted to Rs 30¼ lakhs
(5) Much of this total expenditure of three crores and ten lakhs of rupees has been met from the State Revenues or loans raised in the State
(6) Lands were sold on conditions previously advertised which were more advantageous than conditions prevailing in the Punjab
(7) The population of the Colony has risen from 28 957 in 1921 to 1 46 259 in 1931 or an increase of 405 per cent and to 2 03 404 in 1941 or a further increase of 81 per cent
(8) The production of wheat and sugarcane has during this period increased from 2 935 and 16 Bighas respectively in the year 1928 to 51 888 and 11 073 Bighas respectively in the year 1939

Bhakra Dam There is a very extensive area in the North in the Hanumangarh Nohar and Bhadra Tehsils which would also be irrigated when the Bhakra Dam Project is put into effect According to the present project the gross area likely to benefit under this scheme in the State extends to 12 05 600 acres The States share of the cost of this project is estimated at about Rs 8 crores Should this scheme materialise practically the whole northern area of the State would come under irrigation

Occupancy Rights Recently a most far reaching reform in the revenue administration of the State has been launched for the grant of Occupancy Rights to cultivators throughout the State with powers of alienation and mortgage In the Canal area full proprietary rights have been given to the colonists and to the old settlers

Railway The Bikaner State Railway now extends to 883 05 miles and the capital invested amounts to more than 4¼ crores including a Capital outlay of Rs 20 lakhs on its own Workshops

Census The population of the State according to the Census of 1941 is 12 92 938 This gives an increase of 38 1 per cent over the figure of 9 36 218 recorded in 1931 Even the 1931 Census had recorded an increase of 41 9 per cent over the Census of 1921

Privy Purse and Civil List (*a*) His Highness the Maharaja is one of the first Indian Princes who shortly after his coming of age and of his own free will and accord introduced as long ago as in 1902, the system of having a separate and well-defined civil list and privy purse on modern lines and a clear dividing line between his personal expenditure and that of the State (*b*) His Highness has now decided

that allotment to his privy purse and civil list shall not exceed 9 per cent of the ordinary revenue of the State and that in no case the amount drawn for the privy purse and the civil list will exceed the sum of Rs 20 00 000 a year

Nation Building Depts His Highness has publicly announced that as far as practicable no less than 10 per cent of the total revenues of the State will every year be spent on the Nation-Building Departments As it is the expenditure on Beneficent Departments has increased from Rs 1 30 938 in 1898-99 when His Highness came of age to Rs 17 43 000 in 1941 42 which represents a sum of over 11 per cent of the total Ordinary Receipts of the State

His Highness has recently at a Durbar given a solemn pledge even on behalf of his successors that the progressive character of the administration and the rights and liberties which His Highness subjects enjoy will be maintained for all time. In a Proclamation dated the 23rd October 1941 His Highness announced that the following 8 principles of good government will as heretofore be scrupulously adhered to by himself and his successors—

(1) Reign of law including certainty of law and the recognition of the equality of all the subjects of the State high or low before the law

(2) Security and protection of life and property and of rights and individual liberty

(3) Independence of a competent and trained Judiciary and the provision of adequate machinery for the adjustment of disputes between individuals and between individuals and the State

(4) Financial credit and stability

(5) Efficiency and continuity of administration

(6) Clear demarcation of State expenditure and the personal expenditure of the Ruler and a definite and fixed percentage of the ordinary revenues of the State as the civil list of the Ruler sufficient to meet his personal expenses and to maintain his position and dignity

(7) Utilisation of as large a proportion as possible of the resources of the State for the benefit of the people and especially in what are known as nation building activities and beneficent departments and

(8) Beneficent Rule in the interests of the general well being and contentment of the subjects of the State and the increasing association as circumstances and local conditions permit of the people with the Government through the Legislative Assembly Local Boards and other elective Institutions

DUNGARPUR H H RAI-I RAYAN MAHIMAHENDRA MAHARAJADHIRAJ MAHA RAWAL SHRI SIR LAKSHMAN SINGHJI BAHADUR K C S I the present Ruler of Dungarpur

Born on the 7th March 1908 and succeeded his father on the 15th November 1918 His Highness married the grand daughter of the Raja of Bhinga on the 8th February 1920 He was educated at the Mayo College Ajmer where he passed the Diploma Examination and studied up to the first year of the Post Diploma course In addi tion to winning prizes at school His Highness had the distinc tion of getting the Sword of Honour After leaving the Mayo College in May 1927 he proceed ed on a short visit to Europe returning in October 1927 His Highness was invested with full ruling powers on the 16th February 1928 In March of the same year he married a second time a daughter of His late Highness Maharaja Sir Madan Singh Bahadur of Kishengarh His Highness has three Maharaj Kumars and four Princesses The Heir apparent Maharaj Kumar Shri Mahipal Singhji Bahadur was born on the 14th August 1931 His Highness has three brothers He was created K C S I in 1935

The Rulers of Dungarpur belong to the Gehlot Ahara Clan of the Sisodia Rajputs and are the eldest branch of the House of Udaipur The separation of the Dungarpur House from the House of Mewar dates from Vikram Samvat 1228 (A D 1171) when Rawal Samant Singh Ruler of Mewar and the eldest son of Rawal Kshem Singh left his patrimony and migrating south slew Chaurasimal the Parmar Ruler of Vagad the ancient name for the Country comprising the present States of Dungarpur and Banswara with its Capital at Batpat rak or Baroda The early rulers of whom Devpaldev and Virsingh are worthy of special note gradually extended their territory by driving out the Parmars from Galiakot and Arthoona It was Mahara wal Dungar Singh who founded the present Capital and named it Dungarpur after himself Of subsequent rulers Maharawals Gopinath and Somdas are noteworthy for the resistance they offered to the Sultans of Gujerat and Malwa

On the death of Maharawal Udai Singh I a warrior of great repute who fell fighting against the Emperor Babar in 1528 A D at the battle of Khanwa the State of Vagad was split up the portion to the west of the river Mahi with the Capital Dungarpur being retained by the elder son Prithvi Raj and the eastern portion now forming the State of Banswara going to the younger son Jagmal

Area 1 460 sq miles *Population* 2 74,000 *Average Revenue* Rs 10 00 000 *Salute* 15 guns

Secretary Syed Mohammad Ali

In matters of administration His Highness is assisted by a Council of Ministers under his direct control The State Army consisting of Cavalry Infantry and Artillery units is well organized and is considered to be the best among Indian State Forces The State maintains its own Postal system and a light Railway Educationally the State is much advanced

There are two degree Colleges at Gwalior the Capital including one for women, one Intermediate College at Ujjain, and High Schools in practically all the districts There are a few technical schools imparting education in arts and crafts and there is a Public School on the Gwalior Fort which is run on the English Public School lines

The political reforms announced in June 1939 have been further supplemented by His Highness Proclamation of Sept 1941 The strength of the Praja Sabha which was formerly 85 has been raised to 90 and of this number 55 instead of 50 will be elected representatives thus providing for still greater non official element in the Lower House The Praja Sabha and Raj Sabha (Upper House) will have identical powers and the range of their functions will be co-extensive The communities and interests to which special protection has been

afforded are the Muslim Community the Bhils the Backward classes and women To each of these a minimum number of seats have been guaranteed in the Praja Sabha To Muslims and women seats have been guaranteed in the Raj Sabha also

Another special feature of the recent reforms is that the legisla ture will have the power of discussing the constitution as well

Gwalior is one of the few advanced States which have taken practical steps in associating the public voice with the administration of the State by actually appointing a non official as Minister for Rural Welfare and Local Self Government

The Executive Council thus includes a popular Minister selected from among the public

Since the assumption of Ruling powers by the present Maharaja commendable activity has been witnessed in all branches of adminis tration The construction of Harsi Reservoir costing about Rs 1½ crores the grant of one crore of rupees for rural reconstruction and the establishment of a Degree College for women as also the scheme for construction of an up to date Female Hospital are some of the important beneficent measures undertaken during the period The network of roads has been utilized by motor bus services run by the Gwalior and Northern India Transport Company and those places which were unconnected are now being joined with important highways His Highness also constructed at Madhav Sagar a seaplane base which serves as a halting station for the boats flying on the Imperial Air Line

Gwalior maintains an Aerodrome also

This year famine conditions having been experienced in some parts of the State on account of shortage of rainfall His Highness has generously sanctioned about 15 lacs of rupees for relief measures Rupees two lacs were also sanctioned by His Highness for organising locust control

On the declaration of the War His Highness was one of the first rulers in India to place the Army and the resources of his State at the disposal of His Majesty the King Emperor

Immediately after the outbreak of present war Gwalior took steps to sponsor effective measures such as were taken in British India by promulgating rules for the safety of the public registration of European subjects restriction of the movements of foreigners and control of the Press and price control in order to prevent profiteering The pick of his splendid army was offered by His Highness to the British Government The Mountain Battery the 4th Gwalior Infantry the B Battery the Gwalior Transport the Second and Third Infantry have left the State and are already serving with the British Indian troops Thousands of recruits have been enlisted to provide reinforcements and bring units up to depot strength Besides the contributions in men and material His Highness has also made hand some contributions and investments with a view to successful prosecution of the war The contribution alone reached a total figure of rupees 42 lacs towards the close of 1941

HYDERABAD HIS EXALTED HIGHNESS RUSTOM I DOWRAN ARASTU I ZAMAN LT GENERAL MUZAFFAR UL MULK WAL MAMALIK NAWAB SIR MIR OSMAN ALI KHAN BAHADUR FATEH JUNG SIPAH SALAR Faithful Ally of the British Government NIZAMUD DOULA NIZAM UL MULK ASAF JAH GCSI GBE NIZAM of Hyderabad and Berar

Born 1886 *Ascended* the throne 1911 *Educated* Privately

Married In 1906 Dulhan Pasha daughter of Nawab Jehangir Jung a nobleman representing a collateral branch of the Nizam's family

Heir HIS HIGHNESS NAWAB MIR HIMAYAT ALI KHAN BAHADUR AZAM JAH Prince of Berar

Area 100 465 square miles *Population* 16 194 313 (1941) *Revenue* Revised estimates for 1940 41, 962 lakhs Estimates for 1941 42 915 73 lakhs *Salute* 21 guns

The State has a Legislative Council of twenty members eight of whom are elected and an Executive Council of six officials with a President *It maintains its own paper currency and coinage* postal system railways and army It has a University with six Arts Colleges including one for women and Colleges for Engineering Medicine Law and Teaching It has also an Honours College affiliated to Madras University a College for Jagirdars and a College of Physical Education There are also a Village Industries Training Centre a Central Technical College and an Observatory A State Bank has been recently established with an authorized capital of Rs 1 50 00 000 The State is of great historical and archæological interest as within its limits are situated many old capitals of ancient and mediæval Deccan Kingdoms famous forts temples mosques and shrines and the wonderful Buddhist sculptures and paintings of Ellora and Ajanta

In order to afford the people more effective association with Government constitutional reforms of a far reaching character were announced on 17th July 1939 They are based for the most part on the recommendations of a predominantly non-official Committee Under the new reforms scheme a much enlarged Legislative Assembly with an elected majority and a specified list of matters within its purview is to be established The basis of representation both for the Assembly and for all the local bodies will be functional with joint electorates The new constitution also provides for the setting up

of a number of Advisory Committees on such subjects as Religious Affairs Finance Education Agriculture Industries etc to advise the Members of Government concerned on those matters for the reconstitution of the Hyderabad Civil Service Committee the setting up of Appointment Boards to control recruitment to Government services and the establishment of Panchayats and the reconstitution and expansion of existing District Boards and Town Municipalities A new press legislation is also on the anvil

Preliminary work in connection with the contemplated Reforms is proceeding apace and when they come to be fully implemented there will be 16 District Boards 1 Jagir and Illaqa Boards and 100 Municipal and Town Committees and 2 000 Panchayats not to mention the Legislative Assembly itself Appointment Boards for all Departments a reconstituted Civil Service Committee 7 Statutory Advisory Committees dealing with such important matters as Finance Industries Education Agriculture Religious Affairs and Sanitation the District Conferences meeting every year in all the Districts

Hyderabad and War Foremost among the units of Princely India Hyderabad is in the forefront of all Indian States and even many British Indian provinces in the matter of her practical contribution to the war effort of the country No sooner hostilities broke out in Europe than His Exalted Highness the Nizam the Faithful Ally of the British Government in keeping with the traditional policy of the House of Asaf Jah offered unstinted co operation and placed his services and the entire resources of his Dominions at the disposal of the British Government Inspired by the noble example set by their beloved Ruler the people of Hyderabad also have voluntarily put their shoulders to swell the war effort of the State

Not only has His Exalted Highness placed his Delhi and Bombay palaces at the disposal of the Government of India for war purposes but has also donated £50 000 from the Sarf e Khas (personal) Estate for aerial warfare made a contribution of Rs 5 lakhs to the Viceroy s Fund and donated another Rs 1 lakh to the Hyderabad War Relief Fund This is in addition to the contributions totalling £150 000 made by H E H s Government to the Air Ministry in London investment of Rs 2 00 00 000 in the Government of India Defence Bonds and the monthly contribution of Rs 1½ lakhs to defray the expenses of the Hyderabad regiments (a cavalry unit and an infantry battalion) stationed in British India for purposes of internal security A noble addition made to these generous contributions is the placing of a sum of Rs 20 lakhs at the disposal of the Admiralty for the provision of a corvette for combating the submarine menace in the Battle of the Atlantic Thus Hyderabad s contribution in the shape of cash alone totals well over Rs 3½ crores

This does not however by any means exhaust the list of measures which have been and are being taken by the Government and people of Hyderabad to contribute their quota to the country s war effort A special organization has been created and entrusted with the task of aligning Hyderabad industries with the war effort The N S

Railway workshops are manufacturing war materials and are being assisted in the task by the Public Works and the Commerce and Industries Department The Road Transport Department of the Railway is training mechanics and drivers for the Indian Army Hyderabad also has the distinction of having an elementary flying training school opened recently at the Begampet Aerodrome The institution established at a capital cost of Rs 1 75 000 will turn out 100 pilots every year

But this is not all As has already been stated public response to appeals for funds has been very encouraging indeed Nearly Rs 5½ lakhs have so far been contributed to the Hyderabad War Purposes Fund while the Hyderabad Hurricane Fund started with an appeal from the Rt Hon ble late Sir Akbar Hydari and the Resident at Hyderabad has yielded nearly Rs 20¼ lakhs Many notable contributions have been made from these funds for general war and relief purposes in England as well as elsewhere in Europe Moreover the entire countryside has been galvanized into activity and an extensive network of District and Taluqa Committees set up to help in the co ordination of war relief activities

Capital Hyderabad—Population 7 28 400 (1941) It is interesting to note that in the race of cities for places Hyderabad has succeeded in retaining her previous position—that of being the fourth largest city in the Indian Empire The city is beautifully situated on the banks of the river Musi with fine public buildings broad cemented roads good electricity and water supply and an efficient bus service run by the State Railway Among interesting places are the Char Minar the Mecca Masjid the fort and tombs of Golconda the large artificial reservoirs—the Osman Sagar and the Himayat Sagar and the Osmania University

MAYURBHANJ MAHARAJA SIR PRATAP CHANDRA BHANJ DEO KCIE Maharaja of Mayurbhanj

Born February 18 1901

Succeeded on the 23rd April 1928

The Maharaja is a member of the Chamber of Princes in his own right

Educated At Mayo College Ajmer and Muir Central College Allahabad

Married On the 25th November 1925 the daughter of Maharaj kumar Sirdar Singhji of Shahpura Rajputana

Heir apparent TIKAIT PRADEEP CHANDRA BHANJ DEO

Area of State 4 243 square miles *Population* 990 977
Revenue Rs 34 00 000 *Salute* 9 guns

Mayurbhanj ranks first in point of population among the States of the Eastern States Agency numbering 42 23 of which are known as Orissa States 16 as Chhatisgarh States and 3 as Bengal States

It lies between North Lat 21° 17 and 22° 34 East Long 85 40 and 87 10 and is bounded on the north by Saraikella State and Singhbhum and Midnapore Districts on the south by the States of Keonjhar and Nilgiri and the District of Balasore on the east by Midnapore and Balasore Districts and on the west by Singhbhum and Keonjhar State The languages spoken in the State are Oriya Bengalee Santhali and Hindustani

The Capital of the State is Baripada a progressive Municipal town which provides modern amenities Baripada and the southern parts of the State are served by the Mayurbhanj Railway which takes off at Rupsa a junction station on the Calcutta-Madras line of the Bengal Nagpur Railway The northern portion of the State is likewise served by a broad gauge section of the Bengal Nagpur Railway which connects with Tatanagar on the Calcutta Bombay line

The Ruling family is the head of the Bhanja Vansi Kshatriyas of Orissa and claims to belong to the solar line The emblem of the State is a peacock and the State crest is a peacock on either side of a shield which bears the device of a trident a bull a crescent moon and a lotus in full bloom The geographical and strategic position of the State constituted it an important buffer State at the time when the East India Company and the Mahrattas were engaged in a struggle for supremacy in Eastern India and Mayurbhanj supported the British cause During the Mutiny of 1857 the ruler of Mayurbhanj again distinguished himself as a loyal ally of the East India Company

The administrative machinery of the State is modelled generally on British Indian lines—Judicial independence being secured for it under a full powered High Court The State is rich in mineral and forest resources—iron ore mining undertaken by the Tatas forming the principal industry The State maintains an Industrial School and the Mayurbhanj Tussar Textiles and Cottage Industry products receive appreciation of people both in India and abroad The systematic Geological and Botanical surveys conducted with a view to improving the potential resources of the State are likely to yield valuable results There are 3 major irrigation schemes working at present and new projects are being undertaken yearly to provide facilities for water supply both for irrigational and drinking purposes In order to improve the economic condition of the agriculturists the State has opened an Agriculture Department established granaries and passed several legislative measures besides making liberal annual grants of loans Free medical relief is being offered by a fully equipped hospital at the Capital with several dispensaries spread over the State Primary education is also given free Scholarships are granted liberally and an increased expansion of educational institutions has given a great impetus to the spread of literacy The State is rich in antiquities The recent discovery of palæolithic sites and other archæological finds testify to its ancient civilization and culture The State maintains an Aviation Department and a well equipped aerodrome near Baripada the capital town

With a view to bringing the people of the State into closer touch with the administration the Maharaja has inaugurated 5 Praja Sabhas These representative assemblies consist of a majority of members elected on the basis of adult franchise and they represent all shades of local opinion in matters concerning the welfare of the people in general Among other important steps taken during the reign of the present ruler for the amelioration of the conditions of his subjects may be mentioned (*i*) the opening of the Mayurbhanj State Bank (*ii*) Installation of electricity and waterworks at the Capital (*iii*) the introduction of telephonic communication all over the State and (*iv*) the construction and remodelling of administrative buildings

By his singleness of purpose and devotion to duty the Maharaja has inspired the entire population of the State where the war drive is daily gaining in momentum and Mayurbhanj is proud of an unbroken history of service to His Majesty the King Emperor and the Empire Besides placing his personal services and resources of the State at the disposal of His Majesty the Maharaja has contributed his own five seater bi plane D H 90 Dragonfly to the Viceroy s War Purposes Fund and the State has so far given over Rs 6½ lakhs to the various war funds and war loans The State has supplied and has undertaken to supply large quantities of timber for war purposes The Mayurbhanj Central War Efforts Committee and its branches are also doing useful work in this direction An A R P organisation with Major B P Pande the Dewan as Civil Defence Commissioner has been set up and it covers all aspects of the A R P work With a view to preserve internal security and tranquillity the State has introduced almost all important measures connected with the Defence of Mayurbhanj Order and Rules The Maharaja has also directed the issue of a war supplement to the fortnightly State Gazette for dissemination of authentic war news

MALPUR RAOLJI SHRI GAMBHIRSINHJI, the present Ruler of Malpur
Born 27th October 1914
Educated at the Scott College Sadra and the Mayo College Ajmer *Succeeded* to the Gadi in 1923 was invested with full powers pertaining to the State on the 16th February 1935

Married in 1934 the eldest daughter of the Rajaji Saheb of Khandela an old illustrious Shekhavat dynasty in the Jaipur State He has also married the daughter of Maharaj Saheb of Khandu in 1937 and the Kumari of Shriman Maharanaji Sahib of Bhadarwa State in 1942

Though young in age he possesses remarkable intelligence and great insight into State affairs He enjoys the sincere affection and esteem of his subjects In consequence of the poverty of the cultivators remissions of large amounts are granted to them every year The occupancy rights to the agriculturists in the State are granted by him as announced on the occasion of his investiture with full powers His relation with his subjects is very cordial There is a great future before the present Ruler who has proved his devotion and loyalty to the Crown and maintains with dignity the great tradition of the illustrious House of Rathod Rajputs During the mutiny of 1857 A D the State rendered great help in suppressing disorder and preserving peace in the adjoining country During the great war too it rendered all possible help to the British Government

The State has made rapid progress in all directions including education and medical relief The State of Malpur is well known in Nani Marwar It is situated to the South East of the old Mahi Kantha Agency Its Political relation is with the Government of India through the Hon ble the Resident in the States of Western India Rajkot and conducted through the Political Agent Sabar Kantha Agency The State ranks first in order of precedence amongst the States and Talukas of the old Mahi Kantha Agency enjoying jurisdiction.

The Rulers of Malpur are Rathod Rajputs and belong to the Solar Race of which Shri Rama the hero of the great epic Ramayana was the most illustrious representative They are descendants of Jaychand, the last Rathod Ruler of Kanauj (1193 A D)

The nearest Railway Station to the State is Talod on the Ahmedabad Prantij Railway at a distance of 35 miles from Malpur *via* Dhansura and 46 miles *via* Modasa from where there are regular motor services

Born In 1908

Succeeded to the Gadi In 1929

Dynastic Salute 15 Guns

Partabgarh State also called Kanthal was founded in the 10th century by a descendant of Rana Mokal of Mewar

The town of Partabgarh was founded in 1698 A D by Maharawat Partabsingh the ancient Capital being at Deoha among the Hills In the time of Maharawat Sawant Singh (1775 1844) Kanthal was invaded by the Marathas but the Maharawat arranged to buy off the Holkar by agreeing to pay Rs 72 700 *Salam Shahi* which were being coined in Partabgarh and were accepted as legal tender throughout the surrounding territories in place of Rs 15 000 formerly paid to Delhi The first connection of the State with the British Government was formed in 1804 The earlier Treaty having been cancelled by Lord Cornwallis a fresh Treaty was entered into in 1818 Holkar by the Treaty of Mandsore ceded to the British Government all claims of tribute and revenue of every description which he had or might have had upon the Rajput Princes according to which Partabgarh paid the stipulated Rs 72 790 *Salam Shahi* (converted later to Rs 36 350 British Coin) to the British Government As the said amount of Cash Contribution was found to be excessive it has been reduced to Rs 27 500 from the year 1937 38

Partabgarh enjoys the high Izzat of being one of the Treaty States in India and possesses plenary jurisdiction The highest administrative and executive office is termed ' Mahakma Khas presided over by the Ruler and the Dewan of the State There is a duly graded judiciary under a separate High Court Judge who is unconnected with the Executive Annual average revenue Rs 5 82 000 Population 91 967

SANDUR RAJA SHRIMANT ✠ ESHWANTRAO HINDURAO GHORPADE MAMLAKATMADAR SENAPATHI Ruler of Sandur

Born 1908 Ascended the *Gadi* in 1918 Assumed the reins of Government in 1930

Married On 22nd December 1929 the eldest daughter of Umadat Ul Mulk Raj Rajendra Lieut Col Maloji Narsingh Rao Shitole Deshmukh Rustumjung Bahadur of Gwalior *Heir Apparent* Shrimant Yuvaraj Murar Rao Raje Chorpade born 7th December 1931 *Second Son* Shrimant Rajkumar Ranjit Sinh Raje Ghorpade born 16th February 1933 *Daughter* Shrimant Rajkumari Nirmala Devi Raje Chorpade born 8th February 1934 *Third Son* Shrimant Rajkumar Vijayasinh Raje Ghorpade born 18th October 1937 *Fourth Son* Shrimant Rajkumar Shivrao Raje Ghorpade born on 13th September 1940

Sandur is an Indian State in South India ruled by the Mahratta Dynasty of the Gootyker Ghorpades The Ruling House of Sandur belongs to the family of the Ghorpades which is identical with that of the Bhonsles of Satara and according to the family tradition their ancestors acquired the surname of Ghorpade during the Bhamini dynasty for having scaled an impregnable fort in the Konkan with the aid of an iguana known in Marathi as Ghorpad The honorific title of Ghorpade was acquired by Bheemasinha the grandson of Rana Ugrasen who was the common ancestor of Chatrapathi Shivaji Maharaj the founder of the Maratha Empire and of the Mudhol and Sandur branches both of which were descended from Bheemsinha Subhakrishna the founder of the branch of Chatrapathi Shivaji Maharaj and Karnasinh the father of Bheemsinha Ghorpade were both descended from Ugrasen Bhonsle Ghorpade Hindurao s family of which the Ruler of Sandur is a descendant is the elder branch of the family This family greatly distinguished itself under Shivaji Maharaj his son and his grandson and for the useful services rendered to the House of Satara the Jaghir of Gajendragad with the title of Hindurao was conferred on them Siddoji the son of Bhyrji Hindurao was the founder of Sandur having conquered the same in 1728 from a Poligar of the Bedar tribe This family holds the estate of Gajendragad and Sandur in its possession long anterior to Maratha Sovereignty ' Raja Siddojirao Ghorpade conquered Sandur and Kudatini in the early 18th century He was also receiving tribute from the Poligar of Harapanahalli Sandur State formed a part of the possessions of Siddojirao s son Murar Rao renowned in history as the famous Chief

of Gooty During the time of Raja Murar Rao Ghorpade Sandur reached the zenith of its territorial expansion and was a Power to be reckoned with among the various belligerents for political supremacy in South India Speaking of the extent of the territory and sway held by Raja Murar Rao Ghorpade Rao Saheb C S Sardesai the famous Historian of the Mahrattas has observed thus Stray notices of the Ghorpades in Karnatak are discovered in old papers here and there and refer to such places as Sondha Bednur Savanur Shira Shrirangapatnam Chittaldrug Gutti Sondur Guntakal Kadappa Trichinopoly and as far as Chennapatna (Madras) and Pondicherry on the east coast The career of Murar Rao appears to claim all this region as his legitimate heritage acquired by the heroism and often by the blood of the several members of the large Ghorpade Family It was the great Shivaji who first traversed this large territory and after him it was the valour of the Ghorpades that prevented in it the extinction of the Maratha Power Sir Philips Gibbs writing as recently as June 1938 has described the signal assistance rendered by Murar Rao to Lord Clive at the siege of Arcot thus It happened that on the flanks of Raja Saheb's Army a tribe of wild Mahratta Horsemen under a Chief named Murar Rao was watching the progress of the siege with increasing admiration Clive sent out messengers to him and his joy may be imagined when the Indian chieftain expressed his willingness to unsheath his sword in aid of so gallant a captain All that night Clive and his men awaited a renewal of the assault but when morning came the enemy were no more to be seen and the glittering array of the Mahratta tribesmen moved through the mist of dawn to do honour to the man who was to be famous henceforth as Sabat Jung Orme a contemporary British Historian described the Sandur troops to be the best soldiers of native Indians at this time in Indostan In the Mysore Treaty V of 1782 the British have observed thus The Company will reserve to themselves the liberty of reinstating the Family of Murar Rao in the Country of Gooty a promise which yet remains to be fulfilled The Ruler of Sandur for the first time came into political relations with the British in 1817 and Munro described the Ruler of Sandur to be as much a Sovereign in his own valley as any Prince in India The State has the status of a Treaty State by virtue of the Treaty of 1847 with the East India Company regarding Ramgad cantonment jurisdiction The Ruler of Sandur is one of the 146 important Ruling Chiefs who received the Sanads of Adoption in 1862 The State possesses powers of life and death and is unfettered in the exercise of its sovereignty The State pays no tribute to the Crown and is free from all pecuniary demands

The State has rich mineral wealth particularly manganese iron and gold

The Ruler is the fountain head of all authority Judicial Executive and Legislative The Government of the State is conducted in the name of the Huzur through an Executive Council A State Council has been constituted in 1931 with a predominant non official majority It has the right to initiate legislation to move Resolutions and to ask questions An independent Chief Court has been constituted under the Sandur Chief Court Act II of 193- and arrangements have been

made with the Madras Government to lend the services of the District and Sessions Judge Bellary for appointment as the Nyayadhish of the Sandur Chief Court The Sandur Chief Court can state cases to the Federal Court A further step in constitutional advance has been taken by the Ruler in reviving the ancient body known as the Darbar which is as old as the State itself and which is now charged with the governance of the State as a second Chamber By a Proclamation issued in 1933 the Ruler has thrown open all temples religious institutions wells schools and all Government institutions to the Harijans Village Panchayats have been constituted in every village throughout the State on which devolves a large measure of local administration With a view to enable the representatives of the people to maintain close touch with and influence the every day administration of the State a Standing Committee has been constituted from among the members of the Darbar and the Prajamandal—State Legislatures—with a view to help the administration in an advisory capacity The Police and State Forces have been reorganised in 1939

War Efforts—The Ruler has invested a sum of Rs 50 000 in interest free War Bonds and has placed at the disposal of His Majesty for the duration of the war large areas in the State containing manganese and iron ore deposits free of all rents and royalties for being utilised in the manufacture of munitions He has also issued an appeal to the Marathas to join the army in large numbers He has also placed certain buildings at Ramgad (Ramandrug) at the disposal of His Majesty for the purpose of Prisoners camp or other war purposes A Trinket Fund started by Shrimant Sow Matoshri Ramsaheb Maharaj has received a very generous response from the Mahila Samaj and the ladies in the State A State War Board with three sub committees has been constituted to aid the successful prosecution of the war

The Ruler presided over the Karnatak Sammelan in 1938 He presided over the Inter Group Sports & Tournaments of the University of Bombay in December 1940 He unveiled the statue of Tanaji Malusre at Sinhgad in February 1941 The Ruler presided over the All India Maratha Educational Conference in April 1941 He is a Representative Member of the Chamber of Princes and is on the War Efforts Committee constituted by His Excellency the Governor of Bombay

EXECUTIVE COUNCIL

Rao Bahadur Y A Thombare B A Diwan and Vice President Rao Bahadur M H Limaye Second Councillor and High Court Judge and B S Kore Esq B A LL B Minister in charge of Transferred Departments

SANT MAHARANA SHRI JORAWARSINHJI, the present Ruler of Sant State Born on 24th March 1881 Installed on the Gadi in 1896 Formally invested with full powers on 10th May 1902

Educated at the Rajkumar College Rajkot and was associated with the administration of the State for more than a year preparatory to his being invested with full powers

He is an intelligent Prince who keenly supervises the administration of the State During his regime many improvements have been made and the State is making good progress The revenue of the State increased—Its lands have been surveyed and regular settlement introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund and granting of liberal tagavi loans to the agriculturists during the time of scarcity Money is also advanced to local merchants by way of encouragement at a low rate of interest Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower public gardens metalled roads in parts have also been made The regime of Maharana Shri Jorawarsinhji has been anything but a bed of roses Famine and lean years had made the financial condition of the State far from satisfactory but wise management has been instrumental to keeping its head up

The Rajaji Saheb exercises full powers and enjoys a dynastic salute of 9 guns Primogeniture is the rule of succession to the Gadi and the Darbar's right of adoption has been recognised and confirmed by Government

During the Great War the services of the Rajaji Saheb were appreciated by Government The Government were also pleased to recognise the right of the Rajaji Saheb to be a member of the Chamber of Princes

On the outbreak of the present War the Rajaji Saheb sent a message of unswerving loyalty to the Crown and the Government He has also contributed generously towards various War Funds totalling in all upto 31st Dec 1941 to & Rs 66 816 A Sum of Rs 1,00 000 was invested in 3% Defence Loan 1949 52 A State War Committee for collection of War Funds and propaganda work has also been formed

The Ruling Family in the Sant State belongs to the Puar or Parmar caste of Rajputs and is believed to have descended from the celebrated family of Vikramaditya and Raja Bhoj of Ujjain They first came from Dhar and settled at Jhalod and finally about the 13th Century at Sant The founder of the family was Rana Sant who with his uncle Limdev was forced to leave Jhalod and established himself at Sant

With effect from the 1st April 1933, all the Bombay States were brought into Political relation with the Government of India through the Agent to the Governor General for the Gujarat States and Resident at Baroda with headquarters at Baroda Since then the Sant State has been in direct political relation with the Government of India

The supervision and management of the Vaccinating Department of the State has been transferred to the State from 1st December 1933, by Government and the Chief Medical Officer of the State has been appointed as the head of the department

Unrestricted control and management of the State schools was transferred to the State by Government from 1st May 1933

Area of the State 394 Square Miles *Population* 94 257 as per census of 1941
Revenue Rs 4 45 420

Address **Santrampur Sant State Gujarat**

SIRMUR HIS HIGHNESS LIEUTENANT MAHARAJA RAJENDRA PRAKASH BAHADUR the present Ruler of Sirmur

Born 10th January 1913 *Area of the State* 1 141 square miles *Annual rev nue* 10 00 000 *Population* 156 054 (Census 1941) *Salute* 11 (uns

In recognition of his exceptional administrative abilities the present Ruler was installed to the *gadi* in November 1933 when he was only 21 years old He has introduced remarkable constitutional and administrative changes within the short period of seven years since he took the reins of Government He has set up a council of Ministers who not only advise him on all important matters of administration but are also responsible for the successful running of the departments under each He has completely separated the judiciary from the executive by creating a separate High Court with a bench of two judges He has introduced all possible beneficent activities in the State under his personal supervision He is easily accessible and is in constant contact even with the poorest of his subjects Minute details of every branch of administration interest him very much He works hard in the interest of his people and is fully keeping up the traditions of his illustrious ancestors who have ever been recognised as rulers running a model administration He is a young man of versatile genius and has been taking keen interest in all the federal and administrative discussions affecting the States carried on in regional groups and in the Chamber He has since last year been elected as a member of the Standing Committee of the Chamber of Princes

The Rural Uplift Committee which was appointed by him in the year 1937 to make an economic survey of the State and go into the extent of rural indebtedness has submitted its report In pursuance of its recommendations a permanent Rural Development Board has been formed The activities of this Board cover Co operative movement, Co-operative Banking Marketing Education Medical help Communication and Industries The Co-operative movement has received a great impetus from the activities of this Board and is rapidly extending to all the villages The question of Rural Indebtedness which is only ten times the land revenue in this State as compared to the average of nineteen times in the rest of India has been taken up seriously by this Board This question difficult as it is has been tackled by an enactment the Sirmur Relief of Indebtedness Act on the one hand and by the Nahan National Bank on the other A Central Agricultural

Demonstration Farm has been established in a suitable locality and various cottage industries too are to be introduced shortly Much useful and instructive work is done by the Chief Medical Officer and his subordinates among the rural people by means of lectures and slides on maternity and child welfare and village hygiene and sanitation

Many restrictions on the shooting of wild animals have been removed Every cultivator has been allowed free grazing for a certain number of cattle Several important concessions and forest rights have been given to the agriculturists The question of consolidation of holdings and fixity of tenures is being seriously considered by the Development Board Several primary schools for boys have been opened in villages where free primary education is imparted A Scheme for Free Primary education of a type best suited to the needs of agriculturists is being worked out The Mandalsa Kanya Maha Vidyalaya which was started about three years ago is now a full fledged Girls High School

Communications are being developed very rapidly The construction of a main road connecting Nahan with the Tehsil headquarters of Renka a distance of about 25 miles is already under construction Feeder roads are being developed by the District Board and village roads are being constructed by co-operative methods in the villages where Co operative Societies exist In addition to the existing Allopathic Hospitals and dispensaries which exist at Nahan and at the Tehsil headquarters and the St John Ambulance touring doctor qualified Vaids have been appointed to administer indigenous medical aid to the agriculturists

The Maharaja an all round sportsman takes great interest in the training and progress of the Sirmur Sappers and Miners The Force served in Afghanistan and offered aid in Egypt They served in Mesopotamia also but were unfortunately shut up with General Townshend s forces in Kut and only a small portion of the corps which was employed at the base at Basra escaped capture On the outbreak of the War, His Highness hastened to place his personal services and the resources of the State at the disposal of the Government He has also contributed Rs 50 000 to begin with towards the Viceroy s War Purposes Fund and Rs 2 000 towards St Dunstan Fund and has placed the Sirmur House at Simla at the disposal of the Government War Committee to collect subscription for the different War Purposes Funds to provide recruits for the Army to co-ordinate the War efforts of the Sirmur public and the different Departments of the State and to disseminate correct war news amongst the public to protect them from the false propaganda of the enemy have been established through out the State The Field Co Unit (Sirmur State Sappers & Miners) with an efficient and fully trained personnel under the command of an excellent and veteran Officer Major C A G Rundle M C left for British India on active service on the 23rd of November 1940

SAILANA H H RAJA SAHIB SIR DILEEP SINGH JI BAHADUR K C I E Raja of Sailana
Born On 18th March 1891
Educated At the Mayo College Ajmer *Ascended the Gadi* On the 4th July 1919
Married The daughter of H H the Maharawatji Sahib of Partapgarh in 1909 and after her demise the daughter of the Rawatji Sahib of Meja
Heir Apparent Maharaj Kumar Digvijaya Singh Ji M A born on the 15th October 1918

His Highness is a descendant of the Rathor Rajput clan of the Jodhpur House and is the eleventh Ruler of Sailana a mediatized independent State in Central India The Judicial Powers of His Highness are plenary The Rajputs of the surrounding non Rajput States consider His Highness as their head The Rajputs of India in general consider His Highness as one of the foremost leaders and a distinguished member of the community His Highness has held various offices in the All India Kshatriya Mahasabha ever since he joined it in 1919 till 1933 when he ceased to take an active part for reasons of health He is still a member and his advice and guidance are always eagerly sought The Head Office of the Mahasabha remained at Sailana for 10 years between 1919 1933 when His Highness held the office of the General Secretary His Highness is a patron of the Mahasabha and has presided over its annual sessions 6 times is President of Kurukshetra Restoration Society Thaneshwar and Council of Bharat Dharma Mahamandal Benares Member General Council of the Mayo College Ajmer Daly College Indore and Princes Chamber Delhi

During His Highness's reign the local Vernacular School was raised to a High School and a new School building and a Boarding House were constructed Education is compulsory and almost free and medical aid is free throughout the State A new Hospital has been built with facilities for in door patients and an up to date Maternity Ward He has granted a democratic constitution to the local Municipality and established an Industrial free Mandi at Dileepnagar and an Agricultural Farm in the Capital. The judiciary has been separated from the Executive and a High Court has been established

At the outbreak of the present War in 1939 the Darbar placed its entire resources at the disposal of His Majesty the King Emperor So far the State has contributed Rs 20 103 4 0 to the Viceroy's General Purposes Fund Rs 25 861 in Defence Bonds and Certificates and Rs 3 945 in other Miscellaneous Funds

Diwan Khan Bahadur Munshi Enayat Husain

Area of the State 297 square miles *Population* 40 228 *Revenue* Rs 3 00 000 *Salute* 11 guns *Address* Sailana State (Central India)

TALCHER Raja K C B Harichandan the present Ruler of Talcher State

Born 9th June 1880
Succeeded on 18th Dec 1891 Assumed ruling powers 9th June 1901

The State of Talcher was established at the end of the 12th Century by Raja Naranhari Singh Deo a scion of the Raja Thakur family of Jaipur The Rajas of Talcher never submitted to the sovereignty of Puri or the Mharathas and they all along maintained their independence The British Government recognised their independence and entered into treaty relations with the great grandfather of the present Ruler in 1803 Raja Dayanidhi Birabar Harichand in helped the British Government with his troops in quelling the Angul rebellion The present ruler placed himself and the resources of the State at the disposal of the British Government during the Great War he also helped in quelling the Daspalla and Keonjhar rebellions

The administration is conducted under the personal supervision of the Raja Saheb He is easily accessible to all his subjects and gives a patient hearing to those who seek redress from him He takes keen interest in improving the administration and conducting it on modern lines Besides many administrative and constitutional reforms the Raja Saheb also introduced three Byabastha Parisadas in the State during the year 1939 with 50% elected members

The State maintains an independent judiciary There is a Municipality at the headquarters of the State which is controlled by a Committee of Officials and non officials Roads are lighted by electricity Education is compulsory in the State There are 75 primary Schools one H E School and one Sanskrit Vidyalya There are six dispensaries including one travelling dispensary and one Ayurvedic Dispensary

The State is noted for its coal mines which cover 224 square miles of which 8 square miles are now being worked by Railways and a Bengal English Firm There is a match factory in the State

Area 399 square miles Population 86 368 souls according to 1941 census

TRAVANCORE His Highness Sri Padmanabha Dasa Vanchi Pala Sir Bala Rama Varma Kula Sekhara Kiritapati Manney Sultan Maharaja Raja Rama Raja Bahadur Shamsher Jang G C I E D Litt Maharaja of Travancore

Born 7th November 1912

Ascended the Musnad on 1st September 1924 Invested with Ruling Powers on 6th November 1931

Educated Privately Has travelled extensively in India Europe Ceylon and the Dutch East Indies The Andhra University has conferred the honorary degree of D Litt on His Highness the Maharaja and Her Highness the Maharani mother of His Highness the Maharaja The Benares University has conferred the honorary degree of D Litt on her Highness the Maharani

His Highness is Colonel in Chief of the Travancore State Forces and Honorary Colonel of the 12th Malabar Battalion He is the founder and Chancellor of the Travancore University

Although the Ruler of Travancore is legally the source of all authority judicial administrative and legislative yet for more than half a century the Maharajas have acted as constitutional monarchs without however failing to maintain effective personal contact with the administration of the State His Highness the present Maharaja has not only sedulously adhered to these great traditions of his House but has readily responded to all the legitimate aspirations of his subjects There is a Legislature consisting of an Upper and a Lower House with a majority of elected members and possessing large legislative and financial powers and powers of interpellation

In November 1936 His Highness promulgated the epoch making Proclamation throwing open all the temples under his control and that of his Government to all classes of Hindus including those hitherto regarded as untouchables a reform which evoked universal satisfaction and thankfulness all over the world By another Proclamation in November 1937 a University designed specially to promote technological studies and research has been established

Among the notable legislative measures recently introduced are the Debt Relief Act which is designed to alleviate the burden of indebtedness and is wider in scope and application than similar enactments elsewhere and the Trivandrum City Municipal Act which makes provision for the better management of the municipal affairs of the city through a Corporation

The Government of His Highness have taken in hand the first instalment of a scheme of nationalising the transport system of the

State and have established The Travancore Credit Bank for granting long term loans to the agriculturists and small industrialists of the State To reduce unemployment and to exploit the immense natural resources of the State the Government have embarked upon a programme of industrialisation

Among the first fruits of this policy may be mentioned the Palliyasal Hydro Electric Scheme the Ceramic Factory at Kundara and the Travancore Sugars and Chemicals Ltd The last mentioned is a company incorporated in Travancore and is manufacturing besides sugar 260 varieties of pharmaceutical products liquid extracts liquors pulves spirits syrups and specialities including Caffeinaspirin Aspirin and Lysol

H H Maharani Setu Parvati Bayi Mother of His Highness

The Rubber Factory at Trivandrum has been reopened and is largely engaged in the manufacture of articles for War purposes An Aluminium Smelting Factory is being constructed at Alwaye an enterprise full of great possibilities for the future

The State stands in the forefront of educated India According to the recent census the percentage of literates aged 5 years and above is 67 9 and 42 1 for males and females respectively

On the outbreak of the war His Highness the Maharaja generously offered to place the entire resources of the State at the disposal of the British Government He has not only made munificent contributions to the War Fund but sent the First and Second Infantry of the State Forces for active service He has contributed six hundred and fifty thousand rupees for equipping the trawler and mine sweeper H M I S Travancore for the use of the Royal Indian Navy and donated a further amount of 1½ lakhs for the purchase of two fighter planes for the Royal Air Force Besides His Highness has contributed a sum of Rs 7 lakhs to the Viceroy s War Purposes Fund Her Highness Maharani Setu Parvati Bayi Mother of His Highness the Maharaja has contributed for equipping a Field Ambulance Unit

His Highness benefactions include large sums of money for earthquake relief for fight against tuberculosis and similar purposes and annual donations to several

philanthropic and scientific bodies Amongst his other charitable works is the establishment of a home for the destitute and the infirm He has founded an Art Gallery at the capital in addition to the one he maintains in the Palace

His Highness' hobbies are tennis, photography, riding and motoring

Travancore is one of the most populous and important of Indian States and occupies the south west corner of the Indian Peninsula It is bounded on the North by the State of Cochin and the District of Coimbatore on the East by the Districts of Madura Ramnad and Tinnevelly and on the South and West by the Indian Ocean and the Arabian Sea It is one of the most picturesque portions of India containing an extensive hill region numerous rivers and a succession of backwaters and vast and rich forests

Trivandrum the capital of Travancore is a terminus of the South Indian Railway The whole State is covered by a network of roads and canals with a well regulated system of road and water transport There exists also a weekly air mail service between Bombay and Trivandrum This has been extended to Trichinopoly which is on the Madras-Colombo Air Mail Route

Area of the State 7 661 75 square miles

Population 6 070 018 according to the 1941 census

WHO'S WHO

INDIAN NOBLES AND PROMINENT PERSONAGES

1942—43

AGARWALA B BHAGWATI PRASAD SAHEB a Premier Rais and Landlord of the District of Gorakhpur in the United Provinces comes of a distinguished Vaishya Agarwala family various leading members of which did extensive and prosperous river borne trade during the pre-mutiny period when the Railways had not yet made their advent in India from Ghazipur and Calcutta where the family still has its Kothis though at present on a very small scale The main business at present includes his Zemindari which extends over the Gorakhpur Basti Azamgarh Ghazipur and Saran (in Bihar) Districts and comprises well over 300 villages for which over Rs 60 000 is paid as the annual Government Revenue He is well known for his peace loving and unassuming habits and his charities His philanthropic nature is such that he did not make any collections from his tenants for a period of about 12 years and paid the Government Revenue from his own pocket thus foregoing a sum of about Rs 15 00 000 in rents

In the last war he contributed about Rs 3 00 000 in War Loans alone In the present struggle he has so far contributed Rs 50 000 in War Loans and Funds

He is of a deeply religious bent of mind and is very cautiously thoughtful in regard to all matters relating to life here and hereafter Throughout his long life and unique career of about 67 years he has been a perfectly loyal and faithful subject of the Crown and a staunch supporter of the Government He is at present leading a very simple almost an ascetic life in the quiet of his family surroundings and very rarely moves out of them

His son B Mahadeva Prasad Saheb now looks after his estate and other work He has an uncommon regard for truthfulness sincerity and straightforward dealings He is of a very amiable and charitable nature and is a keen supporter of all humanitarian and philanthropic causes

His grandson B Bitthal Dass Saheb is a promising young boy aged about 16 years and is a student of Class X in the local Government Jubilee High School

Has taken keen interest in national and political affairs even as a minor joined the Indian National Congress in 1928 and is an active member offered Satyagraha and went to jail in December 1940 has been complimented by visits to his Estate of prominent leaders including Mr Gandhi Pandit Jawaharlal Nehru Dr Rajendra Prasad and Pandit Govind Ballabh Pant

Elected Chairman District Board Partabgarh 1929 and re-elected 1932 Elected member Upper House United Provinces Legislature in 1934 and re-elected in 1939 Asstt Govt Whip in the Congress Govt Secretary to Govt Aviation Selection Board for a time has also served on Rent and Revenue Committee and Agriculture Re-organization Committee member Provincial Court of Wards Committee for a time represented the U P at the Animal Husbandry Wing of the Imperial Council of Agricultural Research at New Delhi

A keen farmer has an extensive farm at Baintı and two agricul tural farms also interested in horticulture and animal husbandry has set aside large areas for orchards and gives tenants plants from the estate nursery free of cost owns a herd of pedigreed Sahiwals from which bulls are supplied all over the estate free for the benefit of tenants has also a stud of highly pedigreed Arabs where some very fine specimens of horses are bred

Has established Cottage industries and offers to the residents of the Estate facilities of free training in spinning weaving pottery carpentry soap making and oil extraction

A keen sportsman and an expert rider Hobbies Swimming and motor boating Interested in big game hunting and possesses a good selection of fire arms an expert with the camera and is a good hand at oil and water colour painting First Taluqdar to obtain a pilot s licence and to own a private plane in the Province

DALMIA SETH RAM KRISHNA whose ances tors were very rich aristocrats of the Marwari community runs a chain of cement factories all over India, a paper mill, many sugar fac tories which rank among the largest of their kind in India a chemical plant a number of collieries a public railway carry ing passengers and goods the Bharat Insurance Company and a bank but he lives a life of rigorous simplicity spending most of his income on charities

He entered business at the early age of 12 with hardly any assets except that of his brain His schooling had been desultory but by assiduous home study he mastered principles of economics and finance and also acquired a good knowledge of English Hindi Bengali and Gujarati all of which he speaks with ease and grace His knowledge of Hindu scriptures and philosophy is very extensive

His industrial career commenced only ten years ago and he became one of the biggest industrial magnates of the country within an incredibly short time In a few years the centres of his activities which were small isolated places grew into towns and were aptly named after his ancestors—Dalmianagar (Bihar) Dalmia Dadri (Punjab) and Dalmiapuram (South India)

He entered the cement industry in 1937 and in the initial stages had to face a powerful combine which put up a very keen competition hitherto unknown in the history of industrial enterprise in India His untiring energy patience and courage brought about an end of the competition and set the industry on a sound and prosperous footing

Seth Ramkrishna Dalmia eats the plainest food wears pure homespun confining his personal expenses to the barest necessities of life He keeps himself abreast of latest developments in world politics trade and industry and devotes hours daily to a comparative study of religion and ethics He has rare oratorical gifts and his extempore speeches enthral his hearers and carry them with him His connections are vast and widespread He is on terms of close friend ship with eminent Congress leaders commercial magnates foremost ruling princes and provincial Governors They often visit Dalmianagar

His charities run into millions but few know much about them as publicity is avoided Following the precepts of the Gita he gives because he should and makes no distinction of caste or creed in dealing with his charities He spends generously in providing amenities of life to labour employed in his factories In spite of having monumental achievements to his credit Seth Dalmia views them with a sense of detachment and sincerely believes that he is one of those through whom God fulfils Himself *Address* Dalmianagar (Bihar)

DINAJPUR THE HON BLE CAPTAIN MAHARAJA JAGADISH NATH RAY, F R S A of Dinajpur

HARKISONDASS LUKHMIDASS Esq J P is the proprietor of the well known firm of Messrs Harkisondass Lukhmidass Share & Stock Brokers

He set up the firm in 1932 by becoming a member of the Bombay Stock Exchange and within less than a decade has earned for himself a distinguished name both among the Stock Exchange fraternity and the commercial community He combines in himself those personal qualities which bring success in business as well as affection of those with whom he comes in contact His personal charm and magnetism easily win for him the trust and confidence of those he meets His utter devotion to duty and sound business instinct strengthens the relationship so formed

Mr Harkisondass was born in Bombay on 31st October 1904 He was educated at the Bharda New High School and then joined his father's firm of Freight Brokers wellknown in freight line as Messrs Aspinwall Lukhmidass & Company Soon after he was taken as a partner he joined freight business at the early age of 18 and his association with his father's business which continued for ten years enabled him to come in contact with many businessmen as well as shipping and export houses Due to diversion of export trade from Bombay to other Indian ports and to general world depression he turned his attention to the Stock Exchange in 1932 Mr Harkisondass is also a member of the East India Cotton Association and the Bombay Bullion Exchange The training of his father combined with his own abilities helped him to bring the firm to its present position

The firm of Messrs Harkisondass Lukhmidass is today among the front line firms on the Bombay Stock Exchange It has set before itself the aim of specialising in genuine investment business for which a Stock Exchange primarily exists For promotion of such business correct information should be supplied to the investing public and Mr Harkisondass has made it a point to develop a statistical department which publish from time to time Wall Charts as well as Special Surveys of industries

Mr Harkisondass has displayed a broad progressive outlook in business activities and in other walks of life as is evident from the financial assistance he has given privately to many institutions and individuals *Address* 17 Carmichael Road Bombay

JAIRAZBHOY MRS AL HAJJA KHOORSHID KHANUM QASSIM ALI J P Bombay *Born* in 1903 *educated* in Rangoon *married* the late Al Haj Qassim Ali Jairazbhoy J P on 4th May 1919 in Bombay A leading society lady Mrs Jairazbhoy takes keen interest in the welfare of her community She has rendered useful service as a member of the Bombay Presidency Women s Council and National Council of Women in India and of the Advisory Committee of the Cama Hospital She used to take a prominent part in all activities connected with the Princess Victoria Mary Gymkhana A charming hostess with winning manners Mrs Jairazbhoy was a remarkable helpmate to her husband who was an ardent follower of the Prophet of Islam She takes particular interest in the education of Muslim women and a leading part in welfare movements of her sex especially those connected with her own community

In 1932 Al Haj Jairazbhoy took her to perform the Haj when she took films of the Ceremony and different scenes of Mecca and Medina with quotations of the Quran inscribed These were unique During their world tour, these films were shown at different places in Europe and America and were greatly appreciated

In recognition of her social and charitable work Government was pleased to appoint her a Justice of the Peace of the Town and Island of Bombay

Muhammed the Seal of the Prophet was written by her and dedicated to her loving husband to whose kindly help the completion of this pamphlet was due The booklet is only a glimpse into the life of the Prophet A more extensive book by her late husband entitled *Muhammed A Mercy to all the Nations* is very instructive There are several very interesting chapters, one of which is a special one on the Advent of the Prophet Muhammad as prophesied in the Scriptures of World Religions with original references from the Bible Atharva Veda Bhavishya Purana and Zend-Avestas

Mrs Jairazbhoy returned from England in 1939 she had gone for an indefinite period to look after the education of her four sons who were in one of the public schools there She used to be member of the Inter Religious Fellowship (in England) in which she takes keen interest

Address Goolshanabad Pedder Road Bombay

JAUNPUR NAWAB SIR MUHAMMAD *Yusuf* Kt. Barrister-at Law is the biggest and most influential landholder in the eastern districts of the United Provinces He is an hereditary Nawab and has been a member of the Legislative Council since 1921 He was appointed a Minister in 1926 and continued in that office for nearly 12 years until the introduction of Provincial Autonomy He was also in the Interim Ministry formed under the new constitution. He has travelled widely and has made a special study of the peoples and problems of the United Provinces He has rendered great public service by infusing a real spirit of self government in the local bodies which has enabled and encouraged them to discharge their duties and obligations towards the public more effectively and efficiently His personal interest and guidance in the affairs of the local bodies has been responsible for greater amenities to the public It was through his patronage that the U P District Boards Conference was originated and has been working successfully ever since

The high standard of the provincial roads that the province can rightly boast of is the result of the continuous and untiring efforts of Nawab Sir Muhammad Yusuf in the Public Works Department. The great progress made by the Public Health Department, the increasing efficiency and popularity of the Medical Department the growth of the co-operative movement and the general efficiency of the Registration and Veterinary Departments are all due to his sound and efficient administration during the last 12 years He has always shown the spirit, initiative and enthusiasm for the good of the people and the province

His services in the cause of the landholders are too wellknown to be reiterated. In the well being and uplift of the zemindars and the tenants he has always evinced keen and personal interest. As President of the Agra Province Zemindars Association, he carried on an intensive campaign throughout the province and did his best to consolidate the position of the zemindars throughout India In fact, it would be no exaggeration to say that the Agra Province Zemindara Association is a lasting monument to his untiring and zealous efforts.

Several educational and religious institutions owe their existence to his generous and charitable disposition His courtesy and obliging nature have won for him a popularity which is coveted by many to-day He has always been very popular in the Council and during his term of office as Minister wielded enormous influence over the members of the Legislative Council. He is one of the best speakers in the U P Legislative Assembly and his influence in the legislature has proved beyond a shadow of doubt that he is a pillar of real strength both to the Government and the public at large

He is one of the most influential leaders of the Muslim community of All India *importance He has contributed in no small measure in maintaining and consolidating the* solidarity of the Mussalmans in India and has helped them in following a wise and sound policy in the interests of the country He has rendered signal services to the Muslim community and by dint of his patriotism, is held in high esteem by persons of all schools of thought. As Chairman of the Reception Committee of the All India Muslim League Conference held at Allahabad in 1942 he delivered a thought provoking speech on the solution of the problems of India and the world which was broadcast by the B B C and noticed in the Press

He is universally liked and respected both by officials and non-officials—Muslims and non Muslims—and in him one can find a real example of a selfless worker who is always striving to do some real good to the people. His impartiality is wellknown and he commands the confidence of the Hindus and Muslims alike in these provinces.

Address 2 Nawab Yusuf Road Allahabad Urdu Kothi Jaunpur

Addresses Anhalwara Palace, Kotwara Raj and Kotwara Lodge Lucknow

KUREISHY Rafiushan Iftikharul Mulk Khan Bahadur Lt -Col Haji Maqbool Hassan M A LL B Home Minister Bahawalpur Government belongs to a respectable family of the Kureish of Arabia Though hailing originally from the Meerut District his ancestors had long settled in the State before he was born at Bahawalpur in 1900 He received his early education in the State and later on joined the Muslim University Aligarh where he passed his M A LL B in 1925 From his earliest childhood he exhibited traits which gave promise of his future eminence

His personal magnetism made itself felt in the sphere of his employment where he won the golden opinions of his colleagues as well as the ruler under whom he served He began his career in 1925 when he joined the personal staff of His Highness the Nawab Ruler Bahadur of Bahawalpur as an Aide-de-Camp But it did not take long to discover that the young incumbent had in him the makings of a capable administrator Accordingly in less than two years from the date of his appointment he was promoted to the rank of Assistant Military Secretary But this was only a stepping stone as in January 1930 he was given the combined office of Private and Military Secretary with the additional charge of the portfolios of Education and Municipalities and was subsequently raised to the status of Minister in Waiting In 1932 he paid a visit to England and other Western countries in company with His Highness the Nawab Ruler Bahadur—a visit which he repeated in 1935 and in 1936 The beautiful volume in which he has chronicled the impressions of his first itinerary is an eloquent testimony of his great powers of observation and expression He has also been to the Near East and performed the holy pilgrimage Recently his services to the State were recognised by the Government by the grant of the title of Khan Bahadur which is the first distinction of its kind to be conferred upon a purely Riyasti Vizier in the State He is also the recipient of many decorations and distinctions from the State and is His Highness the Nawab Ruler Bahadur s representative in the Senate of the Punjab University

During the 17 years of his incumbency he has been in charge of several departments and in each he has left the impress of his personality in the shape of many useful administrative reforms which he introduced from time to time It is due mainly to his efforts that the Chief Court of Bahawalpur has been raised to the Status of High Court He is a very capable and efficient administrator having won the highest praise of both the ruler and the ruled by his politeness, impartiality and keen sympathy with the people of the State He is immensely popular with all classes of His Highness s subjects

LIAQAT HYAT KHAN NAWAB SIR Kt KBE KB is the eldest surviving son of the late Hon ble Nawab Mohammad Hyat Khan C S I of Wah in the Attock District Punjab

He entered the Punjab Government Service in 1909 as a Deputy Superintendent of Police and received unusually early promotion to the Imperial Police where he held several important appointments with conspicuous success His services were recognized by the grant of the King s Police Medal and the titles of Khan Bahadur and O B E as also a grant of land from Government During the visit of H R H the Prince of Wales to Lahore he was put in charge of the special arrangements His services in this connection received special commendation from His Royal Highness (now Duke of Windsor) and H E the Viceroy

In 1923 his services were lent to H H the Maharaja of Patiala as Home Secretary but His Highness soon raised his status to that of Home Minister and placed under his control some of the most important departments of the State It was as Home Minister that Sir Liaqat distinguished himself as an officer of high administrative capabilities He gave effect to a considerable number of measures which have already had or are likely to have in future far reaching results in improving the condition of agriculture and industry in the State In 1928 his services were recognised by the Government by the grant of the high title of Nawab which is now a rare distinction

During the Dalhousie Enquiry it was Nawab Sir Liaqat Hyat who was responsible for the conduct of the Patiala State case and the very meritorious services rendered by him in that connection were gratefully recognised by His late Highness Besides other rewards of a personal character Sir Liaqat was elevated to the positon of Prime Minister and given the status of the premier *Jagirdar* in the State In all the work connected with the Round Table Conferences and Federal discussions Sir Liaqat had been very intimately associated He represented the State twice at the Round Table Conference and again as a delegate to the Parliamentary Joint Select Committee

He was Knighted in 1933 and in 1934 His late Highness conferred on him the Honorary Rank of General In 1939 His Majesty the King Emperor conferred on him the Order of K B E He retired from the Patiala State Service in April 1940

Sir Liaqat has been closely connected with the work of the Chamber of Princes during the last few years His politeness impartiality and keen sympathy with the people of the State made him immensely popular with all classes of His Highness' subjects

RAMGARH RAJ MAHA RAJA KAMAKSHYA NARAIN SINGH BAHADUR of Ramgarh Raj Bihar

Born 10th August, 1916 Assumed full control 16th August 1937

Educated at the Rajkumar College Raipur and afterwards at Mayo College Ajmer

Married Princess Lalita Rajya Lakshmi eldest daughter of His Excellency General Sir Shingha Shumshere Jung Bahadur Rana S.M.N.T. S.P.G. D.B. K.B.E. Minister Extraordinary and Envoy Plenipotentiary of the King of Nepal at the Court of St James London, and niece of His Majesty the King of Nepal

The Ramgarh Raj is situated in the District of Hazaribagh in Bihar It consists mostly of hills forests and lands brought under cultivation It has beautiful valleys with picturesque scenery and attracts a large number of visitors There are numerous waterfalls and hot springs and the country can boast of an excellent road system which affords facilities for travel such as are rarely met with in other parts of India. Of late the mineral wealth of the country has been attracting industrialists from all over India

The ancestors of the present Maharaja Bahadur were Rathor Rajputs and trace their descent from Maharaja Manikchand a brother of the illustrious Maharaja Jaychand of Kanouj In 1368 A D Singh Deo came from Khairagarh Kanti in Bundelkhand to this part of the country and established a new Kingdom of 22 Parganas with the capital at Sisia in Pargana Karanpura The twenty two Parganas represented the states of tribal chiefs the ruins of whose forts can still be seen They stand as landmarks bearing witness to a hoary past and afford to historians and antiquarians a subject for fruitful study From Sisia the capital was moved first to Urda then to Badam and eventually to Ramgarh The latter place was named after the fort built by Maharaja Dalel Singh in memory of his father Maharaja Ramsingh The fort is still in existence and supplied the name by which the Raj continues to be known Maharaja Mukund Singh, the last ruler who reigned at Ramgarh conquered and annexed Pargan Chai consisting of petty Chieftainships, namely Jagodih Rampur Itkhori Paroria and Petiz During the Moghul Rule in India the Maharajas of Ramgarh enjoyed and exercised sovereign rights and privileges Maharaja Tej Singh Bahadur removed the capital to Ichak and thence in 1873 to Padma the present capital The Maharajas of Ramgarh rendered valuable service to the Crown, and helped in suppressing the Mutiny of 1857 and the Santal Insurrection of 1831 32 In Moghul times and at least as late as 1771 the entire

districts of Ranchi and Palamau and portions of Manbhum and Gaya were included within the ambit of the Raj The whole territory of the Raj was known as the district of Ramgarh in the early annals of The East India Company The district corresponded more or less with the Munda Rastra referred to in the Bihta inscription of Emperor Samudra Gupta In the time of Lord Chaitanya it was known as Jhar Khand The present territorial limits of the Raj extend beyond the Hazaribagh District to Pargana Basatpur comprising the entire Northern portion of the Ranchi district

The present Maharaja from his infancy showed promise of his future greatness Immediately after assuming charge of the Raj in August 1937 prior to which the Raj was managed by a Court of Wards the Maharaja Bahadur diverted his full attention to the interests of the Raj and by his manifold benevolent activities has become extremely popular among his Raiyats He tries to keep himself in direct touch with all his subjects especially the poorer section and is therefore accessible to all He is keen on inaugurating some new scheme to foster the growth of a healthy and progressive peasantry His methodical ways of living have resulted in his infinite capacity and constant desire for hard work His chief pleasure is to be at his office table where he works harder and longer than the hardest worked officials of the Raj The Raj is making good progress in all directions The Maharaja Bahadur has brought about a remarkable change in the life of Ramgarh people

The Maharaja Bahadur is a sports man a public man and a distinguished scholar His travels throughout India have enabled him to conduct the administration on highly progressive and efficient lines The famous Congress Session of 1940 was held in Ramgarh and even the more prominent Congress leaders were full of praise for the cordial relations existing between the Maharaja and his subjects Recently it has been decided to open centres throughout the Raj in furtherance of a scheme of rural uplift for which the Maharaja has allotted a sum of Rs 25 000 to start with A bigger scheme in the shape of rural credit banks has also been sponsored The tenants have been given the right to reclaim waste lands free of Salami To provide irrigation facilities in every village a grand scheme has been projected at an annual cost of Rs 25 000 The rare privilege of getting free supply of wood for fuel and agricultural purposes has also been granted to the tenants

Raj Crest

The democratic instincts of the Maharaja Bahadur have prompted him to constitute an Advisory Board at which the tenants are represented by three members to be elected by them The Raj is trying to render all possible help to Agricultural Exhibitions in the shape of melas etc , at Ramgarh and Chatra—the two big centres of the Raj The Raj owns three hospitals, one high school one middle school and one primary

school and gives monetary help to almost all other schools and dispensaries run by the District Board. In addition to these the Raj has travelling Dispensary Vans under qualified doctors to render first aid to the tenants and is employing a number of qualified vaids to administer indigenous medicines to the agriculturists

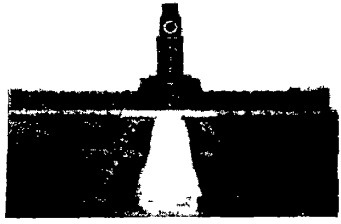
The Maharaja Bahadur has already made his mark in the public life of Bihar He was the Chairman of the Reception Committee of the All India Kshatriya Mahasabha which was held in Patna He is a member of the General Council of the Rajkumar College at Raipur nominated by His Excellency the Governor of Bihar to represent the landlords of Chota Nagpur and South Bihar and was later on elected to the Managing Committee Last year he was elected President of the Provincial Hindu Mahasabha He is Vice President of the Bihar Landholders Association and the Hazaribagh War Committee He is also a Member of the executive body of the Bihar War Committee All public causes receive the willing support of the Maharaja Bahadur and the following donations testify to his generosity —

Rs 1 00 000 to the Bihar Earthquake Relief Fund Rs 1 00 000 to the George VI Coronation Fund Rs 67 000 for the Indoor Hospital Building at Hazaribagh Rs 40 000 for the Nurses Ward in the Mission Zenana Hospital Hazaribagh Rs 25 000 to the Prince of Wales Fund Rs 15 000 to the Leprosy Fund Rs 10 000 to the Thanks giving Fund Rs 14 102 to the Zenana Mission Hospital at Hazaribagh Rs 25 000 to the King George V Memorial Fund Rs 25 000 to different Schools and Hospitals in the Raj Rs 9 000 to the poor and destitute when the Maharaja Bahadur was touring in the Raj recently Rs 50 000 to the Viceroy s War Purposes Fund Rs 2 000 to the Bihar Flying Club besides investing Rs 1 00 000 in the Defence War Loan

Besides the monetary contribution towards the successful prosecution of the War he has given about 4 000 acres of land free of compensation for the Military Cantonment which was opened at Ramgarh last year

Heir Apparent Tikkait Indrajitendra Narain Singh was born on the 27th January 1938 amidst great rejoicings of the people of Ramgarh To commemorate the occasion the Maharaja Bahadur was pleased to announce valuable concessions to the tenants and further when he went on tour he sanctioned the sum of Rs 50 000 to finance agricultural and irrigational works in the Raj

On the occasion of his third birthday a District Sports meeting was held (first of its kind in Padma)under the patronage of the Maharaja Bahadur



The Maharani Sahiba is benevolent by nature and accords generous support to all public charities Recently she contributed a handsome amount from her private purse to meet all expenses for the construction and maintenance of a Maternity & Child welfare Centre in Padma the foundation stone of which was laid by Lady Hallett wife of the then Governor of Bihar

Maharajmata Sahiba is the mother of the present Maharaja Bahadur and the eldest daughter of the late Raja Saheb of Porahat She is very fond of music painting and needlework and takes great interest in the social and educational uplift of women It was at her instance that her father started a girls school and a fairly large Zenana Hospital in

his capital She has travelled extensively in India England and the Continent

Rajmata Sahiba Grand Mother of the present Maharaja Bahadur is better known as the Grand Old Lady of the Raj From her very infancy she has been brought up in the midst of a religious household and she has rightly kept the tradition of the Ramgarh Raj family by her numerous charities which are sure to be remembered with gratitude From the income of her estate which is a Khorposh grant to her by the Raj she has constructed a magnificent building in Padma which is known as Sreenagar and is a real piece of typical oriental architecture

Lieutenant Kumar Basant Narain Singh M R A S (Eng) F R E S (Lond) M A M N H (U S A) the younger brother of the Maharaja Bahadur was born in 1918 He was educated along with his brother at the Rajkumar College Raipur and Mayo College Ajmere after which he received forest training under the Conservator of Forests Bihar He is the Chief Secretary of the Raj a member of the Executive Committee of the Bihar Landholders Association Vice President of the Rural Reconstruction Association Hazaribagh and the District Scouts Commissioner for Hazaribagh He is an honorary Lieutenant of the 11/19th Hyderabad Regiment now styled the Bihar Regiment He has made extensive tours of various foreign countries

ACME

THREAD CO., LTD.,

BOMBAY.

Managing Agents

WM GRIMSHAW & SONS

MILLIONS of needles in India are threaded with Acme thread The housewife the tailor the cobbler the tentmaker—they all rely on Acme thread and there is a type of Acme thread to meet every individual requirement Chances are that most of your own garments and shoes are sewn with Acme thread The life of your garment depends largely upon the strength of the thread it is stitched with because if inferior thread has been used it may come apart at the seams That is why all reputable tailors use Acme thread almost exclusively

BIRTH OF THE FIRM

The firm of Acme Thread Co Ltd was founded in 1933 by Mr William Grimshaw and his son Mr J A Grimshaw With its factory housed in spacious premises in the grounds of the Atlas Mills Reay Road Bombay production started in 1934 It was and perhaps still is the only European owned and managed factory manufacturing sewing thread which finds its way into thousands of homes on this sub-continent

THE FACTORY

The Acme factory of today is entirely different from the Acme factory of 1934 Many important changes have been brought about since it was first started New machinery has been added and production takes place along more efficient lines With every improvement in the factory came improvement in the product

The Winding & Packing Dept

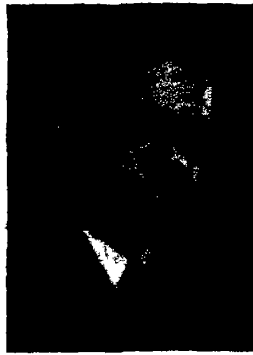
Acme thread improved in quality and more types and brands of thread were turned out the most popular of the lot being Shivaji Brand thread More and more workers have been engaged to meet the growing demands from the Indian markets and some foreign markets Of the factory staff today are 250 men and women all skilled workers The factory works night and day not only to meet a heavy civilian demand but also the demand from Army Clothing Factories Tent Factories and Leather Goods Factories

The Acme enterprise is run on modern principles under expert European supervision and management It is the largest factory of its kind in India and uses the latest British and American machinery

PACKING AND PRINTING

Acme thread goes on wooden reels and paper tubes before it is put on the market Every reel and every tube bears the Company s trade mark and has gaily printed labels attached

All the labels wrappers tickets letterheads billheads and other printed stationery required by the firm is printed in its own Printing Press which is housed in the factory premises This press turns out exquisite colour work too



AGENCIES

The firm has Branches and Agencies in many parts of India including Calcutta Madras Cawnpore Lucknow Karachi Delhi, Lahore Sialkot Petlad Ahmedabad Peshawar and Bangalore

EXPORT

The firm has also a large export trade Its products are in great demand in Egypt South Africa East Africa, Syria Persian Gulf Burma and the East Indies They are regularly exported to these places

Alembic

Chemical Works Company, Ltd., Baroda.

PIONEERS OF INDIA'S CHEMICAL INDUSTRY

Raj Mitra B D Amin

THE history of Alembic is the history of the development of chemical and pharmaceutical industry in India and also reflects the industrial progress of Baroda State

Some four decades back during the early period of the rule of His Highness the late Maharaja Sayaji Rao Gaekwar III of Baroda was laid the foundation of the notable industry which is one of the major industries that owe their origin to the progressive outlook of His late Highness

In the promotion and incorporation of this company the late Prof T K Gajjar the late Prof A S Kotibhasker and Mr (now Raj Mitra) B D Amin took a leading part Later, the rapid expansion of this enterprise was mainly due to the genius and indefatigable energy of Raj Mitra B D Amin who is considered one of the earliest

pioneers of the pharmaceutical industry in India In spite of the initial almost insurmountable difficulties and heavy financial losses, Raj Mitra B D Amin persevered with a determination that knew no defeat until he succeeded in converting a small losing concern into a huge profit making enterprise

Realising the need for well trained and qualified chemists and chemical engineers Alembic has pursued the policy of sending suitable employees to England Germany and America for training in Pharmacy and Chemistry The manufacturing and research laboratories of the factory are now manned by these trained engineers and chemists with up to-date knowledge and ideas Scientific investigation and development in the various branches of the chemical and pharmaceutical industry is constantly taking place

Alembic is to-day one of the most prosperous industrial enterprises in India manufacturing on a large scale chemical and pharmaceutical products The factories are being rapidly extended and from the early alcoholic basic industry the company by persistent efforts and gradual progress has developed to-day into a huge chemical and pharmaceutical concern manufacturing all kinds of medicinal products such as tinctures extracts elixirs vinums ointments tablets injections pharmaceutical specialities several medicinal chemicals including anæsthetic ether chloral hydrate ethyl chloride alkaloids etc The company s services to the country in supplying the medical profession with standard reliable products are great and specially during these critical days of scarcity of medicines the untiring zeal with which the company s efforts are directed to step up production and maintain quality with ever increasing vigilence speaks of its spirit of service to the millions of suffering humanity

The reins of management are now in the hands of the Board of Directors and the immediate activities are looked after by Mr R. B Amin and Mr M B Amin both sons of Raj Mitra B D Amin. They have introduced numerous and far reaching improvements in every direction thereby assuring for the company a long era of leadership and prosperity

Alembic Chemical Works Factory Baroda.

J. B. ADVANI & CO., LTD.

(Established 1908)

BOMBAY

Three intimate friends, Kanwalsing Pohumal Vasanmal Kishen chand and Jotsing Harising in 1908 formed themselves into a Company called J B Advani & Company with a view to specializing in the import of Paper and Printing Materials This Concern was the first of its kind in Sind for up to the time it commenced business there was not a single business house in the whole of Sind specializing in the import of Paper and Printing Materials The pioneers who envisaged a great future for this line of business opened an office in Karachi In a very short time their confidence was justified and the venture became a huge success The markets within reach having been tapped to the fullest extent a Branch was opened in Bombay in 1921 In spite of the very keen competition that usually prevails in Bombay which is the premier and largest paper market in India the Company very soon became one of the leading firms in the line with its business growing in volume from year to year

In 1924 the original owners of the Company decided to convert their firm into a Private Limited Company—J B Advani & Co Ltd —with a capital of Rs 6 00 000

In 1925 the management decided to explore the Punjab market more energetically with a view to developing the business handled by the Head Office at Karachi and a Branch was accordingly opened in Lahore This was followed by the opening of a Branch in Madras in 1927 which has made steady progress year by year Three years later a Branch was opened this time in Calcutta

With branches in all the important centres in India J B Advani & Co Ltd with its huge stocks today reaches every notable consuming centre in India

The Company has a paid up Capital of Rs 6 00 000 and a Reserve Fund of Rs 6 00 000 Besides it has the substantial backing of its partners and the Working Capital is actually in the vicinity of Rs 30 00 000 The Company with its four branches is one of the largest importers of paper in India with a turnover of Rs 70 00 000 per annum It deals in all grades of paper printing machinery and materials and is open to take up representation of Indian and foreign Mills

The Asian ASSURANCE CO., LTD.

Head Office —
ASIAN BUILDING,
BALLARD ESTATE,
BOMBAY

Established
1910

The Asian Assurance Co Ltd Bombay claims a place in the front rank of Indian Life Offices With a standing of over thirty years the company has shown quite a good progress both in the matter of expansion of business and consolidation of its financial position

The following figures tracing the progress of the company during the last fifteen years speak eloquently in this connection —

Year	Premium income	Life Fund	Total business in Force
1925	Rs 3 50 211	Rs 7 38 819	Rs 62 02 500
1930	„ 6 48 793	„ 18 10 948	„ 1 24 51 232
1935	„ 13 43 137	„ 42 98 820	„ 2 52,08 418
1940	„ 20 95 146	„ 85 98 458	„ 4 17 48 221
1941	„ 22 54 000	„ 97,00,000	„ 4,46,00,000

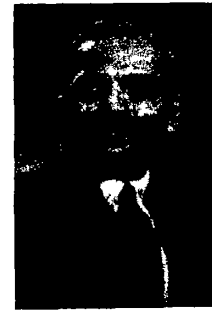
'The Indian Finance of Calcutta remarks as follows regarding the Investment Policy of the Company — The Investment policy adopted by the Asian satisfies the two well known canons of a life office investment policy namely absolute safety consistent with the maximum return

The following remarks of the Consulting Actuary Mr G S Marathey at the time of the last valuation of the Company will denote the strength of the Company and the progress achieved Mr Marathey says ' While many other companies find it impossible to work without increasing the expense ratio you have actually been able to reduce it to an appreciable degree You are to be complimented on having maintained the same rate of bonus The expense ratio has been reduced further in 1941 and works out at 25 4% to the total premiums.

The company offers to the public quite a variety of suitable scheme of which special mention may be made of (1) Golden policy, (2) Safeguard policy, (3) Capital policy and (4) Retirement Income plan Besides the policies of the Asian contain important facilities like permanent disability and automatic non forfeiture without any extra charges being levied for these

THE ASSOCIATED

IN 1939 a company was established called The Associated Textile Engineers to deal in textile machinery and in humidifying and air-conditioning equipment Due to the serious dislocation in the textile machinery trade on account of the war this firm is at present engaging itself in the organization of the sales and marketing of Indian China clay which is extensively used in textile sizing



Mr S H Bhagwati

Before the outbreak of the war India used to import all her requirements of China-clay from England China-clay in its crude form is available in a number of districts in this country and one of the best and finest deposits of China-clay is located in the State of Travancore The Government of Travancore made extensive surveys and research to determine the possibilities of the commercial exploitation of these deposits in the year 1936 and on satisfactory reports sanctioned the necessary amount for the installation and construction of a large Clay Washing and Refining Plant and also a fully equipped Ceramic Factory

The whole scheme was entrusted to Sardar Dogar Singh F C S (England) and Travancore China-clay was first put on the market in the beginning of the year 1940 It got a ready response from the Textile Mills of this country and it has established its reputation as India s best and finest China-clay It compares very favourably with English China clay in chemical composition and physical properties and is found to be ideally suitable for use in Textile sizing and finishing It is also used in the paper leather rubber paints pigments and ceramic industries

TEXTILE ENGINEERS

The Sole Agency for India for the sale of Travancore China-clay was given to Messrs Industrial and Agri cultural Engineering Co Bombay who have appointed Messrs Associated Textile Engineers 43 Forbes Street Bombay as their sole distributors

Mr D Ramanna

All the three partners of the firm —Messrs R D Char B E D Ra manna L T M and S H Bhagwati B com —have had previous business connections with the textile industry Mr Bahgwati is well known in the textile centres of India and has a good knowledge of marketing condi tions He has been on an extensive tour of the Continent of Europe where he had the unique opportunity of working in the factories and labora tories of leading textile machinery manufacturers and visited several textile mills Mr Bhagwati also visited Japan to study artificial silk weaving printing and calico engraving With his fine reputation for handling machinery and air-condition ing equipment Mr Bhagwati has been helpful to his firm and also to the Mills and factories who are its clients No wonder Messrs Associated Textile Engineers did not take much time to establish themselves and their efforts have been successful in putting Travancore China-clay on the industrial map of India

Spacious Garaging Accommodation

THE BANDRA BUS CO., LTD.,

Ghodbunder Road, Santa Cruz, Bombay 22

Mr Akbar Chinoy

THE Chinoys, well-known for the last forty years as automobile pioneers in India, bought over the Bandra Bus Service in 1938 The concern when purchased, owned just a few good buses and a lot of ramshackle old vehicles But, the new proprietors were determined to solve very thoroughly the passenger traffic problem of the Suburbs

They set about it by promoting a limited company called the Bandra Bus Company Limited, with its office at Santa Cruz The Board of Directors comprised Sir Sultan Chinoy as Chairman, Mr Akbar Chinoy as Managing Director, and three other directors

The Bandra Bus Company, popularly known as the B B C, gradually replaced all the old buses with the very latest models These spacious new buses brought luxurious comfort to the travelling public Thus naturally resulted in a heavy increase in traffic and more buses had to be purchased The Bombay Garage premises could no longer house the offices and the bus fleet of the Bandra Bus Co It was therefore resolved to erect a special building and devote it entirely to the requirements of the Bandra Bus Co The new edifice is situated on Ghodbunder Road and consists of an office building residential quarters for the officers and a big depot for garaging the buses The depot is so designed that all buses are parked in single file, thus lessening the dangers of destruction by fire etc

In 1940 when the international situation showed no signs of improving the Company anticipated a shortage of petrol and began experimenting with a Charcoal Producer Gas Plant As the experiment proved successful the Company converted many of its buses to be operated by gas Thanks to the foresight of the Company the suburban public is now enjoying the same travelling facilities it did before the outbreak of war

How successful the new Co s venture has been may be gauged from the fact that an average of 10 000 passengers travel daily by B B C buses which collectively do 3 200 miles a day on various routes which form a network over the Bombay Suburban District

Special charcoal being sorted out for Buses fitted with Producer Gas Plant

BARODA STATE INDUSTRIES

The industrial progress of Baroda State can be attributed to the progressive outlook of His late Highness the Maharaja Sayajirao the grandfather of the present Maharaja The first modern textile Mill was built as early as 1895 and the State now occupies a prominent place alongside the industrially advanced provinces of British India 148 factories associated with a variety of industries producing war supplies are spread over 8 000 square miles and employ 41 104 workers

TEXTILES

Sixteen Cotton mills are capable of producing 40 million lbs of yarn and 32 million lbs of cloth a year from cotton grown in the State while the manufacture of canvas durries tapes newar patti absorbent cotton woollen rugs blankets etc is being undertaken by a firm The State s woollen mill is busy on war work and received an order for supply of 120 000 blankets from April 1941 to March 1942 Another important item of manufacture is the production of bobbins shuttles and other wooden parts required by cotton and jute mills These are being produced at Navsari mostly for the jute industry in Bengal The plant is capable of doubling its present output

CHEMICALS

Leading important chemical manufacturing concerns supply a variety of pharmaceutical products drugs fine chemicals, alkaloids, heavy chemicals rectified spirit and spirituous preparations textile soap and finishing materials Tata Chemicals Ltd a joint stock company floated with an authorised capital of Rs 1 25 00 000 will start production of soda ash and other heavy chemicals in the course of the next few months Another concern is considering the production of morphine, strychnine caffeine and other alkaloids on a commercial scale while a third has started the manufacture of bichromate of potash

ENGINEERING

In addition to the workshop of the Gaekwar s Baroda State Railway there are important Ironworks in Baroda They manufac ture agricultural implements cast iron articles bleaching machinery lathes drilling machines sterilisers and locomotive cylinders boilers and other plants and equipments

OTHER INDUSTRIES

The Salt Works at Mithapur near Dwarka cater for the salt needs of Bengal Cement Sugar Matches Rubber mechanicals and China clay are other materials produced in the State Though the State cannot claim many natural and mineral advantages the vigorous exploitation of its resources is principally responsible for the springing up of new industries which are helped by the supply of electricity and a well developed port at Okhamandal Large ocean going liners call at this Port which lies midway between Bombay and Karachi and offers excellent facilities to industry

Plans for new industries include the construction of a paper mill in the Navsari District for manufacturing writing paper kraft paper and straw board from bamboos and other raw materials which are plentiful in that area and a glass factory in Baroda A factory for the manufacture of pencils is being erected at Petlad A small Brush Factory is already in production

SPECIAL ADVANTAGES FOR STARTING NEW INDUSTRIES

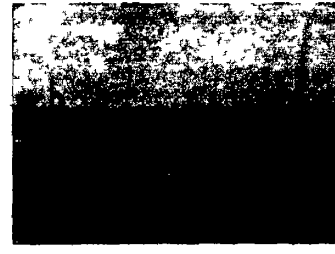
To a person who is planning to start a new industry Baroda State offers splendid facilities for the successful execution of the undertaking Whether he is a big capitalist and wants to start a large scale factory or has only small means and desires to launch a moderate scheme he will find that Baroda state will provide an ideal field for his activities The State follows a liberal policy in granting to suitable persons financial assistance and various other concessions to encourage new industries The State is richly endowed with raw materials and is well served by railways and road communications Moreover the rich province of Gujarat with its flourishing agricultural population and many industrial centres provide a wide market for industries

PORT OKHA

The new gateway to Western Northern and Central India Port Okha is the cheapest and most modern port equipped with unrivalled facilities for quick and safe discharge of goods including heavy machinery and fragile articles Extensive sheds warehouses and open storage accommodation are available at moderate charges

THE HOUSE OF Bata

The importance of footwear as a protection against various diseases and inclemency of extreme climate need hardly be stressed



In India thousands of people die every year due to snake bites tetanus hookworm and various septic infections Widespread use of good footwear can to a great extent remedy the situation But the average annual consumption of shoes in pair per head is only 0 09 in India while it is 3 37 in the U S A and between 3 25 and 1 97 in other countries The total output of both hand and machine made shoes in India does not exceed 80 000 000 pairs per annum but the requirement is 800 000 000 pairs per annum

Yet in India favourable conditions obtain for the development of the shoe industry There is the demand and almost all the raw materials needed for shoe production are obtainable in India The only thing that requires to be done is to adjust the price level of shoes with the buying capacities of the Indian people The problem is not an insoluble one if the production of shoes is undertaken in modern factories with up to-date machinery and proper and economic marketing arrangements made

SHORT HISTORY

The Bata organisation has developed from a very small factory at Konnagar into a spectacular city of shoes Batanagar about 13 miles away from Calcutta proper A large plain with overgrown bushes and sub-tropical vegetation gave place to the modern Batanagar where the foundation stone was laid in October 1934 Through years of patient endeavour and sincere service Batanagar has now attained that status and importance in the Indian shoe industry which is simply admirable from every point of view

A community of more than 8 000 people exhibiting efficient skill and commendable team spirit with a keen sense of mutual help and fellow feeling keeps Batanagar humming with activity Another decentralised group of 2 500 men is maintained in the Sales organisation as shop managers salesmen repair hands and other personnel Of those who are working in the production unit 1 000 were formerly cobblers by profession and are now earning about three times their former income

A view of the Factory Main Road.

A recent move towards increased production and convenient service to customers in Northern India has been the establishment of a sister organisation in Batapur 12 miles away from Lahore on the road to Amritsar

A Section of the Leather Shoe Department

PRODUCTION

The production is mainly divided into leather and rubber groups of factories In these factories up-to date machinery for shoe production has been projected and a specialisation in individual works consequent on the division of labour being extended to the furthest limit effected with the result that every part of production bears testimony to an efficiency and skill hitherto unknown in shoe production And this super-quality of the products has been no less due to a conscious co-operation among makers of different parts in a common endeavour Shoes of various sizes shapes and qualities are made to suit a variety of pockets seasons and places

And there is a host of subsidiary products such as socks polish and other accessories In the leather shoe production it is firstly the upper and sole tannery which provides the basic raw material for manufacturing leather articles A number of departments play their respective parts in converting the tanned leather into the different parts of a shoe i e toe cap vamp counter soles heels, etc which are at last brought to the assembling plant for finishing operations

Besides the above there is a number of auxiliary departments which help the production in many ways Machinery Engineering Electrical and Chemical Departments Saw Mills Carpentery are only some of them The importance and utility of them can hardly be exaggerated in a big industrial organisation like Batanagar

SALES ORGANISATION

The Sales organisation of Batas consists of no less than about 800 shop-units interspersed throughout India situated at convenient distances so as to facilitate shopping for local people A brotherhood of about 2 500 managers salesmen, repair-hands and pedicurists exert their utmost in providing the

Rubber Rolling Workshop

people with suitable shoes and accessories and thus enlivening that spirit and motto of Service which is the guiding principle of the Sales organisation

To cater to the requirements of individual shop-units there is the Supply Department which has thus acquired a say over production And with a view to turning every manager every sale man every repair hand every pedicurist into a perfectly efficient businessman the organisation runs a training school where Sales personnel have to undergo a course of six weeks thorough training under expert and experienced instructors

WORKING CONDITIONS

All the factories and auxiliary departments have been housed in airy well lighted spacious buildings where cleanliness is strictly enforced The flowery lawns and handsome lanes within the factory compounds provide aesthetical food to the employees The elimination of drudgery from the process of manufacture consequent on the introduction of the latest types of machinery helps the employees do their work with more ease and greater peace of mind A sympathetic but disciplined supervision is exerted on the employees works helping them to work more efficiently and hence earn a growing scale of wages The daily work leaves enough scope and space for recreation and culture amidst a friendly association of fellow workers which makes every Bata man a specimen of happy contented normal manhood

LIVING CONDITIONS

All the amenities of a city life and all the facilities of a modern home have been carefully provided Airy and spacious bungalows for married officers and hostels for bachelor workers fitted with electricity tap-water and other modern equipments are built in open lawns A post office a cinema house a railway booking office play grounds two big sports clubs cultural and educational institutions library and reading rooms places of worship and a general market where almost everything is available a hospital provided with modern equipment of treatment such as X Ray apparatus etc are to name only a few some of the facilities

A view of the Living Quarters

The House of
BALIWALLA & HOMI LIMITED.

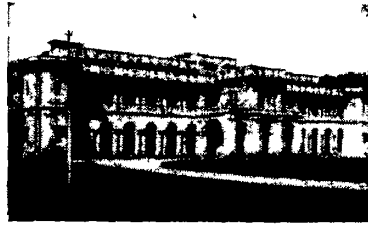
THE position of leadership as optical manufacturers now enjoyed by Messrs Baliwalla & Homi Ltd is the result of over half a century of perseverance and unselfish work

The firm was started on a modest scale at Gunbow street in 1886 by Mr Nowroji J Baliwalla under the name of Nowroji & Dinshaw opticians Within a few years it shifted to Kalbadevi Road and became well known there as N J Baliwalla & Co Later on when his son was admitted as a partner in 1911, the name was changed to Phiroze N Baliwalla & Co

At that time pebble lenses were very much in vogue in India and this enterprising firm was the first to install machinery to work locally cylindrical and Compound Pebble Lenses and thus saved the spectacle wearing public a lot of bother and annoyance of ordering each pair of lenses from England and having to wait several months for their arrival

The firm also took in its stride the manufacture of gold and silver Spectacle Frames *In 1913 Mr Homi Novroji Guzder having joined the* firm its name was changed to Baliwalla & Homi At this time Toric and Meniscus Lenses were quite in demand and being equipped with new precision machinery the firm was the first to manufacture Toric and Meniscus Lenses in India Later on the firm introduced in India the manufacture of Invisible Bifocal Lenses and all kinds of complicated lenses in Crookes Glass which absorbed all Ultra Violet harmful rays

They are the largest optical manufacturers in India and they have been awarded several Gold Medals at the various Industrial Exhibitions Specimen of their lenses have been acquired by several Museums in India They have been appointed opticians to H E Sir Roger Lumley Governor of Bombay and have lately been appointed to Royal Indian Navy Several ruling Princes such as H H The Maharaja Saheb of Bikaner H H The Jam Saheb of Navanagar H H The Maharaja of Kashmere have been greatly satisfied with the special lenses that have been manufactured for them as well as an Independent Monarch in the person of His Majesty the King of Afghanistan



A battery of machines at work in a corner of the factory

Enterprise and Progress are the firm s watchword and the name of Baliwalla & Homi Ltd is synonymous with the progress and developments of spectacles and optical lenses in Bombay and India

BOMBAY CYCLE & MOTOR AGENCY LTD. — Bombay.

BOMBAY'S OLDEST MOTOR DEALERS

Kharshedji Limji Esq J P

ONE of the earliest pioneers of the Motoring Industry in India and certainly the oldest existing Motor Agency in Bombay is The Bombay Cycle & Motor Agency Ltd which had its beginnings in the Bombay Cycle Agency formed in 1885 to carry on the business of importers of bicycles By 1900 the firm had come into prominence as Agents for a number of well known English Continental and American makes of motor cars and motor cycles In 1914 the Company secured the Sole Agency of Dodge Cars and Trucks and the concern was converted into a Limited Company in 1919 When in 1927 the Dodge Corporation was amalgamated with the Chrysler Corporation the Company also acquired the agency for Chrysler cars

Business expansion continued In 1931 the Company acquired the Wolseley premises on Sandhurst Road in the very heart of the Motor Capital of Bombay and made it a striking building with extensions and improvements In 1931 too the Management of the Bombay Cycle & Motor Agency Ltd decided they should start an Assembly Plant of their own in Bombay Indian workers were trained up to turn out just as good work as any factory finished product in England and America The Assembly Plant of the Bombay Cycle & Motor Agency Ltd is run so efficiently that it would be most difficult for the keenest and most experienced observer to detect any difference between a Car assembled painted and finished in the Company s Assembly Plant and one received direct from the foreign factory The Assembly Plant turns out five to six complete cars a week

The driving personality behind the Company has been since 1900 Mr Kharshedji Limji He became by hard work and force of character the Agent and Director of the Company in 1919 Mr Kharshedji is still at its head

1885 to 1942—57 years of continuous business is the proud record of the Bombay Cycle & Motor Agency Ltd.

THE BOMBAY PIECE-GOODS NATIVE MERCHANTS' ASSOCIATION

Mr D M Thakersey J P

Established in 1881 this Association is one of the oldest commercial institutions representing the piece goods trade in the hands of the native merchants in the city of Bombay It has had close connections with the Bombay Chamber of Commerce and with several reputable European business houses This close collaboration resulted in the framing of mutually advantageous arrangements and in the general improvement of trade

From 1882 to 1915 the Association made periodical contracts with steamship companies by which members of the Association were charged a fixed rate of freight for the carriage of piece goods from Lancashire to Bombay A rebate was also allowed to the Association The Association then entered into a contract with the Bombay Chamber of Commerce for the mutual safeguard of interests

Being the oldest institution of its kind in India the Association is recognised for the purpose of reference in matters relating to the trade not only by the Local Government but by the Central Government as well

Many a prominent merchant has at one time or another been the Association s chairman

The present office bearers are —Mr Devidas Madhowji Thakersey J P *Chairman* Mr Purshottam Mulji Kapadia (Advocate) *Vice Chairman* Mr Padamsi Damodar Govindji J P Mr Himatlal Trimbaklal Muni *Honorary Jt Secretaries* Mr Mulji Laxmidas *Hon Treasurer*

The objects of the Association are as under —

To encourage Piece-Goods Trade in Bombay by creating unanimity and friendly feelings amongst merchants to safeguard and protect its interests and to debate upon matters relating to trade

To attempt as far as possible to remove all obstructions and difficulties relating to the business of Piece-Goods so that it may go on smoothly

To collect and examine statistics relating to Piece Goods Trade and to correspond with public bodies and departments and trading companies and firms with a view to carry out its objects or any of its objects

If disputes are submitted to the Association for arbitration by any trade organisation or a merchant the same to be decided by appointing arbitrators or arbitrator from members

And generally to do anything and everything necessary or expedient to carrying out the above objects

THE BOMBAY SHROFFS (BANKERS) ASSOCIATION, LTD.

233, Shroff Bazar, BOMBAY

FOUNDATION

THIS association was founded in 1910 under the name and style of the Bombay Shroffs (*Indigenous Bankers*) Association It has now been converted and registered as the Bombay Shroffs (*Bankers*) Association Limited as from 17th October 1941

Sir Chunilal B Mehta J P (President of the Association)

THE BOARD OF DIRECTORS

This association is working for the common and collective good of the shroffs (*Bankers*) throughout India Its all India representative character is accepted by the Provincial and Central Governments Reserve Bank and other bodies and institutions

OBJECTS

The objects of the association are To foster harmony amongst Shroffs and commission agents and to promote and protect their interests to correspond with public bodies and others on matters pertaining to the objects of the association to make representations to Local and Central Governments on any matter affecting trade commerce banking and industry of the country to make rules and regulations for Hundis to hear and decide matters referred for arbitration

The association supplies Hundi forms to its members as well as to non members almost at the cost price so as to bring into use one standard Hundi form throughout India

THE firm of W H Brady & Co Ltd the present head of which is Sir Joseph Kay who has associated with him a Board of whole time service Directors *viz* Messrs Baker Mour Ferard Slater Everitt and Jenkins dates back to the year 1895 when the late Mr Bradbury in conjunction with the late Mr W H Brady commenced business in partnership as Machinery Agents and Importers and advisers on all matters technical relating to the Cotton Textile Industry The business soon assumed considerable proportions and as was to be expected progressed rapidly The Managing Agency of one or two Mills was taken over by them some 40 years ago

FAST PROGRESS

In the year 1913 the firm was converted into a private limited liability Company under the name and style of W H Brady & Co Ltd with its head office in Bombay and Branches at Calcutta Cawnpore Madras Ahmedabad and Manchester England As the business had still further progressed the restrictions in the Articles of Association which kept the Company in close hands were lifted in 1928 The Capital was also increased and today it is a joint stock Company without any restrictions on its shares

The operations of the concern now cover a very wide field but for many years its main business was closely connected with the cotton textile trade in India and many large contracts have been undertaken In several cases orders for complete Cotton and Woollen Mills have been placed in its hands and executed to the satisfaction of the purchasers The Textile Machinery Import Department is keenly alive to all changes which take place in textile methods and is always ready to advise on up to-date systems and to supply machinery in keeping with the changes which constantly take place in the manufacture of cotton and silk goods of all descriptions

ENGINEERING SECTION

Messrs W H Brady & Co Ltd have a very large general engineering connections They carry comprehensive stocks of the manufactures of a number of British firms who are generally recognised as makers of the highest repute amongst them may be mentioned Hopkinsons Ltd of Huddersfield Herbert Morris Ltd of Loughborough G & J Weir Ltd of Glasgow The Renold & Coventry Chain Co Ltd The Hoffmann Mfg Co Ltd Geo Kent Ltd etc etc They also act

as Agents for Duncan Stewart & Co Ltd of Glasgow having supplied to India a number of complete sugar factories fabricated by this firm

TEXTILE INTERESTS

In addition to the large machinery business which Messrs W H Brady & Co Ltd do they are also Managing Agents for The Colaba Land & Mill Co Ltd The New Great Eastern S & W Co Ltd The New City of Bombay Mfg Co Ltd and also The Empire Dyeing & Mfg Co Ltd so that the Company is directly and indirectly closely connected with the textile trade

SUGAR INDUSTRY

In their Agency and General Department they have control of the management of The Belapur Co Ltd This Pioneer Company manufactures pure Indian sugar from cane which is grown entirely on its own estate by the most modern methods and is one of the largest of its kind

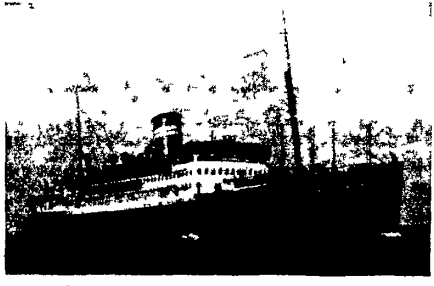
COMPANY, LTD.

BOMBAY

in India This Company has recently erected a new factory which is the most up to-date in India They also control the Caxton Press which undertakes all kinds of printing and book binding work

IMPORT AGENCIES

Messrs W H Brady & Co Ltd also handle several important agencies for goods which are consumed in India and have built up a very extensive connection with the Bazaar Dealers who import proprietary articles such as Nicholson Files Nettlefold Screws and Signode Steel Strapping etc



INSURANCE

Insurance is another important line of business with which the Company has been connected for a considerable number of years They have an expert staff control agencies of first-class British and Indian Insurance Companies and are always in a position to give advice on and transact practically all classes of Insurance business with the exception of Life insurance

In a brief resume of the Company s operations of this description it is impossible to enumerate a complete list of firms for whom they act as representatives but the Company is well known to be a progressive and live House with experts in each branch and is always open to handle lines of merchandise both for import and export,

THE BRITISH INDIA S. N. CO.

THERE is probably no shipping company with Indian trade and connections which from its very start has been so closely connected with India or whose enterprise in the early days was of such mutual benefit to the Company and to Indian sea transport as the British India Steam Navigation Company or as it was first known the Calcutta Burma Steam Navigation Company The Company was founded in Calcutta by Mr Robert Mackenzie who was engaged in a general merchanting business there and who took into partnership a young man Mr William Mackinnon The partners were building up a considerable business and for the shipment of their goods to other ports of India they used whatever coastal shipping was available and had from experience full knowledge of the difficulties and delays which at that time hampered Indian trade In 1854 the East India Company called for offers for a contract for transport of mails passengers and cargo by steam between Calcutta and Burma and Mackinnon and Mackenzie raised sufficient capital between them and amongst their friends to allow them to tender for the contract When they secured this they bought two small steamers the Baltic and Cape of Good Hope and formed a Company for the running of the service under the title of the Calcutta Burma Steam Navigation Company It began with a fortnightly service between Calcutta Akyab Rangoon and Moulmein

B I Liner 'Amra built just before the War

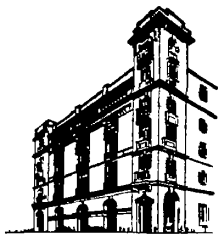
This it will be remembered, was at a time when steam transport in India and the East especially was struggling against many difficulties The engines of those days had low efficiency and a high coal consumption Docking and repair facilities for steamers were also lacking and although the new Company was not the first to attempt steam transport in Indian waters, others had lost heavily on their venture The Calcutta and Burma Steam Navigation Company however began to forge slowly ahead and although they were hard hit by the loss of two of their steamers, the Cape of Good Hope being sunk by collision in the Hooghly and a new ship the Calcutta wrecked on the Wicklow Coast on her way out from the builders two new steamers were added to the fleet and orders were placed for two more

In 1862 Mackinnon and Mackenzie offered not only to renew their existing mail contract but also put forward a project for the new development of other lines round the Indian Coast and to adjacent ports They proposed to run one line to ports of the Persian Gulf and others eastward to Singapore and Malacca Straits ports. The proposal was so daring that there was considerable hesitation and doubt as to the possibility of a contract being carried out. Up to that time no steamers had been able to continue an all-the year-round coastal service

against the seasonal monsoons while the conditions of postal services especially round the Persian Gulf were in a state of chaos Postal arrangements had to be concluded with a number of Gulf Chiefs who could give no guarantee of regularity or safety and had to be bribed or otherwise induced to carry out their part of the work by tribute pay ments Piracy was rife in the Straits and Seas of Singapore and Malacca and even steamers were not immune from attack, especially on the fairly frequent occasions when engine breakdowns left a steamer helpless against the attack of swarming pirate prahus

An early B I Liner 'Rasmara'

These dangers and difficulties were thought to be more than any Company could over come but at last the Supreme Council of the Government Department was sufficiently con vinced to make a contract and give the new services a trial The name of the Company was then changed to the one which it has carried ever since—the British India Steam Naviga tion Company or as it is generally known over the whole of the East the B I



Further troubles were met especially when five steamers including two completely new were lost in cyclones but the lost ships were replaced additional ones added and the mail sailings increased

In 1869 the opening of the Suez Canal brought a flood of competition from new Companies and steamers which broke into the established trade of the B I with the advantage of using what was then regarded as the greatest advance in steam navigation the new and economical compound steam engines The B I practically had to re-engine the whole of their fleet but were now able to send their ships through the Canal to England to have this work carried out This led to the opening of a new service between England and the East and another between *London and East Africa In 1881, a contract was made with the Queensland Government* for a monthly service between London and Brisbane by the Torres Straits Objections were raised to non Australian Companies being engaged in this trade, so the B I in 1886 acquired an interest in the Australian Steam Navigation Company which amalgamated with the Queensland Steam Shipping formed the Australasian United Steam Navigation Company which remains one of the associated companies of the B I

The story of the Chairmanship of the late Lord Inchcape and the negotiations under him which led to the amalgamation of the B I with the P &O in 1914 is all too recent and well known a history to repeat here From the earliest days of the B I their services have always fitted in usefully with those of the P & O and the amalgamation has only resulted in those ties being more closely drawn. Up to the outbreak of war the B.I services were spread in a vast network over the whole of the East and centering on India extended to the Straits and Far East down to Australia Westward to the Persian Gulf Ports of East Africa and to England The Company had then more ocean-going mail passenger and cargo steamers under its House Flag than any other shipping company in the Empire This in itself is striking evidence of the success of a little Company which was founded less than a century ago with two small steamers, and that very extension of the Company's enterprise is evidence also of the tremendous expansion in which they have shared of Indian sea transport, trade and commerce Nothing may be said now of the work which the Company's ships sea and shore establishments, are engaged in the war but there will certainly be a great deal of that to be told after our day of Victory has come

Certain it is that now, as in the past, India has good reason to be proud of the record and service of the Indian-born B I

THE BRITISH INSTITUTES

THE Institutes specialise in preparing ambitious men and women for successful careers in Engineering Business the Professions and Government Service In particular the Engineering Profession holds unusual opportunities for highly remunerative employment and since the outbreak of War the demand for trained men has outstripped supply Those who are working at the bench or in any other subsidiary Engineering position and in any other positions which are crowded and low paid often think that well paid jobs are beyond their reach but the Institutes have proved otherwise and have numerous regular successes to their credit during their many years establishment as a Training Centre for India Burma and Ceylon

THE BRITISH INSTITUTE OF ENGINEERING TECHNOLOGY makes the way easy to the man of small means to obtain a University degree or a Professional Qualification in any branch of Engineering and also to qualify for the highest positions in the Engineering Profession and Government Service

The B I E T is recognised in all quarters as the leading Training Institute of its kind. The system of tuition is entirely by correspondence although students are invited to visit British Institutes House in Bombay whenever they are in the neighbourhood to obtain personal advice information and assistance If students are unable to call they are welcome to write as frequently as they wish to their Tutors and Advisors for additional and personal assistance The obvious advantage of the British Institutes system is that the student can study in his spare time for a few hours a week and he is not retarded or hastened by other students since each student is trained individually according to his abilities and position The subjects taught by the B I E T include Building and Civil Engineering Mechanical Electrical Radio Talking Pictures and Television Engineering Automobile and Aeronautical Engineering Textile Technology and Manufacture Irrigation Agriculture etc In addition students are prepared for Government Service Examinations and for London University and Cambridge School Certificate *Examinations*

The Prospectus Engineering Opportunities which gives full details of courses of instruction is sent free to all enquirers on application

THE BRITISH INSTITUTE OF COMMERCE & ACCOUNTANCY which is associated with the B I E T prepares students for successful careers and for recognised examinations in Commerce Accountancy Secretaryship Banking Insurance Salesmanship Advertising Journalism General Education etc The Prospectus Commercial Opportunities is sent free to all enquirers on application.

The fees charged by the B I E T and B I C A are moderate The Institutes offer a unique Guarantee that tuition fees will be returned if the student is not satisfied with the tuition at the end of the course or if he fails to pass his recognised examination This remarkable and Legal Guarantee definitely safeguards the student and proves the confidence which lies behind the British Institutes Organisation as a result of their successes

All interested persons are welcome to visit British Institutes House Bombay and to see the Principal, Mr J Lee B Sc (Lond) for advice and guidance on careers in all branches of Engineering Business, the Professions and Government Service Parents are particularly requested to communicate with him regarding careers for their sons.

A special feature of the British Institutes is their Students Employment and Welfare Department which secures positions with good pay and practical experience for students when they are progressing with their studies.

ALLEPPEY

We began over 80 years ago in the ancient and historical Seaport of Cochin now a Major Port of India We have expanded with the development of the Port and have the honour of an appointment as Boat builders in Ordinary to H E The Governor of Madras

Our Workshop and Press are at Cochin while our Boat building Yards and Foundry are at Vypeen on the opposite shore We construct Wooden and Steel ships of about 1000 tons build Motor Tugs Barges and Boats Speed Launches Sailing Cruisers Dinghies Life Boats etc At our ship building yards at Vypeen we undertake repairs to Steamers Machinery etc besides the manufacture and fabrication of Structural Steel Works Castings Iron Pipes and special Non ferreous and Alloy Castings and also Industrial Machinery for Soap Textile Tea Rubber and Coir Factories Sugar Mills etc

At present all our resources have been placed at the disposal of the Government and we are actively engaged in the execution of Naval Admiralty and Government of India Supply Department orders

Due provision has been made to meet the enlarged Engineering requirements of the Country in peace time

The CENTRAL BANK

THE idea of starting a purely Indian bank was first conceived in the year 1911 by the late Sir Sorabji N Pochkhanawala who was fired with the ambition to venture into a region which was practically the monopoly of British and foreign institutions He had to his credit some years practical experience at the Chartered Bank, and also held an important position for five years at the Bank of India

The late Sir Sorabji N Pochkhanawala

THE DREAM FULFILLED

The Central Bank of India came into being on the 21st day of December 1911 From the very start it had to face many difficult situations which were at once in the nature of an opportunity and a trial

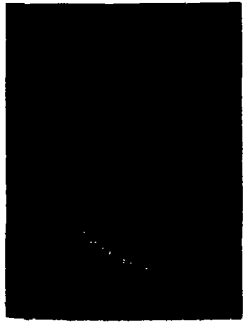
The Bank was singularly fortunate in having Sir Pherozeshah Mehta as its first Chairman He rendered invaluable assistance to Mr Pochkhanawala in guiding the destinies of the Bank during the earlier years.

Frequently the Bank has had to encounter squally weather but thanks to its sound general policy and the prudence of the Directorate and the Management it not only withstood all the shocks but actually emerged stronger and sounder on each occasion

Mr H C Captain

In 1923 two epoch making events of great significance took place namely the Central Bank's assumption of control over the Union Bank of India and the amalgamation of the Tata Industrial Bank and the Central Bank

The Union Bank had been started in 1918 by a few Marwari merchants with a huge subscribed capital of Rs 4 crores But the Bank did not get on well and it looked as if it would be compelled to close down Mr Pochkhanawala came on the scene to rescue it Negotiations were soon completed and the Central took over the management of the Union Bank. That the Union Bank has profited enormously is proved by its rapid recovery and subsequent progress



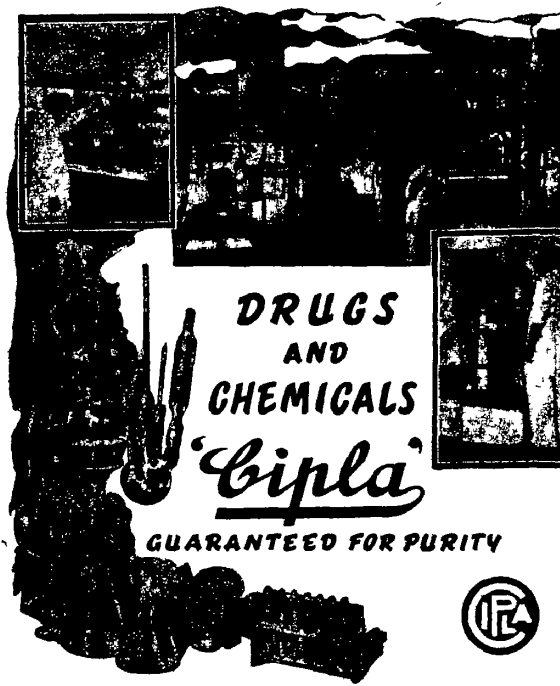
OF INDIA, LIMITED.

The amalgamation of the Tata Bank with the Central is another remarkable episode Established in 1917 the Tata Bank experienced a sudden and inexplicable breakdown in 1923 Mr Pochkhanawala boldly took the initiative and mooted the idea that the Central might absorb the Tata Bank The amalgamation was a signal triumph as is proved by the unbroken record of successes which attended the Central Bank in subsequent years

Prior to the advent of the Central Bank all banks used to confine their activities to banking operations pure and simple Of the striking features in the Central's comprehensive scheme of national service may be mentioned the Home Savings Scheme the Safe Deposit Vault the Executor and Trustee Department Depositors Benefit Insurance the Ladies Department and the Cash Certificates

THE PASSING OF A GREAT FINANCIER

In 1937 Sir Sorabji Pochkhanawala the founder manager of the Bank passed away As *The Times of India* once pointed out there is no single person in India today to whom Indian indigenous banking owes a greater debt of gratitude than to Mr Pochkhanawala On his death the Chairman of the Bank Sir Phiroze Sethna was appointed Managing Director and Mr H C Captain the Secretary of the Bank, was appointed Manager On the death of the Honble Sir Phiroze in 1938 the chairmanship passed on to Sir H P Mody while Mr H C Captain became the General Manager On Sir H P Mody's becoming Supply Member Government of India Mr Haridas Madhavdas was appointed Chairman of the Bank and Mr H C Captain its Managing Director In charge of Mr Captain the Bank is today successfully weathering all the storms of a war torn world



Mr Haridas Madhavdas

RETROSPECT

Out of the tiny acorn sown in 1911 has sprung up the mighty oak which we witness today with its branches spread throughout the length and breadth of this vast sub-continent While adhering to the orthodox canons of sound banking the Central has also been progressive in providing better and more varied facilities for the benefit of the public

NATIONAL INDUSTRIAL PROGRES

CHEMICAL, INDUSTRIAL & PHARMACEUTICAL LABS. LI

"CIPLA"

• *India's Foremost Chemical & Pharmaceutical Laboratories*

THE Chemical Industrial & Pharmaceutical Laboratories Ltd briefly known as Cipla was registered in August 1935 as a public limited Company and officially inaugurated in April 1937 when a number of preparations were placed in the market for the use of the medical profession and the public

During the short period of its existence Cipla has made rapid strides in the field of chemical and pharmaceutical industry under the able guidance of its Technical and Managing Director Dr K A Hamied B SC M A PH D A I C F C S M L C

The house of Cipla is well known for its high class pharmaceutical and fine chemical preparations New products have been made for the first time in India such as Pyridin B carboxylicaciddiethyla mide a product sold under the proprietary name of Cardiamid Cipla which has now been included in the British Pharmacopœia under the name Nikethamide Cipla has also succeeded in making Dehydrocholic Acid known to the public and the medical profession under the name Neocholin Among various other chemicals manufactured by Cipla mention must be made of Nicotinic Acid Calcium Lactate Calcium Lactobionate Ephedrine Hydrochloride, Acriflavin Caffeine Sulphonamide soluble and rubrum The manufacture of alkaloids and other active constituents from indigenous drugs is being carried on by the house of Cipla and rapid progress has been maintained Perhaps Cipla is the only firm manufacturing Emetine Hydrochloride in India and probably in the East

Since the outbreak of War Cipla has been able to help the medical profession and the public by manufacturing and supplying many of the products which were being imported from foreign countries Cipla products are being extensively used in all the neighbouring countries *viz* Afghanistan Egypt Iran Iraq etc Cipla has taken part in War effort by supplying various medicines and drugs to the Supply Dept Government of India including some very important medicines which were not manufactured in India up to now

Besides the manufacture of pharmaceutical products and fine chemicals research work on a number of problems is being ceaselessly carried on by experienced and well-qualified chemists

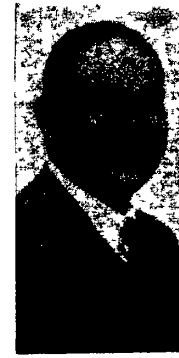
The Government of Mysore have waived the conversion fine on the land acquired for the company's factories and buildings

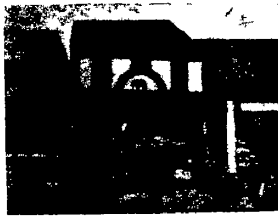


THE HOUSE OF CHINOYS

Sir Rahimtoola M Chinoy

AMONG the famous Houses Serving India The Bombay Garage can easily claim the reputation of being the leading Automobile House This premier position and reputation is the result of 38 years of steady and consistent progress and represents the perseverance foresight and character of the men behind the organization

The immense popularity Chevrolet today enjoys in Western India is due to the thorough management and efficient service established by this firm through its network of Dealer and Branch organisations covering practically one fourth of India In 1933 Refrigeration was added to the franchises already held by this firm Most of the important Mills Hospitals Factories Schools Government and public institutions have since been equipped with one or another type of Frigidaire installation supplied by the Bombay Garage

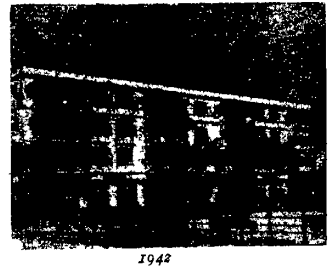


Sir Sultan Chinoy

What India owes today for Radio communication is also due to this firm because it was in 1922 that the Company obtained the representation of Marconi's Wireless Telegraph Company Ltd as the Sole Agents for external communications and the Entertainment field The establishment of the Indian Radio Telegraph Company Limited (now known as The Indian Radio & Cable Communications Company Limited) for whom they act as Secretaries & Treasurers is noteworthy in that this is the first Indian Company to be entrusted with a service of such public utility and importance

Mr Nurmahomed M Chinoy

1904



As in the Industrial World so also in Civic and Public affairs the House of Chinoys has played an important part and enjoys wide popularity and universal esteem

The Chairman of the Company Sir Rahimtoola M Chinoy is a Director of several important Joint Stock Companies was Mayor of Bombay is a member of the Council of State and is the present Chairman of the local Board of the Imperial Bank of India He was the President of the Federation of Indian Chambers of Commerce and Industry He is also connected with several benevolent and philanthropic institutions

To Sir Sultan Chinoy Managing Director of the Company is due the honour of having been the pilot of the House since its inception His dynamic personality his business ability and his farsighted policy have earned for him a great name in the business world Sir Sultan is also very actively interested in important public and civic affairs He too was Mayor of Bombay is a Director of the Reserve Bank of India and is connected with numerous other institutions

Mr. Nurmahomed M Chinoy the third director in addition to making his own contribution to the development of the firm has devoted considerable time to the problem of Transport and Roads He holds a directorship of the Central Bank of India is Chairman of the Motor Manufacturers and Importers Association Limited President of the Federation of Motor Transport Development Association Member Motor Vehicles Insurance Committee He led a deputation of Motor trade interests to the Government of India Mr Dostmahomed F Chinoy is director in charge of the Company's business in the Southern Mahratta Country with head quarters at Poona Gulamhusein F Chinoy is Director in charge of Finance and Mr Habib N Chinoy Director in charge of Refrigeration

The House of Chinoys is a fitting memorial to the late Mr Fazalbhoy M Chinoy whose name the company perpetuates by worthily following in the footsteps of its illustrious founder

1942

THE COMMONWEALTH TRUST, LIMITED

Manufacturers of Tiles, Textiles and Steel Safes

Indian Head Office—**Calicut, Malabar**

THE Commonwealth Trust Limited was instituted in London in 1919 by arrangement with the Secretary of State for India for taking over and administering certain factories in Madras Presidency The Company having been formed as a practical expression of the principle that commercial development in India should be in the interests of the inhabitants the dividend payable to its shareholders is limited to 5% per annum and all surplus profits earned in India go to a body of Trustees to be used for religious and charitable purposes in India

A Section of the Handloom Factory

The Company operates on a similar basis in the Gold Coast West Africa

The Company's predecessors commenced operations in 1859 to find employment for the local population handloom weaving was then as now a popular occupation in Malabar and the material known as calico is said to be named after Calicut They interested themselves in developing this particular industry and it is worthy of mention that the colour known as khaki is said to have been originated by the Company Lord Roberts saw this khaki on the Company's premises and recommended its adoption by the Army

In 1866 the Company started the manufacture of roofing tiles at Mangalore and several tile factories were erected by them in the following years

This expansion necessitated the starting of a workshop and in 1874 the present engineering works was opened in Mangalore In 1890 the Hosiery Factory was started in Mangalore and in 1902 the Embroidery Department was opened in Calicut

With the general development of the mill industry it was decided to open a large powerloom factory at Cannanore for the manufacture of popular priced shirtings and suitings

The Commonwealth Trust, Ltd have now 17 Factores and branches employing nearly 5 000 employees to whom large sums are distributd every year in the form of Sick and Maternity Benefit Provident and Pension Funds A Crèche is attached to each Factory and at Cannanore a free Clinic is maintained under the supervision of a European Doctor

The Company has its own branches for the sale of Textile and Hosiery productions at Madras and Ootacamund with stockists and agents in all the main cities and towns throughout India Ceylon Burma Straits Australia Africa etc

More detailed information regarding the various manufactures is given below

THE CONSOLIDATED PNEUMATIC TOOL COMPANY, LTD.,

Contractors to the British Admiralty, War Office, Air Ministry, India Office and Railways, Foreign Governments and Railways

Branches all over the World

WHENEVER the world's expert builders want a reliable steel structure they specify the Boyer Pneumatic Riveting Hammer

Towards the end of the nineteenth century Boyer perfected the pneumatic riveting hammer which has since been steadily and consistently improved by the Consolidated Pneumatic Tool Company until today it has become the world's standard riveting hammer for steel bridge construction

The Boyer riveting hammer is perhaps the most notable of the Company's products If any proof of its superiority were necessary the fact that ten million rivets were put into the hull of the *Queen Mary* with this hammer and that most of the world's famous bridges have been riveted with it proves that it is still the world's pioneer riveting hammer

The world's famous bridges built with the tools of the Consolidated Pneumatic Tool Company include Sydney Harbour Bridge San Francisco Oakland Bridge Chelsea Bridge (London) Tyne Bridge (Newcastle) and the Khartoum Omdurman Bridge across the White Nile

INDIA'S GREATEST PIPE LINE

The rapid growth of the City of Bombay called for the laying of a new pipe line This great undertaking involved over 110 miles of water pipe and the construction of 150 bridges Thanks to C P Pneumatic Tools the project was completed speedily and economically Caulking hammers of the Consolidated Pneumatic Tool Co enabled each workman to caulk 25 ft per hour After caulking the interiors of the pipes were spray painted with a bituminous solution by pneumatic paint sprays supplied by the Consolidated Pneumatic Tools Co

Pathan riveter at work on the Pipe Line

Several hundred of the well known Boyer Riveting Hammers and Boyer B K Chipping Hammers were used on the work Compressed air was supplied from steam driven portable air compressors

PROUD PROGRESS

The fact that the world s largest steel structures have been built with the tools made by the Consolidated Pneumatic Tool Co Ltd which has been established for close on half a century is the best guarantee of the efficiency and reliability of the Boyer Hammer and its progeny The products of the Company range from light tools for aeroplane manufacture weighing a few ounces and running at a speed of 12 000 revolutions per minute to rock drills weighing a hundredweight or more used in mining or tunnelling and air compressors weighing several tons

The DALMIA

GROUP OF INDUSTRIES

THE Dalmia Group of Industries is composed of different companies manufacturing goods and offering services diverse in character The Group comprises a number of sugar factories collieries cement factories a paper mill a chemical plant and public utility concerns including a Railway, an Insurance Company and a Bank The activities of Seth Ramkrishna Dalmia the founder of these industries began with the establishment of a 1600 ton sugar factory known as THE SOUTH BEHAR SUGAR MILLS LIMITED at Bihta near Patna He put up in quick succession two other sugar factories which rank among the largest of their kind in the country and his group of factories turn out nearly 57 000 tons of white sugar per year With unerring instinct he visualised the commercial possibilities of Dehri then an obscure place and made it the seat of ROHTAS INDUSTRIES LIMITED It has steadily grown into a well planned town beautifully electrified laid on with filtered water and having picturesque lawns parks and wide cement roads

Rohtas Industries Limited—runs with Indian labour and under Indian supervision a 500-ton Cement factory a 2 000 ton Sugar factory a Paper mill producing about 10 000 tons of paper per year and a large Chemical plant

Dalmianagar with Cement Factory in the background

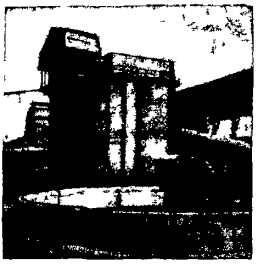
Turbo Alternators supplying power to this Industrial area and also to the Bihar Government Irrigation and Power Scheme utilise steam at 400 lbs and 800° F and permit bled steam at 120 lbs. and 40 lbs pressure to be used for the various process works in the factories The Power House has one of the tallest steel chimneys in India rising to a

majestic height of some 400 ft It supplies electrical energy to the towns of Dehri and Sasaram for household consumption and also to a number of villages for purposes of irrigation

The Cement Factory comprising a single unit plant produces from stone quarried from the neighbourhood by the wet process about 500 tons of finished cement per day The giant rotary kiln is about 12 ft in diameter and 500 ft long

The Sugar Factory produces on an average about 200 tons of the finest quality sugar per day by the double carbonation process A ropeway has been erected at considerable expense for the transport of sugarcane from the canalhead right up to the cane carrier On the other side of the Sone river the Company has acquired large tracts of land for the cultivation of sugarcane

The Paper Factory produces chiefly from bamboo several varieties and grades of paper So far it is the only factory in India manufacturing special paper like Duplex (Carton paper) Triplex (for tickets) and Machine glazed boards



Paper Machine

The Chemical Factory produces out of common salt sulphuric acid alum table salt caustic soda and bleaching powder the greater part of which is consumed in the Paper factory A considerable quantity of the Caustic Soda utilised in the Paper factory is recovered by a separate plant thus effecting production economy

The Central Workshop is fitted with the latest appliances for turning moulding &c All sorts of repairs of machineries and accessories as well as the manufacture of spare parts are carried out

Ample provision has been made for the welfare and recreation of the employees There are libraries kept up to date with latest books and periodicals free reading rooms and two large clubs providing radios musical instruments gymnasiums and arrangements for all sorts of indoor and outdoor games There is a free Middle school for boys and girls and a free night school for adults There are a spacious hospital and a dispensary providing Allopathic Ayurvedic and Homeopathic systems of treatment The Hospital accommodates a number of indoor patients and there is a female ward for maternity cases The operation theatre is fitted with all modern appliances and instruments Arrangements have also been made for the treatment of opthalmic cases

The town has been fitly named Dalmianagar after the name of the ancestors of the founder

Slurry Silos and basin Cement Factory

Dalmia Cement Limited runs at Karachi a 500 ton cement factory to which was added another unit of the manufacturing capacity of 250 tons The other factories of this Company each of the manufacturing capacity of 250 tons are situated at Dandot north of Lahore and at Dalmiapur am in the Presidency of Madras

Dalmia Dadri Cement Limited runs a 250 ton cement factory at Dalmia Dadri This factory is situated within a very short distance from Delhi

The Dehri Rohtas Light Railway Co, Ltd The management of this company has recently been acquired by Dalmias Since its acquirement there has been an all round expansion of its activities bringing about extension of its lines and an increase in goods and passenger traffic This railway leads to the famous fort of Rohtas which is reputed to have been built by King Rohitashwa

India Investment Bank Limited transacts all sorts of banking business Situated as it is in an industrial town it affords banking facilities to the workers at Dalmianagar and also to agriculturists of neighbouring villages

Kharkhari Coal Co., Ltd. and Maheshpur Colliery Ltd.—situated in the Jharia Coal fields raise excellent steam coal a large portion of which is consumed by the Dalmia Group of factories

The South Behar Sugar Mills Ltd. at Bihta manufactures about 500 000 maunds of best quality white sugar per year

S.K.G. Sugar Limited at Hathwa produces by the Double Sulphitation process over 500 000 maunds of high grade white crystal sugar per year

Dalmia Cement & Paper Marketing Co., Ltd. is a public limited company having a capital of Rs 50 Lakhs It is a trading concern dealing in various kinds of goods and has offices in Calcutta Bombay Delhi Lahore Karachi Cawnpore Madras and other places

Dalmia Investment Co., Ltd.—A public limited company having a paid up capital of Rs 45 Lakhs transacts business in securities on sound lines and its holdings comprise largely of securities of the Dalmia Group

The Bharat Insurance Co Ltd., Lahore. Since Seth Ramkrishna Dalmia s taking over control of this Company it has been making astonishing progress and writes life business round about Rs 2 Crores every year It ranks amongst the foremost companies operating in the country The Life Funds of the Bharat exceed Rs 2¼ Crores It has paid claims exceeding Rs 2 Crores

The Dalmia Group has 65 offices and all its employees enjoy the benefits of a liberal Provident Fund

DAVANGERE VANASPATI VEGETABLE OIL COMPANY, LTD.,

DAVANGERE

(Incorporated under the Mysore Companies Act XVIII of 1938)

AUTHORISED CAPITAL Rs 10 00 000/-

Divided into 20 000 shares of Rupees 50/ each

THE above Company has been started with the object of putting up a plant for the production of 25 tons of Vegetable Ghee per day along with Refined Castor Oil Soap and other by products as also the necessary oils for processing It is also proposed to take up the manufacture of the other allied products in due course

Davangere is splendidly suited for the location of the Company inasmuch as about 40 000 tons of groundnuts are produced every year in its surrounding area The major portion of it is exported for the production of oils and Vegetable products

The buildings are being constructed and the erection of the machinery plant is being undertaken It is expected to commence production during the coming groundnut season under the expert supervision of the Technical Staff already engaged

The situation of the Factory is on the Bangalore Poona Provincial Road which is at a distance of about a mile from Davangere Railway Station and about 200 miles from Bangalore The Company has purchased about 35 acres of land for the purpose of the Factory and is one of the biggest of such concerns in India

The Management of the Company is in the hands of Davangere Industrial Agencies Limited Davangere the members of which are important businessmen with a large experience

The members constituting the Managing Agency Company are —

1 Messrs R Rama Setty Cotton Merchant Managing Agent Davangere Cotton Mills Ltd Davangere 2 Channagen Rangappa Banker & Landlord Davangere 3 R Lakshmanasetty Jeweller Davangere

THE HOUSE OF DEVKARAN NANJEE

THE HOUSE OF DEVKARAN NANJEE was founded by the late Seth Devkaran Nanjee J P in 1879 He was born of poor but respectable parents in 1858 in Porbandar (Kathiawar) in the Modh Bania (Hindu) community the same town and community as Mahatma Gandhi s At the age of 11 years he reached Bombay in a sailing ship in the company of his elder brother Chugondas by whom he was educated Having matriculated in 1876 he started business He died in 1922 To his foresight and sagacity is due the high position in which the House of Devkaran Nanjee stands to-day It is also due to no small extent to the ability and brilliance of his youngest son the late Mr Manoo Devkaran Nanjee who died in 1936 at the early age of 32

The scope of the business operations of this House is both extensive and varied and in fact there is hardly an important market that is not covered by them Being Financiers Merchants Dealers Brokers Bankers Printers and Publishers Landlords etc through their different Departments and Firms they occupy a unique place in the business life of India Devkaran Nanjee s are one of the largest Dealers and Brokers in India in Government and allied safe Securities Shares Cotton, Gold and Silver and have their ramifications in all the principal cities of our country as well as Europe and America One or the other of their firms are Members of the Bombay Chamber of Commerce the Indian Merchants Chamber the Marwari Chamber of Commerce Ltd the Native Share & Stock Brokers Association the East India Cotton Association Ltd the Bombay Cotton Merchants & Muccadums Association Ltd the Liverpool Cotton Association Ltd The Bombay Shroffs (Bankers) Association Ltd, The Bombay Bullion Exchange Ltd the Bombay Overseas Freight Brokers Association the Grain and Seeds Brokers Association, the Property Owners Association etc. Their Head Office is situated at DEVKARAN NANJEE BUILDINGS Elphinstone Circle Fort and they also have their Bazaar Offices in all the important markets of Bombay Their Securities firm is running under the name and style of CHUGONDAS & CO their Share Cotton and Bullion firms under the name and style of MESSRS DEVKARAN NANJEE and the other business under the name and style of DEVKARAN NANJEF & SONS

Mr Choonilal Devkaran Nanjee and Mr Pranlal Devkaran Nanjee J P, are the Principal Partners of the different firms and in each of these they have two or three able associates aggregating nearly 20 gentlemen on whose shoulders dwell the responsibility of carrying on the business with efficiency and in accordance with their strict principles Mr Choonilal Devkaran Nanjee has been for many years a Director and the Honorary Treasurer of the Bombay Stock Exchange Mr Pranlal Devkaran Nanjee J P is on the Committee of several bodies and a Director of a number of Companies

Seth Devkaran Nanjee J P Founder of the House

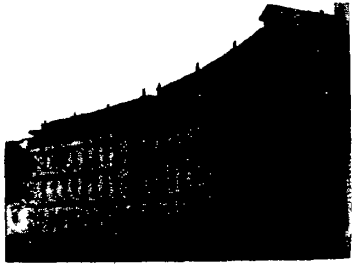
The policy of the House of Devkaran Nanjee has been conservative gradual expansion Every one of their enterprises has been preceded by years of thorough investigation and planning The founder's motto Speak the Truth Practise the Truth pervades all their undertakings

Banking

The late Seth Devkaran Nanjee was deeply alive to the utility of sound Banking institutions in India but unhappily his idea of starting one could not be put into practice during his lifetime However by their indefatigable energy and business acumen his successors fulfilled his wish and started the now well known and popular Bank the DEVKARAN NANJEE BANKING CO LTD The Bank has in all nine Offices at present six of them being in Bombay two at Nasik and a seasonal Sub-Office at Matheran The pace of progress of the Bank has recently accelerated considerably as will be seen from the following extract from the Times of India of 12th February 1942

The steady progress of Devkaran Nanjee Banking Co Ltd Bombay during 1941 was reviewed by Mr Pranlal Devkaran Nanjee presiding over the fifth Ordinary General Meeting on Monday The Directors Report, adopted at the meeting, showed 100 per cent expansion of

The late Mr Manoo Devkaran Nanjee



business during the year The DENABANK as it is popularly known was the first to put on the market 5 10 20 50 100 and 250 Tola SMALL SILVER BARS manufactured at His Majesty's Mint Bombay These are available from the Bank's Offices and nearly 139 other leading Banks and Dealers all over India

Insurance

In the field of Insurance also the House of Devkaran Nanjee has not lagged behind The DEVKARAN NANJEE INSURANCE CO LTD has an influential Board of Directors and writes at present Life Insurance business It is under the management of an able Director in charge and an enthusiastic Manager

Publications

The Publications of the House of Devkaran Nanjee are a Weekly entitled DEVKARAN NANJEE WEEKLY MARKETS SURVEY which contains a Review of the Government Securities and Money Market Share Market Cotton Market and the Bullion Market and a Daily Report entitled DEVKARAN NANJEE'S DAILY MARKET REPORT A Year Book entitled DEVKARAN NANJEE'S BOMBAY INVESTORS YEAR BOOK was published by them in 1940 which included a number of Special Articles on important Industries Markets etc contributed by eminent men A Company entitled DEVKARAN NANJEE PRINTING & PUBLISHING CO LTD handles the printing and publishing of the publications of this House has its own Printing Press and thus makes it as self contained a business enterprise as is possible to make it

DEWAS STATE (Junior)

Its Industries

H H Maharaja Sadashiv Rao Khase Saheb Pawar Ruler of Dewas Junior

SINCE the present ruler took the reins of Government in 1934 Dewas has made considerable Industrial progress Some of the main industries which have flourished are

Yeshwant Soap and Oil Factory—This factory was started about two years back with a capital of about Rs 30 000 and is perhaps the only factory of its kind in Central India Considerable success has been achieved in the manufacture of edible and non edible oils The factory is on the All India list of approved contractors to the Government of India Supply Department for Soaps and Oils and has received contracts worth Rs 40 000 from the Department

Shree Mhalsabai Cotton Weaving and Spinning Mills.—These mills have recently started the Spinning Section only and have made profits The mills are developing rapidly

Hand-Loom Weaving Industries at Sarangpur—This is a very old industry of Sarangpur a Tehasil of Dewas on the Agra Bombay Road Cloth of different varieties of the finest texture is produced This cloth is famous all over India Sarangpur Pugrees and Sarees are specially in demand all over the country The industry has not died in spite of the advent of Machinery and keen competition though it is affected But the present time has brought a revival of the industry and with State patronage it is doing well As a matter of fact it is being found difficult to meet the present demands of the market A sum of about Rs 10 000 was spent in giving encouragement to the industry

The Malwa Sugar Mills Ltd.—In spite of the vast areas under Sugar cane cultivation sugar has to be imported into India Among the pioneers of Indian Industries we may safely reserve a place of honour for the ruler of Dewas who by reason of his enterprise and initiative has made possible the foundation of the Malwa Sugar Mills with a number of Sugar Experts and Financiers of repute as the proprietors of the concern The Mills are started with a capital of Rs 30 00 000 and with the coming into operation of this concern the country will have a greater supply of sugar

EMPIRE OF INDIA LIFE ASSURANCE COMPANY, LIMITED,

BOMBAY

ESTABLISHED 1897

Head Office
Empire of India Life Building

THE EMPIRE OF INDIA LIFE ASSURANCE COMPANY LIMITED was established in Bombay in 1897 under the auspices of leading members of the European and Indian Communities for the purpose of providing Life Assurance on the latest and most approved principles

The object of the Company is to provide Life Assurance at the lowest cost consistent with complete and absolute security and one of its distinguishing features is its very moderate rate of Premium

All the Company's Investments are in gilt edged Securities of the highest class and moreover, being in Terminable Loans are repayable on fixed dates at par except in the case of 3 per cent Government Defence Bonds 1946 where repayment will be at 101 per cent The Security thus offered by the Company is absolute and unexceptionable

The Bonus Record of the Company has been consistently good It has always been the policy of the Directors to declare only such Bonuses as have been justified by results and they have abstained from any anticipation of future profits thus conserving the sources from which future Bonuses must be derived

FINANCIAL PROGRESS

Year ending	Yearly Income		Life Fund (Including Reserve Funds)	Total Assets

London Agents Tozer Kemsley & Millbourn Limited London

New York Agents Fenchurch Export Corporation New York

The House of Fazalbhoys is well known throughout India as one of the premier Muslim business houses Although the present organisation of Fazalbhoy Limited was registered in 1936 the firm founded by the late Mr Abdulla Fazalbhoy and his sons which controlled the Bombay Radio Company Ltd and Sound Equipment Co Ltd is a very old established one having been started in 1924

The Radio trade owes much to the enterprise of Fazalbhoys The late Mr Abdulla Fazalbhoy played a very prominent part in the introduction of broadcasting in India as one of the active members of the All India Radio Merchants Association which helped to a great extent the radio trade in India during the early period when broad casting was the monopoly of a commercial organisation and it was mainly due to his efforts that the Government were finally induced to take over broadcasting as a state enterprise

With the introduction of talking pictures in America and in Europe Mr Fazalbhoy did not lose the opportunity of taking interest in the new developments which were so closely allied to the radio trade in its technical aspects The first double system equipment for recording talking picture was introduced in India by him and very soon he helped and aided a large number of people who were interested in the new business which had come up in India The Film City studios was set up for helping the independent producers It is interesting to note that the first Indian talkie produced in India ALAM ARA was exhibited at the Majestic Cinema which was equipped and installed by Indian enterprise and by Indian Engineers trained in the Fazalbhoy workshops With this small start the Fazalbhoy organisation set up the Sound Equipment Co Ltd where cinema equipments and parts for talking pictures were stocked This has now developed into the Photo phone Equipments Ltd of which Mr M A Fazalbhoy is now the Managing Director PHOTOPHONE EQUIPMENTS LTD is very closely allied to the great R C A Manufacturing Co of America which is one of the largest and most important manufacturers in the United States of America The R C A Organisation has been responsible for a number of improvements and inventions in the film industry as well as in Radio Broadcasting Television Wireless Telephony Telegraphy and several other allied lines Whilst being a premier import house carrying goods from England, America and Japan and before the war from many European countries the House of Fazalbhoys have not neglected the importance of establishing industrial enterprises in the country As pioneers of the film industry one of their Directors Mr Y A Fazalbhoy is the Director in Charge of NATIONAL STUDIOS LIMITED the largest film producing concern in Western India Further additions to the manufacturing organisations are the FAZALBHOY BOMBAY LABORATORIES LTD manufacturing toilet preparations confec tionery hardware cutlery and allied products Another organi sation is the FAZALBHOY INDIA TEXTILES LTD for the manufacture principally of hosiery of all kinds Fazalbhoy Limited has also not neglected two important fields which are responsible for the development of industry of a country namely Insurance and Banking

Mr M A Fazalbhoy is a Director of Bombay Fire & General Insurance Co Ltd whose chief Agents in Bombay are Fazalbhoy Limited He is also a Director of Vasant Insurance Co Ltd In the Banking World Mr M A Fazalbhoy was for a considerable time one of the members of the Board guiding the New Citizen Bank of India He is now the director of Associated Banking Corporation of India Ltd He is also the Chairman of the MERCANTILE FINANCE CO LTD a financing house which has aided many industries

Abdulla Fazalbhoy Technical Institute which is now being conducted by St Xavier s College was originally founded by the House of Fazalbhoys

★ ★ The House of Godrej

Godrej 8 ton Strong Door as supplied to Safe Deposit Companies and Banks

NEARLY fifty years ago the inspiration of the late Mr A B Godrej began a business which keeps on flourishing on the principles of Indian self sufficiency which he laid down Observing one fact which passed generally un recognised in the last century that India has indigenous engineering skill he first enlisted the hereditary lock-smiths of Malabar to make hand fitted locks From this simple beginning the firm proceeded to develop the manufacture of dependable Safes and other security equipment, then Metal Furniture and it has now reached the peak of skill in an Engineering factory by producing Machine tools (for its own use) for the first time in India

Over two decades ago Mr A. B Godrej envisaged the great necessity of a swadeshi soap industry and so was laid the foundation of another pioneer industry by the same man He realised that good soaps should be made exclusively from vegetable oils and that India fortunately possesses both raw materials as well as markets for finished products Much regard one feels for national industry but true pride comes when the home-made articles are better value than the imported The contribution by Godrej is very substantial there are now practically no imports of security articles and the figure for soaps is only about 1 per cent of what it used to be twenty years ago

SECURITY ENGINEERING

When the business was taken over by Mr P B Godrej its expan sion was rapid The metal products works in Bombay is today equipped with a powered plant of steel-working machinery designed to undertake any kind of job in steel sheets or sections either by series-production or individual precision methods It is difficult to think of any hardware which cannot be made by Godrej to the same standards

and as economically as by any manufacturer in the world A skilled staff of 2 000 is thus able to cope with anything from the supply of tens of thousands of bedsteads to the designing building and equipment of giant Safe Deposits

The total output of the Godrej plant is worth Rs 60 lakhs annually it includes the following regular peacetime products

Jointless Safes Safe Deposits Strong Rooms and Doors Steel Coffers and Cash Boxes Steel Cabinets, Air-tight Almirahs Steel Shelving and Library-stacks Bookcases Filing and Card Index Cabinets, Steel and Chromium Furniture for Homes Offices and Hospitals Locks and Latches

The stimulus of wartime demand has resulted in the manufacture of a large number of items—many of which have never been made in India before

Fourteen original patents provide for economy in manufacturing methods and structures which ingeniously combine great strength with lightness The finishes which have been developed for Godrej products are practically indestructible

MANUFACTURE OF SOAP

The well known brown soaps—No 1 and No 2—were the first vegetable toilet soaps made by Godrej And in the course of years the number of varieties has grown to over a dozen including shaving soap—for a variety of tastes all over India and overseas The country-wide distribution of Godrej Turkish Bath soap has made it a pleasure for the average Indian to keep himself clean by washing with a pure toilet soap that actually does not cost more than washing soap! The need for a very good popularly priced toilet soap was felt some time ago and although the price had to be the popular one the quality had to be definitely superior to that of other makes This has been achieved by Vatni the new Godrej soap

The recent extension to the factory had to be undertaken to meet the increased war time demand and for manufacturing Glycerine an essential commodity in war time

One of the Milling Machines in the Godrej Soap Factory

The Godrej factories and their extensive establishments are a living monument to the memory of their founder as also landmarks in the field of Indian Industry Godrej are by far the largest manufacturers in their lines of metal products in the East and their soaps have made Godrej a household word in India. Moreover Godrej products are made and financed exclusively by Indians to serve Indians

Mr J B Greaves

GREAVES COTTON

THE firm of Greaves Cotton and Company was founded in 1870 on which date James Greaves took into partnership George Cotton (subsequently Sir George Cotton) Prior to that date James Greaves had traded for some years in Broach under the name of James Greaves & Co The Manchester Branch of the Company trades under this name today

At the outset Greaves Cotton and Company carried on general export business In 1870 they opened an office in Bombay and soon after floated the Empress Mills The business prospered and in successive years the following other mills were started

Leopold Mills James Greaves Mills Howard and Bullough Mills Connaught Mills New Empress Mills Alfred Manufacturing Co Broach Albert Edward Mills Broach Later on the agencies for the Imperial and Apollo Mills were secured by them

Colonel Arthur Leslie joined the firm in 1889 He retired in 1908 and died in 1931 During his time he founded the Society of Honorary Presidency Magistrates in Bombay and was the first President Incidentally Mr John Brownson Greaves the present head of the firm was President of the Society in 1939

SIR GEORGE COTTON

Sir George Cotton retired from Bombay in May 1900 but continued with the firm until his death in 1904 He was Sheriff of Bombay on one occasion and President of the Municipal Corporation on two occasions On his retirement from Bombay in 1900 he was succeeded by John Greaves the eldest son of James Greaves the founder of the firm John Greaves was a member of the Bombay Municipal Corporation and also at one time the Chairman of the Broach Municipality He died in 1904 and was succeeded by Herbert Greaves the second son of James Greaves Herbert Greaves was Sheriff of Bombay in 1911 during the Governorship of Sir George Clark was President of the Mill-owners Association and a Member of the Municipal Corporation and also of the Governor s Council prior to the Montague-Chelmsford Reforms

Herbert Greaves died in 1921 leaving Mr. Neville Greaves Hunt as the surviving partner In the same year Mr John Brownson Greaves the present Chairman of the Company and head of the firm came out to join Mr Hunt who retired in 1929

LIMITED COMPANY

In 1922 Greaves Cotton & Co was turned into a limited company Amongst the first directors were Messrs J B Greaves N G Hunt A McIntosh Bomanji Hormusji Bharucha and the late Mr H G Davies all of whom with the exception of Mr Davies remain directors of the Company today Mr Bomanji Hormusji Bharucha joined the Company in 1883 and is of course today by far

AND COMPANY, LTD.

Mr James Greaves

the most senior member of the staff Mr A McIntosh was President of the Chamber of Commerce in 1938 and Mr J B Greaves has been one of the representatives of the Chamber of Commerce in the Legislative Assembly for many years Mr A Forrington was made a director in 1938

ENGINEERING BUSINESS

By 1921 Greaves Cotton and Company had relinquished all their mill agencies and had concentrated on developing their Engineering and General Merchanting business *From 1922 until today the Company has* developed more on engineering lines and today four large separate engineering and allied sections exist

ELECTRIC SECTION

1 The Electrical Section which has now been formed into a separate company styled Greaves Cotton and Crompton Parkinson Ltd who handle throughout the Bombay Presidency Bengal and Northern India the whole of the products of Crompton Parkinson Ltd London and many other electrical concerns

TEXTILE MACHINERY

2 The Textile Spinning Machinery Section which has also been formed into a separate small company styled Indian Textile Engineers Ltd who represent Messrs Asa Lees & Co Ltd Brooks and Doxey Ltd Dobson and Barlow Ltd Howard and Bullough Ltd J Hetherington & Sons Ltd and Platt Brothers & Co Ltd —all of Lancashire This concern handles the bulk of the spinning machinery that is imported into India

MECHANICAL ENGINEERING

3 The Mechanical and General Engineering Section of Greaves Cotton & Co Ltd handles a number of machinery agencies the most important of which is the agency of Ruston and Hornsby Ltd the well known Lincoln oil engine manufacturers

MILLSTORES AND WEAVING SECTION

4 The Millstores and Weaving Section handling the mills weaving and finishing requirements represents amongst others Messrs Henry Livesey Ltd of Blackburn and Messrs Mather and Platt Ltd of Manchester In addition this section handles normal millstores requirements of the mills

LOCAL MANUFACTURES

In addition the Chairman of the Company Mr John Brownson Greaves is on the Board of two closely connected companies —Crompton Parkinson (Works) Ltd Bombay who manufacture large quantities of Electric Fans and Motors and Ruston and Hornsby (India) Ltd Bombay manufacturing small Oil Engines

It is of interest to note that unlike many other commercial houses in India the head office of the Company has always been in Bombay Address 1 Forbes Street Bombay

Gwalior Industries.

IN recent years there has been a growing appreciation of the increasing contribution which is made to the economic and industrial potentiality of India by Gwalior State Gwalior is the principal Indian State of the vast hinterland of Central India and by virtue of its geographical configuration particularly owing to the dispersion of its dominion in varied juxtaposition to Indian provincial and State territories the economic and industrial possibilities of the State are of vital significance to the nation's economy

Four decades ago His Highness the late Maharaja Madhav Rao Scindia initiated a planned system of economic and industrial development in the State and if today Gwalior is in the vanguard of industrial development among the Indian States it is entirely due to the foresight and beneficence of this wise ruler who led the way to his brother Princes of India as the Patriarch of industrialism in the country

During his brief regime the present young enlightened Ruler of Gwalior—H H Maharaja Sir Jiwaji Rao Scindia—has given ample token of his personal determination to lead the State on to the higher heights of industrial advancement The policy of Durbar is to give private enterprise every possible encouragement rather than to cripple normal development by creating exclusive monopolies for the State

Of the State owned industries the Gwalior Leather Factory Gwalior Potteries Works Alijah Durbar Press and the Gwalior Engineering Works have achieved outstanding success with an enormous output and sale since their establishment

GWALIOR LEATHER FACTORY

The Gwalior Leather Factory was established as early as 1898 efficiently to meet the long felt need of the Gwalior Army's equipment Pioneers of the leather industry in the State the Gwalior Leather Factory manufactures civil and military boots shoes gaiters attache cases feather weight bags purses riding and racing saddles buttons wallets and travelling kits Lady's hand bags leather photo frames toys and other articles very suitable for presentation are also manufactured by the Factory

Prior to the present war the tent section of the Factory was meeting the requirements of the civil and military departments of the State but since the outbreak of war the activities of this section are mainly focussed in meeting the increasing demands of the Supply Department of the Government of India This is more evident from the fact that the section has so far executed war orders for the Government of India to the extent of 20 lakhs of rupees

GWALIOR POTTERIES

The Gwalior Potteries Works another big industrial concern owned by the State and the leading successful large scale potteries in India is being run on a commercial scale since 1926 Since its establishment the output of the Potteries has nearly been doubled and it now possesses a capital of more than 10 lakhs

Its factories at Gwalior and New Delhi are fully equipped for the manufacture of crockery tiles flooring sanitary fittings drain pipes toys jars firebricks and insulators With a reputation for excellence established in peacetime all over India the products of the Potteries particularly the tea coffee and dinner sets toilet sets have proved their outstanding value Inspite of unprecedented rise in the prices of commodities the Potteries are placing before their customers a wide range of finest products to suit all pockets and modern and æsthetic taste

ALIJAH DURBAR PRESS

A premier press in Central India the Alijah Durbar Press which came into being some 88 years ago occupies an important position amongst the Indian presses run by electricity Since its establishment the Press has undergone numerous changes replacements and improvements costing about 3 lakhs of rupees It is fully equipped with up-to date printing and various kinds of machinery of the latest type The addition of lino and mono machines has contributed to an efficient and quick printing service The installation of modern machines such as miehle and record has brought about vast changes in the printing of superior class at cheaper rates Besides printing lithography book binding die stamping rubber stamp-making gold-edging of cards envelope making perforating ruling eyeletting the Press also deals in stationery and paper

GWALIOR ENGINEERING WORKS

The Gwalior Engineering Works intended to be the locomotive carriage and wagon shops of the Gwalior Light Railway are well equipped with up-to-date machinery and the assembling and wood work are carried out on a highly skilled basis Other works especially undertaken include iron and brass castings and metal work generally motor car engines transmission gear and bodywork steam rollers furniture nuts bolts and rivets carts tongas and ambulances For railway work trusses points crossings and rail keys are manufactured In addition the Engineering Works turn out gold and silver presentation articles and ornaments trophies medals and cups European and Indian silver utensils and photo-frames cigarette cases and water bottles The silverware manufactured by the Engineering Works compares very favourably with the British makes

GWALIOR & NORTHERN INDIA TRANSPORT COMPANY

Gwalior has a remarkable series of bus services which reach practically every corner of the State and which have been described as on a par with any transport organisation overseas These services are run by Gwalior & Northern India Transport Co Ltd which since 1925 has been financed and controlled by the Gwalior Government

The mileage covered by the busses of the company and the passengers carried by them in 1940 were 40 63 000 and 17 53 000 respectively

The industries which are not entirely owned by the State but in which the Government have very substantial interest have achieved great progress in recent years Textiles provide one of the most flourishing industries in the State. There are seven cotton mills at Ujjain and Gwalior

Hardcastle,

Alice Buildings, Hornby

THE Firm of Messrs Hardcastle Waud & Co Ltd took over the Import & Export Business of the Firm of Messrs F E Hardcastle & Co Ltd in the year 1924 The Firm handles various well known commodities which fill the requirements of Industry very extensively With their Head Office in Bombay and branches in Calcutta Madras Karachi and Colombo they have a very thorough and extensive sales organization which is divided into various Departments each in charge of officials specially trained for the work

are standardized Another important Agency allied to heat treatment is the Representation of Messrs Leeds & Northrup Company also of Philadelphia Leeds & Northrup Equipment consists of everything required for the measuring controlling and recording of temperatures Klingent Jointing and other special products of Richard Klinger Ltd Sidcup have been marketed by the firm for a number of years Klinger products are in a class by themselves and a standard by which comparisons are drawn

The firm have not been far behind the industrial advancement in India and they themselves have been producing Waterproof Paper Wire Brushes of various descriptions and Heat Treatment products amongst other lines made by them

Specialised Lubrication is also one of the main lines on which the house of Messrs Hardcastle Waud & Co Ltd has been built up Acheson s Colloidal Graphite being one of the main products in this field The business has been built up and controlled by Mr C W H P Waud and Mr C H Hardcastle Joint Managing Directors and has grown from strength to strength

D C M PRODUCTS (1937) LTD, CALCUTTA

This is an associated firm of Hardcastle Waud & Co Ltd and the specialities manufactured by them with indigenous materials are Solidified Axle Oil Wirol Rope Dressing Gearol Crease Hydrocas Hydraulic Lubricant D C M Belt Dressing D C M Emulsion—a highly concentrated Insecticide Cleaner Disinfectant and Deodorant Clearol Insecticide

HOLMES & CO., TARDEO, BOMBAY

This is a further associated firm of Hardcastle Waud & Co Ltd who manufacture High Grade Distempers and Camouflage Paints from purely indigenous materials under the registered trade mark of SUNFAST

THE HINDUSTAN · BICYCLE MANUFACTURING & INDUSTRIAL CORPORATION, LTD.

P O Phulwarisharif

PATNA

RAI BAHADUR SYAMNANDAN SAHAYA, (Bihar) M L C

Chairman and Managing Director

THE Hindustan Bicycle Manufacturing & Industrial Corporation Limited was registered on the 26th May 1939 The share subscription was placed on the 16th December 1939 and was closed on the 6th January 1940 when it was over subscribed The authorised capital of the Company is Rs 25 00 000 and the Paid up capital is Rs 12 50 000 but the Directors have already spent Rs 3 00 000 more as the price of the materials had gone up due to the outbreak of war

Sir Syed Sultan Ahmad the Law Member of the Viceroy's Executive Council was the Chairman of this Corporation Rai Bahadur Syamnandan Sahaya, M L C Bihar is the Managing Director and now the Chairman too Under the able guidance and full support of the Managing Director this Corporation is progressing very favourably The Company has been very fortunate in getting Rai Bahadur Syamnandan Sahaya as its Managing Director and through his untiring efforts the factory has started production and the bicycles of this Company are being sold throughout the length and breadth of India

The Cycles of this factory have received expert approval and due to attractive price beauty and durability have gained popularity very quickly Messrs Sales Organization Ltd, Calcutta, are the Agents for Calcutta and Orissa and Messrs Industrial Stores & Agencies of Muzafferpur are the Sole Distributors for Bihar

Mr G H Shirazi is the Director in charge, and Mr S Reza Haider B A. (Alig), is the Secretary and Mr L. P Molner is the chief

HOLKAR STATE

The Holkar State the largest and one of the most progressive States in Central India offers excellent opportunities to the capitalist desiring to invest in industries The Government is following a policy of active assistance to industries the beneficial effects of which have already begun to be felt

Textile Industry

Beginning with one mill in 1866 the textile industry of Indore now consists of 7 large spinning and weaving mills with 6 200 looms and about 2 lakhs spindles and produces about 200 million yards per year which is about 5 per cent of the all India production

Sugar Factory

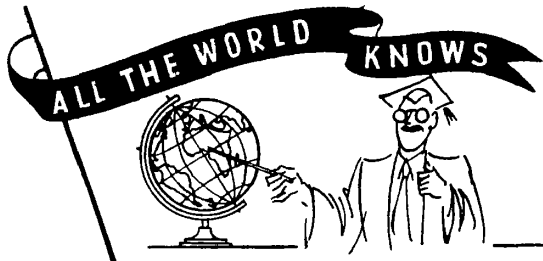
A sugar factory capable of crushing about 400 tons of cane a day is expected to start work shortly at Mehidpur The factory is expected to result in an increase in the acreage under a paying cash crop like cane Permission has also been given to utilise the molasses from the factory for the manufacture of power alcohol

Slate Factory

The extensive deposits of slate in the State are being exploited and at present about 2 500 school slates per day are being manufactured at Piplia. A slate factory capable of producing about 10 000 school slates per day will shortly be erected

Mineral Resources

A Geological Department was established in 1939 with a qualified Geologist who is engaged in carrying out a mineral survey of the State Prospecting licenses have already been issued for iron-ore and for barytes A pottery works for the manufacture of firebricks and clay ware products is being organised in Piplia A valuable mineral found in a very pure form in various parts of the State is limestone which promises to be of use in chemical industries especially the manufacture of bleaching powder



Other known minerals in the State are manganese copper and ochres

Forest Resources

The 2 000 square miles of forests in the State contain valuable timber and other produce An economic forest survey undertaken last year is almost completed The abundant production of grasses of a fairly high cellulose content and of water and lime in the neighbourhood makes Barwaha an ideal place for starting a paper and cardboard factory

Other possible industries are the cigarette industry the starch industry the artificial silk industry etc

Government assistance to industries mainly takes the form of a monopoly for a long period, light taxation free supply of water lease of land at nominal rents etc

Success in Railways The Company has rendered pioneer service to the Indian State and private Railways in composing a new Phosphor Bronze for locomotive axle bearings under its proprietory name IM PROVED PHOSPHOR BRONZE This metal has been under trial for three years in one of the Indian Railways and after passing through the most severe tests unique results have been obtained The mileage obtained from this IMPROVED PHOSPHOR BRONZE bearings is about 72 000 miles which figure has never been reached before This success of IMPROVED PHOSPHOR BRONZE has prompted many Indian Railways to adopt this metal for their use

The Works are situated in Sion a suburb of Bombay and the Registered Office of the Company is in Shale Building Bank Street Fort Bombay

The labour is exclusively Indian

The Indian Radio & Cable Communications Co., Ltd.

RADIO HOUSE, APOLLO BUNDER, BOMBAY

The establishment of an Indian Radio Telegraph Company with a Rupee Capital controlled by an essentially Indian Board of Directors in the year 1923, was an event of historic importance The Company was registered as the Indian Radio Telegraph Co Ltd. on the 11th October 1923 and commenced business on 17th January 1924 The inauguration of the Beam Telegraph Service took place at the Central Telegraph Office Bombay on the 23rd July 1927 when H E The Viceroy Lord Irwin sent the following message to His Majesty King George V —

> Before a new Service is opened which will render possible for the first time reciprocal communication by Wireless between India and the United Kingdom I send to Your Majesty a message of respectful greeting on behalf of India This service will not only be of practical assistance in bringing more closely together the British and Indian peoples but it is an expression of the closeness of the ties which unite them in loyalty to Your Majesty s person

His Majesty the King Emperor s gracious reply was as follows —

> I thank Your Excellency for the loyal greetings which you have sent me on behalf of India to mark the inauguration of reciprocal Wireless communication between India and this country I am deeply sensible of the feelings of loyalty which unite my Indian and my British peoples and I am confident that the improvement of communications between the two countries which this new service will achieve cannot fail to bring them still closer together to the advantage of both

The inauguration of the Beam Wireless Service thus marked a new era in India s external communications The popularity of the new service led to further developments and the Beam and Cable

Services in India were amalgamated with effect from 1st July 1932 when the Indian Company took over the management of Cables and assumed its present name as The Indian Radio and Cable Communications Co, Ltd In association with Cable & Wireless Ltd the Indian Company thus established direct communication with all parts of the world The I R.C —Imperial route indicates India s telegraphic connection with the Empire and the world Then followed the inauguration of the Japan Beam Service on 11th January 1933 and the Wireless Telephone Service with the United Kingdom and most countries of the world on 1st May 1933

Telegraph Messages of different categories are accepted at all Government Telegraph Offices and transmitted by this Company Special mention must be made of the facility afforded to residents in the British Empire for sending cheap rate social messages called G L T For the benefit of His Majesty s Forces and their relations a new category has been introduced known as E F M Details regarding above may be had from the General Traffic Manager of the Company Central Telegraph Office Bombay

The Company holds a perpetual License for India & Burma from the Marconi s Wireless Telegraph Co Ltd London for all their Patents & Patent Rights and has supplied the necessary Wireless Equipments for the construction of the majority of the Broadcasting Stations in India A large number of Wireless installations for point to-point communication commercial receivers Aircraft and Aerodrome Wireless Equipments etc have also been supplied by this Company Marconiphone Broadcast Receivers which have now become a necessary part of every household owe their popularity to the vigorous efforts of the I R C C The products of Companies associated with Marconi s Wireless Telegraph Co Ltd such as R C A Manufacturing Co of Camden (U S A) and Amalgamated Wireless Australasia Ltd of Sydney (Australia) are marketed by this Company

THE INDUSTRIAL & AGRICULTURAL ENGINEERING CO.

ELECTRICAL, MECHANICAL & TEXTILE ENGINEERS, 43, FORBES STREET, FORT, BOMBAY

WHAT business integrity perseverance and expert knowledge in spite of initial lack of finance can do is amply portrayed in the progress year after year of the firm of the Industrial & Agricultural Engineering Co popularly now known as I A E C

Started in the year 1929 in a small single room Mr R D Char, Proprietor Engineer Clerk and Despatch Boy has built up to-day a modern organisation employing several Indian Engineering Graduates with associated offices at Madras Bangalore and Hyderabad (Deccan)

The firm specialises among other Engineering lines in Ventilation and Humidification of Textile Mills and have to their credit several Mills equipped with their Plants all over India

The well known Continental Electrical Manufacturers Messrs Ganz Electric Co Ltd Budapest were represented by them before this War Thousands of Electrical Equipment have been supplied and installed in various industries

The Textile Machinery Department was organised in the year 1932 by Mr D Ramanna L T M The increased activity of this Department necessitated the formation of a separate organisation—The Associated Textile Engineers

The Firm s policy has always been to co-operate with sound Indian Manufacturers The sale and popularity of the MYSORE INSULATORS MYSORE LAMPS and TRAVANCORE CHINA CLAY are due to the untiring enthusiasm and business foresight of the firm

JAIPUR STATE

AMONG the States in Rajputana and Central India Jaipur holds a prominent place for its Arts Industries and Commerce The Ruling Chiefs have always given adequate facilities to the artisans and financiers and as a result the State ranks first for the variety and excellence of its art productions

Jaipur is noted for the abundance of raw materials necessary for the starting of many large scale industries—Cotton Wool Oilseeds Sugar Cane and also a host of important minerals necessary for the establishment of many mineral and chemical industries

Applications from the famous multi millionaire merchant princes of Sheikhawati (Jaipur) for permission to start within the State many large scale industries have been received and the Director of Industries and Commerce has successfully negotiated and completed proposals for the establishment of a Cotton Spinning and Weaving Mill a Woollen Spinning and Weaving Mill a Woollen Press a Hosiery Mill and a Sugar Mill These proposals are at present receiving the favourable consideration of His Highness s Government

The Department of Industries is negotiating at present for a Glass Factory a Ceramic Factory an Oil Mill a Paint and Varnish Factory and for several chemical industries which can be successfully established within the State

His Highness the Maharaja Sahib Bahadur evinces keen personal interest in the development of new industries and his popular Prime Minister, Raja Gyan Nath C I E has laid down a liberal policy of granting assistance and concessions for encouraging new industries

The claims of labour have also not been ignored as the State fully realises that Capital and Labour both play important roles in industrial development Consequently to safeguard the interest of the Working Classes the State Government has enacted the Factories Act

Any narrative of the Jaipur Industries would be incomplete if it did not mention the most laudable work done in connection with the War effort by its private citizens The State has given generous help in Men and Money and the citizens have contributed their quota in Materials Supply Department orders worth several lakhs of rupees have been executed for dehydrated potatoes namdas felts and rolling mill stock.

Mention must be made of the Jaipur State Cottage Industries Institute promoted by a Jaipur Seth under the active guidance of the Director of Industries and Commerce with a capital of over a lakh of rupees for the purpose of manufacturing Army Blankets Namdas, Felts Over-Coat Cloth Brass Buckles Wooden articles like tent mallets tent heads etc., and generally to co-ordinate and put into practice the resolutions of the Small Scale Industries Conference held at Delhi recently

THE HOUSE OF J. K.

Kamla Tower, CAWNPORE.

The late Lala Kamlapat Singhania

←

★

Lala Padampat Singhania.

→

Among the leading business houses of this country which have paved the way for India s economic regeneration by making a notable contribution to the development and expansion of national industry on modern lines the HOUSE OF J K occupies a paramount place Now the largest industrial combine in the north of India the seed of the great J K Industries popularly known as the J K (Jugglal Kamlapat) Group of Mills was sown in Cawnpore about the middle of the 19th century The seed germinated into a healthy plant which being nursed and nurtured with fostering care soon began to spread its branches in all directions until the present day when the mighty structure of this great tree towers in the country s industrial firmament

As stimulating a tale as any in the annals of India s commerce and industry is the story of the meteoric rise of the HOUSE OF J K —*pride of Cawnpore and a monument to the incomparable commercial* genius of the late Lala Kamlapat Singhania Previdence had endowed him with the highest qualities of industrial planning enterprise and progressive efficiency and he realised his dreams by sagacious fore sight vision perseverence and character The combination of these rare gifts enabled him to found a chain of industrial concerns whose name is a household word throughout the length and breadth of this country and whose fame has crossed the country s borders and spread across the seas The result is that to-day the name of Lala Kamlapat Singhania is more than a mere memory—something more concrete and stable than an inspiring legend

The name of Cawnpore is permanently linked with the HOUSE OF J K. There is many an institution in the city which echoes their loving regard for all just and noble causes As time goes on the HOUSE OF J K. is bound to play an ever increasing part in the evolutionary processes relative to India s commerce and industry

J K. Industries are in every sense the fationalists dream come true for the capital is Indian the management is Indian, the labour is Indian and all the raw products consumed in the various mills are Indian

Among themselves J K Industries are now producing a number of new articles while the range and output of the existing industries have considerably expanded Every effort is made to replace imports wherever possible by indigenous production in order to attain the largest measure of self-sufficiency in the matter of national requirements Thus they are doing everything to usher in an era of industrial emancipation and advancement

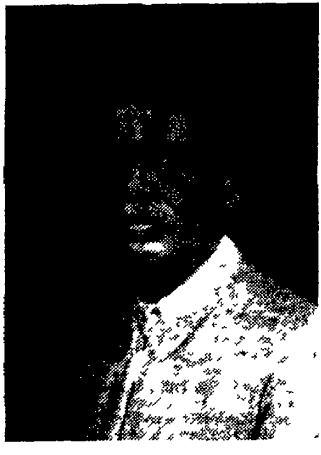
THE JUPITER GENERAL INSURANCE COMPANY LTD.

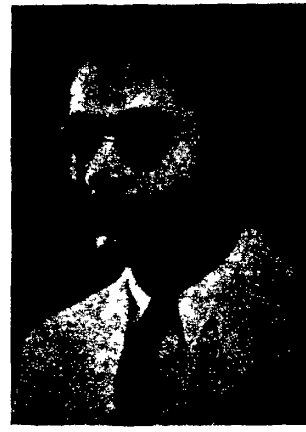


(INCORPORATED IN INDIA)

Head Office **Ewart House Tamarind Lane, Fort Bombay**

Freedom for India is coming sooner than most of us imagine Indian business men have a great part to play in a free India as builders of the Nation along constructive lines having service of the poor as their ideal THE JUPITER GENERAL INSURANCE COMPANY will develop into a mighty concern and play a great role in the economy of Free India

MR S SATYAMURTHI
(18-11 1941)



It was in the year 1919 that the late Seth Lalji Naranji an outstanding personality and brilliant figure in the commercial and business world conceived the idea of starting an Indian Insurance Company and the JUPITER GENERAL owes its existence to him as its founder The late SETH LALJI NARANJI S services in the cause of Indian Business and Industry in general and Indian Insurance in particular met with wide public recognition His name is closely associated with several well-known institutions concerns, undertakings and activities The Indian Merchants Chamber named their building as Lalji Naranji Memorial Indian Merchants Chamber Building thereby acknowledging the late Seth Lalji Naranji s services in the interest of Indian Commerce

Late Seth Lalji Naranji (Founder)

The Jupiter General has an authorised capital of Rs 2,00 00 000 out of which Rs 1,50 00,000 is issued and subscribed, the paid up capital being Rs 23,74 800

At first the Company transacted Fire Accident and Marine business and its early struggles were similar to the experience of all Indian undertakings started in those times Numerous difficulties were encountered and surmounted In spite of the various obstacles the Company progressed steadily and its continued growth is evidence of the great tact business acumen, capacity and untiring energy of the Founder and his co Directors

Seth Dharamsey Mulraj Khatau
(Chairman)

In 1928, the Company started its life business for the first time After facing the vicissitudes usual in the case of infant Life Insurance Companies JUPITER S Life Department by the end of 1940 had become strong and had found a place for itself amongst leading Indian Life Offices The steps taken by the Directors to achieve this object were immensely successful and in the year 1941 the business written in the Life Department was remarkably enough, more than double the maximum of any of the previous years

To-day due primarily to the uniform and unstinted patronage of our countrymen, the Company has attained the proud position of being the second largest Composite Indian Office with Branches at Ahmedabad Alleppey Calcutta Delhi Indore Jalgaon Karachi Lahore and Madras with a net work of Agencies in India Ceylon and Africa. In London the Company s representatives are Messrs B W Noble Ltd

Security and service have been the guiding policy of the Company since its inception and the present Directorate take the greatest care to see that the interests of the Shareholders and Policyholders are safe and also keep a very watchful eye on the numerous investments of the Company

As at 31st December 1941 the gross annual premium income of the Company in all Departments was about Rs 30 00 000 while the total assets of the Company on that date was about Rs 80 00 000

JODHPUR STATE

AN AGRI-PASTORAL COUNTRY NOW GETTING INDUSTRIALISED

JODHPUR (*Marwar*) State in Rajputana is the home of the Marwari trader the business genius of the country Lying mostly in the Thar the State stretches from the Aravalli in the East to the Rann of Cutch in the West and is therefore primarily agri pastoral

Jodhpur has been an exporter of raw materials About 8,000 maunds of wool 65 000 maunds of cotton 13 000 maunds of hides and skins 66 000 maunds of bones and 16 000 maunds of oil seeds are annually available for export The State is also quite rich in mines though none of the minerals is such on which large scale industries could be developed Mines of Wolfram Bentonite Gypsum Saltpetre Mica Beryl and Falspar to mention just a few occur in some parts of the State Jodhpur (*Makrana*) marble was used to build the Taj Mahal of the Great Mughals and the Victoria Memorial of our own times Fullers earth lime lime stone and the pink building stone is available in large quantities

In a State where about eighty five per cent of the population is engaged in Agriculture and cattle rearing and has most of its time unoccupied in single cropped areas cottage industries naturally find a good scope The products consist of hand loom blankets woollen namdas and coarse cloth In some parts of the State small scale industries such as making of metal water bottles cooking utensils iron and brass cutlery saddlery and camel corps equipment have flourished well Handicrafts like ivory-ware lacquer-ware embroidered shoes printed and Jodhpur process coloured silks and calico printing form another group of industries Of the jail factory products carpets rugs and curtain hangings find a market even outside the State

A big cotton weaving and spinning mill has recently been completed at Pali at a cost of about Rs 40 00 000 The State has about fifty cotton pressing and ginning factories and about a dozen oil mills

In its war effort the State Economic Development Department has undertaken to prepare 16 000 Army Blankets At the Railway workshops twenty five pounder shells go through several early processes and the number now being turned out is four times as great as was promised or expected Crates for carrying shells wheel barrows and pick-axe heads are being turned out in very large numbers

The State has an Economic Development Officer and an Industrial Planning Officer The Government is engaged in drawing up a practical scheme for the development of rural industries After careful consideration it has chosen as a compromise between large scale industries and the revival of cottage industries, to establish an equilibrium between Man and Machine and to remove unemployment and poverty by providing new and profitable occupations for its people

THE HOUSE ★ ★ ★ *of* KALYANMAL

KALYAN BHAWAN, INDORE

Rajya Bhushan Rai Bahadur Shrimant Seth Hiralal Kalyanmalji

RAJYA Bhushan Rai Bahadur Shrimant Seth Hiralal Kalyanmalji succeeded to the leading firm of Bankers and Millowners of Rai Bahadur Danvir Tilockchand Kalyanmal of Indore Bombay and Ujjain Born on 12th June 1898 at Ajmer he was educated in local institutions and by private tutors

Mr L R W Forrest

THE Firm of Messrs Killick, Nixon & Co Bombay was founded on 24th November 1857 by Messrs. Charles Killick and Robert Preston Nixon who arrived in Bombay the previous day by P & O s s. Pottinger " having, according to the Passenger list, embarked at Alexandria

The Firm commenced trading as General Merchants and for the first 18 years or so the business was mainly confined to the import of Manchester piece goods and the export of cotton and seeds In 1875 however, they took over the business of the well known Firm of Messrs Edward Lawrence & Co , who had commenced business in Bombay in the "fifties " and who were substantially interested in the export trade as well as in Shipping, Coal and Insurance

THE FIRM OF KILLICK,

In 1876, the late Mr L R W Forrest became a Partner in Messrs Killick Nixon & Co and it was largely due to his initiative that the Firm from the year 1896 decided to strike out on entirely new lines of business, in the direction of floating and managing various companies, beginning with Railway Companies and the Kohinoor Mills Other senior partners of the Firm in Bombay have been the late Sir Henry E E Procter, C B.E. (Knighted in 1911), Sir Thomas W Birkett (Knighted in 1918), the late Mr H P Hebbleth waite, who died in November 1941, Mr F C Annesley, who retired from the Firm in 1930 and Mr E C Read, M C The present Partners in Bombay are Messrs R C Lowndes, F F Stileman, R C Giles, D R C Hartley, C B.E., D S O and V F Noel Paton.

The Firm has a small branch at Mormugao in Portuguese India, and used to maintain a branch in Calcutta The latter was taken over by Messrs Burd & Co in 1926, the Firm at the same time taking over Messrs Burd & Co s branch in Bombay The Firms Agents in London are Messrs Nixon, Forrest & Co , of 29, Great St Helens, E C 3

IMPORT AND AGENCY

Although the original character of the Firm's business has changed greatly a considerable business is still carried on in Snowcrete and Colorcrete cements Masonite products, Remington Air Conditioning Machines, Boase s

canvas and several other well known Agency Lines They further represent Messrs Bird & Co as already stated, and Messrs Heilgers & Co of Calcutta in Bombay and are Selling Agents for Silvertown Oils also for the Indian Paper Sales Association, an organisation for the sale in Bombay Presidency and Kathiawar of the products of the Titaghur, India Paper Pulp, Bengal and the Deccan Paper Mills

INSURANCE

In this line, the Firm represents the Yorkshire, British & Foreign Marine and Union Insurance Society of Canton Insurance Companies

Sir Henry E E Procter C B E

NIXON & COMPANY

SHIPPING AND COAL

In addition to the Shipping, Chartering and Coal business taken over from Messrs. Edward Lawrence & Co in 1875, previously mentioned, the Firm in 1898 amalgamated Sir Edward Bates & Sons' Bombay Agency with their own business By virtue of this amalgamation, the Firm has from that date been Agents for Ellerman's City & Hall Lines in Bombay The Firm are also Agents in Bombay for the Bibby Line and Harrison Line of Steamers, and the Elder Dempster Steamships Co Chartering is done through Messrs. F W Heilgers & Co, and Coal through Messrs. Mitchell Cotts & Co for Natal coal, and through other Agencies for Indian coal.

RAILWAY COMPANIES

The following Railway Companies have been floated by the Firm the Ahmedabad Prantej Railway Co Ltd. in 1896, the Tapti Valley Railway Co Ltd., also in 1896, the Ahmedabad Dholka Railway Co Ltd in 1900, the Amritsar Patti Railway Co Ltd., in 1905, the Central Provinces Railway Co Ltd., in 1910, the Guzerat Railways Co Ltd., in 1911, the Mandra Bhon Railways Co, Ltd, in 1913, the Sialkot Narowal Railway Co Ltd. in 1914. Jointly with Messrs. Gillanders, Arbuthnot & Co of Calcutta the Sara Sirajganj Railway Co. Ltd was floated in 1913, and the Mymensingh Bhairab Bazar Railways Co. Ltd. in 1914 In accordance with the Government of

India's policy of taking over the contracts of certain railways when they expire, those of the Ahmedabad Dholka Railway Co., Ltd. The Amritsar Patti Railway Co Ltd. and the Tapti Valley Railway Co Ltd have already been taken over, the last as from 31st March 1942.

COTTON MILLS

As previously stated, the Kohinoor Mills Co Ltd. was originally floated in 1896 with an initial installation of 38,788 spindles. It now incorporates the Naigaum and Courtauld's Mills in its organisation and with 94 368 spindles and 1,834 looms it is one of the leading mills in India.

MANGANESE ORE

In 1904 the Firm obtained control of valuable Manganese ore deposits in the Central Provinces and the Central India Mining Co Ltd. was floated and, though it experienced a prosperous existence for many years, it was unable to survive the serious slump in Manganese ore in 1929 In 1909 the Firm became interested in the large Manganese ore deposits of the Shivrajpur Syndicate Ltd in the Panch Mahals, and later took over the Managing Agency of that Company In 1938 the Firm registered the Kanara Mining Co , Ltd as a Private Company to take over from a previous Syndicate and operate various deposits of Manganese ore in the Kanara District.

COAL MINING

In 1909 the Hingir Rampur Coal Co , Ltd. was promoted, to take over coal deposits in Orissa.

ELECTRICITY

In the year 1913 the Ahmedabad Electricity Co Ltd. was floated, originally with a capital of only Rs 4½ lakhs The Issued and Subscribed Capital of this Company is now Rs 1 Crore In 1920, the Surat Electricity Co Ltd was promoted, and in 1929, the Firm floated the Bombay Suburban Electric

Control Room Ahmedabad

Bundi Cement Factory

Supply Ltd., for the purpose of distributing throughout the suburbs of Bombay and the Island of Salsette, energy purchased in bulk from the Tata Hydro Electric Companies.

CEMENT

The Bundi Portland Cement Co Ltd was also formed in 1913 at Lakheri, in Bundi State where the well known "B B B cement was first brought into production The Punjab Portland Cement Co , Ltd was floated in 1920 In 1925, the Firm was largely instrumental in forming the Indian Cement Manufacturers Association, the fore-runner of the Cement Marketing Company of India, which in 1930 was formed to take its place. This led to the idea of the amalgamation of practically all the Cement Companies in India, which in 1936 were merged into the Associated Cement Companies Ltd. The amalgamation of 11 out of 12 of the Cement Companies then operating in India into this Company (which has an issued and Subscribed Capital of over Rs.7 crores) was undertaken by the merging interests and no small portion of the heavy burden of co-ordinating this amalgamation of so many different Companies, owing to the sudden death of Mr F E. Dinshaw, the originator of this Merger, fell upon the shoulders of Mr E. C Reid, the then Senior Partner of the Firm in India. The Management of the new Company was entrusted to Cement Agencies Ltd., comprising the joint management of Messrs. Killick Nixon & Co., F.E Dinshaw Ltd., Tata Sons Ltd , and Mulraj Khatau & Sons, Ltd.

LEVER BROTHERS (INDIA) LIMITED,

SOAP MANUFACTURERS.

When William Hesketh Lever retired from the wholesale grocery trade and in 188 started to manufacture soap he launched a sequence of events which today after nearly 6 years, are still powerful factors in world commerce It is indeed probable that Mr Lever had no unduly restricted ideas of the eventual scope of the activities arising from the original foundation of Lever Brothers and the manufacture of that great constellation of soaps of which Sunlight Soap was the first and is still the leader

EARLY BEGINNINGS IN INDIA

Early in the Company s history contact was made with this market and Lever products manufactured in the United Kingdom were sold in India through a system of area agents until 1934. In this year Lever Brothers (India) Limited was founded and manufacturing was started in Calcutta and, later in Bombay At these factories the world famous Lever Brands are manufactured as well as brands which for 100 years had been sold in the Indian market by Gossages, an old established Company which is now associated with the firm of Lever The position today is that Lever Brothers (India) Limited market Indian made soaps and only rely on importations for trivial quantities of highly specialized products.

An associated company United Traders Limited, is occupied in marketing toilet soaps and preparations, and considerable headway is being made towards manufacturing these in this country One of the leading brands handled by this Company is Pears Soap which it is reputed, has sold in India since 1786

SERVICE—THE KEY TO SUCCESS

Lever laid down as a vital principle of the organizations which eventually came under his control, that no commercial or industrial concern could achieve or had any right to expect, permanent prosperity-except on the basis of Service Service interpreted as Service to the public, is the key to whatever success has been enjoyed by the Lever Company in the past and is the guiding principle in the policy of the Indian Company today

IDEAL LABOUR CONDITIONS

Nevertheless, good conditions of labour and the workers health and welfare have always been a requirement which all the companies connected with the name of Lever have been expected to fulfil as a pre-requisite of Service to the community at large In pursuance of

Modern, well-planned, perfectly situated—one of Lever s Soap factories in India. All of the famous Lever Soap lines are made in this country

this policy the factories at Bombay and Calcutta are practical testimony These factories are designed to utilise human effort in the most productive way with the minimum of strain upon the individual. They are light and airy are equipped with modern rest and refreshment rooms and are generously set in hygienic and attractive surroundings Well equipped laboratories insist on a high standard of excellence in the products manufactured, and the processes are based on world wide experience

By these means coupled with wide scale marketing and mass production, it is possible to supply the Indian public with goods of extremely high quality and at prices which are within the reach of all except the very poorest of India s 40 crores

A Sunlight Soap Cinema Van Fully equipped with its own power plant standard talkie projector slide projector and gramophone amplifier The van is capable of giving a complete cinema performance to 2—3 000 people at a time

CONTRIBUTIONS TO WAR EFFORT

War has produced a heavy crop of difficulties but, until the end of two years after war started, prices had, generally been maintained at pre war levels notwithstanding the higher cost of production a part of which was due to the greater burden of increased wages.

The Lever Company in India is a considerable source of the Government s supplies of glycerine The Company also provides the Forces with large quantities of soap

FAMOUS NAMES

The marketing of the Company s products covers the brands which are household words in many countries—Sunlight, Lifebuoy Lux Toilet Soap, Lux and Vim—in addition to the well known Gossage soaps, and is under the direction of Mr W G J Shaw who has been responsible for its fortunes since the formation of the Company eight years ago In its work the Company has employed every practicable device calculated both to improve the public s standards of cleanliness and to sell the products of the Company

WIDE-SPREAD PROPAGANDA

Noticeable developments in the field of marketing have been the creation of a fleet of propaganda vehicles, which by means of loudspeakers and illustrated lectures, are designed to infiltrate health and cleanliness ideas amongst strata of the public largely out of reach of advertising of the ordinary kind. A more specialised departure on these lines has been a pioneer fleet of mobile cinema units each equipped for full-sized talking pictures. These units carry entertainment, educational and commercial films, including a number of Government interest films relating to the war effort. The future of this activity during the war is doubtful, but when peace returns new developments are scheduled. Incidently the first sky writing in India was in support of Sunlight Soap and Pears.

INDIAN EXECUTIVES

Necessarily Lever Brothers (India) Ltd. was guided during its early development by men who had learnt the Company's methods in other parts of the world. Expansion of the executive staff, has, however been by the enthusiastic participation of young Indians of high qualifications who have been recruited and trained for executive responsibilities. Already nearly twenty of these have graduated into important executive positions and are members of the covenanted staff

KIRLOSKAR BROTHERS, LTD.,

Kirloskarwadi, District Satara, Western India.

THE name KIRLOSKAR is quite a household word You may have seen it stamped on machinery or discreetly enamelled upon steel furniture or splashed in a thousand and one advertising media all over India. Messrs Kirloskar Brothers Ltd are by far, the largest and most up-to-date manufacturers in India of iron and steel agricultural implements

What was once a desolate spot in Satara District is now the handsome township of Kirloskarvadi with its well laid roads its electric lighting and power its fine school hospital and gymnasium The remarkable development of Kirloskarvadi a model industrial settlement is largely due to the foresight and courage of one dynamic individual Mr Laxmanrao Kirloskar the founder of the whole enterprise and still at seventy its energetic managing director

Right from his school days Mr Kirloskar had a natural aptitude for things mechanical Starting as a teacher in draftsmanship through selling bicycles and windmills and acting as a building contractor, Mr Kirloskar came to found this great industrial enterprise Much material aid including the very site for the factory came from the Rajasaheb of Aundh State The little 32 acre kingdom, given by the ruler of the State was organised in such a way that every employee should share the fullest communal benefits of health education recreation and comfort

In the extensive grounds stand the various factory-departments, the machine shops, the foundry, the power house the pattern and design department, the furniture department the factory for power-looms the pump house, the stock sheds and the Company s printing press and administrative offices Chief among the manufactures are Agricultural Implements Power and Hand Pumps Steel Furniture, Power Looms, Dobbies and Crude Oil Engines

THE MYSORE KIRLOSKAR, LTD., HARIHAR

A new enterprise of Messrs Kirloskar Bros. Ltd is The Mysore Kirloskar Ltd It meets an urgent requirement of Indian manufacturers by supplying them a high grade of machine tools This Company has the active support of the Mysore Government. The Harihar plant, by providing the essential machine tools to the Indian manufacturer, is sure to contribute to the prosperity and progress of the whole nation

R. E. MODY & CO.
BOMBAY.

IN the year 1892 Mr Furdonjee Cursetjee Mody founded the firm of Messrs Furdonjee Cursetjee Mody & Sons

Mr F C Mody Founder

The name Mody is synonimous with the timber trade of India and Burma The Policy of the firm then as now was to strike out boldly for the expansion of the timber trade not only throughout the East but in the Western Hemisphere as well

The years which followed the last War were full of vicissitudes for the firm But under the able management and firm guidance of the late Mr R E Mody then head of the concern the firm emerged as one of the largest and best known timber business in the East A change of partnership in 1930 caused the name of the firm to be changed to R E Mody & Company

The firm at present enjoys the reputation of being one of the largest timber concerns in the East and supplies timbers of all kinds indigenous as well as foreign to the Government Departments Railways Steamship Companies Industrial Concerns Mills and Indian States throughout the length and breadth of India Indeed it is surprising that though the firm has no branches or Agents in any part of India its supplies extend from Srinagar (Kashmir) in the North to Bangalore in the South and Vizagapatam in the East

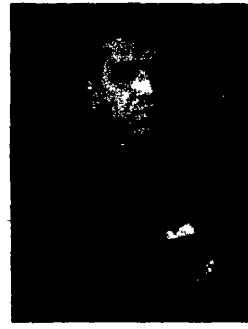
Mr R E Mody

The firm trades in almost all known commercial timbers of India and Burma Plywoods Hard Boards and finished Hard Boards suitable for panelling dado furniture etc

From the very commencement of the War the firm has been supplying Timber of all sorts to almost all the Defence Works such as for the manufacture of Army Trucks Ammunition Boxes Tent Poles Stretchers Trawlers and for other ships and for the Railways.

Manickavelu Limited,

BANGALORE.



THE house of Manickavelu Limited takes its name from its founder the late Mr V Manickavelu Mudaliar The story of the firm the story of its rise to prominence as an industrial house of note is the romance of a fourteen year old homeless but determined boy who from the humblest and the smallest beginnings shot up to celebrity as an industrial magnate Cast in the mould of a leader of men say with the Carnegie touch in him or that of a Jamshedji Tata Manickavelu Mudaliar pinned his faith to trade and industry and emerged out of the struggle as the owner of three of the largest Chrome Ore mines in the world

Youngest child of Mr V Gangadhara Mudaliar sent out into the wide world by an elder brother who could not understand him young Manickavelu started life as a trader in a small way selling sweets and pencils to school children in Bangalore With grim and unshakable determination he went his way graduating into bigger lines of business tea shoes groceries arrack oilman stores medical supplies and *so on* He went *through* the *whole* gamut and stepped out as an exporter of hides and skins to the United States running at the same time 14 tanneries An ill wind that blew across India brought disaster and the export business came toppling down with a crash Manickavelu undaunted and undefeated sold his all and took a job as Manager of the Broach Industrial Spinning & Weaving Mills in far away Gujerat on a salary of Rs 1 000 per month He made good saved hectically and won the goodwill of those whom he served He returned home with money saved and with an agency for piece-goods in his pocket and set himself up as a piece-goods man While at it he turned his attention and his business acumen to other fields and started the Mahalakshmi Woollen & Silk Mills Co Ltd and The Manickavelu Banking Corporation Limited Adventure was in his blood and he came out as the owner of Chrome and Manganese Mines

A man of iron grit a self made man Manickavelu never for a moment forgot his humble beginnings and was generous to a fault with his money In his case it was not will to-power but will to-serve The worker who served him was his partner and friend A genuine nationalist communalism and anything that smacked of separatism was anathema to Manickavelu As a glorious finishing touch to an active and useful career Manickavelu set his foot into a different field

V Manickavelu Mudaliar

V Sundaramurthy

of human activity and organised the Mysore State Congress He could lay claim to be the pioneer of a popular political movement in the State He suddenly passed away at the ripe age of 63 universally lamented

The house is now presided over by Mr V Sundaramurthy Manickavelu s only son Cradled in the hard school of business and industry by his father Sundaramurthy s sole aim is to justify the ways of his father to man Sundaramurthy dreams his industrial dreams with his heart set on a comprehensive industrialisation of India Believing as he does that a country s most dependable first line of defence is her industrial strength and believing that an Indo-British friendship on the basis of equality is the most secure basis for the prosperity of the Empire and world peace the war found Sundaramurthy making a gift of 2 000 tons of Chrome Ore for war and organising war funds and fetes In the second month of the war Sundaramurthy sent out an appeal to the Government of India and the Indian Industrialists to plan an all out industrial war effort for economic co-ordination on a national scale He exhorted the Government of India to make of the Eastern Group Conference something more than a dealer in supplies to make of it a planner of an arsenal of democracy in the East He followed it up with a book entitled India and the Greater War , throwing out a suggestion for a Congress of Indian Industrialists a live and alert economic council to guide industrialisation during the war and to prepare the blue-prints of an economic base for the India of the future It is his conviction that a new world cannot be built on the basis of old assumptions old prejudices and ante-dated economic theories

MUKAND IRON & STEEL

PIONEERS IN THE MANUFACTURE

Pouring molten metal from the electrical furnace

THE considerable demand in India for spring steel and tool steel is now met to some extent by the enterprise of Mukand Iron & Steel Works who a few years ago started a factory at Lahore This factory was fitted with the most modern type of electrical furnace together with a fully equipped laboratory for controlling the composition during manufacture and testing the finished materials

The demand for steel turned out by the Lahore factory from Railways the Indian Stores Department and engineering firms was so great that a plant similar to the one in Lahore was installed by the company in Bombay Here too the same high standards of manufacture are maintained with the result that Mukand s Tool Steel and Spring Steel have now become synonymous with outstanding excellence

The Tool Steel Spring Steel and other tested steels are manufactured by the firm under the expert supervision of an

WORKS LTD., Bombay & Lahore.

OF TOOL STEEL AND SPRING STEEL

Rolling iron bars in the Steel Rolling Mills

experienced metallurgist trained in one of the most famous firms in England Owing to the increasing demand for Mukand s quality steels the factories both at Lahore and Bombay have been considerably extended

Mukand s also make steel and iron castings hoops structural work rounds squares flats angles channels as well as hammers anvils vices etc

In addition to fulfilling the requirements of the public demand from the Army Indian Stores Department Municipalities and Railways is also met

Mukand Iron & Steel Works Ltd have an influential directorate the Chairman of the Board of Directors being Mr R D Birla and the Managing Director Mr Jeevanlal Motichand under whose able guidance the company is expanding daily and is establishing itself as one of the essential industries of India

THE HOUSE OF
Munjee Nathoobhoy & Co.,

Pioneers of Kerosene,

BOMBAY.

In 1874 India knew nothing of Kerosene or Petroleum The traditional lighting oil was sweet oil and burning fuel was wood The introduction of Kerosene is due to the enterprise of Mr Munjee Nathoobhoy the founder of the firm of that name

When the old Standard Oil Company wished to introduce Kerosene into India they met with considerable apathy from merchants in Bombay and elsewhere The late Mr Munjee realised and appreciated the tremendous future possibilities of Kerosene (called by some in those days as Oily-Water) and bought on his own account 100 000 cases which he gradually introduced into the Indian market and thus educated India to the use of Kerosene and also founded his fortune

In 1876 the Shell Transport Company wishing to extend its operations to India appointed Messrs W & A Graham & Co as their correspondents in India and for whom Messrs Munjee Nathoobhoy & Co became agents and through them began the long connection of the House of Munjees with the Burmah Shell

Later on when the Asiatic Petroleum Company wished to establish its own office in India Messrs Munjee Nathoobhoy & Co at the request of Grahams became their principal agents and gave the new Company considerable help in establishing and organising their field They not only controlled most of the Agencies but also acted as their Guaranteed Brokers

Mr Munjee died in 1901 leaving three sons Mr Cassamally (the present head of the firm) Mr Dostmahomed and Mr Karmally Upon Mr Dostmahomed's premature death in 1935 Mr Cassamally Munjee became its Sole Proprietor

With the expansion of Kerosene trade mechanisation of industry and transport during the Edwardian and the Great War periods the activities of the Asiatic Petroleum Company increased enormously Guaranteed brokerage was gradually eliminated and the firm of Messrs Munjee Nathoobhoy & Co co-operated in establishing independent agencies and gave the benefit of the change to their erstwhile employees Some of the successful agents of the present day owe their origin and their fortunes to the firm of Messrs. Munjee Nathoobhoy & Co The firm thereafter was appointed advisory agents to A.P.C. in addition to their other activities such as Sellers Shippers and Custodians of

their goods They represent Messrs Burmah Shell for all products in Kathiawar Bombay Presidency and Central India

Messrs Munjee Nathoobhoy & Co (Kathiawar), Ltd

In 1939 the firm s activities in Kathiawar were handed over to a limited liability company having the firm s name *viz* Messrs Munjee Nathoobhoy & Co (Kathiawar) Ltd Their annual turnover runs into some millions of rupees

Plastex Products Company

Apart from oil the firm under the initiative of its head has expanded its activities to various fields of commercial and industrial enterprise The firm through its allied concern Messrs Plastex Products Company is manufacturing a Rubber Cement known as Plastex It is used mainly for ship s decking and general flooring purposes Messrs Plastex Products Co are the only concern manufacturing Rubber Cement in India Amongst its many other uses are water proofing materials and making anti-corrosive paints

Other Enterprises

They also run a shipyard for building country craft and run their ships between the Indian Coastal Ports They have under consideration the formation of a big Bank to help Indian agriculture and industry They are also Insurance Agents of well established Insurance Companies They are also Printers and Stationers owning the Berkeley Printing Press and the Berkeley Stationery Mart

Their Organisation

Their selling and office organization are very efficient A visit to the Bombay Office run entirely by Indian staff would impress one as a first rate European firm The present head of the firm (and its allied concerns such as Messrs Munjee Nathoobhoy & Co (Kathiawar) Ltd the Country Craft Shipping Co Messrs Plastex Products Co) is Mr Cassamally Munjee He is ably assisted by his brother sons and nephews all of whom are trained in England and a capable staff

Mr Cassamally Munjee is a Deputy of His Highness The Aga Khan and a leader of the Khoja Ismaili community to which he belongs He is a liberal contributor to educational institutions and is well known and respected by the mercantile community and the Rulers in whose domains he trades He is very modest but has a firmness of purpose and the word Izzat is written all over him

Messrs Munjee Nathoobhoy & Co are old associates of Messrs Burmah Shell of over 50 years standing having grown from strength to strength. They furnish to others an example of profitable trading with a first rate organization The good old days may be no more but all is well in the present and the future is bright for the House of Munjees

THE MURREE BREWERY

THE Murree Brewery Company Limited as its name implies was started at Ghoragali in the Murree Hills thirty-two miles from the railway terminus of Rawalpindi in the year 1860 Later on having attained a very great reputation the Company s activities were expanded and Branch Breweries were erected in Quetta in 1888 and Rawalpindi in 1890 Rawalpindi being the largest military station in India proved an excellent choice for the expansion and prosperity of the Company s business

View of Distillery Building

LATEST BREWING PLANT

Owing to high temperatures however during the summer months it was only possible to brew in Rawalpindi from the month of October to March and for the remaining period of the year the Rawalpindi Brewery was dependent on its outturn from the Brewery at Ghoragali This obstacle was overcome by the adoption of the latest and most scientific devices which included the installation of a complete Nathan Brewing Plant The principal problem of any fermenting process is the production of a clean and suitable beer This problem in the Nathan system is solved The whole system is so scientifically controlled from the refrigeration plant fermentation plant pure yeast plant and collection of CO_2 and is so perfect that it distinguishes itself fundamentally from brewing plants of the old style The installation of this plant has proved an unqualified success and removed the necessity of having beer transported from the Ghoragali Branch, and this Brewery was consequently closed in the year 1928

View of Brewery Tun Room

CO., LTD., RAWALPINDI

IDEAL CONDITIONS

The Brewery is located in one of the most picturesque spots of Rawalpindi The Brewery owns a very large estate and has ample room for any expansion

A plentiful supply of water is obtained from the Company s own wells and has been found to be most suitable for the brewing of beer and for all other manufacturing purposes

The Company have their own Railway siding which renders their position most accessible and facilitates the despatch of their many products

MALT WHISKY, TOO!

The Company have recently erected one of the most modern and up-to-date French Distillation Plants and supply spirits of all descriptions For many years the Company have produced a very excellent Malt Whisky which is manufactured in the true Scottish style and distilled in Pot Stills used only for this purpose The French Still is capable of producing Alcohols of the very purest degree possible and has an outturn of 900 gallons per day The Malt Whisky produced by the Company is considered to be as good as that imported from Home

CHOICE INGREDIENTS

The materials used during the course of manufacture are the best obtainable only the best barley and hops being used for the production of the Beer The barley is obtained from the districts of Rewari and Ferozepur, which are well known for their high standard of quality Samples of these barleys were recently examined by the Institute of Brewing and were pronounced to be equal to some of the best barley grown at Home All hops however have to be imported from Europe and the British Isles only the best Kent and Californian hops being used The molasses used for the production of the spirit is obtained from the large sugar growing districts in the United Provinces

SOME OF THE POPULAR BRANDS

BEERS

- Gold Ribbon Lager
- Light I ion Pilsener
- East India Pale Ale (M B)

SPIRITS

- GYMKHANA Malt Whisky
- DEW OF HIMALAYAS Malt Whisky
- XXX Rum

MYSORE STATE INDUSTRIES

MYSORE represents the focal point in State industrialisation in India The State's wonderful natural resources are being zealously harnessed to provide for Man s multitudinous needs in civilised life Now India s teeming millions can "wash themselves with Mysore Soap, dry themselves with Mysore towels, clothe themselves in Mysore Silks, drink Mysore coffee with Mysore sugar, build their homes with Mysore cement, Mysore timber and Mysore steel, furnish their homes with Mysore furniture, write their letters on Mysore paper and cure their ailments with Mysore medicines"

Government Sandalwood Oil Factory.

The Government Sandalwood Oil Factory produces oil which conforms to the different pharmacopœias of the world Modern methods of distillation under strict scientific control are adopted at the Factory

Government Soap Factory

The Government Soap Factory Bangalore, is one of the pioneer Soap Factories in India It was started in 1918 and has since then made continued and steady progress The factory manufactures not only household soaps but also high class toilet soaps and certain cosmetics like pomades creams tooth paste etc. The factory also manufactures certain other household necessaries such as 'Iodocure boot polishes and quick fix The products of the factory enjoy an extensive sale in the home market and are in demand even in foreign markets

Government Electric Factory

The Government Electric Factory is manufacturing amongst other things Electrical Transformers Scientific Instruments bakelite articles black bolts and nuts rivets galvanized hardware for porcelain fittings besides rendering useful service to other factories in the State as well as to the Railway Department by supplying spare parts for their plant

Government Porcelain Factory

This factory is the only concern in South India which manufactures both High Tension and Low Tension Insulators which are supplied for defence purposes as well as to Government Departments and Corporations in India An electrical tunnel kiln the first of its kind in Asia has been newly installed The factory is manufacturing Crockery articles and also wall tiles Experiments are being conducted in the manufacture of Acid Resistant Ware and Chemical Porcelain

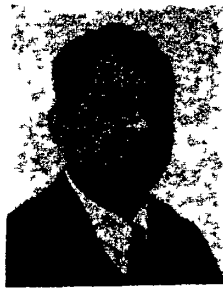
Government Silk Weaving Factory

This factory manufactures pure and unadulterated silk and laced fabrics out of pure Mysore Silk The products of this factory are durable washable and are sold at reasonable prices The factory is now engaged in the manufacture of parachute silk

Government Industrial & Testing Laboratory

This Laboratory is engaged in manufacturing pharmaceutical products In addition to supplying the needs of the Mysore Government Medical Stores the Laboratory has also been making supplies of its medicinal products to the Government of India etc The Laboratory also manufactures Acetates and Citrates and Cream of Tartar for the Supply Department

Mysore Government Implements Factory



The factory is now producing Mumties Pickaxes Hammers Pruning Knives Digging Forks and various other Estate and Garden implements and also cutlery and scissors

Mysore Government Lac & Paint Works

The chief lines of manufacture taken up by this factory are Shellac Paints Ready mixed oil paints French polishes Sealing waxes Printing ink and Electrical insulating varnishes

Sri Chamrajendra Technical Institute

This Institute was started with the main object of training students in several arts and crafts and to revive and improve many of the indigenous industries of the Mysore State Show rooms are opened in the Institute Building to display the products of the Institute as well as those of the private artisans and Government Industrial concerns Furniture in wood and rattan of an excellent quality are made in this Institute

THE MYSORE CHEMICALS & FERTILISERS, LIMITED, MYSORE.

Mr E V Ganapati Iyer B.Sc.,
Chairman and Managing Director of the Company

Mr H. K. Ramiengar, M.A. (Hons)
Secretary and General Manager

TO Mysore State belongs the credit of establishing the only factory in India for the fixation of atmospheric nitrogen—a basic industry in any country whether during peace time or war THE MYSORE CHEMICALS AND FERTILISERS, LTD MYSORE owes its existence to the forward industrial policy and encouragement given by the Government of Mysore following the establishment of the Mysore Sugar Company in Mandya and the Development of sugarcane cultivation under the Irwin Canal System

THE MYSORE CHEMICALS & FERTILISERS, LTD, was formed towards the end of 1937 with a share capital of Rs. 25,00,000 divided into 2 50 000 shares of Rs 10 each.

PRODUCTS.

The Company s activities include three basic industries *viz*

(*i*) Synthetic ammonia manufacture
(*ii*) Sulphuric Acid manufacture
(*iii*) Manufacture of Superphosphates

In addition to these heavy chemicals the manufacture of a number of other chemicals has been developed These include Ammonium Sulphate Liquor Ammonia Forte Ammonium Carbonate Ammonium Chloride various kinds of Mixed Fertilisers Oleum Hydrochloric Acid and Chlorosulphonic Acid It is hoped that the manufacture of Nitric Acid will soon be taken up The Company commenced production in April 1940 and within less than 2 years has achieved remarkable progress in the quantity and variety of its manufactures All its products conform to the requirements of the British Pharmacopoeia and other standard tests Supplies to the Government of India for war supply requirements conform fully to the specifications of the Supply Department The Company has an active programme of further expansion of manufactures so that it may be reasonably hoped that these Works will soon be among the largest Chemical Works in South India

AMMONIA FROM AIR AND WATER

For its products the Company makes the maximum possible use of the raw material resources of the country The plant is of the most modern kind obtained from American manufacturers and erected by American Experts and is the only one of its kind in India. The synthesis plant produces ammonia from the abundant natural sources of air and water

The products of the Company find a ready market though at the present time practically the greater part of its production is taken over by the Government of India for war purposes The fertilisers made at the Works are used by coffee planters and agriculturists all over the country for large areas of cultivation of cane paddy and other crops and have already achieved a splendid reputation for quality and results

This flourishing concern has led to the establishment in the Mysore State of industries for the manufacture of basic salts like Copper sulphate, etc and dichromates and has paved the way for the formation of many more chemical industries in the State and its neighbourhood.

THE MYSORE CHROME TANNING CO., LTD.

MYSORE ROAD, BANGALORE

HISTORY

THE Mysore Tannery which was started in the year 1908 as a Limited Liability Company in Bangalore City for the purpose of Chrome Tanning of Cow Hides worked successfully for sometime Thereafter the Company passed through various vicissitudes and in the year 1934 the Bangalore Bank, Ltd Bangalore acquired the ownership of the concern and effected several improvements in the manufacturing process thus increasing the productive capacity of the Tannery The Tannery was the first to be established in Southern India and it had afforded occupation to a large number of skilled men The Government of Mysore helped to start the concern and form it into a Limited Company on a Joint Stock basis with an authorised Share Capital of 5 lakhs of Rupees under the present name of Mysore Chrome Tanning Company Limited by taking up a portion of the shares The Management is vested in the hands of a Senior Officer of the status of a Head of the Department

ADVANTAGES

The Tannery is situated on the Mysore Road Bangalore City and the site covers an area of over 9 acres of land

The climate of Bangalore is specially suited for tanning operations as the temperature is fairly low throughout the year which renders loss of hide substance very low and yields leather of good substance and tight grain Added to this the Tannery has the advantage of a good supply of efficient and trained labour with an expert staff who have won a reputation for the products of the Tannery throughout the United Kingdom

Front view of the Factory

DEVELOPMENT

The Company has taken up the manufacture of Textile goods such as Picking Bands Leather Belting Ginning Washers besides the Leather goods required by the Railways and Printed Leathers for War Purposes in addition to the manufacture of Box and Willow side and Calf Leathers Arrangements are in progress for the manufacture of Bark Tanned Soles Harness and Saddlery Leathers Boots and Shoes and Attache Cases etc

Besides meeting the demands in the Indian markets the Upper Leathers manufactured by the Company are popular in the United Kingdom

MYSORE GOVERNMENT IMPLEMENTS FACTORY

HASSAN (Mysore Rlys.)

THIS Factory was started with the object of manufacturing and supplying the needs of peasants and artisans in Mysore and elsewhere in the form of working tools implements etc It is the only Factory of its kind in Mysore and is already meeting the deficiency caused by the War

Power Forging Section

The Factory came into operation in October 1940 nearly one year after the war began, and has since been making Mammooties Pick Axes Pruning Knives Digging Forks Mammooty Forks and other implements required for Tea Coffee & Rubber Estates and also Sledge Hammers Scissors and Cutlery of various kinds

The products of the Factory are in good demand in Mysore and South India and they are also being sent to distant centres like Karachi, Bombay Assam and Colombo

In addition to the products required for the Market the Factory has been making various War Supply articles like Ballpane Hammers Leg Picketting Hammers Table Knives Flesh Forks etc , in increasing quantities

The following list will give an idea of the wide variety of articles in demand manufactured by this Factory and the scope for expansion in view of the fact that millions of working class people must be provided with tools and implements of various kinds

Mammooties.	Digging Forks	Penknives
Pick Axes.	Kodaly Forks.	Table Knives
Weeding Hoe	Hand Forks.	Vegetable Knives.
Quintany	Wheel Barrows.	Bread Knives.
Sledge Hammers.	Water Barrows.	Scissors.
Stone Breaking Hammers.	Mysore Stoves	Garden Shears
	Felling Axes.	Secateurs.
Ballpane Hammers.	Hatchets.	

Inclusive of various sizes and varieties in the above items over 200 different articles are now being made

PIPE FOUNDRY

THE MYSORE IRON & STEEL WORKS.

THE plant occupies an area of about 100 acres and comprised originally a modern Charcoal Blast Furnace with wood distillation and bye products recovery plant with the auxiliary steam and power plants foundry and machine shop

Now the production has been widened by the addition of an Alcohol Refinery Plant and a Pipe foundry the latter for the manufacture of cast-iron pipes for water supply and drainage purposes an additional Pipe foundry to manufacture pipes up to 33" diameter an up-to-date Steel Plant and Rolling Mills for the manufacture of mild steel sections such as flats rounds squares angles reinforcing rods etc in all common sizes and a Cement Plant for the manufacture of Chamundi Brand Portland Cement to B S S

A structural shop has also been added to fabricate transmission line towers for the electrical department Steel towers and trusses are also made to order.

Another addition is a plant for the manufacture of Formalin The major portion of the output is utilized for the manufacture of synthetic resin for which a Pilot Bakelite Plant is also put up

A Steel Foundry manufacturing special steel articles such as axle boxes anvils and other special castings has also been added as an experimental measure

With a view to assisting war efforts Government have sanctioned the installation of an additional Open Hearth Furnace for the supply of ingots and billets To increase the production of small rods and to roll strips $\frac{1}{4}$" x 20' gauges orders have been placed for another Rod Mill as an extension to the Rolling Mills

One Electrical Steel Furnace for the manufacture of special steels and two Electric Furnaces for the manufactures of Ferro-silicon and Ferro-chrome at Mysore are under installation

THE MYSORE LAMP WORKS LIMITED,

MALLESWARAM P O,

BANGALORE.

THE leading position occupied by South India generally, and Mysore State in particular in Hydro-Electric development specially electrification of numerous towns and villages has led to the establishment of an important industry in THE MYSORE LAMP WORKS LTD. The starting of the concern itself has been due to the progressive industrial policy of the Mysore Government who with great vision of the future readily gave the necessary encouragement

PRODUCTION

The Company was incorporated in August 1936 and production started in November 1937 It has an issued capital of 3 lakhs of rupees and the Government of Mysore have subscribed 10% of the share capital It has a modern American plant automatic and efficient in operation with an average capacity of 3 000 lamps per day It has its own gas plant and lamp life testing equipment

The Company s normal products at present are vacuum and gas filled lamps in all standard wattages and voltages The installation of additional equipment for the manufacture of high wattage railway service street series and other special types of lamps has been delayed owing to war conditions and the Company expects to have regular production of these products in the early future

EFFICIENCY OF LAMPS

The Works mostly use raw materials of highest quality obtained from the leading American manufacturers and manufacture is carried out with an efficient and intelligent personnel trained under an American expert All lamps are subjected to a rigorous test before they are marketed in attractive packing

Mr E V Ganapati Iyer, B Sc , Chairman

IMPORTANT USERS

MYSORE LAMPS , under which name the Company s products are marketed have established a name throughout India for quality and efficiency The Company counts among the regular users of MYSORE LAMPS the Mysore Government Electric Department, leading textile mills in Bombay and Ahmedabad cities & corporations and factories in various cities of South India

Available at moderate prices and with guaranteed long life produced out of best quality materials by skilled workers, MYSORE LAMPS ' form a most popular and attractive proposition for the illumination of every home

THE MYSORE MATCH CO., LTD.,

SHIMOGA

MANUFACTURE of Safety Matches dates back to 1925 in Mysore State The Government of Mysore granted concessions in 1923 for exploitation of softwoods in the State at a nominal seigniorage and a Public Limited Company was registered in 1925 which commenced operations in 1927 at Shimoga being near the Malnad Forest Area and continued till 1934 In the year 1934 on the advent of Excise Duty on matches the Company had to suspend operations and finally stopped working in 1936

As the industry had an important place in national economy and was calculated to utilise local resources and employ local labour, the Government of Mysore again thought of resuscitating the old Match Factory Accordingly a fresh Public Company was floated in May 1940 with some more concessions from Government for wood supplies, power and subscribing 10 per cent towards Capital. The management has been entrusted to a Board of Directors of 9 members, out of whom three directors are nominated by Government with one of them as the Chairman The new Company has as the Head of the Administration the Chairman of the Mysore Iron and Steel Works Bhadravati and the factory is located at Shimoga eleven miles from Bhadravati where The Mysore Steel and Cement Plants and also a Paper Mill exist

The whole operation of the plant from cutting of logs to finishing is automatic only the banderolling and bundling of packets is done by manual labour The production of the plant is rated at 1 000 gross per day

In addition to the plant required for the manufacture of matches there is an additional 100 H P Gas Generator Set as a standby

The present products are marketed under the Trade Mark ' JOG FALLS Safety Matches and are finding a ready sale in Mysore State and adjacent districts of Bombay and Madras Presidencies

PAPER INDUSTRY IN MYSORE

THE Mysore Paper Mills owe their origin to the progressive industrial policy of the Government of His Highness the Maharaja of Mysore A Joint Stock Company was formed in 1936 with the Government of Mysore taking a share both in the Capital and the Management

The Mill at Bhadravati on the banks of the perennial Bhadra commands various facilities such as nearness to bamboo forests labour and workshop facilities His Highness the late Sri Krishnaraja Wadiyar Bahadur laid the foundation of the Mill buildings on the 1st of April 1937

The Mill designed and equipped on an all bamboo basis is fitted with the most modern type of paper machines and other accessories for the production of chlorine and recovery of chemicals

The mill has a daily rated output of 17 tons of bamboo pulp 2½ tons of rag pulp and 15 tons of high class finished paper or about 4 500 tons per annum

Writing Printing and Typewriting Banks Bonds Manifolds Antiques Badamis and other varieties glazed and unglazed, are manufactured and marketed under the Registered Trade Mark Bison Brand

The Mills employ more than 100 educated men on an average and about 600 skilled and unskilled workers besides providing employment to 500 more in the extraction of bamboos

Consequent on the outbreak of the War and the resultant Newsprint shortage the Mysore Paper Mills undertook to manufacture Emergency Printing Paper a substitute for newsprint and thus came to the rescue of the local newspaper industry

The quality of the Mysore Paper Mills products and their attractive prices created a demand greater than the Mills can meet inspite of increased production

A regular town has grown up at Bhadravati with all modern amenities like protected water supply electric lighting sanitary arrangements a co-operative society a primary school and medical and maternity aid

THE DRY END OF THE PAPER MACHINE IN THE MYSORE MILLS

THE MYSORE SILK FILATURES, LTD.

T. NARASIPUR. (Mysore District.)

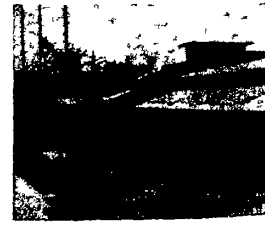
NARRONDASS MANORDASS

135 SHEIKH MEMON STREET

ESTABLISHED 1788

Bankers, Bullion and Cotton Merchants, Refiners of Precious Metals and Manufacturers of Chemical, Owners of Mines and Dealers in Minerals.



BOMBAY is one of the largest Gold and Silver markets in the world Most of the imports into and exports from India generally take place from Bombay In export, import and actual handlings and dealings of Gold and Silver, the firm of Messrs Narrondass Manordass stands first since several decades The firm was founded in 1788 by Mr Narrondass Manordass and the business continues in the same family since the last seven generations occupying the same business premises for the last 150 years Mr G P Sonawala, senior partner of the firm, is the seventh decendant of Mr Narrondass Manordass

In order to facilitate their handlings of Gold and Silver the firm has set up an up to date Electrolytic Precious Metal Refinery since more than a decade This refinery is the largest and the first of its kind in India as far as private refineries and enterprises are concerned The capacity of this refinery is about $\frac{1}{3}$ of the refinery at His Majesty's Mint at Bombay His Majesty's Mint at Bombay has accepted the assayed fineness of the firm

The firm is also interested in the manufacture of chemicals and the development of the mineral resources of this country A plant for the manufacture of heavy chemicals and other chemical products is going to be set up shortly at Kalyan on a site of about 100 acres

The firm has a mining lease for the mining of bauxite, chromite and other minerals and is carrying out prospecting operations for minerals in several provinces and states of this country

The firm is also interested in investment, cotton and property

The Precious Metal Refinery at Sonawala Estate, Tardeo Bombay

THE NEW BOOK CO.,

188-190, Hornby Road, Bombay

The New Book Company is no ordinary book shop but a vast organisation having business connections with every part of the world In fact it is one of the largest and most up to-date establishments of its kind east of Suez

It might be supposed that it took the New Book Co a few decades to build up such a fine reputation for itself The truth is it came into existence only six years ago and with Service as its watchword has risen to its present enviable status

Many and varied are the services it offers its patrons For example the New Book Co will trace and procure for you any book that is out of print or is not available ordinarily and there is an Express Service for those needing books urgently If any book is out of stock a cable is sent to the London or New York office of the firm and the book is despatched direct to the customer by the first mail

Book Selection Service is another of their innovations Periodically a picked collection of books according to individual taste is sent to their Patrons who have the option to retain all or any of the books and return the rest

The Company publishes every month an interesting Literary Journal entitled The New Book Digest which in the words of The Clique London is a complete guide to current reading on every subject

The New Book Co has a very large stock of books on almost any subject under the sun and can send you descriptive lists on your favourite subjects on application What is more the customer is free to examine the books in the marked shelves at leisure without being disturbed or embarrassed by the over attentions of the staff The New Book Co also runs an up-to-date Stationery Department and undertakes printing and publishing work They have published several distinctive works by well known authors and research scholars

John Gunther the famous author who has seen all the capitals of the world has alluded to The New Book Co as the Most Excellent Shop

THE NEW CITIZEN BANK OF INDIA, LTD., Bombay.

The New Citizen Bank of India Ltd Bombay was incorporated on 31st July 1937 and commenced its banking business on 1st April 1938 The Company was promoted under the distinguished chairmanship of Mr Jamnadas M Mehta and the Board of Directors is composed of the following —

THE BOARD OF DIRECTORS

Chairman Mr Jamnadas M Mehta M A LL B, Bar at Law
Depositors Director Mr G V Salvekar B A

Sir H P Dastur B A LL B Bar-at-Law, P B Gole Esq B A LL B Advocate Seth Govindas Narayandas Banatwala Rao Bahadur N B Deshmukh B D Garware Esq G V Puranik Esq G S Marathey Esq M A A I A Rao Sahib R S Athavle B A Bhagwanji Murarji Goculdas Esq

Mr D D Deshpande B A has been the promoting Managing Director and the Bank has made fairly good progress under his able management

The Company had a paid up share capital of nearly Rs 85 000 and secured initial deposits of Rs 42 000 on the day it commenced business Since then it has made rapid strides The Bank had a paid up share capital of over Rs 5 06 400 in April 1939 and was placed in the second schedule with the Reserve Bank of India from 10th May 1939 The Bank has been able to extend its activities both in the City of Bombay and outside in the Deccan It has now three local branches in Bombay at Girgaum Dadar and Javeri Bazar and four mofussil branches at Nasik Kolhapur Sholapur and Sangli

The Bank has so far published three balance-sheets the last being as on 31st March 1941 From the third year s annual report and balance-sheet, as on 31st March 1941 the Bank has made some profit and has been able to pay a dividend of 5 per cent to its 5 per cent Cumulative Preference Shareholders for the first two financial periods ending on 31st December 1939

Since the issue of its third balance sheet *viz*, upto 31st March 1941 there has been further increase in business The paid-up share capital of the Bank has increased from Rs 5 06 000 to Rs 5 67 000 and the deposits of the Bank have increased from Rs 19 32 000 to Rs 25 52 000 as on 31 3 1942 The working capital of the Bank has also increased from Rs 25 00 000 to over Rs 32,00 000 by the end of March 1942 It will thus be seen that the Bank has been making a steady and sure progress during the short period of four years it has been in existence The Bank hopes that in the future it will make even greater progress and become one of the leading Banks of Bombay

The special feature of this Bank is that it has allowed representation to its depositors on the Board of Directors, from its inception There has been on the board a Director on behalf of the depositors. This is probably the only Bank in India which so allows representation to its depositors on its Board.

H E H
THE NIZAM'S STATE RLY.

H E H the Nizam s State Railway was purchased by the Government of H E H the Nizam in the year 1930 from the Nizam s Guaranteed State Railway Company Limited It is a system of both Broad and Metre Gauge construction and comprises 1 367 miles of open line, 693 of which are Broad Gauge and 674 Metre Gauge This Railway connects the north of India with the south and the east of India with the west and links up the M S M Railway with the G I P Railway

Secunderabad is the Headquarters Through service carriages daily run between Secunderabad and Bombay Secunderabad and Delhi and Secunderabad and Bangalore Through service between Secunderabad and Madras is provided during the hill season

From Bezwada (M S M) the line runs in a north westerly direction till Kazipet is reached whence it turns due west towards Secunderabad and Wadi (G I P) There is a branch line from Dornakal junction serving the Singareni and Kothagudam coal fields At Kazipet another branch line runs due north and connects with the G I P Rly at Balharshah This link is important as it constitutes the shortest route between northern and southern India and also serves the Tandur coal fields and the Sirpur Paper Mills which is exploiting the vast bamboo resources in this area

The Metre Gauge line from Dronachellam runs north-east up to Secunderabad and from Secunderabad proceeds in a north westerly direction and connects with the G I P Railway at Manmad

A branch line connects Vikarabad on the Secunderabad-Wadi Section with Parbhani on the Metre Gauge main line

Another Metre Gauge branch line connects Purna with Hingoli, an important cotton centre

The Nizam s State Railway also operates more than 4 000 miles of Road Services Air transport has also been brought under the management of the Railway

PILGRIM CENTRES AND PLACES OF HISTORICAL AND ARCHÆOLOGICAL INTEREST

Bhadrachellam Standing on the left bank of the River Godaveri, at Bhadrachellam is the famous Sree Rama Temple

Aundah has the magnificent temple of Nagnath which is hallowed by a Jyothirlinga

Verul is a village 11 miles from Daulatabad station with its famous temple dedicated to Lord Grishneswar

Aurangabad is the headquarters of the District of the same name and is the most convenient station on the N S Ry from which to visit the world famous rock temples of Ellora and the frescoes of Ajanta.

Mahomedabad Bidar the city of a thousand legends is situated on the Vikarabad Parbhani branch line

Nander is famous for the Sikh temple known as the Gurudwara' which contains the tomb of Guru Govind

The New Piece Goods Bazar Company, Ltd.

(THE MOOLJEE JAITHA MARKET)

(Established in 1871)

BOMBAY

BOMBAY the Gateway of India boasts of a fine cloth market—the biggest in Asia and perhaps in the world having as it does over 770 shops under one roof You wander through aisles of cotton cloth woollens and silks There is colour glorious colour everywhere The little shops gleam with their rich wares

Late Sheth Mooljee Jaitha

The idea of this beautiful market was conceived by that far-sighted and able business magnate a Bhatia gentleman the late Sheth Mooljee Jaitha A company with a capital of Rs 6 00 000 was floated and named the New Piece Goods Bazar Co Ltd Its capital was later raised to Rs 18 00 000 This commendable project was launched at the explicit wish of Bombay s leading merchants who wanted to centralise the trade When the scheme was put into execution there were only 30 shops Gradually the Market expanded and today it covers 17 000 square yards

The present Directors of the Company are (1) Mr Karsandas Dharamsey Soonderdas J P *Chairman* (2) Mr Chatrabhuj Gordhandas Soonderdas J P (3) Mr Handas Liladhar Jairam (4) Mr Chandra kumar Karsandas Dharamsey B Com (5) Mr Krishnaraj Madhavjee D Thackersey B A (6) Mr Hansraj Purshottam Vishram B Com LL B , (7) Mr Dwarkadas Meghji (8) Mr Laxmidas Kalyanji The Secretary of the Company is Mr Padamsey Damodar Govindji J P

It is gratifying to find that the Mooljee Jaitha Market today is a citadel of security and sound finance Its capital has reached the figure of 18 lakhs and its assets stand at the respectable figure of 59 lakhs though actually they are much more The peculiarity of this

unique institution is that all along it has been a Bhatia institution all the Directors being Bhatias This Market is probably bigger than all other markets of the city put together It controls the cloth trade to this day It is as pointed out above by far the largest market for textiles in the East controlled by private individuals

In the beginning 75 per cent of the tenants were Bhatias who controlled the cloth Trade With the tragic crash of the Specie Bank in 1912 the business got deflected into other channels The Trade was at its height in 1918 19 The merchants suffered a set back in 1920 owing to the dramatic collapse of the Exchange The Market is a lucky institution having had only one fire in its history on the 20th day of July 1920 inflicting a colossal loss of a crore of rupees on the cloth merchants Since then half the portion of the market building was rebuilt in 1921 22 In the political crisis of 1930 31 the market had to be locked up for over 8 months This closure entailed a heavy loss on the trade

The Trade is generally divided into 5 or 6 channels (1) Wholesale Dealers (2) Retail Dealers (3) Dealers of woollen cloth (4) Dealers of Printed Cloth (5) Dealers of Gray unbleached cloth (6) Dealers of bleached and fancy cloth Imported cloth comes principally from England and Japan There is a large section of dealers in cloth manufactured by Indian Mills And there is also a section of dealers who export cloth to Africa and Egypt There is a monthly turnover of over 5 crores of rupees in the market The secret of the Trade is that it has the confidence of the merchants and one shop is run by one member for more than 50 years Some merchants are still founder members of the market, prominent among whom are Messrs Valji Shamji Messrs Raghavji Anandji Messrs Damoder Haridas Messrs Damoder Valji Messrs Ghela Dayal and Messrs Pragji Vandravan

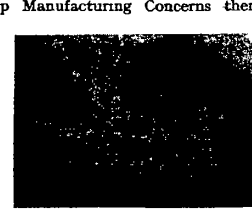
The market owns besides cloth shops buildings occupied princi pally by Banks like the Central Bank and the Devkaran Nanjee Banking Co Ltd It also controls the old Sunderdas Mills property The intrinsic value of the Market to-day is well nigh 2 00 00 000 of rupees The Market remains closed under instructions from the Landlords who issue them at the request of the Trader s Association All disputes of the Trade are submitted to and settled mostly by Arbitration

The Market is an everlasting monument to that great man Sheth Mooljee Jaitha who raised the standard of textile Trade in the Bombay Presidency Sheth Mooljee Jaitha was a realist His decisive nature was the key to his success He framed ideal schemes to centralise the trade of Western India

THE OGALE GLASS

OGALEVADI (Aundh State),

THE works were started in 1916 by Mr S P Ogale as a proprietary Concern Shrimant Rajasaheb of Aundh who has done so much for the development of industries in his small but progressive State granted a plot of land measuring 15 acres at a nominal price where the Works and the Industrial Colony of Ogalevadi are now situated



A small beginning with a capital of Rs 10 000 was made Though a demand for indigenous articles was created by the last Great War the Works could not take advantage of it owing to difficulties in securing supplies of raw-materials particularly of coal which was strictly controlled

In 1920 there were about 125 people working and the annual production had reached Rs 1 00 000

The proprietary Concern was converted into a Limited liability company with a capital of Rs 2 00 000 which was readily subscribed The progress was steadily maintained and in 1923 the annual production reached Rs 2 00 000 with 250 people working The Company paid three successive dividends during this period

A scheme to start the manufacture of Dietz type Hurricane Lanterns was prepared in 1925 and the authorised capital of the Company was increased to Rs 10 00 000 New shares to the extent of Rs 3 00 000 were issued and subscribed for—the Rajasaheb of Aundh subscribing a substantial portion thereof

Mr G P Ogale the Company s Engineer went to Germany and after visiting a number of Lamp Manufacturing Concerns there purchased a suitable plant and machinery for manufacturing 1 200 complete lanterns per day Within about 4 months the machinery was brought to Ogalevadi fitted up and regular manufacturing commenced The lanterns produced were very satisfactory and a complete success so far as the manufacturing side was concerned

Front view of the Ogale Glass Works Ltd

About this time Germany America and Japan started dumping their Lamps and Lanterns in this country and the price of lanterns which was round about Rs 27 per doz went down to Rs 15 per doz it further dwindled down to Rs 9-4 0 per doz within the space of next 12 months.

WORKS LIMITED,

District, Satara.

The Raja Saheb of Aundh

A case for protecting the Industry in the face of this killing competition was presented to the Government of India but without success The Works continued to produce lanterns till about 1932 and thereafter finding it impossible to carry on considerably restricted their production

There was also a very keen competition in the Glass trade and though the Indian Tariff Board recommended a certain measure of protection to the Industry Government turned down the Tariff Board s proposals Both the glass and lantern Industries had to fight their way in the face of the worst competition from abroad and without any kind of protection at home The management continued to make progress in the direction of producing new articles and bringing them to the standard of the imported articles

One of the Ogale Brothers started a new Glass Factory at Nagpur in C P at this time

The Enamelling Department was started in 1932 and the production of the Glass Lantern and Enamelling Sections reached a figure of Rs 5 00 000 with about 700 people working in all the sections

The Company started the Mysore Glass & Enamel Works Ltd in 1939 and took up the Managing Agency

The present War gave them a fillip and all the Glass Lantern and Enamelling Sections doubled and trebled their production They got the advantage of the various experiments they had made during the lean years

The present production of the Works at Ogalevadi has reached Rs 1 25 000 per month More than 1 200 people are now working The Company paid a dividend last year and will pay a substantial dividend this year

At the invitation of the Government of Ceylon Messrs Ogale Brothers have recently undertaken the erection and working of a Glass Factory in Colombo

They propose to start a Factory for manufacturing Sheet Glass at Alwaye (Travancore State) where very cheap raw materials labour packing materials and transport facilities are available

The Rajasaheb of Aundh gave his moral and material support to the Concern liberally and but for this help it would not have been possible for the Company to survive through the bad period of foreign competition

THE HOUSE OF PATANWALLA

Mr E S Patanwalla, Founder

Honesty and Quality are the two foundation stones on which is built the glorious reputation of the House of Patanwalla which occupies a leading position in India s perfumery industry The firm s romantic rise to prominence makes interest ing and inspiring reading

Way back in 1899 Ebrahim Sultanalli Patanwalla a boy of ten came to Bombay from Patan a village in Rajputana After a year of precarious existence Ebrahim became shop assistant in a perfumery stores on a monthly salary of Rs 8 He liked his new job and tried his best to learn all he could of the fragrant business But the business did not hold much prospect for him It was a fourteen hour routine drudgery So after six years of unprofitable toiling Ebrahim gave it up and began hawking on his own In this university of hard knocks and ex perience he learnt the lesson that to be successful one must be honest in his dealings and sell only products of good quality He began preparing Hair Oils himself and found a ready market for them With this preliminary success his confid ence rose and with it his ambition

Mr F E Patanwalla

In 1910 Mr Patanwalla opened a perfumery store—a small shop in Bhaja pala Lane—still he would not give up canvassing personally all his regular customers He then began making his own perfumes and brilliantines and in 1918 began manufacturing on a large scale An all India demand for toiletries compelled Mr Patanwalla to increase his staff In 1926 he started manufacturing the now famous Afghan Snow He put his heart and soul into the perfection of the product Sample after sample were prepared tested and rejected until Afghan Snow as we know it today was finally brought out Mr Patanwalla con sidered Afghan Snow his star production He spared no pains to see it well

The Patanwalla Factory

established in the market. He insisted on the best of packaging the best of publicity and the best of distribution for it This set the popularity of Afghan Snow soaring

In 1930 taking advantage of the Swadeshi Movement Mr Patan walla started a factory at Connaught Road In 1935 he went to England to acquire a first hand knowledge of Industrial Organisation He was much impressed with what he saw there and on his return to India lost no time in having his factory completely overhauled The most modern machinery was installed factory lighting was modernised and working conditions were generally improved More experts were taken on the staff and manufactures rose from just a few products to well over 300 items The factory now employs more than hundred workers in addition to a batch of chemists and research men

In 1937 taking his cue from the knowledge he had gained abroad Mr Patanwalla separated the Sales Department from the Manufac-turing Department situated at Abdul Rehman Street This segrega-tion stepped up efficiency He converted the Sales Department into a private limited liability company with himself as its Managing Director and Mr Khanalli Allimohamed and Mr Moosaji R Rampuri as co-directors In them Mr Patanwalla found excellent associates Mr Khanalli Allimohamed joined the firm in the year 1914 Coming from Sunel in Holkar State, he is shrewed and pays much attention

to details There is hardly anything in the Indian perfumery trade that Mr Khanalli does not know His infinite knowledge his wide experience and his organising ability led to his appointment as partner of Mr Patanwalla s firm in 1931 In 1937 he became a director of Patanwalla Ltd

The other director Mr Moosaji R. Rampuri hails from Rampura in Central India He joined Patanwalla s in 1922 He possesses the knowledge of an advertising expert and has been responsible for the firm s publicity since 1931 when he was appointed advertising manager Some of the very distinctive labels on Patanwalla products are the creation of Mr Moosaji In 1938 he became a director of Patanwalla Ltd

Mr E S Patanwalla himself took charge of the Manufacturing Department In 1938 after a very eventful career Mr E S Patanwalla died leaving his son Fakhruddin Ebrahim Patanwalla in charge

Mr Khanalli Allimohamed one of the Directors

Mr Moosaji R Rampuri one of the Directors

Like father like son Young Fakhruddin soon proved his mettle Having come out a qualified chemist from the Victoria Jubilee Technical Institute he was determined to carry on his father s good work. He is responsible for several useful innovations at the factory A keen student of advertising and selling he spares no pains to effect constant improvements in existing products and creating new ones No wonder Patanwalla products have become famous for quality Their packaging too displays a note of originality and modern treatment

Starting from a humble one man show the firm of E S Patanwalla now occupies a leading position in India s perfumery industry Patanwalla s products now enjoy a nation-wide popularity Besides they are in regular demand in such far off places as Africa, Iraq, Iran Palestine, Syria Burma and Afghanistan

So far sighted is the management s policy that when war broke out Patanwalla were more than equal to meeting the rising demand The fact that they have laid by ample stocks of raw materials is also a tribute to their far sighted policy

PORBANDAR STATE INDUSTRIES.

Porbandar claims to be a pioneer State in Western India in regard to some important industries such as Cement engine turning on precious metals ghee processing stone quarrying etc The variety of industries which have sprung up may be attributed as much to the industrial instinct zeal and enterprize of the people as to the easy availability of raw materials and the facilities provided by the State to utilize them to the best advantage

Porbandar is by far the most ancient and exclusive Maritime State of Western India Porbandar the capital town is situated on the direct trade route between Bombay and Karachi and is as such a most convenient Port for ocean going steamers to drop anchor

Within 10 miles of Porbandar are situated the famous stone quarries which are traversed by the Quarry Railway line This fine Porbandar stone is employed in the construction of conspicuous buildings of metropolitan cities such as Bombay Calcutta and Madras The necessity of economising the use of steel has recently induced Engineers and Building Contractors to employ Porbandar Stone to a larger extent and in place of other forms of construction

The vast quantity of lime stone chippings and clay available so near Porbandar induced the Indian Cement Co Ltd of the House of Tata Sons to establish a Cement Factory at Porbandar the first of its kind in India in 1914

The Porbandar Ghee industry is as famous as it is ancient Porbandar Ghee sells at an assured premium in the Bombay Market and abroad After being processed in refineries it is graded in the Ghee Laboratory the first of its kind in Kathiawar packed in tins of all sizes manufactured in local Tin Factories and sealed and labelled AGMARK as a guarantee of its purity

Textile Mills Salt Works Match Works Hosiery Works Shipbuilding Cement Flooring Tiles Paints and Distempers Plaster of Paris Soap, Whiting—these are some of the other industries in which the people take a lively interest Cottage industries and Handicrafts have been receiving no less attention

The Imperial Bank of India established its branch at Porbandar in 1928. The State has also a Darbari Bank

The steep rise in the population of the town of Porbandar from 33 444 in 1931 to 52 747 in 1941 is an index of the industrial progress of Porbandar during the decade

THE P. & O.

100 years of Indian Trade

The P & O 'Hindustan' leaving Southampton 1842 to open the Indian Mail Service

THE years 1942 and 1943 mark the Centenary of an event of considerable importance both in the history of the Peninsular and Oriental Steam Navigation Company and of Indian transport. It was on the 24th September 1842 that the Hindustan specially built and fitted for the route between India and Suez left Southampton to proceed to India by the Round the-Cape route. She successfully made the passage out in 91 days of which 28 were spent in port refuelling watering and provisioning.

Next year the Bentinck went out by the same route and the regular service to Egypt and India began. This linked up with the European Service of the P & O which since 1837 had been carrying mails to ports of the Spanish Peninsula and in 1840 extended the service to Egypt. The Peninsular Company first obtained the mail contract for the Spanish Peninsula Service in 1837 and it was after the success of this had been proved by the remarkably regular running and well kept timetable across the stormy waters of the Bay of Biscay that tenders were asked by the Post Office for a steam service to Egypt and an extended service between India and Egypt the two links to be joined by a proposed overland route across Egypt. On obtaining this further contract, the Company was incorporated under Royal Charter with the condition that the mail steamer extension to India should be carried out within two or three years.

This was the conclusion of many fruitless efforts to establish a regular India/Egypt mail Service. The great difficulties in the way were in the monsoon seasons which made the Red Sea an impassable obstacle for sailing ships and an extremely difficult one for the under powered steamers which first attempted to navigate the route. For centuries the native craft of India had traded with ports in the Red Sea taking advantage of the monsoon winds to carry them from India and then after a wait of months to return when the monsoon winds changed direction. This however only meant about one voyage a year so was impossible in the consideration of a regular mail service. When the P & O began the through service coaling depots had to be established over the whole route and these were supplied by a large fleet of sailing vessels which carried the coal out round the Cape to the depots in the East. It was found to be impossible to carry coals to Suez or any other Red Sea port because of that same difficulty to the monsoon winds and for many years after the service was established the P & O had to carry coal for the voyage down the Red Sea by camel-back across Egypt to the depot at Suez.

This Overland Route had been in existence for some years but was carried on in the most haphazard fashion and with an extreme delay and discomfort for any passengers who ventured to take it. One of the first tasks set about by the P & O was the improvement of this journey across Egypt Outward bound the steamers took the passengers and mail to Alexandria Here they were transferred to barges which were towed over a canal to join the waters of the Nile Here again there was another transfer to a Nile steamer which ran between the end of this canal and Cairo, and from Cairo all passengers and baggage had to be conveyed by pony carriage cart camel and donkey back, across the Desert to Suez The first barges over the canal were towed by horses but very quickly the P & O sent out special tugs which towed the barges to and fro Similarly special steamers were built for the passage of the Nile and across the Desert rest houses were established After two or three years this organisation was working so smoothly that the total time taken to do the 290 miles from sea to sea had been reduced to 78 hours. The journey across the Desert with halts for rest and refresh ment took 36 hours a journey which is now made by many passengers who wish to visit Cairo on their way to and from India by luxurious motor cars which cover the distance over a well made road in two to three hours

There had been long controversies and many sittings of Parliamentary Committees and investigators into the possibilities of steam communication with India and as mentioned several attempts had been made to establish the Eastern end of the road As the result of all

One of the latest built of the P & O Liners

this the building and fitting of the Hindustan drew world attention and the ship s depar ture from Southampton was held as an event of national importance All ships in the port and roadstead were dressed with flags and the warships' crews manned the yards as the Hindustan passed them The Hindustan was of 2017 tons with direct acting engines of 520 indicated H P the largest and most powerful steamer then afloat The Bentinck ' was very nearly the same size of 1974 tons with side lever engines of 520 H.P The Precursor of 1817 tons was sent out to India in 1844 and new steamers were continually added and the service improved from then up to the opening of the Suez Canal

The steam communication for mails made an enormous difference to the trade of India Before the P & O Service opened, the whole trade of the East with the U K was put at £20 millions a year Just before the Suez Canal was opened the value of the trade carried by the Overland Route rose to £40 millions a year This was despite the fact that by then there were more ships trading with India by the Cape Route than there had been before the coming of steam, and the year before the Canal opened the value of Eastern trade was £110 millions a year India derived other benefits from the coming of the P & O extensions of the service to Singapore, China and Japan to Australia and to the Island of Reunion, as well as to Egypt and England made India a centre of world ocean transport and the establishment by the P & O of works and offices docks and wharves suitable for steamer traffic again was of immense value to India

It is difficult at the present time to foresee what may be the outcome of the war and the political points now at issue but whatever these may be it is certain that the P & O and the people of India will continue mutually to benefit from the trade which the Company first opened a Century ago

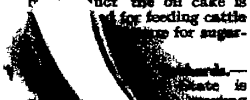
PHALTAN STATE

Industries

PHALTAN though a small State of the Deccan Group and covering only 397 sq miles of area, is making a steady progress in industrialisation—especially agricultural industrialization The State has taken early advantage of the advent of the Nira Right Bank Canal and owing to the impetus given to the sugar industry by the tariff facilities by the Government of India a Sugar Factory was established in 1933 in the State This prompt measure was due to the alertness and progressive outlook of its Ruler Major Raja Shrimant Malojirao Nanasaheb Naik Nimbalkar who is as much keen on industries as on agriculture The Phaltan Sugar Works Ltd must also be given their due share of credit as they are the pioneers of the sugar industry in the State

1 **Sugar and Sugarcane.**—Sugarcane is the principal agricultural crop grown in the State in the irrigated area its acreage being about 4 000 acres The Sugar Factory at Sakharwadi in the Phaltan State owned by the Phaltan Sugar Works Ltd produces about 15 000 tons of sugar every year It started work in 1933 and is a reputed Sugar Factory in the Deccan

Gul (Jaggery) is another finished product from cane Gul making has been an old industry known to the country people About 7 000 tons of Gul are produced annually in the State and the greater part of it is exported to British India There are 7 power crushers working in the State and many other country-crushers for the manufacture of Jaggery



2 **Cotton and Hand-Loom Industry**—The area under cotton is about 2 000 acres and yielding about 1 000 bales of short and fair staple yarn

About 150 Hand looms are worked for silk cotton and woollen yarn Coarse country woollen blankets are produced in large numbers

To supplement the income of agricultural workers in the State Shrimant Rajasaheb has caused a branch of the Maharashtra Charka Sangh to be started in the State to give training in hand-spinning and weaving to the poor people as a basic Industry The Sangh has begun its work only a year ago and has trained about 100 agriculturists in spinning yarn One cotton ginning factory is working in the State and there is scope for a Cotton Press

3 **Oil and Oilcake.**—Groundnut is also an important crop in the State and improved varieties rich in yield and oil percentage are being sown with the efforts of the Rural Development Department But Kardi seed is mainly used for oil extraction in the State There

are 43 country oil presses working producing 3 000 maunds of Kardi, Til and Groundnut oil per year Its by-product the oil cake is used for feeding cattle [illegible] for sugar-

[illegible] State is [illegible] growing [illegible] fruit like grapes, [illegible] lemons, sweetlimes [illegible] annanas are grown in abundance in the locality

5 **Village Industries.**—Two small country-tanneries are working at Phaltan which export tanned goods There is ample scope for a leather factory Brick making and rope-making are also other village industries

Shrimant Raja Saheb of Phaltan

6 **Public Utility and Transport Services** —The Phaltan Electric Supply Company satisfies the lighting demand of the town Power is not at present available for industrial purposes but it is hoped that the need will soon be met

Rao Saheb K V Godbole, Dewan

The Kishorsinh Motor Service Company with its head office at Phaltan carries on all the passenger traffic from Phaltan to Poona Lonand Baramati and Pandharpur It is by far the best bus service in the Deccan Its regularity fixed rates and above all the comfortable seating arrangements have won for it an enviable position The Company maintains a fully equipped motor workshop

Owing to the industrialization even on such moderate scale there are signs of prosperity coming to all classes of people in the State and also to the Durbar

The House of
RAMNARAIN RUIA

The House of Ramnarain Ruia was founded by the late Seth Ramnarain Harnandrai who hailed from Rámgarh in Rajputana in the Samvat year 1953

Harnandrai Ramnarain for that was the name under which the late Seth Ramnarain traded were doing business principally as Bankers Financiers etc and were also the Managing Agents for the Phoenix Mills Ltd Bombay from 1918 It was on the death of Seth Ramnarain Harnandrai in 1929 following his express wishes that the firm RAMNARAIN SONS LTD was incorporated with the following Board of Directors

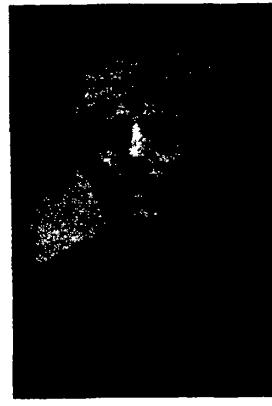
Suvtadevi Ramnarain (*Chairman*)
Jamnalal Bajaj
Ramniwas Ramnarain and
Paliram Muthradas

Of these Seth Jamnalal Bajaj died in February 1942

RAMNARAIN SONS LTD carry on business as Bankers Financiers, Concessionaires Cotton Merchants Cotton Exporters and Importers and Commission Agents They took over the Managing Agency of the Bradbury Mills Ltd Bombay in 1934 This Mill is one of the largest of its kind in India and has about 848 looms and 30 448 Spindles It manufactures Coatings Shirtings, Dhotis Saris Longcloth Bed ticking and other Grey and Fancy cloths and employs approximately 2 000 persons

In addition to all the foregoing Ramnarain Sons, Ltd in recent years have developed their Raw Cotton business until today they are one of foremost cotton merchants in India. Up to the outbreak of the present hostilities their exports covered all the foreign markets including the U S A , in which Indian cotton is used Today they are among the leading shippers to the United Kingdom and through the British Ministry of Supplies, their cotton finds its way into most of Lancashire s Mills Through their network of Agencies in most

of India s upcountry markets they purchase cotton that is used in India s domestic mills while for use by the Fine Count Section of the domestic industry their imports of Long Staple Foreign Cotton cover Egyptians Sudans Iraq Afri cans and Americans



The present Board of Direc tors of Ramnarain Sons Ltd consists of —

Suvtadevi Ramnarain (*Chairman*)

Ramniwas Ramnarain (*Managing Director*)

Madanmohan Ramnarain
Radhakrishna Ramnarain

Sushil Kumar Ramnarain and Pahram Muthradas

The late Seth Ramnarain Harnandrai

The volume of business done runs into several Crores of Rupees annually

RAMNARAIN HARNANDRAI & SONS.

This firm is owned and conducted by the sons of the late Seth Ramnarain Harnandrai and the Managing Agency of the Phoenix Mills Ltd Bombay which was handled since 1918 by Harnandrai Ramnarain remains in the family and is today carried on by Ramnarain Harnandrai & Sons The Mill is one of the largest of its kind in India and has 54 000 Spindles and about 800 Looms It manufactures Yarn of Counts from 4s to 40s and Piecegoods such as Saris Sheeting Bedticking Shirtings, Dhotis Long cloth and various types of other Grey and Fancy cloths The number of persons on its pay roll today approximates 2 500

INDUSTRIAL DEVELOP-

BEFORE the accession of the present ruler industrial activity in Rampur State was confined to a few cottage industries such as the making of knives betel nut crackers certain woven fabrics and Rampur caps During the past few years the position has entirely changed and the State has embarked on a policy of rapid industrialisation The keynote of this policy has been to provide employment in the urban area and create at the same time a market for the agricultural produce of the rural area The sugar industry was the first to be started in the State. In 1933 the Raza Sugar Company Ltd with Messrs Govan Brothers as Managing Agents was established and was so successful that before 1934 was out a second sugar company namely the Buland Sugar Company Ltd was floated

VARIOUS INDUSTRIES

During the last four years industrial development has been even more rapid The Raza Textiles Ltd was floated about the end of 1938 with Sir J P Srivastava and Son as the Managing Agents and despite the difficulties brought about by the War the Mill succeeded in starting its operations without undue delay It is now working day and night largely on War supply orders The Dawn Match Factory which produces good class matches commenced production in June 1940 and is capable of manufacturing 50 cases a day The Fruit Canning Factory which is run by the Hindustan Products Limited possesses an up-to-date machinery for the manufacture of tins and the canning of fruit The Rampur Tent and Army Equipment Manufacturing Company is fulfilling orders for the supply of tents to the Army An Oil Mill under the management of the Rampur Industries Ltd was constructed and commenced operations in 1940 The Rafat Ice Factory was

The Dawn Match Factory

MENT IN RAMPUR STATE

started last hot season and a Ginning Mill also started operations during 1941

Agreements have been entered into with the J K Gas Manufacturing Co, the J K. Rubber Manufacturing Co and the Rampur Maize Products Ltd The former two are being managed by Mr Kailashpat Singhania the well known industrialist and the latter by Messrs. Govan Bros. (Delhi), Ltd. Usual facilities have been offered to these three new companies and it is hoped that in spite of the War they will be in operation soon

Cart Loads of Sugarcane arriving at the Raza Factory during the Crushing Season

To meet the increasing demand of industry a new large Power House has been constructed This Power House is capable of supplying 4 400 kilowatts of electrical energy A State Engineering Workshop was started in 1941 and has been manufacturing lathes fans machinery vices and motor car accessories

COTTAGE INDUSTRIES

Cottage industries have been developed and a flourishing Cottage Industries Institute has been established It has weaving hosiery paper making durrie carpet making dyeing and silk printing departments The products of the Cottage Industries Institute and of local weavers who have been taught improved designs and methods are marketed by the Industries Department at Emporiums in Rampur and Naini Tal The knife making industry has been improved Similarly the making of cutlery knives forks and spoons is being developed

EDUCATIONAL POLICY

Side by side with the development of industries efforts have been made to bring about a re-orientation of Educational policy in the State Already about 150 students most of whom are in receipt of stipends are receiving instruction in various technical institutions and it is hoped that before long the majority of young men who have completed their education up to the VIII Standard will be absorbed in technical institutions which will fit them for earning their livelihood through some form of craft or industry without neglecting the cultural side of their education

THE RELIABLE WATER SUPPLY SERVICE OF INDIA, LTD., LAHORE.

Founded in 1925 by Rai Bahadur Tej Ram a retired Punjab P W D Executive Engineer, this firm was incorporated into a limited liability company early in 1928

The Reliables were soon called upon to build big Tubewells for Water Works at Civil and Military stations for the Railways and Sugar Mills

Previous to Reliables coming into the field Tubewells mostly had wire strainers which were very costly to build These strainers with their short life were not extractable If the strainer went out of order the Tubewell became unusable and therefore a dead loss

Rai Bahadur Tej Ram patented in 1925 an all brass strainer now known as the Tej strainer for tubewells With slit openings correct to the thousandth part of an inch this strainer has been found to be unchokable strong and easy to extract in case of trouble It gives a better discharge at low head needs no shrouding and thus saves in boring cost It is manufactured under license by Reliables

The Reliables soon came to manufacture and supply a complete range of water supply fittings and castings for sewerage schemes

In 1932 the Company was called upon to undertake pioneer work on Tubewells for the U P Govt The result of this pioneer work done by Reliables was later embodied in a scheme of over 1 300 Tubewells built by that Government which brought under effective command over 6 50 000 acres of land in that province The Reliables alone built with their Tej strainer about 700 Tubewells with discharges ranging from one cusec to 4 cusecs the remaining 600 having been built during the same period by at least ten more agencies including the U P Agricultural Department

It is estimated that there are about 5 000 Tubewells in different provinces built by Reliables and other agencies using Tej all brass strainers pumping over a million and a half gallons of water a minute day in and day out

In 1938 a Rock Boring Department was added to the Company s activities This is equipped with up-to-date boring rigs and expensive tools to work in N W Frontier Province Central India and elsewhere

Rai Bahadur Tej Ram still guides the Company in its day to day activities as its Chairman with Mr Vidya Prakash a qualified Civil Engineer as Managing Director The general management vests in Mr A R Sethi with Mr D N Tondon a British qualified Sales and Factory Manager as Sales Advertising and Works Manager

The Company's Calcutta Office is ably managed by S Narain Singh Ahluwalia, an engineer

THE RENOWN Biscuit Co.

Connaught Road,
Byculla, BOMBAY

LIKE nearly all big concerns the famous Renown Biscuit Company started on a very modest scale It was established in 1925 with a staff of fifteen employees only and with one solitary machine But the demand being far in excess of the supply it was found necessary to expand the organisation This expansion took place in 1927 when an additional unit of full capacity was set up employing in all 100 persons

This rapid expansion has enabled the firm to cover an all India market and also to export its products to Ceylon Burma and even beyond It owes its phenomenal growth prosperity and popularity to the personal efforts and business acumen of the partner Mr D D Kerawalla who is ably supported by his co partner Seth Mahomed Yakub Sahib

Biscuits manufactured by the firm conform to the highest standards of quality They are well known in thousands of India s homes for their oven fresh crispness and high nutritive value There is an excellent variety of biscuits in the Renown range They are marketed in attractive airtight cartons and tins

With every improvement in quality the demand for Renown biscuits soared and a further expansion was called for Just a few months before the outbreak of war the proprietors ordered out from Europe yet another unit It was installed in the factory just a month before Germany attacked Poland

The proprietors have taken good care to employ only experts They know their job thoroughly and ensure the production of biscuits that are quite as good as the best of imported ones Only the best grades of raw materials are used and at no stage in manufacture are the biscuits touched by hand

'Renown are playing an important part in keeping India supplied with first class Indian goods Theirs is an all-India organisation with agencies in all the important cities and towns

The House of SHALEBHOY

REPRESENTS A CENTURY OF

Exterior view of Shale Building Bank Street

ESTABLISHED in 1840 this firm is one of the oldest largest and the most reliable amongst Government Railway and Shipping contractors in India Its Head Office is housed in a magnificent building named Shale Building in Bank Street Fort with floor space of over 15 000 sq ft Further business expansion has necessitated its branching out to other parts of India and acquiring additional premises to accommodate workshops

The founder was Mr Tyebjee to whose indefatigable energy and sound business acumen goes the credit for its first forty years of progress Since then it has grown from strength to strength as the management passed on from father to son for three generations Its wide miscellany of business includes general hardware railway and engineering tools ship-chandlery and many other imported or locally manufactured goods which the firm supplies on a very large scale

SHRI RAMA SILK MILLS LTD.

Manufacturers of

SILK YARN FOR ALL WEAVING REQUIREMENTS AND SILK CLOTH

Mr Narayana Rao Naik the Managing Director

THE SHRI RAMA SILK MILLS LTD has its nucleus in the Shri Rama Silk Throwing Factory established by Mr Narayan Govinda Naik in 1926

From a small beginning of 500 spindles the Factory grew to its present magnitude and is now working with 5000 spindles and employs 400 workers The Factory is equipped with the latest machinery to produce quality products The motive power for the whole plant is electricity

Weaving in silk has been introduced and every requirement in the line is met with The Factory caters to all tastes and needs Sarees bodice cloth in lace floral silk designs and borders shirtings and coatings of different patterns are being manufactured The factory s products have a big market throughout India and Ceylon At Present the factory is engaged in manufacturing silk cloth and other components required for parachutes by the War Supplies Department of the Government of India

Silk yarn of enchanting fast colours and shades from 13 to 15 ranging to 40 to 45 deniers is turned out

The concern was converted into a private Limited Company on November 29 1939 for expanding its business The capital invested is about Rs 3 lakhs

Mr Narayana Rao Naik has been the proprietor since the inception of the Company and is now its Managing Director on its conversion into a limited company

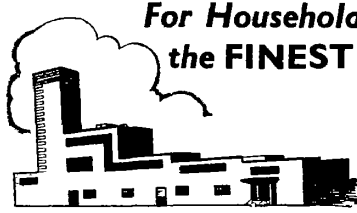
Mr Naik is a prominent businessman in Mysore State He was the President of the Mysore Chamber of Commerce for one term and continues to be a prominent member of it He went to Japan specially to study the silk industry there and the outcome of this tour was the founding of the Mysore Silk Filatures Ltd at T Narsipur Mysore District He is also the Managing Agents of the said concern He gave valuable evidence before the Indian Tariff Board which inquired into the Silk Industry

Mr Naik is the Director of the Mysore Silk Filatures Ltd Mysore Spun Silk Mills Ltd The Mysore Glass and Enamel Works Ltd and is also a prominent member of the Mysore Silk Association

Under his guidance the Shri Rama Silk Mills have grown from strength to strength and today it is the foremost silk manufacturing company in South India.

THE UNITED COFFEE SUPPLY Co., Ltd.

T STANES & Co, Ltd, (Managing Agents)



COIMBATORE

About the year 1899 T Stanes & Co commenced a business for the sale of Coffee retail and about the same time certain Planters on the Nilgiri Hills formed a Company in Coimbatore called the United Coffee Growers Co Ltd for the same purpose In the year 1908 The United Coffee Supply Co was formed for acquiring and amalgamating the retail business of T Stanes & Co and the business of the United Coffee Growers Co Ltd Soon after that date the Company commenced packing its coffee under the well known RED ENSIGN Trade Mark and this brand may be considered the most popular coffee in India During the years 1916 1917 the Company supplied large quantities of Roasted and Ground Coffee in tins for the British Troops in Mesopotamia In the year 1917 the Company acquired the Tea business of Messrs T Stanes & Co Ltd which they had worked as the Glendale Tea Agency and which they had taken from Glendale Tea Estate at their request The capital of the Company was then increased to enable it to deal with its rapidly expanding business Soon after that date the Company also commenced packing its Teas under the well known STANES ENSIGN BRANDS which have become equally well known and popular throughout India In the year 1922 owing to the increasing demand for Tea the Company purchased an interest in certain Tea Estates on the Nilgiris and now hold a large number of shares in the United Nilgiri Tea Estates Co Ltd which own several high elevation Estates producing high grown teas of which a large proportion is used in the Ensign brands supplied by this Company

A more recent extension has been the purchase in 1935 of the Business and Coffee Estates of Messrs Bayly & Brock Ltd who has been retailing tea and coffee under the Shell Brand mark for many years A few years ago the Company found it necessary to erect a modern Tea Factory at Kotagiri to cope with the increasing demand for Stanes Teas

In recent years the Cashewnuts trade showed rapid developments and exports of this commodity have increased annually but unfortunately due to the War progress is likely to be retarded In 1938 the Company secured a fairly large holding of shares in the Indian Cashewnuts & Plantations Ltd a Company formed to meet the increasing demand for Cashewnuts both in this country and abroad Stanes Cashewnuts raw and roasted and salted have rapidly gained popularity in India and the United Coffee Supply Co Ltd should be congratulated on its enterprise in this new line

The Founder of the Company Sir Robert Stanes Kt arrived in India in 1858 and may be said to have made the town and name of Coimbatore and Stanes famous throughout India After 78 years of useful and benevolent work in India he died at Coonoor on the 6th September 1936 at the age of 95—a record which can be equalled by few

TATAPURAM COCHIN STATE

TATA OIL MILLS CO., LTD.,

TATAPURAM & BOMBAY

A. V. THOMAS & COMPANY, LIMITED

(*Incorporated in Travancore*)

Head Office ALLEPPEY, SOUTH INDIA

Mr A V Thomas
Managing Director

Founded by a well known Planter and Business man of South India Mr A V Thomas with six other leading men of Business on January 14th 1935

The beginning was modest but the Company made rapid progress from the very commencement and continued to maintain steady development It holds a unique position in South India and manages eight prominent Plantation Companies The Coorg Rubber Co Ltd, The Fringford Estates Ltd The Highland Produce Co Ltd The High Range Cardamom Co Ltd The Kalpetta Estates Ltd The Midland Rubber and Produce Co Ltd The Rajagiri Rubber & Produce Co Ltd and The Velliamattam Rubber Co Ltd with a paid up Capital exceeding rupees 38 lakhs and controlling about 2 600 acres of Tea 5 900 acres of Rubber and 1 600 acres of Cardamoms Coffee etc

Realising that the future of the Country depends upon Industrial development alongside Agricultural development the Company extended its activities in this direction and has under its managing agency, the reputed firm of Ship builders and Engineers Messrs Brunton & Co Engineers Ltd of Cochin The Coir Yarn & Textiles Ltd and the West Coast Chemicals & Industries Ltd of Alleppey

A recent development was the registration of an Associate Company in British India under the name of A V Thomas & Co (India), Ltd with Head Office at Madras

Situated in Alleppey the most important Commercial Town and Seaport of Travancore a progressive State ruled by a Democratic young Maharajah and close to Cochin Harbour this Company with its ramifications throughout India is pre-eminently suited to serve the Trade and Industry of this Country

TRAVANCORE INDUSTRIES

TRAVANCORE essentially an agricultural country has in the course of the last decade taken up a systematic and well-planned programme of industrialisation The Pallivasal Hydro-Electric works inaugurated in 1939 is designed to supply the cheap power indispensable for industrial development Road transport has recently been taken over by Government thus ensuring efficient and inexpensive transport facilities In the Travancore University technical and technological studies are emphasised, and a Department of Industrial Research is maintained at a maximum of efficiency Power Transport and Research have thus been co-ordinated so as to foster and accelerate industrial progress

A number of industrial concerns are being run under Government auspices **The Travancore Rubber Works, Trivandrum,** manufactures cycle tyres and tubes motor car tubes surgical tubings sheets electric standards dipped goods hoses gharry tyres etc from rubber This concern is also engaged in the manufacture of goods specially designed for war purposes The discovery of large deposits of china clay on the shores of the Ashtamudi Lake has led to the starting of the **Government Ceramic Factory at Kundara** The clay which is washed and refined there is used for the sizing of textile fabrics paper etc and it stands comparison with the finest clay available elsewhere Porcelain ware sanitary ware drainage and household stone ware electrical goods crockery fancy and artistic ware are also being manufactured there

The Travancore Sugars and Chemicals Limited, comprise three concerns a sugar factory at Thuckalay which refines jaggery produced in the State; a distillery at Nagercoil for manufacturing alcohol and a factory at Trivandrum for the manufacture of pharmaceutical pro

ducts From the soft timber available in the State in large quantities wooden toys of exquisite workmanship are turned out in the **Toy Factory at Trivandrum. An Aluminium Smelting Factory at Alwaye** and a **Plywood Factory at Trivandrum** are nearing completion

A Cement Factory will shortly be started the raw material to be used for the purpose being lime which is available in abundance in the coastal lakes and is a pure form of calcium carbonate

A scheme for developing the **Fishing Industry** by the introduction of modern methods and instruments of fishing and improved methods of export is being worked out The State is also exploring the possibilities of developing **subsidiary industries,** of which one of the first fruits is the manufacture of shark liver oil which has proved to be a useful substitute for cod liver oil

There are several industrial concerns conducted by private enterprise which bear witness to the liberal policy of the State In the **Coir Factories** at Alleppey and Shertallai are manufactured mats matting rugs druggets cables etc from cocoanut fibre The **mineral companies** at Manavalakurichi and Chavara extract rare mineral sands like monazite ilmenite zircon sillimanite rutile etc from the littoral sands Eetta a kind of reed which grows profusely in the Travancore forests is being utilised for the manufacture of paper in the **Punalur Paper Mills.** In Quilon and Alwaye are large **Tile-Works** for the manufacture of roofing and floor tiles and bricks from inferior varieties of clay There are over fifty **cashewnut factories** in Quilon and neighbouring places providing employment to two hundred thousand people The kernels of the nuts of the cashew tree (anacordium occidentale) which is grown widely in the wastelands and hillocks are roasted and shelled there and packed for export **The collection and export of cocoanut shell charcoal** is a new industry which has sprung up as a consequence of the War the material being used in the making of gas masks The **Salt Factories** in South Travancore numbering about sixteen make the State self-sufficient in respect of salt supply The High Ranges are the home of **Tea Plantations,** and tea to the value of two crores of rupees is exported every year

Apart from these large scale industries a large number of **cottage industries** are being run in thousands of homes in different parts of the State Among them may be mentioned the **making of copra** and the **expression of oil** therefrom **the making of jaggery,** and the **distillation of oil from lemon grass ;** the **spinning of coir yarn,** the **making of screw-pine mats, handloom weaving, embroidery and lace making ; ivory carving and kuftgari work ;** and the manufacture of leather goods.

The name that stands for " Quality "

The Brand that guarantees " Excellence "

The symbol of " Perfect Products "

The Trade mark that is universally known to all sportsmen

The House of Uberoi Ltd Sialkot (India) needs no introduction to the Sporting Public In fact its very name has become so synonymous with Sports that it has now become a household word wherever games or sports of any kind are indulged in

The Founder of the Sports Goods Industry in India was the late Sardar Ganda Singh Uberoi who founded Uberoi Ltd in 1888

LARGEST IN THE EAST

The largest power driven modern factory in India and the East for the manufacture of Sports Goods the works of Uberoi Ltd cover over six acres of land and comprise one of the largest groups of buildings of their type employing over 600 skilled craftsmen under expert supervision besides providing labour to thousands of workmen outside the factory for making and supplying War Material to the War Supply Board

The workshops possess special Departments for forging and general metal work spinning timber conversion bending turning leather working net making gut string manufacture stringing and finishing A feature of the factory is the repairs section

FAMOUS PRODUCTS

The goods produced by this firm command enormous sales in this country and a demand has been created from all parts of the world to which large quantities are exported

They are patentees of several models of footballs designed to ensure a perfect and waterproof ball The Entirent and Aerofier tennis rackets the Fibo-Sleeve Polo stick the Spinalpropeller Hockey Stick the Meteor cricket ball their Klimatik tennis gut string (a perfect tropical gut string that stands the most trying conditions and which does not slack) the wrought T tennis post and the Kompakt tennis bat press are all notable and unique improvements Catalogues of sports gear and details of these improvements will be forwarded post free on application There is a lot of very useful and really interesting information to be had in their literature

A UNIQUE DISTINCTION

This firm has had the unique distinction of being favoured by the All India Olympic Hockey Team and the All India Military Hockey Team who selected Uberoi products for their equipment on their English and Continental tours and also on the New Zealand tour

WAR WORK

Besides meeting the greatly increased demand for their products in India and abroad the Company is now busily engaged in manufacturing and supplying to the Government huge quantities of war materials and other implements

BRIGHT PROSPECTS

Mr Hardev Singh Uberoi the present Chairman and Managing Director of the Company took over control of the business in 1938 on the death of his father who founded the firm He was the Chief Executive Officer of the firm for over 20 years and gained practical experience in the manufacturing and executive side of the business The Company is now making rapid strides towards progress and prosperity beating all previous records It has at present more than 20 branch offices covering India and Burma an office in London and agencies all over the world Many improvements have been made in the organisation and all orders large and small are executed promptly without any delay

Pilot Officer Desmond Vernon, R A F V R

VERNON &

36, 2nd Line Beach,

In the year 1930 Desmond Vernon an energetic and enterprising Irishman who had previous business experience in the City and Singapore severed his connection with one of the larger Madras firms and started business on his own very much a one man show as he opened a one room office with one clerk one typist one storekeeper and one peon His first venture was the establishment of trade with South Africa in Natal coal and oranges Despite attempts to freeze him out he held his own and on securing the Philips agency early in 1931 cabled home for his old friend and associate Ian Cumming to join him Since then the firm has made progress by leaps and bounds and a third member was added towards the end of 1938 in the person of J Hills who had also previously been in Madras but his participation was short lived as he joined the R A F V R in the first batch in November 1939 In 1940 Mr Vernon flew home to recuperate after enteric and on his return joined the R A F V R in December when he proceeded overseas immediately and has seen service in all the Middle East campaigns In the meantime the firm is carried on by Colonel Cumming who commands the Southern Provinces Mounted Rifles and Mrs Cummmg, ably assisted by an Indian staff of 50

Since its inception the firm s policy has been not to endeavour to compete in well established lines but to look for something new and if possible non-competitive which can be developed by energy and intelligence The success of the Natal orange venture resulted in the establishment of a trade with South Africa in fresh fruit which was carried in refrigerated space and stored in a cold chamber which the firm constructed specially on their premises They were then appointed agents for the South African Co-operative Deciduous Fruit Exchange Ltd and the trade subsequently extended to Rhodesia Jaffa, Australia Tasmania New Zealand and North India, but its scope has

COMPANY

Post Box 79, Madras

Lt Col Ian Cumming
E D A D C

naturally been curtailed by war time shipping restrictions In 1934 a subsidiary company was floated The Indian Mutual Sales Corporation Ltd for the retail distribution of fruit direct to consumers but owing to the difficulty of securing employees of suitable calibre had eventually to be wound up

Radio was then in its infancy and its potentialities were quickly realised The Philips agency proved a most important one and was later followed by Mullard Invicta Paillard and Ultra and negotiations are now in progress with American manufacturers Under this department comes the Hammond Electric Organ with its revolutionary principles which has swept the States and Britain and is now installed in most of the larger churches in India and Burma During this period gas discharge lighting made its first appearance with Philips as the pioneers and this provided another field which has been extensively exploited for municipal and industrial lighting Examples of non-competitive activities which have now been developed and highly organized are The Performing Right Society Ltd Automatic Machine Co (India) Ltd and Eastern Scales Ltd

The development of indigenous industries was another essential part of the firm s policy and its agencies include Philips lamps (made in Calcutta) Indian Smelting & Refining Co Ltd (non ferrous metals alloys etc manufactured in Bombay) Gwalior Potteries Ltd Andhra Provincial Potteries Ltd etc Indian granite had been shipped to England mainly for kerbstones but it had been shown that polished granite memorials could be satisfactorily turned out in this country and when Italy entered the War this trade was developed Complete polishing machinery was imported from home and the services of a specialist had been obtained, when import restrictions were instituted

Head Office Building Madras

in U K and the project had to be temporarily shelved The increasing anti-malarial measures carried out by Government and public bodies in South India offered additional scope and a campaign was instituted for the introduction of Pyrocide 20 (standardised extract of pyrethrum flowers) which met with considerable success with the result that this insecticide is now used almost exclusively throughout South India and the Native States A further development was the manufacture and introduction of Pip a ready to spray insecticide with a Pyrocide 20 base

Other branches of the firm s activities are Dunlop sports goods Insurance in all its branches (agencies being held for General Accident Fire & Life Assurance Corporation Ltd Eastern Insurance Co Ltd New Zealand Insurance Co Ltd Norwich Union Life Insurance Society Manufacturers Life Insurance Co British Bloodstock Agency etc.) On the import side are fans and motors, pine oil etc from U S A electrical accessories from Hongkong Buchu leaves from South Africa, toilet goods (Cussons) tinned milk (Wilts United Dairies) grinding wheels, etc from Great Britain. The firm also acts as Madras Branch for Hardcastle Waud & Co Ltd., Bombay with a very large business in specialised lubricants heat treatment products paints paper and engineering sundries of all descriptions and conducts business in clearing and forwarding and coal In 1938 an Enquire Within service was started which has proved of considerable value to upcountry customers This consists of the furnishing of information entirely free of charge on an infinite variety of subjects and the purchase on commission of any requirement

Despite the War expansion continues uninterrupted and fresh agencies are being taken up, preferably for indigenous manufactures

THE UNIVERSAL FIRE & GENERAL INSURANCE Co. Ltd.

THE year 1919 was a remarkable year in the annals of Indian Insurance In that year Indian enterprise turned to the promotion of companies for under writing Fire Accident and Marine Insurance The Universal owes its inception to the pioneering spirit of the late Seth Motilal Kanji the late Seth Varajdas Bhaidas and the late Mr Keshavlal H Setalvad whose promotion of the Universal was a mile stone in the onward march of Indian commercial—enterprise

Diwan Bahadur K M Jhaveri

Progress of the Universal.—The company was incorporated on 8 9 1919 It commenced writing Fire Insurance on 7 1 20 Marine Insurance in 1921 and Motor Insurance in 1924

Salomon Volkart

THE FIRM OF

FOUNDED

THE Firm of Volkart Bros was founded in Switzerland and India in 1851 by Salomon Volkart and Joh George Volkart brothers of an old established Swiss family

In starting this business the underlying idea was to establish direct commercial relations between India and the Continent of Europe This had become possible only two years previously by the Repeal in 1849 of the British Act of Navigation This was an Act which prohibited the transport by Sea from British Possessions by any other than British ships and further provided that the first European Port entered by such vessels should be British Volkart Brothers were thus practically the first to establish direct trade relations between India and the Continent of Europe and thereby opened up a new era in India s trade relations with the rest of the world

FIRST OFFICE IN INDIA.

Their first Office in India was opened in Bombay in 1851 it is still in the days of the old East India Company Joh George Volkart was in charge of it till 1863 when he died He was buried in Bombay The firm s business gradually expanded and other Branch Houses were opened in Colombo Ceylon (1857) Cochin Malabar Coast (1859) Karachi Sind (1861), etc etc In 1868 an Office was also opened in London and from that date the firm has been participating in the export trade of India to the U K and the import trade from the U K

Business at the outset was confined to the export of Raw Cotton to Europe and the import of manufactured goods to India Later on the export of Coconut Oil, Coffee, Cinnamon, Pepper and other Indian Produce was taken up Cotton Ginning—and Pressing—Factories were started and later on also Pressing—Factories for Coir yarn Curing Works for Coffee and recently the firm also acquired Coffee Estates

VOLKART BROS.

IN 1851

Joh George Volkart

IMPORTANT EVENTS

As interesting incidents during the long career of the firm may be mentioned the opening of telegraphic communications between Europe and Bombay in 1865 which revolutionized communications between India and Europe and the opening of the Suez Canal in 1869 which made the long route round the Cape unnecessary

During all these years the firm s business was also affected by several Wars of which the most important ones were the American Civil War the Franco German War the World War 1914 1918 and now the present World War Fortunately the firm is still continuing its progressive career

In the course of time the firm also went into the Insurance Business (Fire Accident Marine and Life) in which line they represent a number of leading Companies They also took up the representation of Ship ping Companies trading with India And a few years ago they also obtained the representation of international Air Lines

In their Import business they gradually adapted themselves to the changing requirements of this country

When the industrialisation of India gathered momentum Volkart Brothers took up the representation of leading Manufacturers of Electrical Mechanical Textile and Agricultural Machinery and Stores and recently also of Refrigeration and Air conditioning Equipment They also import Dyes Chemicals and Pharmaceuticals and a large number of other articles required by modern India

All lines are handled by Experts who have made it their career to give the best possible service These developments show that the firm s activities have continuously been adapted to the changing

Volkart Bros Office in Bombay

economic tendencies in India and it is the intention of the firm to follow this policy also in future and to contribute thereby to the country's economic development and prosperity

ORGANISATION OF 1700

To-day Volkart Brothers have an Organisation spreading throughout India with Branch Offices at all important Ports and Agencies at numerous inland places They have a permanent staff of over 1700 qualified Europeans and Indians apart from those temporarily employed or on daily wages Their Imports come from a variety of countries and their Exports from India go to all the five Continents of the World These Exports include now no longer only Raw Produce but also finished articles such as Textiles to Australia and South Africa which illustrates the most recent development in India's industry

Outside India and Europe Volkart Brothers Organisation has spread to China Japan North America South America, etc In the two first mentioned countries business has been suspended for the time being owing to the War

THE PARTNERS

The firm has always been a Family Concern The present Partners are George Reinhart and Werner Reinhart (residing in Switzerland) both grand sons of Salomon Volkart founder of the firm and Peter Reinhart (residing in New York) a great grandson of the founder A brother of the latter is at present in India, undergoing a training in the various lines handled by the firm

The Govt. U.P. Handicrafts

In the United Provinces there are twenty times as many cottage workers as factory hands The handicrafts of the U P are now famous not only in India but in many parts of the world thanks to Government s powerful aid in developing new markets

EARLY EFFORTS

The first permanent sales arrangement by the U P Government was about 40 years ago and took the shape of putting up for sale specimens of better handicrafts at the Provincial Museum Lucknow The next attempt was made in 1915 when Village Industries was started at Cawnpore and out of this institution has developed the present Central Marketing Organisation—The Govt U P Handicrafts In order to help the craftsman and supply him with new ideas and designs the institution was attached to the School of Arts & Crafts in 1919

HANDLOOM TEXTILES

In 1935 a new department for textiles was opened to aid handloom weaving Four years later the Handloom and the Arts & Crafts Departments were amalgamated to form The Govt U P Handicrafts Its main objects are to supply designs organize production and distribution centres carry on propaganda and publicity both in India and abroad and assist the workers by buying their products outright for sale in places where there are no co operative societies

INTERNATIONAL EXHIBITIONS

Selections of artware and textiles have been exhibited at various international expositions including those at Wembley Lyons Budapest *Milan Toranto and the British Industries and Leipzig Fairs* The industries that have benefited considerably by these exhibitions among others may be mentioned Calico Printing Benares Brocades Cotton Textiles and Moradabad Brassware Not only have these industries received tremendous publicity in Europe but have increased their overseas business

TECHNICAL IMPROVEMENTS

" The Govt U P Handicrafts is responsible for the improvements in design and finish of Moradabad Brassware Ivory carving has also increased its scope with the help of the organisation There has been an improvement in the design and technique of Khurja Pottery too The best achievement in the Handloom Section has been the weaver s securing a pride of place among the world s textile workers He now produces everything from suitings to furnishing fabrics of distinction

In conclusion it may be said that the organisation has created an awakening among workers decreased unemployment and enabled them to hold their own even in these days of keen competition There is every promise of the organisation developing on a much larger scale in the near future

WESTERN INDIA LIFE INSURANCE COMPANY, LTD, SATARA

(Incorporated in India in 1913)

Head Office—SATARA CITY

A Review of Progress and present position

The Company was established in the year 1913 at Satara Capital of the Maratha Kings and commenced business that very year Not only was it the first Insurance Office of the Marathi speaking Districts of the Bombay Presidency but was also one of the first few pioneer Indian Insurance Companies with full Indian control Indian Capital and Indian Administration

The Company s policy schemes are both simple and attractive and premium rates charged are comparatively low That the Western India has followed its course of business with strict adherence to sound principles and tested methods has been admitted by its consulting actuary financial journals such as Indian Finance and Capital of Calcutta and by great Indian industrial and commercial leaders like Sir M Visvesvaraya Sir Homi Metha Mr G D Birla and Mr Gowar dhandas Morarji

The Company has maintained very rigidly its traditions of economy sound investments and stability as the following figures as at the end of 1941 will show —

Total Business in Force exceeds	Rs	5 34 00 000
Total Assets		1 66 73 586
Annual Income	,	31 60 430
Life and Reserve Funds		1 50 71 339
Cost Price of Investments		1 33 31 919
Market Value of Investments		1 48 39 051
Resulting Hidden Reserves		15 07 131
Reserves shown in the Balance Sheet		3 96 707

Mr W G Chirmule President

Dividend to shareholders—10%

Expense Ratio 21 41 one of the lowest in the Country

Triennial Bonus Per Thousand

Endowment—Rs 54

Whole Life—Rs 67½

Maximum in the Country

Although the Company has its Head Office at a wayside town in the Presidency the organisation of the Company has spread over all the Provinces of India and the Company has been securing a large business from outside Bombay Presidency It has amongst its organisers some very highly educated young men from different provinces It has branches at Poona Bombay Nagpur

Ahmedabad Karachi Lahore Delhi and Calcutta Organising offices at Indore Nasik Kolhapur Sholapur and Belgaum and Chief Agencies at Ellore Baroda and B E Africa And even during the war the Company has maintained its progress The total paid for business at the end of 1941 is Rs 68 72 648 which is even a little in excess over last year s business figure and its expense ratio for that year is expected to be still further reduced which viewed along with its reserves and bonuses and dividends to Shareholders makes a record in the history of Indian Life Insurance and has no equal not only among companies of the age of Western India but even amongst almost all other Companies

Western India House Bombay

Sir M Visvesvaraya wrote in his foreword of 24th January 1939 to the Silver Jubilee Souvenir of the Company as follows —

This is a commercial undertaking which the leading citizens of Satara have made a notable success It will be difficult for the present generation in India when more than two hundred Indian Life Offices are actually functioning to visualise the value of the pioneering work done by this Company and by its president Mr W G Chirmule in particular in the days when the Indian mind was suspicious and even opposed to the very idea of Insurance

The success of the Company and its present position are worthy of all praise They are claimed by the promoters as a contribution towards the reorientation of the economic life of the people of the Deccan What has pleased me most in all the history of this Company is the spirit of service and sacrifice and the tradition of selfless patriotism which has characterised the efforts of many of the pioneers and leading men who have directed its affairs I wish to associate myself with the hope that Western India may prove a model to Life Offices generally in this Country

And again while presiding over the Silver Jubilee celebration of the Company on 26th February 1939 Sir M Visvesvaraya paid the following tribute to the Company

My inquiries go to show that the administration of the affairs of the Company is conducted with great caution and no relaxation of sound principles or practices is tolerated in the eagerness to attract business I understand too that the expenses of the management are low that lapses are few and that while adhering to a stringent valuation basis the Company has maintained profits at a high level The satisfactory financial results the Company is able to show in these days of cheap money is an evidence that its investments are carefully selected

Head Office Winchester House Old Broad Street London and at Metal Exchange

The Company was established as a Partnership Concern in 1880 and comprised Messrs J Gray Buchanan, Stewart Barry and R Russell Walker Originally Mr Bonar Law later to become the Prime Minister of Great Britain was also a Partner

In its early trading the Company dealt mainly in Metals and Rubber They were very large Dealers in Pig Iron and gradually became a great force in the Metal Market of London Their export trade was carried on throughout India Burma and China with various connections in Egypt Europe and North and South America

In those days the Home trade was the main concern of the Company but in the gradual development of its 60 odd years existence Branches have appeared at various points in the East and Far East. At the beginning of this century in view of the large volume of business which it had developed in India the Company decided that the time was ripe for opening Offices of its own Consequently a representative was sent out to study the possibilities and shortly afterwards William Jacks & Co opened its first branch in India in Bombay This was a small office in Medows Street close to where our present Show Room stands The staff consisted of one European 2 clerks and a peon Within a year or two however this staff was found inadequate and had to be considerably increased Shortly afterwards in view of the volume of business being put through in Bombay it was decided to open a similar branch in Calcutta which started very much on the same lines

The main business done by these small branches was in connection with the sale of Hall Distemper and Expanded Metal Both of these products were new to the Indian market and a considerable amount of spadework was necessary As the scope of the business increased it was found that the original premises was much too small and the office was moved to Waudby Road where another assistant was found necessary At the same time reciprocal agreements with the firms to whom the Company was making large supplies of basic material etc in England gave them additional agencies to handle

From this point the firm's interests in India rapidly developed It was found necessary to augment the office staff and to increase the number of European employees. The firm at this stage was however an entirely mercantile concern and had not interested itself in Engineering to any extent but about 25 years ago in view of the rapidly increasing industrial development in India the Company decided to interest itself in Engineering To do this it had to engage qualified Engineers for its staff

The firm pioneered into India among other things the Caterpillar Tractor and Electrode Steam Boiler, but also interested itself in the importation of Asbestos Cement Products in the form of Sheets, Pipes, etc. and rapidly built a name in the building trade as suppliers

Jacks Built . . .

of all kinds of building products The engineering business developed on parallel lines and the Company now regards itself justifiably as one of the leading Specialist Engineering concern in this country having on its staff in India qualified Electrical Mechanical and Agricultural Engineers

During this period branches were opened up in Karachi Lahore Madras and in Rangoon. Subsequently in Delhi and in Quetta

For many years the Karachi Office has been prominent in connection with the export of wool from that port

A few years ago the firm decided to take an interest in the Machine Tool business and now represent the Craven group of Manufacturers of all classes of Machine Tools Their supplies are now mostly confined to Government undertakings

The Company has also interested itself in Industrial enterprise in this country For instance up to the commencement of this war our Associated Co The Crittall Mfg Co (India) Ltd was the leading importers of Metal Windows but owing to the severe export conditions from Great Britain the firm decided to manufacture windows in India. For this purpose it formed a new Company known as William Jacks & Co (Manufacturers) Ltd and built a Works in Karachi in order to locally manufacture windows The venture has been most successful from the outset

The firm is also financially interested in Messrs J C Gammon Ltd one of the leading concrete Engineering Concerns in India and in Messrs Carstairs & Cumming Karachi a Structural Engineering Concern

Prior to the declaration of war there was an establishment of 7 Covenanted European Assistants as well as a number of European trained Indian Officers in Bombay a like number in Calcutta and lesser numbers in the other Branches The bulk of the European Assistants are now serving in His Majesty s Forces

It has always been the policy of the Directors in London to arrange for training of Assistants before proceeding to India and it is an accepted understanding with all assistants when proceeding on leave to Europe that they will take refresher courses in Principal Works This has been found to keep the knowledge of the staff up to-date Members of our staff regularly visit Works in Great Britain and in America so as to keep in touch with the latest developments This policy has been found to pay itself very well

The grand old man of the Company Mr J Gray Buchanan has been for many years a leading member of the London Chamber of Commerce He is the Chairman of Directors of the Company and has for many years been the guiding hand at the helm Mr Buchanan was educated at Glasgow High School in Scotland and joined the then young firm of William Jacks & Co Later the Company moved its Head Office to London to begin its great career as leaders in the Metal and Export world He can now look back upon 54 years association with William Jacks & Co He is a Director of the Expanded Metal Co G M Callender & Co and a Member of the Institute of Structural Engineers Apart from these activities he has been a very prominent member of the London Metal Exchange His Foresight Saga published every week giving Metal Market forecasts has always been much sought after by metal merchants

Mr R Russell Walker, the Managing Director of the Company is largely responsible for the development of its Eastern ramifications and is in control of the entire export side of the business. Needless to say his shrewd knowledge of foreign markets has been invaluable in opening new branches as and when it was decided that these were necessary Mr Walker was educated in Allen Glen s School Glasgow

Mr W G Buchanan who is the son of Mr J G Buchanan spent 6 years in Singapore with the Associated Company William Jacks & Co (Malaya) Ltd before returning to settle down in London

Mr J C Gammon is the very well known authority on concrete engineering Mr Gammon is also a Director and Founder of J C Gammon Ltd and Gammon (Malaya) Ltd. both of which Companies are very well known in their respective areas as Reinforced Concrete Specialists

Recently we regretted to announce the death of Mr Stewart Barry one of the early Partners of the Company Mr Barry was a specialist in Metals and was largely responsible for the firm s amazing expansion in this branch of its business His activities were confined almost exclusively to the Home trade of the Company

In the year 1909 Mr J W Jessop was appointed in London to proceed to Bombay as an Assistant in the then small office at Meadows Street Mr Jessop came straight from Haileybury College to India being probably the youngest Assistant ever appointed to the firm. He has been closely associated with our Directors in the expansion of the Company in India and Burmah and may be said to be largely responsible for its phenomenal growth in this country It is to a large extent due to his foresight that instead of continuing our more or less non technical business of importing paints etc we embarked on the more specialised engineering and building trades and these ventures on his part have been more than fully justified He has for many years been Senior Manager and is well known through out India He takes a leading part in commercial affairs in Bombay and is a Justice of the Peace Among his other activities he is the Managing Director of the Crittall Mfg Co (India) Ltd Director of J C Gammon Ltd and Chairman of Directors of Messrs William Jacks & Co (Manufacturers) Ltd

In 1938 the Partnership was turned into a Limited Liability Co in order to control its very considerable holdings in India and the Far East It has financial interests in many important Eastern concerns but its policy has always been to allow complete freedom in action to its various Branches throughout the world

In spite of its huge export business the Company have always specialised in the Metal Market even to this day and by dint of hard work and efficiency the Company in London are the Sales Organization for the huge Indian Metal interest represented by Messrs Burn & Co

The standing of William Jacks & Co is reflected by the class of Manufacturers who have placed their faith in our ability to handle their goods It is not possible to mention the names of all these Companies here but such concerns as those mentioned below speak for themselves

Thos Firth & John Brown Ltd Firth Vickers Stainless Steels Ltd Crittall Mfg Co Ltd Cleveland Tractor Co U S A Carborundum Co Ltd J Samuel White & Co Ltd. Winget Ltd Laurence Scott & Electromotors Ltd Brush Electrical Engineering Co Ltd The Paraffine Cos U S A Ransomes Sims & Jefferies Ltd Sissons Bros & Co Ltd Petters Ltd Consolidated Pneumatic Tool Co Ltd Bastian & Allen Ltd

We should also mention that the Company in India are the Secretaries for the Consolidated Pneumatic Tool Co Ltd who are probably the largest importers of compressed air machinery in this country

The war which has now developed in the Far East has to a considerable extent affected our undertaking in that territory Within a short space of a month we lost contact with our Offices in Shanghai Hongkong Penang Taiping Ipoh Teluk Anson and Kuala Lumpur

Our Malayan business naturally specialises in the export of Rubber and Tin It has also been interested in a large number of enterprises in Malaya and has been for many years agents for the Government of Brunei Though actually in a separate concern our Far Eastern Associates developed in the same way and along the same lines as we have in India

The franchise which our London office holds for so many different manufactures in Britain and America extends in most cases to India Burma Ceylon Malaya and China

This huge undertaking has been solely built up as a result of many years forethought and care It has suffered some setbacks but has overcome them one by one We are confident that those which it meets during the present troublous times will be overcome

It is no empty compliment therefore that we pay to the three original Partners who extended energy and money in the Company s great development in the 60 odd years of its existence

THE WOLVERHAMPTON WORKS Co., LTD.,

BOMBAY

Mr W M Martin

THE common heavy metals have been known since antiquity, but the light metals are a product of the last century The Wolverhampton Works Co Ltd , are the pioneers in India of the use of aluminium the commonest of the light metals Started in 1896, by Walter N Cresswell, the Company was the first to produce utensils made from aluminium imported from England They were expensive and looked upon with suspicion To day the Wolverhampton Works is one of the largest producers of, not only utensils, but spinnings and die and sand castings covering many hundreds of the uses to which aluminium is put

Aluminium has become a serious competitor of the more well-known metal, brass, and has many advantages over that metal, which renders it more suitable for many purposes

The Wolverhampton Works has its factory at Worli, employing some 250 men, with its office at the Bank of Baroda Building, Apollo Street It is closely connected with the British Aluminium Co , Ltd of England from whom most of its aluminium is obtained Overhead conductor, sheet, ingot, wire, powder, sections and foil are a few of the aluminium products in which a large business is done The present Manager is Mr W M Martin, M Inst , Met , J P

INDEX.

—Every effort has been made to give a comprehensive Index to the information given in the Year Book, and it is hoped that it will facilitate easy reference. Should, however, anyone have suggestions or criticisms to offer calculated to improve the index, they are welcome and will be carefully considered
